Lung Cancer Metastasis Venkateshwar Keshamouni, Douglas Arenberg, Gregory Kalemkerian.2009-09-18 Lung cancer is the leading cause of cancer-related mortality. Metastatic lung cancer is responsible for more than ninety percent of lung cancer related deaths. However, relatively little progress has been made in understanding the process of lung cancer metastasis. The two main aims of this book are a) to introduce clinical aspects to basic scientists and basic molecular

and cellular concepts to clinical investigators, in order to promote collaboration and foster much needed translational research; and b) to introduce new and emerging concepts and approaches in metastasis research to lung cancer research community at large. In this attempt, the book will cover a broad spectrum of subjects ranging from the current trends in the clinical management of the metastatic disease, to the systems biology approach for gaining insights into the mechanisms of metastasis. Some of the subjects covered will include: defining basic hallmarks of a metastatic cell, the concept of tumor stem cells, epithelial-mesenchymal transitions, evasion of immune-surveillance, tumor-stromal interactions, angiogenesis, molecular imaging and biomarker discovery.

Why, God? Margaret Cupit-Link, Edward Hugh Henderson. 2015-03-04 A nineteen-year-old chemistry major at Rhodes College is selected to spend the summer after her freshman year doing research at St. Jude Children's Research Hospital. Instead, she finds herself a patient there, fighting a life-threatening form of pediatric cancer and suffering through a year of aggressive chemotherapy and surgery. Refusing to believe what many tell her--that the cancer was all part of God's plan--she finds solace in journaling and begins a discussion with her grandfather, a university professor specializing in philosophy of religion. Through her experiences and writing about them, the student discovers that she may be a person of faith after all--just not in the way she expected. Her grandfather has selected and arranged the journal entries and their faith conversation and has commented on them in order to bring out the spiritual dimensions of her experience. He learns from his granddaughter that faith comes more through experience than through ideas. The coauthors hope the book will help other sufferers recognize the presence of a loving God in the midst of pain, uncertainty and death.
