Handbook of Research on Emerging Innovations in Rail Transportation Engineering Rai, B. Umesh.2016-05-31 The rail-based transit system is a popular public transportation option, not just with members of the public but also with policy makers looking to install a form of convenient and rapid travel. Even for moving bulk freight long distances, a rail-based system is the most sustainable transportation system currently available. The Handbook of Research on Emerging Innovations in Rail Transportation Engineering presents the latest research on next-generation public transportation infrastructures. Emphasizing a diverse set of topics related to rail-based transportation such as funding issues, policy design, traffic planning and forecasting, and engineering solutions, this comprehensive publication is an essential resource for transportation planners, engineers, policymakers, and graduate-level engineering students interested in uncovering research-based solutions, recommendations, and examples of modern rail transportation systems.

Cities, Railways, Modernities Carlos López Galviz.2019-01-14 *Cities, Railways, Modernities* chronicles the transformation that London and Paris experienced during the 19th century through the lens of the London Underground and the Paris Métro. By highlighting the multiple ways in which the future of the two cities was imagined and the role that railways played in that process, it challenges and refines two of the most dominant myths of urban modernity: a planned Paris and an unplanned London. The book recovers a significant body of work around the ideas, the plans, the context, and the building of metropolitan railways in the two cities to provide new insights into the relationship of transport technologies and urban change during the 19th century.

Old Buildings, New Ideas Françoise Astorg Bollack.2023-12-18 Some architectural transformations are modest, some are revolutionary. Shining a

light on the hidden side of the accepted narrative of the history of architecture, this book explores works which transform existing buildings to build a way forward, through adaptations, additions and visual shifts. Examining 30 buildings across Europe, North America and South America, spanning from the early Middle Ages to the end of the 20th century, it demonstrates the creative possibilities of working with existing buildings. The book reveals how formal inventions can shape architecture and our environment over time in a built world constantly in a state of becoming. As we face a climate emergency, it taps into our deep cultural knowledge about the inventive use and re-use of buildings. Generously illustrated with architectural plans and over 300 colour images, it provides an alternative to the dominant view which sees conservation and preservation of historic buildings as a 20th century creation.

Making Modern Paris Christopher Curtis Mead.2012 Investigates how architecture, technology, politics, and urban planning came together in French architect Victor Baltard's creation of the Central Markets of Paris. Presents a case study of the historical process that produced modern Paris between 1840 and 1870.

Les Halles centrales de Paris - Autrefois et aujourd'hui Jules Vigneau.2016-11-17 Sous les premiers rois de France, Paris ne comprenait que la Cité. Il n'y avait qu'un seul marché, le marché Palu. L'emplacement contigu à ce marché, situé sur la rive de la Seine, était marécageux. Plus tard, une Halle, dite Halle de Beauce, ou marché au blé, fut établie rue de la Juiverie, près du Petit-Pont. Louis VI, dit le Gros, acheta en 1137 le terrain dit « des Champeaux » ou Petits-Champs, pour y établir un marché, autour duquel plusieurs autres furent construits. Fruit d'une sélection réalisée au sein des fonds de la Bibliothèque nationale de France, Collection XIX a pour ambition de faire découvrir des textes classiques et moins classiques dans les meilleures éditions du XIXe siècle.

Baltard, les Halles de Paris Patrice de Moncan, Maxime Du Camp. 2010 « Au cours du XIXe siècle, on n'a bâti qu'un seul monument original, un monument qui ne soit copié nulle part, qui ait poussé naturellement dans le sol de l'époque ; ce sont les Halles centrales, une oeuvre crâne, écrivait Zola. Ce sont pourtant ces bâtiments magnifiques, construits par Baltard en 1853, que les années 1970 ont osé détruire au nom du modernisme, au moment où l'on anéantissait le quartier Montparnasse en y plantant sa haute tour solitaire. Certes, il était urgent que les Halles quittent le cœur de Paris pour rejoindre Rungis. Mais pourquoi avoir détruit ces chefs-d'œuvre de l'architecture de métal et de verre - le style appelé aujourd'hui Baltard -, qui auraient pu être préservés en abritant des galeries d'art, des boutiques de mode, et même un centre commercial ? C'est l'histoire emblématique de leur construction, de leur vie jusqu'à leur massacre que raconte ce livre, images à l'appui, dont la fin a été miraculeusement photographiée par Gérard Glanard qui en fut un témoin tristement privilégié. »--

Dividing Paris Esther da Costa Meyer.2022-02-15 Dividing Paris: Urban Renewal and Social Inequality, 1852-1870 offers a new look at the ambitious urban changes that transformed the city of Paris during the Second Empire, when Paris became a template for urban renewal in many large cities in Europe, North, and South America. Esther da Costa Meyer looks at the social and historical context of these urban changes--what Napoleon III, his prefect Georges-Eugene Haussman, and their team of engineers planned, as well as how the diverse and deeply stratified public responded to them. Along with broad streets and boulevards intended to enable crowds and merchandise to circulate and, also, impede the chances of popular insurgency, Haussman's project of urban renewal called for ample water supply, sewerage, and public parks and gardens. These changes radically altered the old, tightly-knit weave of the medieval city, serving the needs of the industrial bourgeoisie while forcing the urban poor to the outskirts. Dividing Paris is the first architectural history of the city that takes into account the larger part of the urban territory annexed in 1860, a ring of settlements and villages which became increasingly class-specific. Instead of relating the story of Haussmanization as a top-down administrative effort, as Haussman's critics and admirers have both tended to do, it draws on primary sources, especially newspapers and memoirs, to investigate the degree to which Parisians' experiences of modernity were class and gender-specific and to ask what strategies working class men and women in particular used to cope with and in some cases resist the changing world around them. At the same time, da Costa Meyer resists the familiar narrative of Paris as capital of the 19th century that has endured, at least since Walter Benjamin's famous essay, as euro-centric and misleading insofar as it fails to situate Paris's urban developments in a broader global context or to acknowledge the extent to which Haussmanization was itself implicated in the broader imperial project on which France was embarked at the time--

Napoleon III and the Rebuilding of Paris David H. Pinkney.2019-01-29 In the two decades between 1850 and 1870 Napoleon III and his Prefect of the Seine, Baron Haussmann, created the modern city of Paris out of the congested and ill-equipped capital of the 18th century. They gave Paris many of its present major streets, its great municipal parks, the Central Markets, the Opera House and other well-known buildings, as well as a water supply system and a network of sewers that still serve the city. The various factors of the venture: the city's rapidly increasing population, the challenging engineering problems, the political complications, and the clash of personalities involved are here considered. The author presents the whole undertaking in the perspective of French political and economic history, shows its relation to the public health movement of the mid-nineteenth century, and explains its significance in the history of city planning. Originally published in 1958.
