The Prague School and Theories of Structure Martin Procházka,Markéta Malá,Pavčina Šaldová.2010 The first part of this volume discusses the importance of Prague Structuralism for contemporary linguistics: the phonology of N. S. Trubetzkoy, the concepts of sign and neutralization in the work of Bohumil Trnka, and his influence on the theory of functional sentence perspective. It also traces contemporary developments of structuralist methodologies in pragmatics, morphology, and lexicology. The second part focuses on the legacy of the Prague school in the theories of poetic function, rhetoric, and translation. It assesses the relevance of structuralism for the present thought of difference, social systems and history, system theories and fictions in science and literature. The book is the first volume in the series Interfacing Science, Literature, and the Humanities.

Subjectivity and Truth Michel Foucault.2017-07-22 "The working hypothesis is this: it is true that sexuality as experience is obviously not independent of codes and systems of prohibitions, but it needs to be recalled straightaway that these codes are astonishingly stable, continuous, and slow to change. It needs to be recalled also that the way in which they are observed or transgressed also seems to be very stable and very repetitive. On the other hand, the point of historical mobility, what no doubt change most often, what are most fragile, are modalities of experience." - Michel Foucault In 1981 Foucault delivered a course of lectures which marked a decisive reorientation in his thought and of the project of a History of Sexuality outlined in 1976. It was in these lectures that arts of living became the focal point around which he developed a new way of thinking about subjectivity. It was also the moment when Foucault problematized a conception of ethics understood as the patient elaboration of a relationship of self to self. It was the study of the sexual experience of the Ancients that made these new conceptual developments possible. Within this framework, Foucault examined medical writings, tracts on marriage, the philosophy of love, or the prognostic value of erotic dreams, for evidence of a structuration of the subject in his relationship to pleasures (aphrodisia) which is prior to the modern construction of a science of sexuality as well as to the Christian fearful obsession with the flesh. What was actually at stake was establishing that the imposition of a scrupulous and interminable

hermeneutics of desire was the invention of Christianity. But to do this it was necessary to establish the irreducible specificity of ancient techniques of self. In these lectures, which clearly foreshadow *The Use of Pleasures* and *The Care of Self*, Foucault examines the Greek subordination of gender differences to the primacy of an opposition between active and passive, as well as the development by Imperial stoicism of a model of the conjugal bond which advocates unwavering fidelity and shared feelings and which leads to the disqualification of homosexuality.

Islamic Philosophy and Occidental Phenomenology on the Perennial Issue of Microcosm and Macrocosm Anna-Teresa Tymieniecka. 2006-09-22 By proposing the Microcosm and Macrocosm analogy for dialogue between Islamic Philosophy and Occidental Phenomenology, the authors of this volume are reviving the perennial positioning of the human condition in the play of forces within and without the human being. This theme has run from Plato through the Middle Ages, Renaissance and Modernity, and has been ignored by contemporaries. It now acquires a new pertinence and striking significance due to the scientific discoveries into the infinitely small in life, on the one hand, and the prodigious technological discoveries of the infinitely great on the other. Both open up undreamt-of prospects for the continuing conquest of cosmic forces. The human person – thrown into turmoil by the new approaches to life and needing to acquire new habits of mind, having lost security of all beliefs – desperately seeks a new clarification of the Human Condition within the unity of everything-there-is, of cosmic forces, and of his destiny. The dialogue between Islamic Philosophy and phenomenology of life can show the way. The Worlds of Langston Hughes Vera M. Kutzinski.2012-10-15 The poet Langston Hughes was a tireless world traveler and a prolific translator, editor, and marketer. Translations of his own writings traveled even more widely than he did, earning him adulation throughout Europe, Asia, and especially the Americas. In *The Worlds of Langston Hughes*, Vera Kutzinski contends that, for writers who are part of the African diaspora, translation is more than just a literary practice: it is a fact of life and a way of thinking. Focusing on Hughes's autobiographies, translations of his poetry, his own translations, and the political lyrics that brought him to the attention of the infamous McCarthy Committee, she shows that translating and being translated—and often mistranslated—are as vital to Hughes's own poetics as they are to understanding the historical network of cultural relations known as literary modernism. As Kutzinski maps the trajectory of Hughes's writings across Europe and the Americas, we see the remarkable extent to which the translations of his poetry were in conversation with the work of other modernist writers. Kutzinski spotlights cities whose role as meeting places for modernists from all over the world has yet to be fully explored: Madrid, Havana, Buenos Aires, Mexico City, and of course Harlem. The result is a fresh look at Hughes, not as a solitary author who wrote in a single language, but as an international figure at the heart of a global intellectual and artistic formation.

The Rules of Art Pierre Bourdieu.1996 Written with verve and intensity (and a good bit of wordplay), this is the long-awaited study of Flaubert and the modern literary field that constitutes the definitive work on the sociology of art by one of the world's leading social theorists. Drawing upon the history of literature and art from the mid-nineteenth century to the present, Bourdieu develops an original theory of art conceived as an autonomous value. He argues powerfully against those who refuse to acknowledge the interconnection between art and the structures of social relations within which it is produced and received. As Bourdieu shows, art's new autonomy is one such structure, which complicates but does not eliminate the interconnection. The literary universe as we know it today took shape in the nineteenth century as a space set apart from the approved academies of the state. No one could any longer dictate what ought to be written or decree the canons of good taste. Recognition and consecration were produced in and through the struggle in which writers, critics, and publishers confronted one another.

Linguistics and Psychoanalysis Michel Arrivé.1992 between linguistic and psychoanalytic concepts necessarily arises. Until now this question has been examined mainly by psychoanalysts, from their own perspective, but here it is investigated by a linguist, who systematically explores two domains. The first is related to the sign and symbol, where the meeting of Freud, Saussure and Hjelmselv occurred; whereas in the second, that of the signifier, Saussure reappears escorted by Lacan. But Freud is not far away, since the.
