Le Corbusier Stanislaus von Moos. 2009 Originally published in Germany in 1968, this first comprehensive and critical survey of Le Corbusier's life and work soon became the standard text on the architect and polymath. French, Spanish, English, Japanese and Korean editions followed, but the book has now been out of print for almost two decades. In the meantime, Le Corbusier's archives in Paris have become available for research, resulting in an avalanche of scholarship. Von Moos' critical take and the basic criteria by which the subject is organized and historicized remain surprisingly pertinent in the context of this recent jungle of Corbusier studies. This new, completely revised edition is based on the 1979 version published in English by the MIT Press but offers a substantially updated body of illustrations. Each of the seven chapters is supplemented by a critical survey of recent scholarship on the respective issues. An updated edition of this acclaimed book, an essential read for students of architecture and architectural history.

Ninety-Three Victor Hugo. 2022-11-13 *Ninety-Three* (Quatrevingt-treize) is the last novel by the French writer Victor Hugo. Published in 1874, shortly after the bloody upheaval of the Paris Commune, the novel concerns the Revolt in the Vendée and Chouannerie – the counter-revolutionary revolts in 1793 during the French Revolution. It is divided into three parts, but not chronologically; each part tells a different story, offering a different view of historical general events. The action mainly takes place in Brittany and in Paris. Ayn Rand greatly praised this book (and Hugo's writing in general), acknowledged it as a source of inspiration, and even wrote an introduction to one of its English-language editions.

A Topology of Everyday Constellations Georges Teyssot. 2013-02-22 The threshold as both boundary and bridge: investigations of spaces, public and private, local and global. Today, spaces no longer represent a bourgeois haven; nor are they the sites of a classical harmony between work and leisure, private and public, the local and the global. The house is not merely a home but a position for negotiations with multiple spheres—the technological as well as the physical and the psychological. In *A Topology of Everyday Constellations*, Georges Teyssot considers the intrusion of the public sphere into private space, and the blurring of notions of interior, privacy, and intimacy in our societies. He proposes that we rethink design in terms of a new definition of the practices of everyday life. Teyssot considers the door, the window, the mirror, and the screen as thresholds or interstitial spaces that divide the world in two: the outside and the inside. Thresholds, he suggests, work both as markers of boundaries and as bridges to the exterior. The stark choice between boundary and bridge creates a middle space, an in-between that holds the possibility of exchanges and encounters. If the threshold no longer separates public from private, and if we can no longer think of the house as a bastion of privacy, Teyssot asks, does the body still inhabit the house—or does the house, evolving into a series of microdevices, inhabit the body?

A Thesaurus of English Word Roots Horace Gerald Danner. 2014-03-27 Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

The Equality of the Human Races Joseph-Anténor Firmin. 2002 This is the first paperback edition of the only English-language translation of the Haitian scholar Antenor Firmin's *The Equality of the Human Races*, a foundational text in critical anthropology first published in 1885 when anthropology was just emerging as a specialized field of study. Marginalized for its radical position that the human races were equal, Firmin's lucid and persuasive treatise was decades ahead of its time. Arguing that the equality of the races could be demonstrated through a positivist scientific approach, Firmin challenged racist writings and the dominant views of the day. Translated by Asselin Charles and framed by Carolyn Fluehr-Lobban's substantial introduction, this rediscovered text is an important contribution to contemporary scholarship in anthropology, pan-African studies, and colonial and postcolonial studies.

Unpacking predictors of income and income satisfaction for artists World Intellectual Property Organization,Alexander Cuntz,Angie L. Miller.2018 The stereotype of the “starving artist” is pervasive in modern Western culture, but previous research on artists and income is mixed. The goal of this study is to explore how several demographic variables, along with self-reported behaviors and artistic activities associated with non-monetary and monetary motivators, predict income and income satisfaction for artists.Using unique survey data on current working artists in the United States, we provide empirical evidence on substantial reputational rewards and rewards from altruistic behaviors as important sources of artists’ utility and, arguably, sources of their motivation to create new works. Moreover, we find that the evidence on “procedural” utility from working in the arts is less straightforward, and we find that many artists are pooling and diversifying financial risks on household levels. Overall, quantitative findings indicate that artists may have different criteria and conceptualizations when it comes to income, and they may derive value from their work in a variety of ways aside from income.

The Rise of Heritage Astrid Swenson.2013-12-19 Where does our fascination for 'heritage' originate? This groundbreaking comparative study of preservation in France, Germany and England looks beyond national borders to reveal how the idea of heritage emerged from intense competition and collaboration in a global context. Astrid Swenson follows the 'heritage-makers' from the French Revolution to the First World War, revealing the importance of global networks driving developments in each country. Drawing on documentary, literary and visual sources, the book connects high politics and daily life and uncovers how, through travel, correspondence, world fairs and international congresses, the preservationists exchanged ideas, helped each other campaign and dreamed of establishing international institutions for the protection of heritage. Yet, these heritage-makers were also animated by fierce rivalry as international tension grew. This mixture of international collaboration and competition created the European culture of heritage, which defined preservation as integral to modernity, and still shapes current institutions and debates.

The Crisis of the Meritocracy Peter Mandler.2020-09-11 Before the Second World War, only about 20% of the population went to secondary school and barely 2% to university; today everyone goes to secondary school and half of all young people go to university. How did we get here from there? The Crisis of the Meritocracy answers this question not by looking to politicians and educational reforms, but to the revolution in attitudes and expectations amongst the post-war British public - the rights guaranteed by the welfare state, the hope of a better life for one's children, widespread upward mobility from manual to non-manual occupations, confidence in the importance of education in a 'learning society' and a 'knowledge economy'. As a result of these transformations, 'meritocracy' - the idea that a few should be selected to succeed - has been challenged by democracy and its wider understandings of equal opportunity across the life course. At a time when doubts have arisen about whether we need so many students, and amidst calls for a return to grammar-school selection at 11, the tension between meritocracy and democracy remains vital to understanding why our grandparents, our parents, ourselves and our children have sought and got more and more education - and to what end.

Art and Globalization James Elkins,Zhivka Valiavicharska,Alice Kim.2015-09-10 The “biennale culture” now determines much of the art world. Literature on the worldwide dissemination of art assumes nationalism and ethnic identity, but rarely analyzes it. At the same time there is extensive theorizing about globalization in political theory, cultural studies, postcolonial theory, political economy, sociology, and anthropology. Art and Globalization brings political and cultural theorists together with writers and historians concerned specifically with the visual arts in order to test the limits of the conceptualization of the global in art. Among the major writers on contemporary international art represented in this book are Rasheed Araeen, Joaquín Barriandos, Susan Buck-Morss, John Clark, Iftikhar Dadi, T. J. Demos, Néstor García Canclini, Charles Green, Suman Gupta, Harry Harootunian, Michael Ann Holly, Shigemi Inaga, Fredric Jameson, Caroline Jones, Thomas DaCosta Kaufmann, Anthony D. King, Partha Mitter, Keith Moxey, Saskia Sassen, Ming Tiampo, and C. J. W.-L. Wee. Art and Globalization is the first book in the Stone Art Theory Institutes Series. The five volumes, each on a different theoretical issue in contemporary art, build on conversations held in intensive, weeklong closed

meetings. Each volume begins with edited and annotated transcripts of those meetings, followed by assessments written by a wide community of artists, scholars, historians, theorists, and critics. The result is a series of well-informed, contentious, open-ended dialogues about the most difficult theoretical and philosophical problems we face in rethinking the arts today.

Across Anthropology Margareta von Oswald, Jonas Tinius.2020-06-15 How can we rethink anthropology beyond itself? In this book, twenty-one artists, anthropologists, and curators grapple with how anthropology has been formulated, thought, and practised 'elsewhere' and 'otherwise'. They do so by unfolding ethnographic case studies from Belgium, France, Germany, Italy, the Netherlands, and Poland – and through conversations that expand these geographies and genealogies of contemporary exhibition-making. This collection considers where and how anthropology is troubled, mobilised, and rendered meaningful. *Across Anthropology* charts new ground by analysing the convergences of museums, curatorial practice, and Europe's reckoning with its colonial legacies. Situated amid resurgent debates on nationalism and identity politics, this book addresses scholars and practitioners in fields spanning the arts, social sciences, humanities, and curatorial studies. The Architecture of Psychoanalysis Jane Rendell.2017-03-01 In this thought-provoking book, Jane Rendell explores how architectural space registers in psychoanalysis. She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical 'setting' of the psychoanalytic encounter, with reference to Sigmund Freud, D.W. Winnicott and Andre Green. Building on the innovative writing methods employed in *Art and Architecture and Site-Writing*, she also addresses the concept of architecture as 'social condenser' a Russian constructivist notion that connects material space and community relations. Tracing this idea's progress from 1920s Moscow to 1950s Britain, Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice. Illuminating a novel field of interdisciplinary enquiry, this book breathes fresh life into notions of social space.

Aspects of Multilingualism in European Border Regions Andrea Abel, Mathias Stuflesser, Leonhard Voltmer.2007

Muralnomad Romy Golan.2009 In this fascinating and generously illustrated book, Romy Golan explores mural and mural-like works in Europe from the 1920s to the 1950s, beginning with Monet's installation of the *Nymphéas* at the Musée de l'Orangerie in Paris, and ending dramatically with Le Corbusier's huge tapestries in Chandigarh, India. Many artists and critics looked to the mural as a corrective to the ills of painterly Modernism: the disruption of the pictorial field at the hands of Cubism and other avant-garde practices; the commodification of painting through the market for easel paintings; and more generally the alienation of man and the anomie of art in the modern condition. At the same time it was clear that a return to the mural format would never be more than an anachronistic and futile gesture. This book is therefore about mural paintings that are not convinced they belong on walls: such strange objects as mosaics designed to be disassembled; paintings that resemble large-scale photographs, or photomurals; and tapestries that functioned as portable woolen walls. The author argues that the uncertain relation of these objects to the wall is symptomatic of the dilemmas that troubled European art, artists, and architects during the middle decades of the twentieth century.

Cultural Resistance Reader Stephen Duncombe.2002 From the Diggers seizing St. George Hill in 1649 to Hacktivists staging virtual sit-ins in the 21st century, from the retributive fantasies of Robin Hoods to those of gangsta rappers, culture has long been used as a political weapon. This expansive and carefully crafted reader brings together many of the classic texts that help to define culture as a tool of resistance. With concise, illuminating introductions throughout, it presents a range of theoretical and historical writings that have influenced contemporary debate, and includes a number of new activist authors published here for the first time. *Cultural Resistance Reader* is both an invaluable scholarly resource and a tool for political activists. But most importantly it will inspire everyday readers to resist.
