Kaj smo, ko smo Cvetka Lipus.2018 Working within a postmodern style, this rhythmic and melodious collection of poems originally written in Slovenian by Cvetka Lipus and translated here by Tom Priestly, blends the real with the surreal, dull urban lives with dreams. Lipus, known for the lexical beauty of her work, dwells on topics of time and space which she handles in an almost revolving, irreverent manner. Priestly captures the maze-like characteristic of her verse and carefully reconstructs the sonic beauty of the work in its original language.

Alchemist's Handbook Frater Albertus.1987-01-15 Formerly handed down under oath of secrecy, this clear, concise handbook discusses: the fundamental principles of alchemy; directions for the formation of an inexpensive home laboratory, with illustrations of the necessary equipment; step-by-step instructions for the work of the Lesser Circulation, the alchemical transformation within the plant kingdom?the necessary prerequisite for any work in the mineral kingdom.

So What's New About Scholasticism? Rajesh Heynicks, Stéphane Symons.2018-07-09 In So What's New about Scholasticism? thirteen international scholars gauge the extraordinary impact of a religiously inspired conceptual framework in a modern society. The essays that are brought together in this volume reveal that Neo-Thomism became part of contingent social contexts and varying intellectual domains. Rather than an ecclesiastic project of like-minded believers, Neo-Thomism was put into place as a source of inspiration for various concepts of modernization and progress. This volume reconstructs how Neo-Thomism sought to resolve disparities, annul contradictions and reconcile incongruent, new developments. It asks the question why Neo-Thomist ideas and arguments were put into play and how they were transferred across various scientific disciplines and artistic media, growing into one of the most influential master-narratives of the twentieth century. Edward Baring, Dries Bosschaert, James Chappel, Adi Efal-Lautenschläger, Rajesh Heynicks, Sigrid Leyssen, Christopher Morrissey, Annette Mülberger, Jaume Navarro, Herman Paul, Karim Schelkens, Wim Weymans and John Carter Wood reconstruct a bewildering, yet decipherable thought-structure that has left a deep mark on twentieth century politics, philosophy, science and religion.

Ernst Jünger's Philosophy of Technology Vincent Blok.2017-04-21 This book examines the work of Ernst Jünger and its effect on the development of Martin Heidegger's influential philosophy of technology. Vincent Blok offers a unique treatment of Jünger's philosophy and his conception of the age of technology, in which both world and man appear in terms of their functionality and efficiency. The primary objective of Jünger's novels and essays is to make the transition from the totally mobilized world of the 20th century toward a world in which a new type of man represents the gestalt of the worker and is responsive to this new age. Blok proceeds to demonstrate Jünger's influence on Heidegger's analysis of the technological age in his later work, as well as Heidegger's conceptions of will, work and gestalt at the beginning of the 1930s. At the same time, Blok evaluates Heidegger's criticism of Jünger and provides a novel interpretation of the Jünger-Heidegger connection: that Jünger's work in fact testifies to a transformation of our relationship to language and conceptualizes the future in terms of the Anthropocene. This book, which arrives alongside several new English-language translations of Jünger's work, will interest scholars of 20th-century continental philosophy, Heidegger, and the history of philosophy of technology.

Statutenbuch des Ordens der Tempelherren. Aus einer altfranzösischen Handschrift herausgegeben und erläutert von D. F. Münter.1794

Pomona: The Future of English Basil de Sélincourt. Before discussing the future of English, one is forced, in the bustle of these scientific days, to inquire whether language itself has a future. "We are working", wrote Mr. J. B. S. Haldane, in his brilliant little essay *Daedalus*, "towards a condition when any two persons on earth will be able to be completely present to one another in not more than a twenty-fourth of a second." Is speech quick-moving enough to keep a place in such a picture? When everything else has learned the speed of lightning, will the transference of our thought be likely to lag behind and is it not a waste of time to ask if future generations will speak German, or Japanese, or Esperanto, when they may not need to speak at all? Scientific knowledge is a delightful plaything. Working with measurable quantities, it can treat the future like a ball of string to be unwound. Though life is all wonder and surprise, though the world always turns out stranger and richer than we expected, we know that the future will be linked mechanically with the present as the present is with the past. The machinery of human existence fifty years hence will be the practical application of possibilities known to-day. There is basis, then, for a certain kind of scientific prediction. The future of language is in a different case, because the mechanical element in it is subsidiary. It is conjecturable, of course, that it may one day be superseded, that men may learn to transfuse their meanings by a kind of controlled telepathy, mind meeting mind. But to do this they would need to be able to think without words, and language, as we now know it, is not for communication only: it is the very framework of our thought. It is part of our lives; and what our lives are to be we can tell only by living them. A good deal has been learned of late about the evolution of language—enough to modify very much our views as to the influences that really count, the habits which conduce to accuracy or to vitality. But there is a long way between understanding after the event and understanding before it. It is with the different languages of the world as with the different species of animals: once they have come into being, one easily sees which way they came, one cannot see in the least which way they are going. Of all whom change awaits, man seems likely to change most and most quickly. Whole nations are stirred to hope and restlessness. Never did the future beckon more enticingly than it does now. Science lays a finger upon the springs of life and dreams of a race to be made perfect, not by the murderous processes of haphazard struggle, but by the swift and decisive elaboration of a conscious design. The man of the future, we hear, may differ as much from ourselves as we do from monkeys. Inventive eugenics, new as motor-cars, is to inaugurate a still more drastic revolution and make of us, in the near future, whatever we may wish to be.

Problems of Mysticism and Its Symbolism Herbert Silberer.1917

Everyday Enlightenment Sally Bongers.2008-07-25 Sally Bongers, the distinguished Australian cinematographer, compiled these interviews while researching subjects for a documentary film on Enlightenment. Initially she sought out established spiritual teachers, but her emphasis changed to interviewing ordinary people who had experienced a shift of perception which, in the Eastern tradition, would be called Enlightenment or Liberation. She found men and women who still live their lives much as they had done before the realization, working and living in the everyday world. Seven of their stories were chosen for this book. Hearing these people talk about living with this understanding in the real world (not in an ice-cave somewhere!) confirmed the closeness of it all. These stories make it clear that Enlightenment can "happen" to anyone, regardless of so-called spiritual qualifications.

Poems of Tenderness Gabrielle von Bernstorff-Nahat.2020-03-25 These poems have been composed during the early weeks of the Corona Pandemic. During times of physical distancing mental, spiritual and heartfelt closeness are all the more important. May these humble poems provide closeness in times of isolation. May they provide solace at a time when the existence of millions of human beings are on the line. Gabrielle von Bernstorff-Nahat is a writer, artist and architect. She has lived in the United States, in the Middle East, India and Germany. She currently lives in Switzerland.

Making Sense of Modern Times James Davison Hunter, Stephen C Ainsley. 2024-04 Peter Berger (1929-2017) was one of the pre-eminent sociologists of the twentieth century. First published in 1986 this title shows how Peter Berger struggled with the classical legacy of the sociological enterprise - a legacy abandoned by contemporary sociology. Berger made a self-conscious effort to recover this vision.

The Campaign of the Marne, 1914 (Classic Reprint) Sewall Tyng. 2017-11-16 Excerpt from *The Campaign of the Marne, 1914* In the following narrative, an attempt has been made to adhere, so far as possible, to matters of military interest and to avoid the fields of political and economic history, despite their necessarily close relationship. Religion in Sociological Perspective Bryan R. Wilson. 1982 In this book, based on lectures that the author was invited to deliver in Japan, Bryan Wilson traces the dominant contours of religion as perceived by the sociologist. His themes range from the study of sectarianism, on which he is one of the relationship between religion and culture in modern societies of the West and the East.

Peoples of the World Mirella Ferrera. 2006 Whether white, black, red or yellow, whatever religion or language, whether city dwellers or country folk, sedentary or nomadic, rich or poor, the peoples of the world are the creators of such diverse civilizations that even researchers have not yet fully mapped them. To document the beauty and richness of this heritage and to celebrate the variety of human types and cultures, the volume *Peoples of the World* presents a narrative supported by splendid photographs to describe the Earth's most anthropologically interesting ethnic groups. They range from the Maori to the Rom, from the Maasai to the Inuit, demonstrating the diversity of humankind.

Galen: Works on Human Nature: Volume 1, Mixtures (De Temperamentis) .2018-12-31 *Mixtures* is of central importance for Galen's views on the human body. It presents his influential typology of the human organism according to nine mixtures (or 'temperaments') of hot, cold, dry and wet. It also develops Galen's ideal of the 'well-tempered' person, whose perfect balance ensures excellent performance both physically and psychologically. *Mixtures* teaches the aspiring doctor how to assess the patient's mixture by training one's sense of touch and by a sophisticated use of diagnostic indicators. It presents a therapeutic regime based on the interaction between foods, drinks, drugs and the body's mixture. *Mixtures* is a work of natural philosophy as well as medicine. It acknowledges Aristotle's profound influence whilst engaging with Hippocratic ideas on health and nutrition, and with Stoic, Pneumatist and Peripatetic physics. It appears here in a new translation, with generous annotation, introduction and glossaries elucidating the argument and setting the work in its intellectual context.

Vandal Love Deni Ellis Bechar. 2012-05-15 An astonishing novel of epic ambition, *Vandal Love*—winner of the prestigious Commonwealth Writers' Prize for best first book in 2007—follows generations of a unique French-Canadian family across North America and through the twentieth century. A family curse—a genetic trick resulting from centuries of hardship—causes the Hervé children to be born either giants or runts. Book One follows the giants' line, exploring Jude Hervé's career as a boxer in Georgia and Louisiana in the 1960s, his escape from that brutal life alone with his baby daughter Isa, and her eventual decision to enter into a strange, chaste marriage with a much older man. Book Two traces a different kind of life entirely, as the runts of the family discover that their power lies in a kind of unifying love. François seeks the identity of his missing father for years, while his own son, Harvey, flees from modern society into spiritual quests. But none of the Hervés can abandon their longing for a place where they might find others like themselves. In assured and mystically powerful prose, Deni Y. Béchar tells a wide-ranging, spellbinding story of a family trying to create an identity in an unwelcoming landscape. Imbued throughout with a deep sensitivity to the physical world, *Vandal Love* is a breathtaking literary debut about the power of love to create and destroy—in our lives, and in our history.

Social Dreaming, Associative Thinking and Intensities of Affect Julian Manley. 2018-08-23 This book describes a way of sharing dreams in a group, called 'social dreaming'. It explores how the sharing of real, night time dreams, in a group, can offer information on and insight into ourselves and the worlds we live in and share. It investigates how we can turn dream images, and ideas and feelings that arise from these images, into conscious thought, before describing the ways in which these can be used. Using a background of the psychosocial combined with a philosophical lens influenced by the work of Gilles Deleuze, Julian Manley shows how social dreaming can be understood as a Deleuzian 'rhizome of affects', a web or a root design where things interconnect in a random and spontaneous fashion rather than in a sequential or linear way. He illustrates how social dreaming can link dreams together into a collage of images, and compares this to the rhizome, where clusters of emotional intensity - which emerge from the dream images - weave and interconnect with other clusters, forming a web of interlinked dream images and emotions. From the basis of this rhizome emerges an interpretation of social dreaming as a 'body without organs' and the social dreaming matrix as a 'smooth space' where meanings emerge from the way these images form connections, and come and go according to our emotions at any particular moment.

Possibility and Reality Hans Rott, Vitezslav Horák. 2003 The dialectics of possibility and reality is an old philosophical theme. In contrast to empirical sciences that deal with reality, philosophy has sometimes been viewed as the science of the possible. That said, the modal concepts of possibility and necessity have proven to be ambiguous and recalcitrant to analysis, and their relation to the concept of reality remains problematic to the present day. From Aristotle to Russell, the belief that the real world by no means exhausts the possible worlds has attracted serious thought. This work brings together a group of experts who are intent on transcending the worn-out dichotomy between analytic and continental philosophy. This collection takes a fresh look at the metaphysics and logic of possibility and reality, and illuminates them from a great variety of perspectives. Topics include the history of philosophy (from Greek antiquity to David Lewis) as well as the semantics of possible worlds; logic, mathematics, and computer science as well as literature and the new media; forms of scientific as well as fictional discourse. The basic position taken by many contributors is a commonsensical one. In ordinary language we do not seem to have any problem in making statements about future possibilities without establishing

definitive claims to their truth. In other words, one can speak of future contingencies without making claims for present-day truths. Moreover, the contributors hold that it seems quite feasible to talk of objective truth as a series of possibilities rather than empirical realities. All branches of philosophy seem to agree that to think about possibilities is an inclination of human nature. In short, the more we know about possibilities the better human beings and actions relate to reality. This is a serious effort that invokes a sense of intellectual history to explain issues that are vexing, but not insoluble. It will interest a variety of people from philosophers to social planners. Vitezslav Hork is director of the DFG-Project on Cultures of Lying. Both he and Hans Rott are affiliated with Universitt Regensburg Institut fr Philosophie, Regensburg, Germany.

Experiments in Ethics Kwame Anthony Appiah.2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of experimental philosophy, provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Walking in Your Shoes Christian Assel.2012-12-04 This book provides a therapeutic method and a tool for transformation. During a walking process it becomes possible to experience a movement, a kind of shift of consciousness and give spontaneous expression to certain aspects of the behavior, the emotional as well as mental condition, and the life issues of the person one walks. People who are being walked feel accepted and understood in unexpected ways, while those who walk themselves experience liberation from restrictive concepts and a sense of enhanced self-esteem. This book combines the most recent findings of psychotherapy with proven systemic concepts of therapeutic self-experience and provides simple solutions for deep-seated conflicts.

At the Origins of Modern Atheism Michael J. Buckley.1990-01-01 In this book, Michael J. Buckley investigates the rise of modern atheism, arguing convincingly that its roots reach back to the seventeenth century, when Catholic theologians began to call upon philosophy and science—rather than any intrinsically religious experience—to defend the existence of god. Buckley discusses in detail thinkers such as Lessius, Mersenne, Descartes, and Newton, who paved the way for the explicit atheism of Diderot and D'Holbach in the eighteenth century. The Origin of Oughtness Stefan Fischer.2018-08-06 How come we ought to do things? Current metanormative debates often suffer from the fact that authors implicitly use adequacy conditions not shared by their opponents. This leads to an unsatisfying dialectical gridlock (Chang): One author accuses her opponents of not being able to account for stuff she judges essential, but the opponents do not think this to be a major flaw. In an attempt to meet the problem of gridlock head-on, the current investigation approaches oughtness differently. I start with the introduction of a grounding framework for thinking about oughtness that allows a lucid presentation of the views on the market. It soon becomes clear that one necessary part of any plausible assessment of accounts of oughtness is a discussion of their adequacy conditions. I continue with a detailed evaluation of four different accounts, as presented by Halbig (2007), Schroeder (2007), Stemmer (2006), and Scanlon (2014). My main result is that desire-based or Humean theories of oughtness are more plausible because desire-independent accounts fail to explain something crucial: the for-me character of oughtness. Based on the insights gathered thus far, I then develop a new Humean theory – metaethical conativism – and defend it against some historically influential objections.

Anleitung Chiologie - Handlesen - Ulricke Banziger, Max Banziger.2019-04-09 Dieses Buch ist sowohl alltags- als auch bürotauglich. Mit diesem Werk halten Sie ein Buch in der Hand, dessen Inhalt vor der Veröffentlichung bisher nur unseren Studenten und Seminar-teilnehmern vorbehalten war. Das hier vermittelte Handlesen hat nicht nichts mit dem auf den Straßen und Jahrmärkten praktizierten gemeinsam. Es ist ein Bestandteil aus der Reihe der Menschen-kenntnis und dient sozusagen der Überprüfung dessen, was physiognomisch zu sehen ist und ggf. die Körpersprache aussagt. Bei jedem ist beim Gestikulieren, Handheben zum Winken und beim Handgeben ein Blick auf die Hand möglich und oft auch in die Handinnenflächen. Allein die Handform sagt einiges über den Handbesitzer aus. Max Bänziger entwickelte und lehrt diese Methode des Handlesens seit über 40 Jahren, sie hat sich somit seit vielen Jahren nicht nur etabliert, sondern auch bewährt. Wir schreiben Auf der Basis altägyptischer Weisheit, weil Max Bänziger Autodidakt in der Ägyptologie ist, er in den Bildern und Hieroglyphen in Gräbern, Tempeln und Pyramiden der Altägypter die niedergeschriebenen und in den Bildern festgehaltenen Naturgesetze erkannte und verstand. All seine Lehren beschäftigen sich mit den Gesetz-mäßig-keiten der Natur, auf der Erde und im Universum. Daher lernen Sie hier das Alphabet der Natur kennen, wie wir diese Gesetze nennen, und deren Wirkungen zum menschlichen Körperbau, somit auch in der Hand und den Handlinien. Jeder Interessierte wird durch die Bücher aus der Reihe der Menschenkenntnis im Verstehen von sich selbst und im Verstehen von anderen Menschen unterstützt.
