**Why States Recover** Greg Mills.2015-01-03 State failure takes many forms. Somalia offers one extreme. The country's prolonged civil war led to the collapse of central authority, with state control devolving to warlord-led factions that competed for the spoils of local commerce, political power, and international aid. Malawi, on the other hand, is at the other end of the scale. During President Bingu's second term in office, the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics. On the surface, Malawi's economy seemed largely stable; underneath, however, the polity was fractured and the economy broken. In between these two extremes of state failure are all manner of examples, many of which Mills explores in the fascinating and profoundly personal *Why States Recover*. Throughout he returns to his key questions: how do countries recover? What roles should both insiders and outsiders play to aid that process? Drawing on research in more than thirty countries, and incorporating interviews with a dozen leaders, Mills examines state failure and identifies instances of recovery in Latin America, Asia, and Africa. For anyone interested in the reasons behind states' failure, and remedies to ensure future economic stability, it is important reading.

Carabid Beetles: Ecology and Evolution K. Desender, M.

Dufrêne, M. Loreau, M.L. Luff, J-P. Maelfait. 2013-04-17 The Carabidae form one of the largest and best studied families of insects, occurring in nearly every terrestrial habitat. The contributions included in this book cover a broad spectrum of recent research into this beetle family, with an emphasis on various aspects of ecology and evolution. They deal both with individual carabid species, for example in studies on population and reproductive biology or life history in general, and with ground beetle communities, as exemplified in papers treating assemblages in natural habitats, on agricultural land and in forests. Disciplines range from biogeography and faunistics, over morphology, taxonomy and phylogenetics, ecophysiology and functional ecology, to population, community, conservation and landscape ecology. This volume is the result of the 8th European Carabidologists' Meeting, 2nd International Symposium of Carabidology, September 1-4, 1992, Belgium.

The book evaluates secularism as it exists today - its formations and discontents within contemporary discourses of power, terror, religion and cosmopolitanism - and the focus on these two continents gives critical attention to recent political and cultural developments where secularism and multiculturalism have impinged in deeply problematical ways, raising bristling ideological debates within the functioning of modern state bureaucracies. *Democracy and Education* John Dewey. 1916 John Dewey's Democracy and Education addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in

education and for the necessity of universal education for the advancement of self and society. First published in 1916, Democracy and Education is regarded as the seminal work on public education by one of the most important scholars of the century.

**Pantomime Terror** John Hutnyk.2014-02-28 Pantomime is a theatrical form that has come to rule our everyday lives as terror. In the early years of the 21st century, a dissembling political demonology has sometimes placed otherwise merely lyrical musicians in a volatile predicament. The discussion here is of Fun-da-Mental's Aki Nawaz portrayed as a 'suicide rapper', Asian Dub Foundation striking poses from the street in support of youth in Paris and Algiers, and M.I.A., born free fighting immigration crackdown with atrocity video. Along the way, bus bombs, comedy circuits, critical theory, Arabian Nights, Bradley Wiggins, Dinarzade, Karl Marx, Paris boulevards, Molotov, Mao, the Eiffel Tower, reserve armies, lists, Richard Wagner, Samina Malik, Slavoj Žižek, Freudian slips, red-heads, Guantanamo. The book offers some sharp critiques of our contemporary complacency, and the failures of theory as more than ten years of war on terror turns anxiety at home and drone-strike assassinations abroad into a normal everyday. This pantomime is a terror story told over and over to distract from the workings of a despotic power. The need for an adequate (winning) counter-narrative was never more clear.

**Revolting Subjects** Doctor Imogen Tyler.2013-04-11 Revolting Subjects is a groundbreaking account of social abjection in contemporary Britain, exploring how particular groups of people are figured as revolting and how they in turn revolt against their abject subjectification. The book utilizes a number of high-profile and in-depth case studies - including 'chavs', asylum seekers, Gypsies and Travellers, and the 2011 London riots - to examine the ways in which individuals negotiate restrictive neoliberal ideologies of selfhood. In doing so, Tyler argues for a deeper psychosocial understanding of the role of representational forms in producing marginality, social exclusion and injustice, whilst also detailing how stigmatization and scapegoating are resisted through a variety of aesthetic and political strategies. Imaginative and original, Revolting Subjects introduces a range of new insights into neoliberal societies, and will be essential reading for those concerned about widening inequalities, growing social unrest and social justice in the wider global context.

**Citizenship and Belonging in France and North America**

Ramona Mielusel, Simona Emilia Pruteanu. 2020-01-09 The first decades of the new millennium have been marked by major political changes. Although The West has wished to revisit internal and international politics concerning migration policies, refugee status, integration, secularism, and the dismantling of communitarianism, events like the Syrian refugee crisis, the terrorist attacks in France in 2015-2016, and the economic crisis of 2008 have resurrected concepts such as national identity, integration, citizenship and re-shaping state policies in many developed countries. In France and Canada, more recent public elections have brought complex democratic political figures like Emmanuel Macron and Justin Trudeau to the public eye. Both leaders were elected based on their promising political agendas that aimed at bringing their countries into the new millennium; Trudeau promotes multiculturalism, while Macron touts the diverse nation and the inclusion of diverse ethnic communities to the national model. This edited collection aims to establish a dialogue between these two countries and across disciplines in search of such discursive illustrations and opposing discourses. Analyzing the cultural and political tensions between minority groups and the state in light of political events that question ideas of citizenship and belonging to a multicultural nation, the chapters in this volume serve as a testimonial to the multiple views on the political and public perception of multicultural practices and their national and international applicability to our current geopolitical context.

**Sulfur** Gerald Kutney. 2007 This attractive volume presents the history, characteristics, and uses for that vibrant yellow element, sulfur. Commercial sulfuric acid production from the early 16th century until today is reviewed, spanning the Ancient and Renaissance periods, the Industrial Age (to which sulfur was

vitality important), and the Sulfur War of 1840. The book introduces the Sulfur Age and the processes of this period -- such as the Nordhausen, Bell and Leblanc methods --, then goes on to review native sulfur production in Sicily, once a major supplier to the world. Colorful characters abound here, including the Gabelloti, Doppioni, and wine merchants. The focus shifts to Frasch Sulfur production, with a portrait of Herman Frasch, his life and career, and a look at areas touched by his legacy (e.g., Texas, Mexico, Poland and Iraq). Moving to present day, the book presents recovered sulfur -- derived from sour gas and oil -- which constitutes 90% of today's elemental sulfur supply, and looks to Canada, a powerhouse supplier of Recovered Sulfur. An entire chapter is devoted to the modern-day sulfur entrepreneur, with a profile of various investors (from the reluctant to the private and institutional), and evaluates the benefits of adopting revolutionary technologies. Finally, the book forecasts the sulfur industry's future and potential supply sources, such as worldwide oil sands. If you need a single, comprehensive book on sulfur, this is a book for your library.

**Imagining Muslims in South Asia and the Diaspora** Claire Chambers, Caroline Herbert.2014-08-13 Literary, cinematic and media representations of the disputed category of the 'South Asian Muslim' have undergone substantial change in the last few decades and particularly since the events of September 11, 2001. Here we find the first book-length critical analysis of these representations of Muslims from South Asia and its diaspora in literature, the media, culture and cinema. Contributors contextualize these depictions against the burgeoning post-9/11 artistic interest in Islam, and also against cultural responses to earlier crises on the subcontinent such as Partition (1947), the 1971 Indo-Pakistan war and secession of Bangladesh, the 1992 Ayodhya riots, the 2002 Gujarat genocide and the Kashmir conflict. Offering a comparative approach, the book explores connections between artists' generic experimentalism and their interpretations of life as Muslims in South Asia and its diaspora, exploring literary and popular fiction, memoir, poetry, news media, and film. The collection highlights the diversity of representations of Muslims and the range of approaches to questions of Muslim religious and cultural identity, as well as secular discourse. Essays by leading scholars in the field highlight the significant role that literature, film, and other cultural products such as music can play in opening up space for complex reflections on Muslim identities and cultures, and how such imaginative cultural forms can enable us to rethink secularism

Blue Revolution Ian Calder.2012-05-16 'Blue Revolution upturns some environmental applecarts - not for the hell of it, but so we can manage our environment better.' Fred Pearce, New Scientist This updated and revised edition of The Blue Revolution provides further evidence of the need to integrate land management decision-making into the process of integrated water resources management. It presents the key issues involved in finding the balance between the competing demands for land and water: for food and other forms of economic production, for sustaining livelihoods, and for conservation, amenity, recreation and the requirements of the environment. It also advocates the means and methodologies for addressing them. A new chapter, 'Policies, Power and Perversity,' describes the perverse outcomes that can result from present, often myth-based, land and water policies which do not consider these land and water interactions. New research and case studies involving ILWRM concepts are presented for the Panama Canal catchments and in relation to afforestation proposals for the UK Midlands.

**Invented Religions** Carole M. Cusack.2016-05-06 Utilizing contemporary scholarship on secularization, individualism, and consumer capitalism, this book explores religious movements founded in the West which are intentionally fictional: Discordianism, the Church of All Worlds, the Church of the SubGenius, and Jediism. Their continued appeal and success, principally in America but gaining wider audience through the 1980s and 1990s, is chiefly as a result of underground publishing and the internet. This book deals with immensely popular subject matter: Jediism developed from George Lucas' Star Wars films; the Church of the Flying Spaghetti Monster, founded by 26-year-old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools; Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students. The Church of All Worlds' focus on Gaia theology and environmental issues makes it a popular focus of attention. The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late/post-modern religious forms, including the use of fiction as part of a bricolage for spirituality, identity-

formation, and personal orientation.
