It needs to be successfully trained and practiced. Teamwork in Medical Rehabilitation provides a guide to efficient teamwork in professional healthcare. Showcasing the practice of medical rehabilitation in Sweden, the book describes how to create, develop, nourish and organise a team. Medical rehabilitation in Sweden is a discipline filled by not only doctors and nurses, but also physiotherapists, occupational therapists, psychologists, social workers, speech therapists and dieticians. Using these multi-professional teams as clinical case studies, the book contains many practical examples from different rehabilitation care areas. This book will prove to be invaluable to healthcare professionals and students as effective collaboration is essential to good clinical outcomes.
