**Indigenous Knowledge and Intellectual Property** Elmien Du Plessis, Caroline Bongiwe Ncube. 2016 This title flows from several panels at the Commission on Legal Pluralism Jubilee Conference, entitled Living Realities of Legal Pluralism, that was organised in conjunction with the Centre for Legal and Applied Research (CLEAR), the Research Chair in Customary Law and the Chair for Comparative Law in Africa, of the University of Cape Town. The panels highlighted controversial aspects of the legal protection of indigenous knowledge with which the contributors to this volume have critically engaged. This engagement is informed by recent legislative and policy developments in several countries in the global South, including South Africa--Page 4 of cover.

**Phylogenetic Diversity** Rosa A. Scherson, Daniel P Faith. 2018-08-31 "Biodiversity" refers to the variety of life. It is now agreed that there is a "biodiversity crisis", corresponding to extinction rates of species that may be 1000 times what is thought to be "normal". Biodiversity science has a higher profile than ever, with the new Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services involving more than 120 countries and 1000s of scientists. At the same time, the discipline is re-evaluating its foundations - including its philosophy and even core definitions. The value of biodiversity is being debated. In this context, the tree of life ("phylogeny") is emerging as an important way to look at biodiversity, with relevance cutting across current areas of concern - from the question of resilience within ecosystems, to conservation priorities for globally threatened species - while capturing the values of biodiversity that have been hard to quantify, including resilience and maintaining options for future generations. This increased appreciation of the importance of conserving "phylogenetic diversity", from microbial communities in the human gut to global threatened species, has inevitably resulted in an explosion of new indices, methods, and case studies. This book recognizes and responds to the timely opportunity for synthesis and sharing experiences in practical applications. The book recognizes that the challenge of finding a synthesis, and building shared concepts and a shared toolbox, requires both an appreciation of the past and a look into the future. Thus, the book is organized as a flow from history, concepts and philosophy, through to methods and tools, and followed by selected case studies. A positive vision and plan of action emerges from these chapters, that includes coping with inevitable uncertainties, effectively communicating the importance of this "evolutionary heritage" to the public and to policy-makers, and ultimately contributing to biodiversity conservation policy from local to global scales.

**Male Roles, Masculinities and Violence** Ingeborg Breines, Raewyn Connell, Ingrid Eide, Unesco. 2000 This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-

children that aggressiveness, violence and force are an acceptable means of expression.

*Pilgrimage and Holy Space in Late Antique Egypt* David Frankfurter.2015-08-27 This volume deals with the origins and rise of Christian pilgrimage cults in late antique Egypt. Part One covers the major theoretical issues in the study of Coptic pilgrimage, such as sacred landscape and shrines' catchment areas, while Part Two examines native Egyptian and Egyptian Jewish pilgrimage practices. Part Three investigates six major shrines, from Philae's diverse non-Christian devotees to the great pilgrim center of Abu Mina and a Thecla shrine on its route. Part Four looks at such diverse pilgrims' rites as oracles, chant, and stationary liturgy, while Part Five brings in Athanasius' and an anonymous hagiographer's perspectives on pilgrimage in Egypt. The volume includes illustrations of the Abu Mina site, pilgrims' ampules from the Thecla shrine, as well as several maps.

The Neurobiology of Olfaction Anna Menini.2009-11-24 Comprehensive Overview of Advances in Olfaction The common belief is that human smell perception is much reduced compared with other mammals, so that whatever abilities are uncovered and investigated in animal research would have little significance for humans. However, new evidence from a variety of sources indicates this traditional view is likely overly simplistic. The Neurobiology of Olfaction provides a thorough analysis of the state-of-the-science in olfactory knowledge and research, reflecting the growing interest in the field. Authors from some of the most respected laboratories in the world explore various aspects of olfaction, including genetics, behavior, olfactory systems, odorant receptors, odor coding, and cortical activity. Until recently, almost all animal research in olfaction was carried out on orthonasal olfaction (inhalation). It is only in recent years, especially in human flavor research, that evidence has begun to be obtained regarding the importance of retronasal olfaction (exhalation). These studies are beginning to demonstrate that retronasal smell plays a large role to play in human behavior. Highlighting common principles among various species - including humans, insects, *Xenopus laevis* (African frog), and *Caenorhabditis elegans* (nematodes) - this highly interdisciplinary book contains chapters about the most recent discoveries in odor coding from the olfactory epithelium to cortical centers. It also covers neurogenesis in the olfactory epithelium and olfactory bulb. Each subject-specific chapter is written by a top researcher in the field and provides an extensive list of reviews and original articles for students and scientists interested in further readings.

**The Sounds of Early Cinema** Richard Abel, Rick R. Altman.2001-10-03 The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. Silent cinema may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised

to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauevert, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Dominique Nasta, Bernard Perron, Jacques Polet, Lauren Rabinovitz, Isabelle Raynauld, Herbert Reynolds, Gregory A. Waller, and Rashit M. Yangirov.

Ready Player Two Shira Chess.2017-10-01 Cultural stereotypes to the contrary, approximately half of all video game players are now women. A subculture once dominated by men, video games have become a form of entertainment composed of gender binaries. Supported by games such as Diner Dash, Mystery Case Files, Wii Fit, and Kim Kardashian: Hollywood—which are all specifically marketed toward women—the gamer industry is now a major part of imagining what femininity should look like. In *Ready Player Two*, media critic Shira Chess uses the concept of “Player Two”—the industry idealization of the female gamer—to examine the assumptions implicit in video games designed for women and how they have impacted gaming culture and the larger society. With *Player Two*, the video game industry has designed specifically for the feminine ideal: she is white, middle class, heterosexual, cis-gendered, and abled. Drawing on categories from time management and caregiving to social networking, consumption, and bodies, Chess examines how games have been engineered to shape normative ideas about women and leisure. *Ready Player Two* presents important arguments about how gamers and game developers must change their thinking about both women and games to produce better games, better audiences, and better industry practices. Ultimately, this book offers vital prescriptions for how one of our most powerful entertainment industries must evolve its ideas of women.

It addresses key questions about EDC and HRE, including competences for democratic citizenship, the objectives and basic principles of EDC/HRE, and a whole school approach to education for democracy and human rights. The manual consists of three parts. Part I outlines the basic principles of EDC/HRE as far as they are helpful and meaningful for the practitioner. Part II gives guidelines and tools to design, support and assess the students' processes of constructivist and interactive learning. Part III provides toolboxes for teachers and students in EDC/HRE. The other volumes in this series offer concrete teaching models and materials in EDC/HRE for pupils from elementary to upper secondary level.

The purpose of the current work is to consolidate recent data and conceptual insights related to navigational insight processing in a format useful to both practitioners and advanced students in neuroscience.

**Blocking Public Participation** Byron Sheldrick. 2014-02-18 Strategic litigation against public participation (SLAPP) involves lawsuits brought by individuals, corporations, groups, or politicians to curtail political activism and expression. An increasingly large part of the political landscape in Canada, they are often launched against those protesting, boycotting, or participating in some form of political activism. A common feature of SLAPPs is that their intention is rarely to win the case or secure a remedy; rather, the suit is brought to create a chill on political expression. *Blocking Public Participation* examines the different types of litigation and causes of action that frequently form the basis of SLAPPs, and how these lawsuits transform political disputes into legal cases, thereby blocking political engagement. The resource imbalance between plaintiffs and defendants allows plaintiffs to tie up defendants in complex and costly legal processes. The book also examines the dangers SLAPPs pose to political expression and to the quality and integrity of our democratic political institutions. Finally, the book examines the need to regulate SLAPPs in Canada and assesses various regulatory proposals. In Canada, considerable attention has been paid to the “legalization of politics” and the impact on the Charter in diverting political activism into the judicial arena. SLAPPs, however, are an under-studied element of this process, and in their obstruction of political engagement through recourse to the courts they have profound implications for democratic practice.

Oral Speech Mechanism Screening Examination (OSMSE) Kenneth O. St. Louis, Dennis M.

Ruscello. 1981 Although speech-language pathologists are expected to be able to administer and interpret oral examinations, there are currently no screening tests available that provide careful administration instructions and data for intra-examiner and inter-examiner reliability. The Oral Speech Mechanism Screening Examination (OSMSE) is designed primarily for use by clinical speech-language pathologists. The examination could also serve, however, as a useful tool for oral myofunctional therapists, as well as physical therapists, dentists, and orthodontists interested specifically in speech. It is reliable, relatively easy and quick to administer, and appropriate for children and adults in either diagnostic or therapy settings. The OSMSE is intended to assess those anatomical structures and physiological functions that are most often considered to be potentially related to speech or language disorders. Structural and/or functional judgments included are organized on the OSMSE test form under categories of: lips, tongue, jaw, teeth, hard palate, soft palate, pharynx, breathing, and diadochokinesis. Results of a preliminary study with normal speaking subjects indicated that the OSMSE had satisfactory intra- and inter-examiner reliability after minimal training. The time required to administer the examination typically ranged from 5 to 10 minutes. (Author/GK)

*Vertigo: Its Multisensory Syndromes* Thomas Brandt. 2012-12-06 A variety of syndromes are hidden behind the term vertigo; the interdisciplinary approach here shows how surprisingly easy it is to correctly diagnose and effectively treat them. The book's clinical practicality uncovers the key elements necessary for understanding vertigo: the sensorimotor physiology, careful history-taking, and otoneurological examination. For each syndrome, there is a full description of the clinical features and diagnostic procedure. Numerous tables and thorough cross-referencing guide you to

differential diagnosis. Special emphasis is placed on the relationship between the management and the underlying pathological mechanism of the disease.

**Religion and International Law** Mark W. Janis, Carolyn Evans.2004-02-01 One of the great tasks, perhaps the greatest, weighing on modern international lawyers is to craft a universal law and legal process capable of ordering relations among diverse people with differing religions, histories, cultures, laws, and languages. In so doing, we need to take the world's peoples as we find them and not pretend out of existence their wide variety. This volume includes studies of the interface between international law and ancient religions, Confucianism, Hinduism, Judaism, Christianity, and Islam, as well as essays addressing the impact of religious thought on the literature and sources of international law, international courts, and human rights law.
