Sit Down and Shut Up Brad Warner.2010-10-05 In 2003, Brad Warner blew the top off the Buddhist book world with his irreverent autobiography/manifesto, Hardcore Zen: Punk Rock, Monster Movies, and the Truth about Reality. Now in his second book, Sit Down and Shut Up, Brad tackles one of the great works of Zen literature, the Shobogenzo, by thirteenth-century Zen master Dogen. Illuminating Dogen's enigmatic teachings in plain language, Brad intertwines musings on sex, meditation, death, God, sin, and happiness with an exploration of the punk rock ethos. In chapters such as "Evil Is Stupid," "Kill Your Anger," and "Enlightenment Is for Sissies," Brad melds the antiauthoritarianism of punk with that of Zen, mixing in a travelogue of his triumphant return to Ohio to play in a reunion concert of Akron punk bands. For those drawn to Buddhist teachings but scared off by their stiff austerity, Brad writes with a sharp smack of truth, in teachings and stories that cut to the heart of reality.

The Imperative of Responsibility Hans Jonas.1984 Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

Embodied Politics in Visual Autobiography Sarah Brophy,Janice Hladki.2014-11-05 From reality television to film, performance, and video art, autobiography is everywhere in today's image-obsessed age. With contributions by both artists and scholars, Embodied Politics in Visual Autobiography is a unique examination of visual autobiography's involvement in the global cultural politics of health, disability, and the body. This provocative collection looks at images of selfhood and embodiment in a variety of media and with a particular focus on bodily identities and practices that challenge the norm: a pregnant man in cyberspace, a fat activist performance troupe, indigenous artists intervening in museums, transnational selves who connect disability to war, and many more. The chapters in Embodied Politics in Visual Autobiography reflect several different theoretical approaches but share a common concern with the ways in which visual culture can generate resistance, critique, and creative interventions. With contributions that investigate digital media, installation art, graphic memoir, performance, film, reality television, photography, and video art, the collection offers a wide-ranging critical account of what is clearly becoming one of the most important issues in contemporary culture.

Animal Beauty Christiane Nusslein-Volhard.2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Integral Spirituality Ken Wilber.2007-11-13 This cutting-edge theory of spirituality for today's global society honors the truths of modern science and postmodern culture while incorporating the wisdom of the great world religions Applying his highly acclaimed integral approach, Ken Wilber formulates a theory of spirituality that honors the truths of modernity and postmodernity—including the revolutions in science and culture—while incorporating the essential insights of the great religions. He shows how spirituality today combines the enlightenment of the East, which excels at cultivating higher states of consciousness, with the enlightenment of the West, which offers developmental and psychodynamic psychology. Each contributes key components to a more integral spirituality. On the basis of this integral framework, a radically new role for the world's religions is proposed. Because these religions have such a tremendous influence on the worldview of the majority of the earth's population, they are in a privileged position to address some of the biggest conflicts we face. By adopting a more integral view, the great religions can act as facilitators of human development: from magic to mythic to rational to pluralistic to integral—and to a global society that honors and includes all the stations of life along the way.

Palace of Flies Walter Kappacher. 2022-05-03 One of those rare biographical novels that bring a whole world to life in a way that lingers in memory. --Jay Parini, author of *Borges and Me* This absorbing, sensitive novel portrays a famed author in a moment of crisis: an aging Hugo von Hofmannsthal returns to a summer resort outside of Salzburg that he visited as a child. But in the spa town where he once thrilled to the joys of youth, he now feels unproductive and uninspired, adrift in the modern world born after World War One. Over ten days in 1924 in a ramshackle inn that has been renamed the Grand Hotel, Hofmannsthal fruitlessly attempts to complete a play he's long been wrestling with. The writer is plagued by feelings of loneliness and failure that echo in a buzz of inner monologues, imaginary conversations and nostalgic memories of relationships with glittering cultural figures. *Palace of Flies* conjures up an individual state of distress and disruption at a time of fundamental societal transformation that speaks eloquently to our own age.

The Way of Archery Jie Tian, Justin Ma. 2015-02-28 *The Way of Archery* provides a detailed introduction to practicing archery in the traditional Chinese military style. It explains the basics of how to shoot using the Asian thumb ring: proper posture, training regimen, equipment, and avoiding pitfalls in shooting. The thorough translation and commentary (with original and new illustrations) provide a fresh and practical perspective on Gao Ying's 1637 archery treatise (which, itself, influenced generations of archers in East Asia). The authors themselves are active practitioners of Chinese archery, having spent an endless amount of time and effort vetting their understanding of this old manual and putting its ideas into practice. Through this process, the authors have been able to make this archery text accessible to modern readers. Not only will the reader come to understand the technical side of the *Way of Archery*, but will connect with the philosophy and spirit of the ancient Chinese warriors.

PolyluxMarx Valeria Bruschi, Antonella Muzzupappa, Sabine Nuss, Anne Stecklner, Ingo Stützle. 2014-03-01 The Great Recession, triggered by the collapse of financial markets in 2008, struck with such ferocity that millions of people began to question the rationality of our capitalist economic system. And as scholars, journalists, and activists tried to comprehend what was happening, they were forced to look deeply into the nature of capitalism—inevitably leading them to the work of Karl Marx. Now, Marx is enjoying a worldwide rediscovery and resurrection, and his masterwork, *Capital*, has found its way back into college classrooms, labor unions, the Occupy movement, study groups, and into the hands of disillusioned young people. Reading *Capital* can be a daunting endeavor and most readers need guidance when tackling this complex work. *PolyluxMarx* provides such guidance. Developed by scholars and political activists associated with the Rosa Luxemburg Stiftung (Foundation), one of the leading political education institutions in Germany, this book has been field tested with groups studying Marx's masterpiece over several years. It consists of a large set of PowerPoint presentations, combined with detailed annotations and suggestions for ways to discuss the material. Each page illustrates a central argument from *Capital*, provides helpful introductory texts, and supplies notes on methodology and teaching tips. *PolyluxMarx* is an ingeniously devised illustrated workbook that will help readers grasp the key arguments of *Capital*. It will prove invaluable to the curious reader of all ages, as well as to students, teachers, workers, activists, and study groups.

Women Philosophers Ethel Kersey, Calvin O. Schrag. 1989-09-12 Women philosophers have not received their due in the discipline's reference works. Kersey's international biographical dictionary of women philosophers from ancient times up until the present redresses that situation. . . . This very capably fills a very evident gap in the philosophy reference corpus. *Wilson Library Bulletin* This work developed from Kersey's discovery that there existed no biographical dictionaries of women philosophers, and few references to women in textbooks on the history of philosophy. Intended to fill that void, this source book covers more than 170 women born before 1920 who wrote about or pondered questions of Western intellectual life. Using broad criteria, Kersey has included any woman who conducted serious work in the traditional fields of philosophy, including metaphysics, ethics, aesthetics, or logic. Although acknowledging that the field has been dominated by men, the author excluded feminist scholars on the grounds that they have been given serious attention elsewhere, and also omitted women theologians or devotional writers. The volume includes extensive bibliographies of both primary and secondary works about each philosopher. An in-depth introduction establishes the context for the reference, and an appendix provides charts showing women philosophers by century, nationality, and discipline. An index of names completes the source book. This reference will be an important addition to university and public libraries, and a valuable reference for courses in philosophy and women's studies.
