Fundamentals of Investment Appraisal Martina Röhrich.2014-09-09 How to make sound investment decisions: Fundamentals of Investment Appraisal, 2nd edition, is based on long-term experience with students and is written in an easily understood style. A case study has been constructed to illustrate all methods discussed. The goal of the book is to pace a sure way through the variety of methods in investment appraisal.

Mathematical basics are specifically explained in detail. The book shows clearly why there are different methods in investment appraisal and on where to focus in a given situation. As all methods are introduced by the same case study, it is easy to compare and evaluate the results. The statements in the text are further consolidated by abstracts and evaluations of each of the methods. Exercises with extensive solutions will lead to the confidence which is necessary for an ease of handling the investment appraisal techniques and for a good preparation for students' exams. German and international students at universities and other institutions of higher education will find this book an excellent systematic preparation for their exams.

Solvency II in the Insurance Industry Maria Heep-Altiner, Martin Mullins, Torsten Rohlf.2019-02-22 This book illustrates the EU-wide Solvency II framework for the insurance industry, which was implemented on January 1, 2016, after a long project phase. Analogous to the system for banks, it is based on three pillars and the authors analyze the complete framework pillar by pillar with a consistent data model for a non-life insurer, which was developed by the Research Group Financial & Actuarial Risk Management (FaRis) at the Institute for Insurance Studies of the TH Köln - University of Applied Sciences. The book leverages the long-standing and close cooperation between the University of Limerick (Ireland) and the Institute for Insurance Studies at TH Köln - University of Applied Sciences (Germany).

Science Education Research and Practice in Europe Doris Jorde, Justin Dillon.2012-12-17 Each volume in the 7-volume series The World of Science Education reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe, Arab States, and Sub-Saharan Africa. The focus of this Handbook is on science education in Europe. In producing this volume the editors have invited a range of authors to describe their research in the context of developments in the continent and further afield. In reading this book you are invited to consider the historical, social and political contexts that have driven developments in science education research over the years. A unique feature of science education in Europe is the impact of the European Union on research and development over many years. A growing number of multi-national projects have contributed to the establishment of a community of researchers increasingly accepting of methodological diversity. That is not to say that Europe is moving towards homogeneity, as this volume clearly shows.

And Then Life Happens Auma Obama.2012-04-24 A moving account by Auma Obama about her life in Africa and Europe, and her relationship with her brother, Barack Obama. While her younger brother Barack grew up in the U.S. and Indonesia, Auma Obama's childhood played out at the other end of the world in a remote village in Kenya, the birthplace of the siblings' shared father. Barack and Auma met for the first time in the 1980s, and they built a lasting relationship which lead to travels together in Kenya, research into their family history and finally Auma's support for her brother's political career and eventual bid for the U.S. presidency. Auma spent sixteen years studying and living in Germany, moved to England for love, and gave birth to a daughter there. The tension between her original and chosen worlds and cultures was a constant challenge, and eventually Auma returned to Africa and worked to support young men and women in shaping their futures. In *And Then Life Happens*, her candid and emotional memoir, Auma shares her own story as well as recollections of and experiences with her famous brother, who says about their first encounter: I hugged her, we looked at each other, and laughed. I knew right then that I loved her.

Two hundred pre-programmed signal engineering systems and design transparencies are provided on the CD-ROM. There are numerous videos, more than 250 photos, and - most important - all living experiments and their results are visualized.

Learning to Teach Neville Bennett, Clive Carre. 2002-01-31 The Leverhulme Primary Project reported here provides for the first time evidence on what is actually happening in teacher education today and on how novice teachers learn their craft. The book looks in detail at the experience of all the student teachers on one post graduate primary teacher training course and of those responsible for them in their university and in schools. It tracks them as they work to acquire the appropriate subject and pedagogical knowledge and as their own beliefs about teaching develop during the course. A final section follows some of the students through their first year as qualified teachers. Teacher education is going through a period of radical change and more people than ever before now have some responsibility, whether in higher education or in school for the training of teachers. None of them can afford to ignore the fresh insights into how teachers are made contained in this book.

Quality of Instruction in Physics Hans E. Fischer, Peter Labudde, Knut Neumann, Jouni Viiri. 2014 This book reports the findings from the tri-national video study Quality of Instruction in Physics (QuIP). Within the scope of the QuIP study, physics instruction was investigated in a total of 103 classes from Finland, North Rhine-Westphalia (Germany) and German-speaking Switzerland. The main aim was to identify typical patterns of physics instruction of the three samples and to investigate conditions under which these patterns are successful with respect to students' learning, interest and motivation. Among others instructional characteristics, the quality of students' practical work, successful patterns of sequencing, the subject matter structure and teaching strategies were investigated by means of analyses of video-recorded lessons. Variables external to instruction that were investigated included teachers' professional knowledge and students' cognitive abilities. The study followed a pre-post-design with data collection prior to and after an instructional unit on electrical energy and power. The results are well in line with the findings from large-scale international studies indicating a particularly successful instructional pattern in Finland. A comparison of characterisation of instruction in comparison between the three countries reveals important findings for the improvement of the teaching and learning of physics in secondary school education.

European Company Law Andrea Vicari. 2021-03-08 The book provides students of European company law courses, scholars and practitioners with an overview. Although company law remains mainly regulated at the level of national laws, it has become important to obtain a systematic view of the main directives in the field of company law, the EU Court of Justice's jurisprudence, the European Model Company Act and the state of implementation of these directives in the member states of the Union. The book therefore contains, in addition to the illustration of the law laid down by EU legislative bodies and the related soft laws, detailed references to the most important domestic legislations and case laws, in order to make them known and usable as much as possible. Moreover, the book allows identifying the most relevant current legislative trends and the main historical reasons for divergences.
