Righting Software Juval Löwy.2019-11-27 Right Your Software and Transform Your Career
Righting Software presents the proven, structured, and highly engineered approach to software design that renowned architect Juval Löwy has practiced and taught around the world. Although companies of every kind have successfully implemented his original design ideas across hundreds of systems, these insights have never before appeared in print. Based on first principles in software engineering and a comprehensive set of matching tools and techniques, Löwy's methodology integrates system design and project design. First, he describes the primary area where many software architects fail and shows how to decompose a system into smaller building blocks or services, based on volatility. Next, he shows how to flow an effective project design from the system design; how to accurately calculate the project duration, cost, and risk; and how to devise multiple execution options. The method and principles in Righting Software apply regardless of your project and company size, technology, platform, or industry. Löwy starts the reader on a journey that addresses the critical challenges of software development today by righting software systems and projects as well as careers—and possibly the software industry as a whole. Software professionals, architects, project leads, or managers at any stage of their career will benefit greatly from this book, which provides guidance and knowledge that would otherwise take decades and many projects to acquire. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

Bad with Money Gaby Dunn.2019-01-01 “Humorous and forthright...[Gaby] Dunn makes facing money issues seem not only palatable but possibly even fun....Dunn’s book delivers.” —Publishers Weekly The beloved writer-comedian expands on her popular podcast with an engaging and empowering financial literacy book for Millennials and Gen Z. In the first episode of her “Bad With Money” podcast, Gaby Dunn asked patrons at a coffee shop two questions: First, what’s your favorite sex position? Everyone was game to answer, even the barista. Then, she asked how much money was in their bank accounts. People were aghast. “That’s a very personal question,” they insisted. And therein lies the problem. Dunn argues that our inability to speak honestly about money is our #1 barrier to understanding it, leading us to feel alone, ashamed and anxious, which in turns makes us feel even more overwhelmed by it. In *Bad With Money*, she reveals the legitimate, systemic reasons behind our feeling of helplessness when it comes to personal finance, demystifying the many signposts on the road to getting our financial sh*t together, like how to choose an insurance plan or buy a car, sign up for a credit card or take out student loans. She speaks directly to her audience, offering advice on how to make that #freelancelife work for you, navigate money while you date, and budget without becoming a Nobel-winning economist overnight. Even a topic as notoriously dry as money becomes hilarious and engaging in the hands of Dunn, who weaves her own stories with the perspectives of various comedians, artists, students, and more, arguing that—even without selling our bodies to science or suffering the indignity of snobby thrift shop buyers—we can all start taking control of our financial futures.

Making Summer Count Jennifer Sloan McCombs,Catherine H Augustine,Heather L Schwartz.2011 Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Raising Public Awareness of Consumer Fraud in Australia Russell G. Smith,Tabor Akman.2008

As part of a global effort to fight mass-marketed consumer scams, each year consumer protection agencies in 33 western countries participate in a month of fraud prevention activities to raise awareness of the problem and to provide advice to consumers on how to avoid being victimised. In Australia and New Zealand, 19 government agencies comprise the Australasian Consumer Fraud Taskforce (ACFT), which conducted a campaign in March 2007 with the theme 'Scams target you - protect yourself'. This paper describes the activities undertaken by the ACFT and assesses the impact that the publicity had on official reporting of scams by consumers. The results of an online survey of 841 self-selected respondents are also presented. It is concluded that the campaign was highly effective in raising consumer awareness, with reporting rates increasing substantially

throughout the period of the campaign.

Handbook of Engaged Sustainability Joan Marques.2018-07-09 This handbook is based on the premise that in order for sustainability to be sustainable, a profound psychological transformation has to take place at the individual and collective level. Focusing on the practice of environmental sustainability, this handbook will explore the application of sustainability in a wide variety of contemporary contexts—from economics of consumption and growth to government policy, sustainable cities, and sustainable planet. The editors believe that the way to achieve sustainable, harmonious living in all spheres is through lived or engaged sustainability at the personal, team, and organizational levels. It is impossible to separate economic development issues from environment issues. In its most practical aspect, sustainability is about understanding the interconnections among environment, society, and economy. This book aims to provide a comprehensive overview of current theories and approaches in the area of engaged sustainability for academics, researchers and practitioners. Specifically, it will focus on making responsible decisions that will reduce humanity's negative impact on the environment. While various social and political initiatives for sustainability are welcome, one cannot really enact sustainability into legislative laws. Something has to change fundamentally at the level of a common person in the street. The Handbook of Engaged Sustainability acknowledges the classic literature, theories and principles in the area of sustainability, but also provides new theories and approaches from global scholars and practitioners in the field. It will also provide a well-structured pedagogical framework with real life case examples. The aim of this handbook is to expand the reader's thinking to one of "big-picture awareness" and a "cosmic vision" of sustainability, a vision that extends from our neighborhoods to our communities, to states, countries, globe, galaxy, and envelops the entire Universe! This book will serve as an essential resource for researchers, scholars and students of sustainability, ethics, corporate social responsibility and environmental economics, as well as consultants, business and team leaders, and anyone interested in engaged sustainability.

Neoliberalism and Global Cinema Jyotsna Kapur,Keith B. Wagner.2011-05-09 In cinema studies today, rarely do we find a direct investigation into the culture of capitalism and how it has been refracted and fabricated in global cinema production under neoliberalism. However, the current economic crisis and the subsequent Wall Street bailout in 2008 have brought about a worldwide skepticism regarding the last four decades of economic restructuring and the culture that has accompanied it. In this edited volume, an international ensemble of scholars looks at neoliberalism, both as culture and political economy, in the various cinemas of the world. In essays encompassing the cinemas of Asia, Africa, Latin America, Europe, and the United States the authors outline how the culture and subjectivities engendered by neoliberalism have been variously performed, contested, and reinforced in these cinemas. The premise of this book is that the cultural and economic logic of neoliberalism, i.e., the radical financialization and market-driven calculations, of all facets of society are symptoms best understood by Marxist theory and its analysis of the central antagonisms and contradictions of capital. Taking a variety of approaches, ranging from political economy, ideological critique, the intersection of aesthetics and politics, social history and critical-cultural theory, this volume offers a fresh, broad-based Marxist analysis of contemporary film/media. Topics include: the global albeit antagonistic nature of neoliberal culture; the search for a new aesthetic and documentary language; the contestation between labor and capital in cultural production; the political economy of hollywood, and questions of gender, sexuality, and the nation state in relation to neoliberalism.

Things Fall Apart Chinua Achebe.1994-09-01 "A true classic of world literature . . . A masterpiece that has inspired generations of writers in Nigeria, across Africa, and around the world." —Barack Obama "African literature is incomplete and unthinkable without the works of Chinua Achebe." —Toni Morrison Nominated as one of America's best-loved novels by PBS's The Great American Read Things Fall Apart is the first of three novels in Chinua Achebe's critically acclaimed African Trilogy. It is a classic narrative about Africa's cataclysmic encounter with Europe as it establishes a colonial presence on the continent. Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, Things Fall Apart explores one man's futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, Things Fall Apart provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village, he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.

Behop to the Boolean Boogie Clive Maxfield.2008-12-05 This entertaining and readable book provides a solid, comprehensive introduction to contemporary electronics. It's not a how-to-do electronics book, but rather an in-depth explanation of how today's integrated circuits work, how they are designed and manufactured, and how they are put together into powerful and sophisticated electronic systems. It even tells how to pronounce the alphabet soup of acronyms that runs rampant in the industry. Written in conversational, fun style that has generated a strong following for the author and sales of over 14,000 copies for the first two editions The Third Edition is even bigger and better, with lots of new material, illustrations, and an expanded glossary Ideal for training incoming engineers and technicians, and for people in marketing or other related fields or anyone else who needs to familiarize themselves with electronics terms and technology

Don't Pay for a Promise! John McHardy.2000-11-01 Growing out of a project to help the author deal with his own credulity, Dont Pay for a Promise is a treasure house of information distilled from hundreds of Government publications. These publications are constantly being revised and updated and the reader should consult them regularly for the latest facts. However, because each publication must stand on its own, there is a patchwork character to the material and finding answers for a particular situation can take time. By capturing the essence of these publications, John McHardy has created a powerful resource for anyone who has ever agonized over an offer that seems too good to be true. In 14 compact chapters, the book deals systematically with the diverse types and guises of consumer fraud, offering concrete advice on how to recognize and respond to each of them. The first chapter provides information common to all types of fraud and serves as a foundation for the rest of the book. The next eleven chapters then cover individual aspects of the subject. For example, Chapter 2 Identity Theft examines topics that range from simple theft to the less obvious hazards of

automatic debit and electronic banking. A typical chapter begins with an outline of pertinent laws and regulations and continues with one or more sections on particular issues. For example, Chapter 3, arranges the broad subject of Contests into three separate sections. Within each section, the material is organized under a consistent set of paragraph headings. These include the promise (the scam or deceptive practice), warning signs that may distinguish it from a legitimate offer, and ways that consumers can protect themselves or at least minimize their losses. The book concludes with two chapters of reference material, Chapter 13 detailing the many organizations that can offer help in the fight against fraud and Chapter 14 containing the full text of FTC Telemarketing Sales Rule.
