Iceland ANDREW. EVANS.2020-10-02 This new, thoroughly updated fifth edition of Bradt's award-winning Iceland guide remains the most in-depth guide available to one of the few countries in the world that has no mosquitoes, no ants, no Starbucks and no MacDonalds. Featuring honest, practical information from an author who has repeatedly visited the country over twenty years and is familiar with its language, history and culture, Bradt's Iceland has won the Lowell Thomas Award (the highest travel writing award available in the United States) and provides more context for individual places than any other guidebook, plus frank, investigative hotel and restaurant reviews that hide nothing. This latest edition covers everything you would expect, from the Northern Lights to snowmobiling, dog sledding, visiting West Fjords, Iceland's remotest corner, and the Laugavegur trail, Iceland's most famous 5-day trek. New developments covered include the merging together of different Nature Reserves and National Parks under the 'Vatnajökull National Park' banner, better infrastructure throughout the entire country, new hotels, restaurants, bars and geothermal spas, and more tour companies offering a wider variety of activities. For Reykjavik, there has been a complete update of the city's nightlife, restaurants, hotels, swimming pools and festivals, while other new features include fuller coverage of East Iceland, visiting hot springs and spas, 4X4 adventures in the Icelandic Highlands, plus more details of how and where to experience Iceland's amazing wildlife. Bradt's Iceland also offers the most detailed maps of any guidebook. Based on 20 years of personal and business travel, exploration and adventure all around the country, the guide is exhaustive, well-researched and comprehensive, featuring a year-round approach to travelling in Iceland in line with the development of the local tourist industry to offer attractions beyond the normal summer season. As a contributor to National Geographic, and a frequent host for tours to Iceland, Andrew Evans explores some of the remotest corners of the country regularly. He continues to lecture about the country to high-end tour groups, as well as the National Geographic Society and Smithsonian Institution. His guide is exhaustive, allowing travellers to make informed decisions, to go anywhere and explore anything.

Lapland James Proctor.2007 This first English-language guidebook to the Lapland region of Scandinavia covers places and activities in the remote outposts of Norway, Sweden and Finland, together with background information to help travellers understand the Lap cultures.

Svalbard Roger Norum, James Proctor .2018-05-03 The Bradt guide to Svalbard (Spitsbergen), including Franz Josef Land and Jan Mayen, is a unique, standalone guidebook to this evocative Arctic archipelago, a place that is plunged into darkness for four months each year and where there are 4,000 snow scooters for a population of just 2,500. This new sixth edition has been thoroughly updated throughout and offers new material on everything from adventure tours to accommodation, environmental change to restaurants. Also covered are the restoration of Barentsburg and the opening of Svalbard's historic mines to visitors. Newly updated and amended, this edition reflects important recent changes in the archipelago, making it the perfect guide to a quintessential bucket-list destination. Possibly the most remote destination in the developed world, Svalbard is as off the beaten track as you can get in Europe today. A destination where there are more polar bears than people, Svalbard is the planet's most northerly settled land and the top (if not the end) of the world. It was on and around Svalbard that most of David Attenborough's 'Frozen Planet' was filmed. A trip to Svalbard easily lends itself to notching up geographic superlatives (most northerly kebab, most northerly souvenir shop, etc) and adventurous travellers seek out experiences such as husky driving and hikes across the permafrost, charmed by the island law that requires everyone to carry a rifle anywhere outside of Longyearbyen, a constant reminder of Svalbard's 3,000-strong polar bear population. The main tourist period falls in Svalbard's brief summer, from June to August, when it's light around the clock and not very cold. However, increasingly popular for winter sports - especially because the next few years will enjoy unusually high Northern Lights activity - are the so-called 'light winter' months (March-May), when there is both sunlight and snow. The winter season itself (November/December-March) offers many possibilities for outdoor adventure - and the polar night is an experience in itself. Despite winter temperatures that can drop to over 40 below zero, Svalbard's glorious mountains, majestic fjords and sprawling valleys are the perfect setting for adventurous journeys out to the back of beyond, giving visitors a unique vantage point on a unique tourist destination. This brand-new edition of Svalbard provides all of the practical and background information you'll need to explore this wild place, turning the hostile into the hospitable. Bradt's Svalbard is written by Roger Norum, an expert in the region who writes regularly on northern Norway for the press and who teaches Norwegian language and translation at University College London. He is also a Research Fellow at the University of Leeds, where he carries out research on the links between tourism, travel writing and environmental change in the European Arctic.

Out in the Cold Bill Murray.2017-03-20 An inspired tale of high adventure, Out in the Cold is Bill Murray's vivid portrait of adventure across the vast Northern Atlantic from the Arctic north of Norway to Nova Scotia. Murray begins in pursuit of a total solar eclipse in Svalbard, 800 miles from the North Pole. He tests the culinary appeal of wind-dried sheep in the tiny Faroe Islands, befriends Inuit bone carvers in Greenland and camps with an itinerant Italian musician who dreams of building Greenland's first luxury resort. He stands naked and freezing on an Icelandic glacier and later (with his clothes on), on the wind-battered Canadian bog where the first European stood 500 years before Columbus. With a light touch, wry analysis and remarkable depth of reportage, Bill Murray weaves high adventure with practical science and absorbing history, taking the pulse of an under-explored, fragile region on the precipice of change. By turns evocative, astonishing and always a jolly good ride, Out in the Cold is a sprawling and rewarding tour of the Atlantic northlands today.

New Perspectives on People and Forests Eva Ritter, Dainis Dauksta. 2011-04-29 The aim of this book is to elucidate the role of forests as part of a landscape in the life of people. Most landscapes today are cultural landscapes that are influenced by human activity and that in turn have a profound effect on our understanding of and identification with a place. The book proposes that a better understanding of the bond between people and forests as integrated part of a landscape may be helpful in landscape planning, and may contribute to the discussion of changes in forest cover which has been motivated by land use changes, rural development and the global climate debate. To this end, people's perception of forest landscapes, the reasons for different perceptions, and future perspectives are discussed. Given the wide range of forest landscapes, and cultural perspectives which exist across the world, the book focuses on Europe as a test case to explore the various relationships between society, culture, forests and landscapes. It looks at historical evidence of the impacts of people on forests and vice versa, explores the current factors affecting people's physical and emotional comfort in forest landscapes, and looks ahead to how changes in forest cover may alter the present relationships of people to forests. Drawing together a diverse literature and combining the expertise of natural and social scientists, this book will form a valuable reference for students and researchers working in the fields of landscape ecology and landscape architecture, geography, social science, environmental psychology or environmental history. It will also be of interest to researchers, government agencies and practitioners with an interest in issues such as sustainable forest management, sustainable tourism, reserve management, urban planning and environmental interpretation.

Lapland & Norway's Northern Lights Travel Guide Nicole Wright. 2014-06-28 Lapland is not a country but it is actually a region that stretches across Finland, Russia, Norway and Sweden. Nearly all of Lapland falls within the Arctic Circle. The largest part of Lapland is in Finland, where approximately a quarter of the country is Lappish. For thousands of years people have been fascinated by Norway's Northern Lights (Aurora Borealis) and its magical display of coloured lights dancing across northern skies. These northern lights are caused by the earth's magnetic field reacting with electrically charged solar particles. Tromsø in Norway is one of the best places on earth to see this spectacular display.

Common Sense and Whiskey pokes into the back corners of our planet. It takes us into the unknown and describes what the unknown looks like. You can handle just about anything out on the road with a believable grin, common sense and whiskey. That's been the author's theory, anyway, for 25 years of international travel. So far, so good. And now, Common Sense and Whiskey distills (no pun there, certainly) the most memorable experiences of a lifetime of travel to some of the world's least visited places. Fifteen stories from Bhutan, Borneo, Burma, Greenland, Guangxi, Lake Baikal, Madagascar, Malawi, Papua New Guinea, Paraguay, Chilean Patagonia, the Southern Caucasus, the Trans-Siberian Railroad, Sri Lanka and Tibet. For travelers - experienced, aspiring and armchair alike, Common Sense and Whiskey is something to sip slowly and savor. Perceptive travel tales, masterfully told. ***** You leave home with a blank page. You return with stories of your own to share. This is what Bill Murray does so well. Rich and inspiring. Filled with surprises and great adventures. - George Brown, President, Friendship Force International A good travel writer shows rather than tells and Bill shows us beautifully with unassuming prose and evocative images. Riding with Reindeer Robert M. Goldstein.2010 In the summer of 2007, the author departs on a self-supported bicycle journey across Finland, Lapland and Arctic Norway with the goal of pedaling to the Barents Sea. More than a travelogue, Riding with Reindeer intersperses an often humorous narrative about the author's adventures (he gets trapped in a woman's shower in one remote village) with rich cultural and historical anecdotes, while providing insight into the soul of a region whose honest and resourceful, yet often taciturn, citizens are always willing to lend a helping hand to the stranger on the little blue folding bicycle.

52 European Wildlife Weekends James Lowen.2018-04-06 This innovative new title from Bradt is the first of its type to focus specifically on the vast array of wildlife-watching opportunities found in Europe. Written by expert James Lowen, author of the best-selling 52 Wildlife Weekends: A Year of British Wildlife-Watching Breaks and award-winning A Summer of British Wildlife: 100 Great Days Out Watching Wildlife, this unique guide is packaged into 52 weekend-sized breaks highlighting the best of European wildlife including mammals, reptiles, amphibians, flora, butterflies, dragonflies and birds. We may think of snow-covered Antarctica, South American jungles or African savannahs as holding the world's most plentiful and special wildlife, yet Europe heaves with wildlife wonders year-round, many of which can be seen in a simple weekend break. This book suggests one wildlife-watching break, somewhere in Europe, for every weekend of the year. Want to see brown bears? Make for Finland or Slovenia. Fancy a crack at wolves? Hop on a flight to northern Spain or Italy's Abruzzo. If whales float your boat, a long weekend in Iceland, Ireland or the Bay of Biscay would suit. Orchid lovers can head to Corsica, Crete or the Costa del Sol in spring. Birdwatchers can flock to see migrating raptors in Gibraltar, great gatherings of cranes in central Spain, or vast flocks of seaduck in Arctic Norway. Then there's the wacky olm in Slovenia, cave salamanders in Sardinia and owl-flies in the Picos de Europa. Hungary's mayfly emergence is truly spectacular, as are Norway's musk oxen and Poland's bison. Stretching from the Arctic to its boundaries with Africa and Asia, Europe has enough exciting living creatures amid jaw-dropping landscapes to fill an entire lifetime of wildlife-watching. Ideal for both the experienced wildlife tourist and the novice and packed with stunning colour photos, Bradt's 52 European Wildlife Weekends shows when, where and how to see the most exciting wildlife, complete with inspiring itineraries, engaging descriptions, detailed directions and tips on how to find, identify and enjoy animals and plants. Finnish Lapland (Finland) - Wink Travel Guide Wink Travel Wink Travel Guide.2019-06-14 Lapland is the Wild North of Finland. Outside cities wilderness - with half-wild reindeer - is everywhere. Even by the roads the distances between villages are long and villages on the map may be home only to a few families, some even uninhabited part of the year. People don't come to Lapland for the architecture, they come here for the nature. While there are no craggy mountains or fjords here, the endless pine forests and the treeless rounded fells (tunturi) poking out between them can also be breathtakingly beautiful. Finns talk about the Lapland fever because of the many who have lost their heart to this land. Wink Travel Guides introduce you to the best world travel destinations, in a clear and concise way, illustrated by photos.

Based on 20 years of personal and business travel, exploration and adventure all around the country, Bradt's Iceland is in-depth, well-researched and comprehensive, featuring a year-round approach to travelling in Iceland in line with the development of the local tourist industry to offer attractions beyond the normal summer season. Socotra Hilary Bradt,Janice Booth.2020-09-18 This new full-colour title from Bradt is the first and only guide available to the largest of the four islands that make up the UNESCO World Heritage Site of the Socotra Archipelago in the Arabian Sea, 240 miles offshore from their mother land, Yemen. Everything you might need for a successful trip is covered, from pre-departure planning, getting there, tour operators and where to stay to the full range of information for making the most of your time while there. Background information on history, people, language and culture is followed by an easy-to-follow geographical breakdown covering everywhere from the capital Hadibo to Ayhaft Canyon National Park, Qaria Lagoon, Rosh Marine Protected Area, Homhil Reserv, Terbak village and Hoq cave, Qalansiyah, Diksam Plateau and the forest of Firhimin to name just a few of the places detailed. There is also a section on vocabulary, an endemic wildlife check list and suggested sources of further information.Socotra is unique. Sometimes known as 'The Galapagos of the Indian Ocean', the archipelago has an exceptionally large number of endemic species. Of the 220 bird species recorded, 11 are endemic, including the relatively recently identified Socotra Buzzard. Closer to the ground, an estimated 307 plant species are endemic. More than 600 species of insects, some 100 land and freshwater molluscs, around 80 arachnids, some dozen myriapods, four land- and fresh-water crabs, 30 reptiles and 14 mammals have been found to occur, of which all the land snails, 90 % of the reptiles and about 60 % of the spiders are unique to the archipelago. With its superb beaches and dramatically varied landscapes (mountains, forest, ravines, sand-dunes, beaches, caves .) Socotra is a prime target for tourism, which will need handling with extreme care. Strict regulations are in force to preserve the island's natural heritage and much of it has protected status, but some unprotected land has already been sold to potential developers. This pristine and relatively unknown little island, so full of natural treasures, may be on the brink of a very different future.

The Last Passenger Train Robert M. Goldstein.2020-09-15 Join author Robert Goldstein and his wife, Melinda Denson, on a seemingly idyllic trip to celebrate his retirement by traversing Canada on the remnants of its once robust transcontinental train service. More than a routine travelogue, the author describes what happens when two individuals marry late in life, then spend a week crammed in a train compartment. Goldstein is determined to cure his inner restlessness and obsession with being on time, even inventing a new philosophy - Zen Train Mind - to keep on track. Denson constantly reminds her new husband that the trip is about relaxation, defeating anxiety and being in the moment. Initial success is met with retrenchment as The Canadian falls hours behind schedule. The author's penchant for checking timetables, composing letters to railroad officials and politicians, and concocting crazy schemes to encourage speed transforms the trip into a comedy of confinement. When not worrying about the train's pace, the author provides rich descriptions of the land the train passes through, as well as of the Herculean effort required to build Canada's cross-country railroad.

Northern Tanzania Philip Briggs,Chris McIntyre.2013 Tanzania has grown to be one of the top safari destinations in Africa. This new edition of Northern Tanzania focuses solely on the northern region and Zanzibar. This area accounts for a tiny fraction of the country's surface area but around 95% of tourist developments. Written by Africa expert Philip Briggs, the guide reflects the growing trend away from large lodges towards small exclusive eco-friendly camps in remote parts of the Serengeti and other major reserves. This edition is more critically selective than previous editions, detailing the best on offer in all price brackets. It includes new chapters on the North Coast and on the Usambara Mountains both of which offer good off-the-beaten-track travel opportunities, as well as an expanded chapter on Lake Victoria. There is in-depth coverage of Tanzania's wildlife including where to see tree-climbing lions, and a full-colour wildlife guide. Philip Briggs keeps readers up-to-date with the highly controversial proposal to build a highway through the Serengeti. Northern Tanzania is an essential travel companion for both first-time visitors and seasoned safari-goers.
