Diderot and Rousseau Marian Hobson.2011 Marian Hobson's work has made a seminal contribution to our understanding of the European Enlightenment, and of Diderot and Rousseau in particular. This book presents her most important articles in a single volume, translated into English for the first time. Hobson's distinctive approach is to take a given text or problématique and position it within its intellectual, historical and polemical context. From close analysis of the underlying conceptual structures of literary texts, she offers a unique insight into the vibrant networks of people and ideas at work throughout Europe, and across disciplinary boundaries as diverse as literature and mathematics, medicine and music. In their translations of Hobson's essays, Kate Tunstall and Caroline Warman present the primary sources in both the original eighteenth-century French and modern English, making the detail of these debates accessible to everyone, from the specialist to the student, whatever their academic discipline or interest.

Brazilian Studies in Philosophy and History of Science Décio Krause,Antonio Videira.2011-01-27 This volume, The Brazilian Studies in the Philosophy and History of Science, is the first attempt to present to a general audience, works from Brazil on this subject. The included papers are original, covering a remarkable number of relevant topics of philosophy of science, logic and on the history of science. The Brazilian community has increased in the last years in quantity and in quality of the works, most of them being published in respectable international journals on the subject. The chapters of this volume are forwarded by a general introduction, which aims to sketch not only the contents of the chapters, but it is conceived as a historical and conceptual guide to the development of the field in Brazil. The introduction intends to be useful to the reader, and not only to the specialist, helping them to evaluate the increase in production of this country within the international context.

Repertoires and Choices in African Languages Friederike Lüpke,Anne Storch.2013-05-28 Most African languages are spoken by communities as one of several languages present on a daily basis. The persistence of multilingualism and the linguistic creativity manifest in the playful use of different languages are striking, especially against the backdrop of language death and expanding monolingualism elsewhere in the world. The effortless mastery of several languages is disturbing, however, for those who take essentialist perspectives that see it as a problem rather than a resource, and for the dominating, conflictual, sociolinguistic model of multilingualism. This volume investigates African minority languages in the context of changing patterns of multilingualism, and also assesses the status of African languages in terms of existing influential vitality scales. An important aspect of multilingual praxis is the speakers' agency in making choices, their repertoires of registers and the multiplicity of language ideology associated with different ways of speaking. The volume represents a new and original contribution to the ethnography of speaking of multilingual practices and the cultural ideas associated with them.

Under the Sky of My Africa Catharine Theimer Nepomnyashchy,Nicole Svobodny,Ludmilla A. Trigos.2006-05-30 A wide-ranging consideration of the nature and significance of Pushkin's African heritage Roughly in the year 1705, a young African boy, acquired from the seraglio of the Turkish sultan, was transported to Russia as a gift to Peter the Great. This child, later known as Abram Petrovich Gannibal, was to become Peter's godson and to live to a ripe old age, having attained the rank of general and the status of Russian nobility. More important, he was to become the great-grandfather of Russia's greatest national poet, Alexander Pushkin. It is the contention of the editors of this book, borne out by the essays in the collection, that Pushkin's African ancestry has played the role of a wild card of sorts as a formative element in Russian cultural mythology; and that the ways in which Gannibal's legacy has been included in or excluded from Pushkin's biography over the last two hundred years can serve as a shifting marker of Russia's self-definition. The first single volume in English on this rich topic, Under the Sky of My Africa addresses the wide variety of interests implicated in the question of Pushkin's blackness-race studies, politics, American studies, music, mythopoetic criticism, mainstream Pushkin studies. In essays that are by turns biographical, iconographical, cultural, and sociological in focus, the authors-representing a broad range of disciplines and perspectives-take us from the complex attitudes toward race in Russia during Pushkin's era to the surge of racism in late Soviet and post-Soviet contemporary Russia. In sum, Under the Sky of My Africa provides a wealth of basic material on the subject as well as a series of provocative readings and interpretations that will influence future considerations of Pushkin and race in Russian culture.

Traitor's Blade Sebastien de Castell.2014-02-10 When every noble is a tyrant and every knight is a thug, the only thing you can really trust is a traitor's blade. The Three Musketeers meets Joe Abercrombie via Mark Lawrence: 'Guaranteed to increase household swashbuckling by 100%,' says Library Journal The Greatcoats - legendary heroes, arbiters of justice . . . or notorious traitors? The Greatcoats are travelling magistrates bringing justice to all . . . or at least they were, before they watched the Dukes impale their King's head on a spike. Now the land's heroes are reviled as traitors, their Greatcoats in tatters. 'One hell of a good book' - Conn Iggulden, author of the Sunday Times Top Five bestseller The Gates of Athens Facio, Kest and Brasti have been reduced to working as mercenaries, but when they find their employer dead - and are forced to watch as the killer plants evidence framing them for the murder - they realise things are about to get even worse. For the royal conspiracy that began with overthrowing an idealistic young king is spreading to Rijou, the most corrupt city in the land, and the life of a young girl hangs in the balance. When every noble is a tyrant and every knight is a thug, the only thing you can really trust is a traitor's blade.

The Poethical Wager Joan Retallack.2003 Annotation The interrelated essays in this book explore the coming together of ethics and poetics in literatures that engage with their contemporary moments to become

wagers on the future of meaning. The central concern of *The Poethical Wager* is the relation of poetics to agency in a chaotic world.

Music In European Capitals Daniel Heartz.2003-05-27 A glittering cultural tour of Europe's major capitals during a period of intense musical change. This volume continues the study of the eighteenth century begun in Haydn, Mozart, and the Viennese School 1740–1780 (1995) by focusing on the capital cities other than Vienna that were most important in the creation and diffusion of new music. It tells of events in Naples, where Vinci and Pergolesi went beyond their pre-1720 models to cultivate opera in a simpler, more direct manner, soon after christened the galant style. No less central was Venice, where Vivaldi perfected the concerto, on which were patterned the early symphonies and the newer kind of sonata. Dresden profited first from all these achievements and became, under Hasse's direction, the foremost center of Italian opera in Germany. Mannheim with its great orchestra did much to shape the modern symphony. A few years later, Paris became paramount, especially for its Opéra-Comique; during the 1770s the Opéra provided Gluck with a stage on which to cap his long international career. The book concludes with a description of Christian Bach in London, Paisiello in Saint Petersburg, and Boccherini in Madrid. This long-awaited book offers a view of eighteenth-century music that is broad and innovative while remaining sensitive to the values of those times and places. One comes away from it with an understanding of the European context behind the triumphs of Haydn and Mozart. Lavishly illustrated with music examples and reproductions, both in black-and-white and color, this master study will be of inestimable importance to scholars, cultural historians, performers, and all music lovers.

Tolerance Caroline Warman.2016-01-04 Inspired by Voltaire's advice that a text needs to be concise to have real influence, this anthology contains fiery extracts by forty eighteenth-century authors, from the most famous philosophers of the age to those whose brilliant writings are less well-known. These passages are immensely diverse in style and topic, but all have in common a passionate commitment to equality, freedom, and tolerance. Each text resonates powerfully with the issues our world faces today. *Tolerance* was first published by the Société française d'étude du dix-huitième siècle (the French Society for Eighteenth-Century Studies) in the wake of the Charlie Hebdo assassinations in January 2015 as an act of solidarity and as a response to the surge of interest in Enlightenment values. With the support of the British Society for Eighteenth-Century Studies, it has now been translated by over 100 students and tutors of French at Oxford University.

China, the Health Sector Dean T. Jamison.1984 This review of China's health sector begins by noting China's achievements in population control, health status, and nutrition. The policies, sources of financing, and resource use that have contributed to China's successes are cited, and the evolution of several influences on health from outside the sector are discussed, including nutritional improvements, greater access to clean water and sanitary waste disposal, and fertility reduction. Two major challenges now face China's health sector: (i) extending the methods that have been successful to areas where mortality rates and deaths due to infectious diseases remain high; and (ii) developing and implementing approaches to management of chronic disease that combine prevention, low-cost treatment, rehabilitation, and humane care. Major innovation will be essential because resources are limited and plans for meeting the health needs of the population are ambitious. Institutions capable of innovation, experimentation, and analysis of public health problems must be developed. The report includes discussion of specific issues in the sector.

Immoral Memories Sergei Eisenstein.2014 Sergei Eisenstein (1898-1948), creator of such masterpieces as *Battleship Potemkin*, *Alexander Nevsky* and *Ivan the Terrible*, was perhaps the greatest of all film directors. He wrote his autobiography in 1946, two years before his death, and it is a work of major importance in the light it sheds on his personality and mercurial genius. Vivid, eccentric and free-ranging, *Immoral Memories* is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression that characterize its author's film-making technique. He recounts his life in Russia from the time of the Revolution, during which he served in the Bolshevik army as a volunteer, his travels in the West and his encounters with a remarkable medley of individuals during his long career. He gives us unique insights, too, into his triumphs and tribulations. His disappointments and despair were exemplified by the banning of the film *Ivan the Terrible, Part II*, which was not released until fifteen years after his death. And he never expected his autobiography to be published in Russia. Yet in answer to his query Has there been life he replied that there had been life lived acutely, joyously, tormentedly, at times even sparkling, unquestionably colourful, and such a life that, I suppose, I would not exchange for another--Publisher's description.

The Landscape of Lexicography Alina Villalva,Geoffrey Williams.2019-08-01 This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perenis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography - action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the wealth of European language diversity as found in dictionaries by developing and testing new digital annotation tools and a historical morphological dictionary prototype. Funded by the Horizon 2020 Framework Programme of the European Union

Montesquieu's Idea of Justice Sheila Mary Mason. 2012-12-06 Part One of Montesquieu's Idea of Justice comprises a survey of the currency in philosophical, ethical and aesthetic debate during the second half of the 17th century of the terms rapport and convenance, which are central to the enigmatic definition given to justice by Montesquieu in *Lettres Persanes* LXXXIII. In this survey, attention is concentrated on the way in which the connotations of these terms fluctuate with the divergent development of the methodological and speculative outgrowths of Cartesianism into two schools of thought, materialist and idealist, often widely at variance in their views of the nature and organization of the universe. In Part Two, Montesquieu's definition of justice is set against this background, whose doctrinal conflicts, because of the characteristic associations of its key terms, it may be taken to reflect, just as it may be held to epitomize, by virtue of its elaboration in the opening chapter of *De l'Esprit des Lois* and its close terminological affinities with the definition of law there given, an undoubtedly related conflict between the implications of causal determinism and the aspirations of idealist metaphysics surviving at the heart of Montesquieu's outlook, and, remaining unresolved, often said to impair the coherence if not the validity of his theory of society.

The Fine Arts Reduced to a Single Principle Charles Batteux. 2015 *The Fine Arts Reduced to a Single Principle* (1746) by Charles Batteux was arguably the most influential work on aesthetics published in the eighteenth century. It influenced every major aesthetician in the second half of the century: Diderot, Herder, Hume, Kant, Lessing, Mendelssohn, and others either adopted his views or reacted against them. It is the work generally credited with establishing the modern system of the arts: poetry, painting, music, sculpture and dance. Batteux's book is also an invaluable aid to the interpretation of the arts of eighteenth century. And yet there has never been a complete or reliable translation of *The Fine Arts* into English. Now James O. Young, a leading contemporary philosopher of art, has provided an eminently readable and accurate translation. It is fully annotated and comes with a comprehensive introduction that identifies the figures who influenced Batteux and the writers who were, in turn, influenced by him. The introduction also discusses the ways in which *The Fine Arts* has continuing philosophical interest. In particular, Young demonstrates that Batteux's work is an important contribution to aesthetic cognitivism (the view that works of art contribute importantly to knowledge) and that Batteux made a significant contribution to understanding the expressiveness of music. This book will be of interest to everyone interested in the arts of the eighteenth century, French studies, the history of European ideas, and philosophy of art.
