*Rogue Economics* Loretta Napoleoni.2011-01-04 What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

The Connected Company Dave Gray,Thomas Vander Wal.2014-12-02 With a foreword by Alex Osterwalder. The future of work is already here. Customers are adopting disruptive technologies faster than your company can adapt. When your customers are delighted, they can amplify your message in ways that were never before possible. But when your company's performance runs short of what you've promised, customers can seize control of your brand message, spreading their disappointment and frustration faster than you can keep up. To keep pace with today's connected customers, your company must become a connected company. That means deeply engaging with workers, partners, and customers, changing how work is done, how you measure success, and how performance is rewarded. It requires a new way of thinking about your company: less like a machine to be controlled, and more like a complex, dynamic system that can learn and adapt over time. Connected companies have the advantage, because they learn and move faster than their competitors. While others work in isolation, they link into rich networks of possibility and expand their influence. Connected companies around the world are aggressively acquiring customers and disrupting the competition. In *The Connected Company*, we examine what they're doing, how they're doing it, and why it works. And we show you how your company can use the same principles to adapt—and thrive—in today's ever-changing global marketplace.

*Good Luck* Alex Rovira, Fernando Trías De Bes. 2004-08-24 Good Luck is a whimsical fable that teaches a valuable lesson: good luck doesn't just come your way—it's up to you to create the conditions to bring yourself good luck. Written by Alex Rovira and Fernando Trias de Bes—two leading marketing consultants—this simple tale is universally applicable and uniquely inspirational. Good Luck tells the touching story of two old men, Max and Jim, who meet by chance in Central Park fifty years after they last saw each other as children. Max achieved great success in life; Jim sadly did not. The secret to Max's success lies in a story his grandfather told him long ago. This story within a story has a tone reminiscent of the classic *The Alchemist* and shows how to seize opportunity and achieve success in life. In a surprise ending, Good Luck comes full circle, offering the reader inspiration, instruction, and an engaging tale.

**Social Entrepreneurship in the Water Sector** Rafael Ziegler, Jana Gebauer, Lena Partzsch, Marianne Henkel, Franziska Mohaupt, Justus Lodemann. 2016-02-26 There are few sectors where 'getting things done sustainably' is as important as it is for the water sector. From drinking water and sanitation to water use in agriculture, industry and ecosystems, Rafael Ziegler and his co-authors investigate the contribution of social entrepreneurship to the sustainable use of water. Using detailed case studies from Africa, Asia, Europe and Latin America, the authors assess the role and potential of social entrepreneurship for the sustainable use of water. In addition, they examine the ethics and politics of new ideas for sustainability in the water sector. In so doing, they critically discuss the impact of these new innovations, with the emphasis on ideas changing heads rather than money changing hands. By bringing together questions from ecology, ethics, management and political science, and drawing on research in close collaboration with practitioners across the world, the approach taken is both inter- and trans-disciplinary. The result will be of significant interest to researchers and practitioners in social entrepreneurship and social innovation, as well as in water and sustainability politics.
