The Optical Unconscious Rosalind E. Krauss.1994-07-25 *The Optical Unconscious* is a pointed protest against the official story of modernism and against the critical tradition that attempted to define modern art according to certain sacred commandments and self-fulfilling truths. The account of modernism presented here challenges the vaunted principle of vision itself. And it is a very different story than we have ever read, not only because its insurgent plot and characters rise from below the calm surface of the known and law-like field of modernist painting, but because the voice is unlike anything we have heard before. Just as the artists of the optical unconscious assaulted the idea of autonomy and visual mastery, Rosalind Krauss abandons the historian's voice of objective detachment and forges a new style of writing in this book: art history that insinuates diary and art theory, and that has the gait and tone of fiction. *The Optical Unconscious* will be deeply vexing to modernism's standard-bearers, and to readers who have accepted the foundational principles on which their aesthetic is based. Krauss also gives us the story that Alfred Barr, Meyer Shapiro, and Clement Greenberg repressed, the story of a small, disparate group of artists who defied modernism's most cherished self-descriptions, giving rise to an unruly, disruptive force that persistently haunted the field of modernism from the 1920s to the 1950s and continues to disrupt it today. In order to understand why modernism had to repress the optical unconscious, Krauss eavesdrops on Roger Fry in the salons of Bloomsbury, and spies on the toddler John Ruskin as he amuses himself with the patterns of a rug; we find her in the living room of Clement Greenberg as he complains about smart Jewish girls with their typewriters in the 1960s, and in colloquy with Michael Fried about Frank Stella's love of baseball. Along the way, there are also narrative encounters with Freud, Jacques Lacan, Georges Bataille, Roger Caillois, Gilles Deleuze, and Jean-François Lyotard. To embody this optical unconscious, Krauss turns to the pages of Max Ernst's collage novels, to Marcel Duchamp's hypnotic Rotoreliefs, to Eva Hesse's luminous sculptures, and to Cy Twombly's, Andy Warhol's, and Robert Morris's scandalous decoding of Jackson Pollock's drip pictures as Anti-Form. These artists introduced a new set of values into the field of twentieth-century art, offering ready-made images of obsessional fantasy in place of modernism's intentionality and unexamined compulsions.

These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

The Aesthetics of Enchantment in the Fine Arts M. Kronegger,Anna-Teresa Tymieniecka.2013-03-14 Let us revive the true sense of fine arts: enchantment! In the conceptualised, commercialised, artificial approach to fine arts, we forgot its authentic experiential sense. It lies at the imaginative heart of all arts there to be retrieved by the creative recipient as the very 'truth of it all'.

Pre-reflective Consciousness Sofia Miguens,Gerhard Preyer,Clara Bravo Morando.2015-10-16 *Pre-reflective Consciousness: Sartre and Contemporary Philosophy of Mind* delves into the relationship between the current analytical debates on consciousness and the debates that took place within continental philosophy in the twentieth century and in particular around the time of Sartre and within his seminal works. Examining the return of the problem of subjectivity in philosophy of mind and the idea that phenomenal consciousness could not be reduced to functional or cognitive properties, this volume includes twenty-two unique contributions from leading scholars in the field. Asking questions such as: Why we should think that self-consciousness is non-reflective? Is subjectivity first-personal? Does consciousness necessitate self-awareness? Do we need pre-reflective self-consciousness? Are ego-disorders in psychosis a dysfunction of pre-reflective self-awareness? How does the Cartesian duality between body and mind fit into Sartre's conceptions of consciousness?

The Natural Sciences and the Social Sciences Robert S. Cohen.2013-06-29 *Natural Sciences and the Social Sciences* contains a series of explorations of the different ways in which the social sciences have interacted with the natural sciences. Usually, such interactions are considered to go only 'one way': from the natural to the social sciences. But there are several important essays in this volume which show how developments in the social sciences have affected the natural sciences - even the 'hard' science of physics. Other essays deal with various types of interaction since the

Scientific Revolution. In his general introductory chapter, Cohen sets some general themes concerning analogies and homologies and the use of metaphors, drawing specific examples from the use of concepts of physics by marginalist economists and of developments in the life sciences by organismic sociologists. The remaining chapters, which explore the different ways in which the social sciences and the natural sciences have actually interacted, are written by leaders in the field of history of science, drawn from a wide range of countries and disciplines. The book will be of great interest to all historians of science, philosophers interested in questions of methodology, economists and sociologists, and all social scientists concerned with the history of their subject and its foundations.

European Cultural Diplomacy and Arab Christians in Palestine, 1918-1948 Karène Sanchez Summerer, Sary Zananiri. 2021 This open access book investigates the transnationally connected history of Arab Christian communities in Palestine during the British Mandate (1918-1948) through the lens of the birth of cultural diplomacy. Relying predominantly on unpublished sources, it examines the relationship between European cultural agendas and local identity formation processes and discusses the social and religious transformations of Arab Christian communities in Palestine via cultural lenses from an entangled perspective. The 17 chapters reflect diverse research interests, from case studies of individual archives to chapters that question the concept of cultural diplomacy more generally. They illustrate the diversity of scholarship that enables a broad-based view of how cultural diplomacy functioned during the interwar period, but also the ways in which its meanings have changed. The book considers British Mandate Palestine as an internationalised node within a transnational framework to understand how the complexity of cultural interactions and agencies engaged to produce new modes of modernity. Karène Sanchez Summerer is Associate Professor at Leiden University, The Netherlands. Her research considers the European linguistic and cultural policies and the Arab communities (1860-1948) in Palestine. She is the PI of the research project (2017-2022), 'CrossRoads: European Cultural Diplomacy and Arab Christians in Palestine (1918-1948)' (project funded by The Netherlands National Research Agency, NWO). She is the co-editor of the series 'Languages and Culture in History' with W. Frijhoff, Amsterdam University Press. She is part of the College of Experts: ESF European Science Foundation (2018-2021). Sary Zananiri is an artist and cultural historian. He is currently a Postdoctoral Fellow on the NWO funded project 'CrossRoads: European Cultural Diplomacy and Arab Christians in Palestine (1918-1948)' at Leiden University, The Netherlands.

Personal Structures Karlyn de Jongh, Sarah Gold. 2013 Personal Structures presents an ongoing project that deals with questions concerning time, space and existence. This is the second book in the Time. Space. Existence series and involves the personal participation of 46 artists from different parts of the world, in a combination of internationally renowned artists and others whose oeuvre is less known. The concepts time, space and existence are highlighted in very personal ways and from unusual points of view. The many photographs of the artworks and encounters with the artists convey fascinating insights into their being, ideas and work. Seven art projects with established artists centralise their thoughts to a great extent. In addition, the book emphasises two Personal Structures exhibitions that were part of the Venice Biennale in 2011 and 2013. This publication also contains several interviews, artists' statements, and symposium contributions that discuss the theme of this book in detail. Personal Structures was initiated in 2002 by the Dutch artist Rene Rietmeyer. His observation that even in the most distant places artists are occupied with time, space and existence, led to the idea of bringing several of these artists together in publications, symposia and exhibitions. English and Japanese text.

New Orleans and the Global South Ottmar Ette, Gesine Müller. 2021 Innerhalb der USA gilt New Orleans seit jeher als die unamerikanischste“ Stadt, als exotisch und anders, gar als sozio-geographischer Unfall“. Hier überkreuzen sich nicht nur die Einflüsse verschiedener Kolonialkulturen, sondern auch die Routen des atlantischen Sklavenhandels und der asiatischen Arbeitsmigration und nicht zuletzt die ideellen wie materiellen Transferbewegungen zwischen den beiden Amerikas. Der vorliegende Band macht es sich zur Aufgabe, diese vielfältigen transarealen Zirkulationsprozesse zu analysieren und das Potential New Orleans' zur paradigmatischen Metropole des Globalen Südens auszuloten. Im Fokus stehen verschiedene Formen der kulturellen Kreolisierung, wie sie sich in der Sprache, der Literatur, der Musik, aber auch in Alltagsphänomenen wie dem Karneval oder Computerspielen manifestieren. Within the USA, New Orleans has long been considered the 'un-American' city, seen as exotic and different, even as a 'socio-geographical accident'. It is a crossroads not only for the influences of different colonial cultures but also for the routes of the Atlantic slave trade and immigration of Asian workers, and not least for material and non-material transfer between the two Americas. This volume seeks to analyse these manifold transareal circulation processes and to explore New Orleans's potential as a paradigmatic metropolis of the Global South. The focus is on different forms of creolisation as manifested in language, literature and music, but also in everyday phenomena such as Carnival or computer games.

Decent Working Time International Labour Office. 2006 Including international comparative analysis alongside national case studies, this volume offers a wealth of information on the new trends which have emerged over the past decades - all of which were discussed at the recent 9th International Symposium on Working Time, Paris (2004). It looks at the increasing use of results-based employment relationships for managers and professionals, and the increasing fragmentation of time to more closely tailor staffing needs to customer requirements (e.g., short-hours, part-time work). Moreover, as operating/opening hours rapidly expand toward a 24-hour and 7-day economy, the book considers how this has resulted in a growing diversification, decentralization, and individualization of working hours, as well as an increasing tension between enterprises' business requirements and workers' needs and preferences regarding their hours. This new reality has raised some other challenging issues as well and the volume addresses those such as increasing employment insecurity and instability, time-related social inequalities, particularly in relation to gender, workers' ability to balance their paid work with their personal lives, and even the synchronization of working hours with social times, such as community activities.

Mental Health Outcome Measures Graham Thornicroft, Michele Tansella. 2012-12-06 Mental Health Outcome Measures provides an authoritative review of measurement scales currently available to assess the outcomes of mental health service intervention. The excerpt of summaries by leading writers in the field assess the contributions of scale in areas including mental state examination, quality of life, patient satisfaction, needs assessments, measurement of service cost, global functioning scales, and social disability. These chapters provide a critical appraisal of how far such scales have been shown to be reliable and valid, and provide valuable insights in to their ease of use. This book will provide an invaluable reference manual for those who want to take research on mental health services, and for those who need to interpret this research for policy, planning, and clinical practice.

The Utilization of Classroom Peers as Behavior Change Agents Phillip S. Strain. 2013-11-11 Since the early 1800's, children have been taught and encouraged to function as instructional agents for their classroom peers. However, it was not until the last decade that peer-mediated intervention was studied in a rigorous, systematic fashion. The purpose of this edited volume is to provide an up-to-date and complete account of empirical research that addresses the general efficacy of classroom peers as behavior change agents. As a result of various social and legal developments, such as the passage of Public Law 94-142 and its accompanying demand for individualized instruction, peer-mediated interventions

seem likely to proliferate. As I have noted elsewhere (Strain, this volume), close adherence to the principle of individualized programming has rendered obsolete the adults only model of classroom instruction. Whether the utilization of peers in the instructional process comes to be viewed by school personnel as a positive adjunct to daily classroom practices depends in large measure on our ability to carefully design, conduct, and communicate the findings of applied research. I trust that this volume will function both to accurately communicate existing findings and to stimulate further study. My colleagues who have generously contributed their time and skill to this volume have my deepest appreciation. They have performed their various tasks in a timely, professional manner and, in my opinion, have provided considerable insight into the problems and potentials of peers as instructional agents.

Advances in Virtual Reality and Anxiety Disorders Brenda K. Wiederhold, Stéphane Bouchard. 2014-10-27 The interactive computer-generated world of virtual reality has been successful in treating phobias and other anxiety-related conditions, in part because of its distinct advantages over traditional in vivo exposure. Yet many clinicians still think of VR technology as it was in the 1990s—bulky, costly, technically difficult—with little knowledge of its evolution toward more modern, evidence-based, practice-friendly treatment. These updates, and their clinical usefulness, are the subject of *Advances in Virtual Reality and Anxiety Disorders*, a timely guidebook geared toward integrating up-to-date VR methods into everyday practice. Introductory material covers key virtual reality concepts, provides a brief history of VR as used in therapy for anxiety disorders, addresses the concept of presence, and explains the side effects, known as cybersickness, that affect a small percentage of clients. Chapters in the book's main section detail current techniques and review study findings for using VR in the treatment of: · Claustrophobia. · Panic disorder, agoraphobia, and driving phobia. · Acrophobia and aviophobia. · Arachnophobia. · Social phobia. · Generalized anxiety disorder and OCD. · PTSD. · Plus clinical guidelines for establishing a VR clinic. An in-depth framework for effective (and cost-effective) therapeutic innovations for entrenched problems, *Advances in Virtual Reality and Anxiety Disorders* will find an engaged audience among psychologists, psychiatrists, social workers, and mental health counselors. *eractive*

The Culture of the Copy Hillel Schwartz. 2014 A novel attempt to make sense of our preoccupation with copies of all kinds—from counterfeits to instant replay, from parrots to photocopies. *The Culture of the Copy* is a novel attempt to make sense of the Western fascination with replicas, duplicates, and twins. In a work that is breathtaking in its synthetic and critical achievements, Hillel Schwartz charts the repercussions of our entanglement with copies of all kinds, whose presence alternately sustains and overwhelms us. This updated edition takes notice of recent shifts in thought with regard to such issues as biological cloning, conjoined twins, copyright, digital reproduction, and multiple personality disorder. At once abbreviated and refined, it will be of interest to anyone concerned with problems of authenticity, identity, and originality. Through intriguing, and at times humorous, historical analysis and case studies in contemporary culture, Schwartz investigates a stunning array of simulacra: counterfeits, decoys, mannequins, and portraits; ditto marks, genetic cloning, war games, and camouflage; instant replays, digital imaging, parrots, and photocopies; wax museums, apes, and art forgeries—not to mention the very notion of the Real McCoy. Working through a range of theories on biological, mechanical, and electronic reproduction, Schwartz questions the modern esteem for authenticity and uniqueness. *The Culture of the Copy* shows how the ethical dilemmas central to so many fields of endeavor have become inseparable from our pursuit of copies—of the natural world, of our own creations, indeed of our very selves. The book is an innovative blend of microsociology, cultural history, and philosophical reflection, of interest to anyone concerned with problems of authenticity, identity, and originality. Praise for the first edition “[T]he author... brings his considerable synthetic powers to bear on our uneasy preoccupation with doubles, likenesses, facsimiles, replicas and re-enactments. I doubt that these cultural phenomena have ever been more comprehensively or more creatively chronicled... [A] book that gets you to see the world anew, again.” —The New York Times “A sprightly and disconcerting piece of cultural history” —Terence Hawkes, London Review of Books “In *The Culture of the Copy*, [Schwartz] has written the perfect book: original and repetitive at once.” —Todd Gitlin, Los Angeles Times Book Review

Napoleon's Hundred Days and the Politics of Legitimacy Katherine Astbury, Mark Philp. 2018-02-12 This book examines the politics of legitimacy as they played out across Europe in response to Napoleon's dramatic return to power in France after his exile to Elba in 1814. Napoleon had to re-establish his claim to power with initially minimal military resources. Moreover, as the rest of Europe united against him, he had to marshal popular support for his new regime, while simultaneously demanding men and money to back what became an increasingly inevitable military campaign. The initial return – known as ‘the flight of the eagle’ – gradually turned into a dogged attempt to bolster support using a range of mechanisms, including constitutional amendments, elections, and public ceremonies. At the same time, his opponents had to marshal their resources to challenge his return, relying on populations already war-weary and resentful of the costs they had had to bear. The contributors to this volume explore how, for both sides, cultural politics became central in supporting or challenging the legitimacy of these political orders in the path to Waterloo.

But then it broadens its field of inquiry to the global. It compares the achievements of these women with those of key precursors and followers. It also conceives these women's work as an ongoing dialogue with contemporary political and scientific trends in Europe and North America, especially first wave feminism, eugenics, naturism and esotericism. Applying Wisdom to Contemporary World Problems Robert J. Sternberg,Howard C. Nusbaum,Judith Glück.2019-07-03 This book presents perspectives from world experts in the field of wisdom studies to propose how wisdom can provide the foundation upon which solutions to social and global problems can be grounded. The authors argue that where society has come to rely on leaders with skills relating to knowledge and intelligence; instead we should focus on wisdom-based acumen for our leaders in government, business, and the military. In this book the authors offer evidence-based definitions of wisdom and apply these to world problems they believe could potentially be solved using wise solutions. Among the case studies confronted are terrorism and war, poverty and economic disparity, climate change, increasing antibiotic resistance and political corruption. Focusing on the cognitive, social and emotional processes involved in everyday decision-making, this book presents a compelling argument for the application of wise problem-solving to complex world issues that will appeal in particular to those in leadership, teaching and policy roles, and open new pathways in the fields of wisdom-studies, psychology, sociology and political theory.

The Quest for the New Jerusalem, Jean de Labadie and the Labadists, 1610-1744 T.J. Saxby.2012-12-06 The history of Jean de Labadie and the Labadists has received attention through the years. That attention, however, has more often than not fallen short in its tracing of Labadie's 'double migration'. Disaffected with the established church order of his day and motivated by a sense of prophetic mission to establish again the life of the primitive church, this spiritual nomad wandered from France to Switzerland, then to the United Provinces, Germany and Denmark, according to the vicissitudes of the times. As he went, he changed his affiliations from 'high' church over 'lower', from the bosom of Rome to Calvinism, then to congregational separatism. Thus there has been ample reason to treat Labadie's life and ministry episodically, be it a geographical or denominational episode, and a solid grounding could be had by piecing together several of these (all listed in bibliography part D): M. de Certeau on the Jesuit years; X. de Bonnault d'Houet on his stay at Amiens; A-L. Bertrand on the 'lost years' from Amiens to Montauban; J-H. Gerlach and W. Goeters on the schism at Middelburg; P. Scheltema on Amsterdam; L. Holscher and G.E. Guhrauer on Herford; J. Lieboldt and H. von Schubert on Altona; B.B. James and H.C. Murphy on the colony in Maryland; L. Knappert on that in Surinam; and any number of authorities on the Labadists in Friesland. Yet there are significant gaps.

Psychiatry Konstantinos N. Fountoulakis.2021-11-26 This book was the end product of life experiences, thoughts and intellectual wanderings of the author, who through his career and for the last twenty years was always serving all the three aspects of a Psychiatrist: He is a clinician, a researcher and an academic teacher. The book includes a comprehensive history of Psychiatry since antiquity and until today, with an emphasis not only on main events but also specifically and with much detail and explanations, on the chain of events that led to a particular development. At the center of this work is the question 'What is mental illness?' and 'Does free will exist?'. These are questions which tantalize Psychiatrists, neuroscientists, psychologists, philosophers, patients and their families and the sensitive and educated lay persons alike. Thus, the book includes a comprehensive review and systematic elaboration on the definition and the concept of mental illness, a detailed discussion on the issue of free will as well as the state of the art of contemporary Psychiatry and the socio-political currents it has provoked. Finally the book includes a description of the academic, social and professional status of Psychiatry and Psychiatrists and a view of future needs and possible developments. A last moment addition was the chapter on conspiracy theories, as a consequence of the experience with the social media and the public response to the COVID-19 outbreak which coincided with the final stage of the preparation of the book. Their study is an excellent opportunity to dig deep into the relation among human psychology, mental health, the society and politics and to swim in intellectually dangerous waters.

Better Work Monique Kremer,Robert Went,Godfried Engbersen.2021-11-13 This Open Access book provides a thorough analysis of the quality of work in the Netherlands, and suggests policy proposals to promote and facilitate good work for more people. New technology, flexibilization and the intensification of work will have significant consequences for all those who will still have jobs in the future, and - much less studied so far - for the quality of their work. Good work is essential for general well-being: for the individual's quality of life, for the economy and for society. Good work for everyone should therefore be seen as an important aspiration for companies, institutions, social partners and governments. An essential read for an international audience of academics in the field of the sociology of work, labor economics and social policy, as well as for policymakers and researchers of trade unions, and representatives of other social movements.

Mobile Autonomy Nico Dockx,Pascal Gielen.2015 Autonomous labor and its attendant values have now become familiar tools of neoliberal capitalism: work has become freelance, flexible, mobile, project-based, hybrid and temporary. If these conditions are novel to the general economy, this way of working is not new to artists, who began experiencing these precarious conditions long before Post-Fordism was a buzzword. The contributors to Mobile Autonomy, drawn from a variety of disciplines including art, political philosophy and sociology, examine the alternate working methods and economic models developed, in theory and in practice, by artists and other creative professionals to make artistic work viable in contemporary social, economic and political conditions. As Nico Dockx and Pascal Gielen put it in their introduction to this volume: We need to stay mobile to keep our autonomy alive, and we need to develop new autonomous practices to keep our mobility alive.

Engine of Modernity Masha Belenky.2021-09-07 Engine of modernity examines the connection between public transportation and popular culture in nineteenth-century Paris through a focus on the omnibus - a horse-drawn vehicle of urban transport. The omnibus generated innovations in social practices by compelling passengers of diverse backgrounds to interact within the vehicle's close confines. The arrival of the omnibus in the streets of Paris and in the pages of popular literature acted as a motor for a fundamental cultural shift in how people thought about the city, its social life, and its artistic representations. At the intersection of literary criticism and cultural history, Engine of modernity argues that the omnibus was a metaphor through which writers and artists explored evolving social dynamics of class and gender, meditated on the meaning of progress and change, and reflected on one's own literary and artistic practices.
