American Standards Raymond A. Horn,Joe L. Kincheloe.2001 Annotation Unidentified contributors look at the actions taken in Texas that have improved the quantitative measure of public education, ponder whether it can or should be a model for other systems. They investigate whether the reforms represent a final victory for a back-to-basics form of teacher-centered, test-driven education, or the failure of such a rationalized, decontextualized, and culturally insensitive mode of pedagogy. Tulia Nate Blakeslee. 2005-09-26 Early one morning in the summer of 1999, authorities in the tiny west Texas town of Tulia began a roundup of suspected drug dealers. By the time the sweep was done, over forty people had been arrested and one of every five black adults in town was behind bars, all accused of dealing cocaine to the same undercover officer, Tom Coleman. Coleman, the son of a well-known Texas Ranger, was named Officer of the Year in Texas. Not until after the trials - in which Coleman's uncorroborated testimony secured sentences as long as 361 years - did it become apparent that Tom Coleman was not the man he claimed to be. By then two-dozen people were in prison, and the town of Tulia had become a battlefield in the national debate over the war on drugs. Tulia is the story of this town, the bust, the trials, and the heroic legal battle to reverse the convictions that caught the attention of the nation in the spring of 2003. It is the story of Freddie Brookins, a young man with no prior record, whose father urged him to take his chances at trial, and who wound up in one of the state's toughest prisons. Of Joe Moore, the beloved godfather of black Tulia, convicted of selling a few grams of cocaine and sent away for ninety years. Of Vanita Gupta, a young attorney just a year out of law school, at the helm of the biggest civil rights case in the country. The scandal changed the way narcotics enforcement is done in Texas, and has put the national drug war on trial at a time when incarceration rates in this country have never been higher. But the story is much bigger than the tale of just one bust. As Tulia makes clear, these events are the latest chapter in a story with themes as old as the country itself.--BOOK JACKET.

Anti-Racist School Leadership Jeffrey S. Brooks,Noelle Witherspoon-Arnold.2013-03-01 Since the passing of Brown versus Board of Education to the election of the first Black president of the United States, there has been much discussion on how far we have come as a nation on issues of race. Some continue to assert that Barack Obama's election ushered in a new era—making the US a post-racial society. But this argument is either a political contrivance, borne of ignorance or a bold-faced lie. There is no recent data on school inequities, or inequity in society for that matter, that suggests we have arrived at Dr. King's dream that his "four children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character." Children today are instead still judged by the color of their skin, and this inequitable practice is manifest in today's schools for students of color in the form of: disproportionate student discipline referrals, achievement and opportunity gaps, pushout rates, overrepresentation in special education and underrepresentation in advanced coursework, among other indicators (Brooks, 2012). Though issues of race in the public education system may take an overt or covert form; racial injustice in public schools is still pervasive, complex and cumulative. For example, many students of color, year after year, do not have access to "good" teachers, experience low staff expectations, and are subject to "new and improved" forms of tracking (Brooks, Arnold & Brooks, in press). The authors in this book explore various ways that racism are manifest in the American school system. Through a plurality of perspectives, they deconstruct, challenge and reconstruct an educational leadership committed to equity and excellence for marginalized students and educators.

Envisioning a Critical Race Praxis in K-12 Education Through Counter-Storytelling Tyson E.J. Marsh, Natasha N. Croom. 2016-08-01 While critical race theory is a framework employed by activists and scholars within and outside the confines of education, there are limited resources for leadership practitioners that provide insight into critical race theory and the possibilities of implementing a critical race praxis approach to leadership. With a continued top-down approach to educational policy and practice, it is imperative that educational leaders understand how critical race theory and praxis can assist them in utilizing their agency and roles as leaders to identify and challenge institutional and systemic racism and other forms/manifestations of oppression (Stovall, 2004). In the tradition of critical race theory, we are charged with the task of operationalizing theory into practice in the struggle for, and commitment to, social justice. Though educational leaders and leadership programs have been all but absent in this process, given their influence and power, educational leaders need to be engaged in this endeavor. The objective of this edited volume is to draw upon critical race counter-stories and praxis for the purpose of providing leaders in training and practicing K-12 leaders with tangible narratives that demonstrate how racism and its intersectionality with other forms of oppression manifest within K-12 schooling. An additional aim of this book is to provide leaders with a working knowledge of the central tenets of critical race theory and the tools that are required in recognizing how they might be complicit in the reproduction of institutional and systemic racism and other forms of oppression. More precisely, this edited volume intends to draw upon and center the lived experiences and voices of contributors that have experienced racism in K-12 schooling. Through the use of critical race methodology and counter-storytelling (Solórzano & Yosso, 2002), contributors will share and interrogate their experiences while offering current and future educational leaders insight in recognizing how racism functions within institutions and how they can address it. The intended goal of this edited volume is to translate critical race theory into practice while emphasizing the need for educational leaders to develop a critical race praxis and anti-racist approach to leadership.

Educational Leaders Encouraging the Intellectual and Professional Capacity of Others Elizabeth Murakami-Ramalho, Anita McCoskey Pankake. 2012-09-01 This book examines how to encourage the development of others towards social justice practices. The processes of development include practices such as mentoring, coaching, professional development, and the exploration of alternatives to reculture the work environment and enhance collaborative partnerships. Their preparation and development are explored in this volume through the people's voices and

experiences. Finally, challenges can be recognized in the effort to encourage the development of others, including local and federal policies, new forms of academic delivery, and the preparation of leaders in ever-evolving educational structures. These issues will be fully explored with the aim of informing practitioners and scholars in the field of educational leadership.
