MTA Microsoft Technology Associate Exam 98-365 Windows Server Administration Fundamentals ExamFOCUS Study Notes and Review Questions 2015 Edition Examreview.2015-02-09 In the early days of certification study preparation the focus was almost exclusively on cramming. We had a new medium for content that didn't come with the same restrictions as the more traditional forms. We could present material as we felt was necessary and we could do it quicker. As the certification industry grew, so did the approach to gaining readership. In many cases, publishers had their focus shifted away from ultimate understanding of what was being covered, to producing word-for-word exact-match contents significantly motivated by increasing revenue. While it's definitely easier to produce content by going that route, we don't believe it's the only way to conquer an exam. At the

same time, we don't believe readers need the 500-page megatext. As long as there's a balance, we are happy. Our mission at ExamREVIEW is to be a part of that balance. Our No-Frills ExamFOCUS study notes are written to be plain simple and straight forward. We don't paginate material to increase page count, we break them apart across logical boundaries to improve readability. All fancy extra features are removed. We provide study notes that are concise and occupying less pages (so to save trees). And we want you to be up and ready as easy as possible! We are the original developer of our NO FRILLS Exam prep products. Contents are developed entirely in-house, basing on our own research efforts. We believe that with the right preparation material and the right study approach, everyone can clear exams ethically. Many of our products include practice review questions. Think of these as challenges presented to you so to assess your comprehension of the subject matters.
