Schmid-Schönbein,D.E. Sharp.2013-03-07 GOETHE bemerkt in seinen Maximen und Reflexionen: Zur Verewigung des Irrtums tragen die Werke besonders bei, die enzyklopädisch das Wahre und Falsche des Tages überliefern. Hier kann die Wissenschaft nicht bearbeitet werden, sondern was man weiß, glaubt, wähnt, wird aufgenommen; deswegen sehen solche Werke nach fünfzig Jahren gar wunderlich aus. Diese kritische Einstellung zum Handbuch hatte ich vor Augen, als ich mit den Vorbereitungen für den Band Mikrozirkulation begann. Den Mut, dennoch ein nicht abgeschlossenes Werk vorzulegen, begründe ich damit, daß die Sorge, zur Verewigung des Irrtums beizutragen, für das heutige Verständnis der Wissenschaft nicht mehr gilt. Zwar halten manche Forscher daran fest - und das ist auch ihr gutes Recht - zu versuchen, einmal Erarbeitetes mit neuen Methoden oder durch ergänzende Befunde zu bestätigen und zu erhärten, im Grunde geben sie aber durch ihre weiteren Arbeiten zu - und sie sind auch darauf gefaßt -, daß jeder einzelne Befund, jede Grundlage und jede entwickelte Hypothese sich als falsch erweisen kann. Diese skeptische Grundhaltung der Forscher gegen über den Ergebnissen der Wissenschaft rührt daher, daß sie einerseits nicht mehr glauben, sich mit Hilfe der Wissenschaft jemals der Wahrheit direkt versichern zu können, andererseits können sie Glauben im Sinne des Fest-für-wahr Haltens in der Wissenschaft nicht gelten lassen. In dem Bestreben, die Dinge kritisch und realistisch zu sehen, bemühen sich die theoretischen, d. h.

Special attention is devoted to the problem of radiation burden for patients. The authors are all recognized experts in angiology, phlebology, and interventional radiology.

Percutaneous Transluminal Angioplasty C.T. Dotter,A.R. Grüntzig,W. Schoop,E. Zeitler.2012-12-06 In the past ten years, there have been significant advances in the diagnosis and therapy of arterial vascular disease. While long-term morbidity can only be improved by changing the patient's life-style and removing any risk factors that may be present(hypertension, hyperlipidemia,obesity,diabetemellitus, nicotine abuse), symptomatic relief may be obtained by various procedures. Besides conservative treatment of arterial occlusive disease (physical therapy, medical treatment) and surgical vascular interventions (thromboendarterectomy, bypass procedures), balloon catheters introduced percutaneously under local anesthesia have found increased application in virtually all areas for the dilatation and recanalization of obstructive lesions in the past few years. The technique of balloon dilatation, as introduced by Griintzig as a further development of the percutaneous interventions by Dotter and Judkins, is no longer the decisive issue. The main objective of present clinical research is to de termine the proper indications and patient selection for this procedure, which has found its place between conservative treatment and surgery. The contents of this Symposium should provide some guidelines for the indi cations and postprocedural therapy for the referring physician, the angiologist, and for the radiologist and cardiologist performing the dilatation. We owe our thanks to all the specialists involved, who have provided us with the benefits of their experience. Mrs. H. Beilmann and Dr. M. Wojtowycz con tributed substantially to the preparation of the text. I would like to thank them and the staff of Springer-Verlag for their conscientious work in the interest of composition and publication quality.
