**Disrupting Hate in Education** Rita Verma, Michael W.

Apple.2020-11-26 *Disrupting Hate in Education* aims to identify and respond to the ideological forms of hate and fear that are present in schools, which echo larger nativist and populist agendas. Contributions to this volume are international in scope, providing powerful examples from US schools and communities, examining anti-extremism work in the UK, the saffronization of schools in India, struggles to re-orient the villainization of teachers in Brazil, and more. Written by a dynamic group of activist educators and critical researchers, chapters demonstrate how conservative mobilizations around collective identities gain momentum, and how these mobilizations can be interrupted. Out of these interruptions come new opportunities to practice a critically democratic education that hinges upon risk-taking, deep dialogue, and creating a space for common dignity.

[Women, Business and the Law 2020](#) World Bank

Group.2020-04-24 The World Bank Group's *Women, Business and the Law* examines laws and regulations affecting women's prospects as entrepreneurs and employees across 190 economies. Its goal is to inform policy discussions on how to remove legal restrictions on women and promote research on how to improve women's economic inclusion.

**How Black Colleges Empower Black Students** Frank W.

Hale.2023 To their disadvantage, few Americans--and few in higher education--know much about the successes of historically Black colleges and universities. How is it that historically Black colleges graduate so many low-income and academically poorly prepared students? How do they manage to do so well with students as they are, even when adopting open admissions policies? In this volume, contributors from a wide spectrum of Black colleges offer insights and examples of the policies and practice--such as retention strategies, co-curricular activities and approaches to mentoring--which underpin their disproportionate

success with populations that too often fail in other institutions. This book also challenges the myth that these colleges are segregated institutions and that teachers of color are essential to minority student success. HBCUs employ large numbers of non-Black faculty who demonstrate the ability to facilitate the success of African American students. This book offers valuable lessons for faculty, faculty developers, student affairs personnel and administrators in the wider higher education community--lessons that are all the more urgent as they face a growing racially diverse student population. While, for HBCUs themselves, this book reaffirms the importance of their mission today, it also raises issues they must address to maintain the edge they have achieved. Contributors: Pamela G. *Schools of Peace* Miriam Abramovay. 2001

*Moving People and Knowledge* Louise Ackers, Bryony

Gill. 2009-01-01 The book can be seen as a welcomed contribution to this field of study. . . [it] raises some important questions and problems of scientific mobility. Høgni Kalsø Hansen, Papers in Regional Science This is a very timely book looking at East West migration, which has recently become a hot political issue in various West European countries. It does an excellent job in laying out the intricacies of mobility that affect different groups,

particularly knowledge migrants . The book successfully shows that knowledge migrants follow different motivational routes than other groups of migrants in their choice of mobility between institutes and nations. It makes a valuable contribution to a growing body of research that seeks to change established thinking and rhetoric about migration and to shift it from a dualistic thinking of migration in terms of economic vs. non-economic migrants. What this book shows is that the professional identity of people often supersedes their nationalities in relation to why and where they move. Sami Mahroum, NESTA, UK Based on excellent empirical research on migrating scientists from Poland and Bulgaria to the UK and Germany, this book follows an innovative agenda which is crucial to the world today the movement of people and the movement of knowledge. It achieves this by a creative blend of analysing personal stories, embedded in their professional and family networks, on the one hand, and macro-scale discussions of brain drain, brain gain and national and European policy implications on the other. Russell King, University of Sussex, UK This book makes a timely contribution to understanding the circulation of scientific knowledge via international mobility. It skillfully combines an analysis of structural and institutional changes, with a focus on individual circumstances, life courses and motivations. The outcome is a compelling account of the role of international migration in the transfer of knowledge across borders, and in shaping the careers of individual scientists. This places people and human mobility at the heart of the debate about how the knowledge economy is produced and reproduced. Allan Williams, London Metropolitan University, UK Moving People and Knowledge provides a fresh examination of the processes of highly skilled science migration. Focusing on intra-European mobility and, in particular, on the new dynamics of East West migration, the authors investigate the movement of Polish and Bulgarian researchers to and from the UK and Germany. Key questions include: who is moving, how long

for, and why? In addressing the motivations and experiences of mobile scientists and their families, insights into professional and personal motivations are provided, demonstrating how relationships, networks and infrastructures shape decision-making. This book provides a useful perspective on the implications of increasing researcher mobility for both sending and receiving regions and the individuals concerned which is necessary for the construction of future policies on sustainable scientific development. This empirical account provides a nuanced analysis of the duration and flow of scientific mobility showing the prevalence of repeat and shuttle moves in science careers. It will be of particular interest to researchers in European social policy, migration studies and EU law, as well as policymakers in the field of highly skilled migration especially those working on the free movement of persons provisions and the European Research Area and European Area of Higher Education.

**Eurocentrism and the Politics of Global History** Alessandro Stanziani. 2018-07-27 Global history locates national histories in the context of broader processes, in which the West is not necessarily synonymous with progress. And yet it often suffers from the same Eurocentrism that plagues national history, accepting Western categories and values uncritically and largely ignoring non-English historiographies. Alessandro Stanziani examines these tensions and asks what global history is and ought to be. Drawing upon a wide array of sources, he historicizes global history writing from the sixteenth century onward, tracing the forces of revolution, globalization, totalitarianism, colonization, decolonization and the Cold War. By considering global history in the context of a *longue durée*, multipolar perspective, this book assesses the strengths and limits of the field, and clarifies what is at stake.

*Intellectual History in Contemporary South Africa* M. Eze. 2016-04-30 In examining the intellectual history in

contemporary South Africa, Eze engages with the emergence of ubuntu as one discourse that has become a mirror and aftermath of South Africa's overall historical narrative. This book interrogates a triple socio-political representation of ubuntu as a displacement narrative for South Africa's colonial consciousness; as offering a new national imaginary through its inclusive consciousness, in which different, competing, and often antagonistic memories and histories are accommodated; and as offering a historicity in which the past is transformed as a symbol of hope for the present and the future. This book offers a model for African intellectual history indignant to polemics but constitutive of creative historicism and healthy humanism.

Education Sector Strategy .1999-01-01 Annotation Human Development Network Series. As the new millennium approaches,... Education will determine who has the keys to the treasures the world can furnish. This is particularly important for the poor, who have to rely on their human capital as the main, if not the only, means of escaping poverty. In this way, new challenges and opportunities arise for education. Immense progress has been achieved in education in the last 50 years. However, immense challenges still remain. This report lays out the vision for education and the ambitious international goals to which the Bank subscribes. It notes the progress so far and the gaps that remain. It describes the rich group of partners associated with the educational endeavor and how the Bank's role has evolved. It conveys the Bank's global priorities and programs to help countries progress toward the international education goals and improve the quality of teaching and learning. It illustrates the processes and operating principles that will help Bank staff contribute more effectively to better educational outcomes in each client country and to monitor success in implementing this strategy. *International Critical Pedagogy Reader* Antonia Darder, Peter Mayo, João Paraskeva. 2017-09-25 Carefully curated to highlight research from more than twenty countries, the International Critical Pedagogy Reader introduces the ways the educational phenomenon that is critical pedagogy are being reinvented and reframed around the world. A collection of essays from both historical and contemporary thinkers coupled with original essays, introduce this school of thought and approach it from a wide variety of cultural, social, and political perspectives.

Academics from South America, Europe, Africa, the Middle East, Asia, and North America describe critical pedagogy's political, ideological, and intellectual foundations, tracing its international evolution and unveiling how key scholars address similar educational challenges in diverse national contexts. Each section links theory to critical classroom practices and includes a list of sources for further reading to expand upon the selections offered in this volume. A robust collection, this reader is a crucial text for teaching and understanding critical pedagogy on a truly international level. Winner of the 2016 Alpha Sigma Nu Book Award

**The Essential Holmes** Oliver Wendell Holmes. 2012-10-12 Oliver Wendell Holmes, Jr., has been called the greatest jurist and legal scholar in the history of the English-speaking world. In this collection of his speeches, opinions, and letters, Richard Posner reveals the fullness of Holmes' achievements as judge, historian, philosopher, and master of English style. Thematically arranged,

the volume covers a rich variety of subjects from aging and death to themes in politics, personalities, and law. Posner's substantial introduction firmly places this wealth of material in its proper biographical and historical context. A first-rate prose stylist, [Holmes] was perhaps the most quotable of all judges, as this ably edited volume shows.—Washington Post Book World Brilliantly edited, lucidly organized, and equipped with a compelling introduction by Judge Posner, [this book] is one of the finest single-volume samplers of any author's work I have seen. . . . Posner has fully captured the acrid tang of him in this masterly anthology.—Terry Teachout, National Review Excellent. . . . A worthwhile contribution to current American political/legal discussions.—Library Journal The best source for the reader who wants a first serious acquaintance with Holmes.—Thomas C. Grey, New York Review of Books

The Structural Crisis of Capital Istvan Meszaros. 2010-03-01 In this collection of trenchant essays and interviews, István Mészáros, the world's preeminent Marxist philosopher and winner of the 2008 Libertador Award for Critical Thought (the Bolivar Prize), lays bare the exploitative structure of modern capitalism. He argues with great power that the world's economies are on a social and ecological precipice, and that unless we take decisive action to radically transform our societies we will find ourselves thrust headfirst into barbarism and environmental catastrophe. Mészáros, however, is no pessimist. He believes that the multiple crises of world capitalism will encourage the working class to demand center stage in the construction of a new system of production and distribution designed to meet human needs rather than serve the relentless pursuit of profit—a struggle which is already underway in places such as Venezuela. As John Bellamy Foster says in the foreword to this indispensable book, “Today the structural crisis of capital provides the historical setting for a new revolutionary movement for social emancipation in which developments normally taking

centuries would flit by like phantoms in decades or even years. But the force for such necessary, vital change, remains with the people themselves, and rests on humanity's willingness to constitute itself as both subject and object of history, through the collective struggle to create a just and sustainable world. This, Mészáros insists, constitutes the unprecedented challenge and burden of our historical time."

*Principles for Building Resilience* Reinette Biggs, Maja Schlüter, Michael L. Schoon. 2015-04-02 Reflecting the very latest research, this book provides an in-depth review of the role of resilience in the management of social-ecological systems and the ecosystem services they provide. Leaders in the field outline seven principles for building resilience in social-ecological systems, examining how these can be applied to advance sustainability.

*Flip the System* Jelmer Evers, René Kneyber. 2015-06-26 Education is threatened on a global scale by forces of neoliberalism, through high stakes accountability, privatization and a destructive language of learning. In all respects, a GERM (Global Education Reform Movement) has erupted from international benchmark rankings such as PISA, TIMSS and PIRL, causing inequity, narrowing of the curriculum and teacher deprofessionalization on a truly global scale. In this book, teachers from around the world and other educational experts such as Andy Hargreaves, Ann Lieberman, Stephen Ball, Gert Biesta, Tom Bennett and many more, make the case to move away from this uneducational economic approach, to instead embrace a more humane, more democratic approach to education. This approach is called 'flipping the system', a move that places teachers exactly where they need to be - at the steering wheel of educational systems worldwide. This book will appeal to teachers and other education professionals around the world.

**Being an Academic** Joëlle Fanghanel. 2011-08-26 The role of

academics in universities worldwide has undergone unprecedented change over the past decade. In this book Fanghanel discusses the effect on academics of modes of governance that have fostered the application of market principles to higher education and promoted flexibility and choice as levers for competition across the sector. She explores what it means to be an academic in the 21st century with reference to six 'moments of practice' through which she analyses the main facets of academic work and the responses of academics to this neoliberal drive. *Being an Academic* effectively examines the frameworks that govern academic work and academic lives, and the personal beliefs and ideals that academics bring with them as educators and researchers in higher education. It argues that there is a rich, critical, empowering potential within the academy that can be harnessed to counter the neoliberal stance and shape a meaningful contribution to modes of enquiry that deal with complexity and uncertainty in a global world. Drawing on empirical research collected from a global range of academics, this book examines how academics respond to structural challenges. It offers a re-appraisal of the main dynamics underpinning the professional and intellectual engagement of academics in today's universities to feed a reflection on possible responses to the complex contemporary world with which the academic endeavour is engaged. The themes explored include academics' positioning towards: Performativity and managerialism Regulation and professionalisation of practice The relation to learning and students The discipline Research Globalisation Each chapter includes vignettes illustrating the theme addressed, a discussion with reference to the context of policy and practice, published literature and illustrative reference to empirical data collected through interviews amongst academics in the UK, Europe, North America, South Africa and Australia. Providing a fresh look at the role of academics in a changing world, this book is essential reading for all those

engaging in higher education research, lecturers new to higher education, and practising academics navigating through their complex role.

*The Challenges of Education in Brazil* Colin Brock,Simon

Schwartzman.2004-05-10 *Education in Brazil* has changed

intensely over the last several years. Access to basic education is

nearly universal, secondary education has been expanding very

rapidly, and so too has higher education at both the

undergraduate and graduate levels. However, serious issues

remain related to quality, equity and inappropriate use of

resources. Some of these problems are related to the fact that

Brazil started to develop its education institutions very late, and

did not build strong teaching and academic professions that could

provide the necessary support for education policies committed to

equity, quality and efficiency. This book, written by leading

experts, is the first English-language text to provide a

comprehensive analysis of the challenges facing Brazilian

education at all levels, including issues such as the quality of

basic education, the establishment of standards for higher

education, the experiences of technical and vocational schools,

teacher education, regulation and financing of public and private

higher education, and the growing role of graduate education and

research.

*The Book of Disquiet: The Complete Edition* Fernando

Pessoa. 2017-08-29 For the first time—and in the best translation ever—the complete Book of Disquiet, a masterpiece beyond comparison. The Book of Disquiet is the Portuguese modernist master Fernando Pessoa's greatest literary achievement. An "autobiography" or "diary" containing exquisite melancholy observations, aphorisms, and ruminations, this classic work grapples with all the eternal questions. Now, for the first time the texts are presented chronologically, in a complete English edition by master translator Margaret Jull Costa. Most of the texts in The Book of Disquiet are written under the semi-heteronym Bernardo Soares, an assistant bookkeeper. This existential masterpiece was first published in Portuguese in 1982, forty-seven years after Pessoa's death. A monumental literary event, this exciting, new, complete edition spans Fernando Pessoa's entire writing life.

**Academic Women** Ann Brooks. 1997 How and why have women academics experienced patterns of exclusion, segregation and discrimination in higher education? To what extent are academic relationships characterized by endemic sexism in defence of male privilege? What parallels are there in patterns of discrimination and disadvantage for academic women in different cultural contexts? *Academic Women* explores these questions and investigates the relationships between gender, power and the academy through an analysis of the position of academic women in higher education in the UK and New Zealand. It considers the gap between the models of equality and academic fairness which are said to characterize academic life and the sexist reality of the academy. Ann Brooks combines new and original data drawn from statistical evidence and from the results of questionnaires and interviews with British and New Zealand women academics; and this evidence is located within a wider framework of historical evidence on the position of academic women in both countries.

**Gender, Race, and Class in Media** Bill Yousman,William E Yousman,Lori Bindig Yousman,Gail Dines,Jean McMahan Humez.2020-07-24 Gender, Race, and Class in Media provides students a comprehensive and critical introduction to media studies by encouraging them to analyze their own media experiences and interests. The book explores some of the most important forms of today's popular culture—including the Internet, social media, television, films, music, and advertising—in three distinct but related areas of investigation: the political economy of production, textual analysis, and audience response. Multidisciplinary issues of power related to gender, race, and class are integrated into a wide range of articles examining the economic and cultural implications of mass media as institutions. Reflecting the rapid evolution of the field, the Sixth Edition includes 18 new readings that enhance the richness, sophistication, and diversity that characterizes contemporary media scholarship. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Amartya Sen's Capability Approach and Social Justice in Education Melanie Walker,Elaine Unterhalter.2007-07-09 This compelling book introduces Nobel laureate Amartya Sen's capability approach and explores its significance for theory, policy and practice in education. The book looks particularly at questions concerning the education of children, gender equality, and higher education. Contributors hail from the UK, USA, Australia, Italy and Mexico.

*The University* Kern Alexander,F. King Alexander,Fieldon King Alexander.2002 The expectations that society places on higher education are remarkably consistent among nations and the problems and issues faced by college and university leaders are

quite similar worldwide. In *The University* the authors look at colleges and universities in Australia, Canada, South Africa, the United Kingdom and the United States. They examine the purpose of the university, its evolution and change, its degree of autonomy, evaluations of performance and accountability, its role in guaranteeing human rights, financing, and efficiency and the influence of technology on instruction and structure - all issues that are highly relevant to university leaders and legislators who seek to form and fashion responsive and workable institutions and systems of higher education. The authors suggest measures needed to overcome organizational inertia and recognize the necessity of responsiveness to social and economic changes. Different aspects of worldwide human rights struggles that bear on the university are discussed - for instance the situation in South Africa, where higher education institutions are seeking to redress the misdeeds of the past. The authors also address the issue of public versus private institutional competition and the emergence of the private for-profit institution. Finally, the realities of how and to what extent technology can be relied upon to improve college and university instruction is examined. Contributors include Don Aitkin (University of Canberra, Australia), F. King Alexander (University of Illinois), Kern Alexander (University of North Florida), Michael J. Beloff (Trinity College, Oxford), Ian Clark (Council of Ontario Universities), Stephen R. Greenwald (Audrey Cohen College, New York), James J. Mingle (Cornell University), John H. Moore (Grove City College, Pennsylvania), David W. Olien (University of Wisconsin System, Madison), and David R. Woods (Rhodes University, Grahamstown, South Africa).

**Equality Transformed** Herman Belz. A quarter-century after the enactment of the 1964 Civil Rights Act, its legacy remains controversial. The statutory language intended to ensure equal opportunity to all individuals is now interpreted as authorizing both public and private employers to adopt preferential policies

that benefit designated groups based on race and gender. Much the same transformation has occurred in federal contract programs: President Kennedy's executive order that required equal employment opportunity is now understood as mandating minority hiring with numerical goals tantamount to quotas. Herman Belz's *Equality Transformed: A Quarter-Century of Affirmative Action* traces this transformation of equality and how it was brought about by courts, regulatory agencies, and activists. The early champions of civil rights sought to eradicate impediments to advancement for the downtrodden; the ultimate aim was to create a truly colorblind society. Over the years, this goal, while still professed, became even more elusive. Preferences, goals, and timetables - temporary means for the attainment of a nondiscriminatory society - seemed to undermine that noble quest. *Equality Transformed* provides a textured history of affirmative action and its effects upon race relations and our democratic, egalitarian ideals. In recent years, under the impetus of the Reagan Justice Department, the Supreme Court has backed away, however hesitantly, from its earlier sympathy towards race-conscious remedies and preferential treatment. Belz's analysis of recent Supreme Court cases and their antecedents allows us to better understand both the tensions in our society and the fury that the Court has triggered with its recent civil rights pronouncements. Belz makes a strong case for hewing to a forward-looking rather than a backward-looking approach to eradicating discrimination. Anyone interested in the history, law, theory, or morality of affirmative action in employment will find *Equality Transformed* invaluable.

**Helping Doctoral Students Write** Barbara Kamler, Pat Thomson. 2014-03-21 *Helping Doctoral Students Write* offers a proven approach to effective doctoral writing. By treating research as writing and writing as research, the authors offer pedagogical strategies for doctoral supervisors that will assist the production of well-argued and lively dissertations. It is clear that

many doctoral candidates find research writing complicated and difficult, but the advice they receive often glosses over the complexities of writing and/or locates the problem in the writer. Kamler and Thomson provide a highly effective framework for scholarly work that is located in personal, institutional and cultural contexts. The pedagogical approach developed in the book is based on the notion of writing as a social practice. This approach allows supervisors to think of doctoral writers as novices who need to learn new ways with words as they enter the discursive practices of scholarly communities. This involves learning sophisticated writing practices with specific sets of conventions and textual characteristics. The authors offer supervisors practical advice on helping with commonly encountered writing tasks such as the proposal, the journal abstract, the literature review and constructing the dissertation argument. The first edition of this book has helped many academics and thousands of research students produce better written material. Now fully updated the second edition includes: Examples from a broader range of academic disciplines A new chapter on writing from the thesis for peer reviewed journals More advice on reading and note taking, performance and conferences, Further information on developing a personal academic writing style, and Advice on the use of social media (blogs, tweets and wikis) to create trans-disciplinary and trans-national networks and conversations. Their discussion of the complexities of forming a scholarly identity is illustrated throughout by stories and writings of actual doctoral students. In conclusion, they present a persuasive and proven argument that universities must move away from simply auditing supervision to supporting the development of scholarly research communities. Any supervisor keen to help their students develop as academics will find the ideas and practical solutions presented in this book fascinating and insightful reading.

**Caring** Nel Noddings.2013-09-14 With numerous examples to

supplement her rich theoretical discussion, Nel Noddings builds a compelling philosophical argument for an ethics based on natural caring, as in the care of a mother for her child. In *Caring*—now updated with a new preface and afterword reflecting on the ongoing relevance of the subject matter—the author provides a wide-ranging consideration of whether organizations, which operate at a remove from the caring relationship, can truly be called ethical. She discusses the extent to which we may truly care for plants, animals, or ideas. Finally, she proposes a realignment of education to encourage and reward not just rationality and trained intelligence, but also enhanced sensitivity in moral matters.

*The Degradation of the Academic Dogma* Robert A. Nisbet. This is one of the most important books ever published about the American university. Robert Nisbet accuses universities of having betrayed themselves. Over the centuries they earned the respect of society by attempting to remain faithful to what he terms the academic dogma, the pursuit of knowledge for its own sake. The measure of a university's greatness and of the stature of an individual scholar was determined not by the immediate usefulness of the work done, but by how much it contributed to scholarship, learning, and teaching. American universities abandoned this ideal, Nisbet charges, after World War II, welcoming onto their campuses academic entrepreneurs engaged in the higher capitalism, the highly profitable sale of knowledge. This reformation, says Nisbet, has resulted in the greatest change in the structure and values of the university that has occurred since their founding as guilds in the Middle Ages. And it may be responsible, for reasons he spells out in convincing detail, for their eventual demise as centers of learning. In her introduction, Gertrude Himmelfarb pays tribute to Robert Nisbet for his prescience in analyzing the reformation of the university in the postwar period. A second reformation, she says, has further undermined the academic dogma, first by applying the principles

of affirmative action and multiculturalism to the curriculum as well as to student admissions and faculty hiring, and then by deconstructing the disciplines, thus subverting the ideas of truth, reason, and objectivity. The Degradation of the Academic Dogma is even more pertinent today than when it was first published a quarter of a century ago. For those concerned with the integrity of the university and of intellectual life, Robert Nisbet has once again proved himself a prophet and a mentor.

*Diversity and Distrust* Stephen MACEDO, Stephen

Macedo.2009-06-30 Extending the ideas of John Rawls, Macedo defends a civic liberalism in culturally diverse democracies that supports the legitimacy of reasonable efforts to inculcate shared political virtues while leaving many larger questions of meaning and value to private communities.

**Global Village Or Global Pillage** Jeremy Brecher, Tim

Costello.1998 In clear, accessible language, Brecher and Costello describe how people around the world have started challenging the New World Economy. From the Zapatistas of Chiapas to students in France to the broad-based anti-NAFTA and anti-GATT coalitions in the United States, opposition to economic globalization, Brecher and Costello argue, is becoming a worldwide revolt.

**Science, the Endless Frontier** Vannevar Bush.2021-02-02 The classic case for why government must support science—with a new essay by physicist and former congressman Rush Holt on what democracy needs from science today Science, the Endless Frontier is recognized as the landmark argument for the essential role of science in society and government’s responsibility to support scientific endeavors. First issued when Vannevar Bush was the director of the US Office of Scientific Research and Development during the Second World War, this classic remains

vital in making the case that scientific progress is necessary to a nation's health, security, and prosperity. Bush's vision set the course for US science policy for more than half a century, building the world's most productive scientific enterprise. Today, amid a changing funding landscape and challenges to science's very credibility, *Science, the Endless Frontier* resonates as a powerful reminder that scientific progress and public well-being alike depend on the successful symbiosis between science and government. This timely new edition presents this iconic text alongside a new companion essay from scientist and former congressman Rush Holt, who offers a brief introduction and consideration of what society needs most from science now. Reflecting on the report's legacy and relevance along with its limitations, Holt contends that the public's ability to cope with today's issues—such as public health, the changing climate and environment, and challenging technologies in modern society—requires a more capacious understanding of what science can contribute. Holt considers how scientists should think of their obligation to society and what the public should demand from science, and he calls for a renewed understanding of science's value for democracy and society at large. A touchstone for concerned citizens, scientists, and policymakers, *Science, the Endless Frontier* endures as a passionate articulation of the power and potential of science.

**Pygmalion in Management** J. Sterling Livingston. 2009-04-24  
Numerous studies show that people will rise, or fall, to the level where their superiors believe them capable. As a manager, it is up to you to have high expectations for your employees, and to communicate those expectations to them. In *Pygmalion in Management*, J. Sterling Livingston urges you to understand the power you have over your subordinates' success, and use it to benefit everyone involved. Since 1922, *Harvard Business Review* has been a leading source of breakthrough ideas in management practice. The *Harvard Business Review Classics* series now offers

you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

The Kindle Owners' Lending Library has hundreds of thousands of free Kindle books available directly from Amazon. This is a lending process, so you'll only be able to borrow the book, not keep it. The first step is to go to make sure you're logged into your Google Account and go to Google Books at [books.google.com](http://books.google.com). While modern books are born digital, books old enough to be in the public domain may never have seen a computer. Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of mobile devices and eBook readers. Use the download link to download the file to your

computer. If the book opens in your web browser instead of saves to your computer, right-click the download link instead, and choose to save the file. [FreeBooksHub.com](http://FreeBooksHub.com) is another website where you can find free Kindle books that are available through Amazon to everyone, plus some that are available only to Amazon Prime members. [eReaderIQ](http://eReaderIQ) may look like your typical free eBook site but they actually have a lot of extra features that make it a go-to place when you're looking for free Kindle books. Project Gutenberg (named after the printing press that democratized knowledge) is a huge archive of over 53,000 books in EPUB, Kindle, plain text, and HTML. You can download them directly, or have them sent to your preferred cloud storage service (Dropbox, Google Drive, or Microsoft OneDrive). Browse the free eBooks by authors, titles, or languages and then download the book as a Kindle file (.azw) or another file type if you prefer. You can also find ManyBooks' free eBooks from

the genres page or recommended category. Where to Get Free eBooks
