Birth to Psychic Life Albert Ciccone, Marc Lhopital. 2022-03-30 Based on rich clinical experience and on theory from numerous psychoanalytical works, this book explores and analyzes the emergence and development of the psychic life. Birth to Psychic Life explores the genesis of the psychic apparatus, reconstructs the development of subjectivity, with its ups and downs in babies as in all subjects, and studies the relationship between mental states at the dawn of psychic life and those characteristic of psychopathology. The book refers to Freudian, Kleinian and post-Kleinian works, proposing articulations between the different theoretical models. The referenced works' contributions to the understanding of early psychic disorders, as well as to the implications of infantile psychic suffering in adulthood, are essential. The authors identify the three psychic constellations, recognized by many, that accompany the psychic birth and suggest new more adequate names in view of current works on subjectivity: the auto-sensual position, the symbiotic position and the depressive position. Many other new and original proposals are developed by the authors. Providing tools to think about the processes of psychic growth, this book will be of interest to all psychoanalysts and psychotherapists working with infants and interested in the impact of early psychic development throughout life.

When child language began to be studied in the sixties, what interested researchers most was what could be considered language per se. Holophrases were excluded as seemingly having no syntax and research work was carried out as of the two-word stage. Language development was studied up to around age seven, the age at which natural acquisition processes were considered to be contaminated by formal schooling in language. In opposition to such an attitude, this volume has ignored this heavily studied area of language development preferring to present research being carried out at the two ends of the development process that had been rejected: that of prelinguistic speech skills, at the one end, and the development of discourse at the other. This book thus begins with the physical properties in human development necessary for language to occur. It also offers studies on a child's initial equipment, i.e. intra-uterine skills and skills acquired before first words. At the other end are studies on the development of discourse, i.e. the child's acquisition of the ability not only to juxtapose ideas, but to link them into cohesive, coherent texts and to use argumentation, skills that are not fully acquired until the child is well into adolescence and nearing adulthood.

The Notion of Syllable Across History, Theories and Analysis Domenico Russo. 2016-06-22 Any notion linguistically expressed, even one such as the syllable, is always the result of several different viewpoints. In order to take this into account, this book draws inspiration from the scheme of quaternion, as conceived by Sir William Rowan Hamilton and later introduced in theoretical linguistics by Ferdinand de Saussure. The first term of the quaternion (The Dawn of the Syllable) is provided by historical observations. The second term (Beyond the Sound of Syllables) is composed of different descriptive analyses of the syllable carried out in some particular languages and dialects. The third term (The Body of Syllables) presents the analytical-instrumental analysis of the syllable, while the fourth (De Syllaba Ventura) proposes some theoretical considerations.

Perceptual Development Alan Slater.1998 The aim of this book is both to reflect current knowledge of perceptual development and to point to some of the many questions that remain unanswered. The study of perceptual development is now a sophisticated science. The majority of the chapters tell a fascinating detective story: the way in which infants perceive and understand the world as they develop. Each of the major sections is prefaced by introductory comments, and the book will be useful for advanced undergraduates, postgraduates, researchers, and other professionals who have an interest in early perceptual development and in infancy in general.

Recent Advances In Perinatal Medicine - Proceedings Of The 100th Course Of The International School Of Medical Sciences T H Bloomfield,E V Cosmi,Gian Carlo Di Renzo,D F Hawkins.1999-09-17 This volume is based on presentations at the fifth course on perinatal medicine held in the International School of Medical Sciences at the Ettore Majorana Centre for Scientific Culture in Erice, Sicily, in March 1996. It has had a prolonged gestation, but the presentations have been updated and thus the book will benefit perinatologists internationally.The introductory lecture, by philosopher Donald Evans, is of great interest, discussing the issues which all those involved in reproductive medicine, in its widest sense, are dealing with all the time but seldom think about or put in context. Subsequent papers deal with understanding the development and management of the fetus and newborn along lines which represent real progress in perinatal medicine. The epilogue, based on a seminar, will be a help to all those Europeans and others struggling to present their work in English language journals and books.

From Gluttony to Enlightenment Viktoria von Hoffmann.2016-12-08 Scorned since antiquity as low and animal, the sense of taste is celebrated today as an ally of joy, a source of adventure, and an arena for pursuing sophistication. The French exalted taste as an entrée to ecstasy, and revolutionized their cuisine and language to express this new way of engaging with the world. Viktoria von Hoffmann explores four kinds of early modern texts--culinary, medical, religious, and philosophical--to follow taste's ascent from the sinful to the beautiful. Combining food studies and sensory history, she takes readers on an odyssey that redefined a fundamental human experience. Scholars and cooks rediscovered a vast array of ways to prepare and present foods. Far-sailing fleets returned to Europe bursting with new vegetables, exotic fruits, and pungent spices. Hosts refined notions of hospitality in the home while philosophers pondered the body and its perceptions. As von Hoffmann shows, these labors produced a sea change in perception and thought, one that moved taste from the base realm of the tongue to the ethereal heights of aesthetics.

MENC Handbook of Musical Cognition and Development Richard Colwell.2006-02-23 Answering fundamental questions about musical preference, ability, and communication, the field of Musical Cognition and Development is critical to the understanding of how music is processed, grasped, and learned. Drawn from the widely acclaimed *New Handbook of Research on Music*

Teaching and Learning (Oxford, 2002), the MENC Handbook of Musical Cognition and Development covers the latest theoretical and practical techniques that explain meaning and understanding in music. A distinguished team of internationally recognized experts offers cogent and concise insights providing readers up-to-date information and references. The volume covers the most important topics in this field, including skill development in music performance, research on communicating music expressiveness, the neurobiology of music, the cognitive constraints in the listening process, and music and medicine as applied to neuroscience. Practical and affordable, this volume will prove essential for students and scholars of music education and the psychology of music. It is both an excellent starting point for those looking to gain an orientation to the field, and an up-to-date presentation of the most recent research findings for experienced researchers, instructors, and pedagogues.

Writing Beyond the End Times? / Écrire au-delà de la fin des temps ? Ursula Mathis-Moser, Marie Carrière. 2019-10-03 This collection of essays examines how the sense of crisis that occasionally seems to overwhelm us directs and transforms Canadian and Quebec writings in English and French, and conversely, how literature and criticism set out to counterbalance the social, economic, and ideological insecurities we live in. Ce recueil de textes étudie les manières dont le sentiment de crise qui peut parfois sembler nous submerger, oriente et transforme les écrits canadiens et québécois d'expressions anglaise et française, et inversement, comment la littérature et la critique s'efforcent de contrebalancer les insécurités sociales, économiques et idéologiques dans lesquelles nous vivons. Masques de la Diversité Candienne Serge Jaumain, Marc Maufort. 1995 The essays collected here illustrate aspects of recent research conducted by graduate students in Canadian studies at various European universities. The methodological diversity displayed points to the very essence of the culture the contributors explore - what has been commonly termed the Canadian mosaic or, more recently, the Canadian kaleidoscope (Janice Kulyk-Keefer). In analysing the many facets of this mosaic, the numerous images of this kaleidoscope, the contributors offer fresh and youthful reappraisals of traditional visions of Canadianness.

Cultural Dynamics of Women's Lives Ana Clara S. Bastos, Jaan Valsiner, Kristiina Uriko. 2012-12-01 This book explores the diverse landscapes wherein women struggle for their personal and social identities and lives, between biology and culture, destiny and choice, shared and individual worlds, tradition and modernity. Their "peripheral lives" have "central meaning" (Chaudhary, this volume) in any society - and as such are approached as a primary subject in this book, as the chapters traverse ten different countries on three continents: North America (United States); Latin America (Brazil, Chile, Colombia); Asia (India); and Europe (United Kingdom, Ireland, Portugal, Finland, Estonia). Throughout these different places, women's lives are an interesting stage for observing the interaction between biology and culture (e.g. sex vs. gender; pregnancy and childbirth vs. transition to motherhood). The focus on the cultural variability of human experience opens the door for the search of commonalities so needed in psychological theorizing. Here, this search is directed by how cultural models of womanhood (and motherhood) constrain personal experiences, especially through

developmental transitions. This book is, ultimately, an opportunity to approach women's lives from the perspective of the women themselves, particularly making audible and explicit their voices and the axis of logic that structures their world. Undoubtedly, it is a valuable opportunity for women and men interested in understanding and constructing human experience inside better worlds.

The Skin-Ego Didier Anzieu.2018-05-15 In this classic work, the author presents and develops his theory of the importance of 'the Skin-ego'. Just as the skin is wrapped around the body, so the author sees the 'Skin-ego' as a psychical wrapping containing, defining and consolidating the subject. From this perspective, the structure and functions of the skin can provide psychoanalysts and general readers with a fertile and practical metaphor. The author's concept of the Skin-ego is the answer to questions he regards as crucial to contemporary psychoanalysis: questions of topography which were left incomplete by Freud; the analysis of fantasies of the container as of the contained; issues of touch between mothers and babies; extending the concept of prohibitions within an Oedipal framework to those derived from a prohibition on touching; and questions pertaining to the representation of the body and to its psychoanalytic setting. This new translation of *Le Moi-peau* is based on the second and last (1995) edition.

Do Mothers Dream of Electric Babies? Giuliana Mieli.2018-10-09 We live in a society that ignores and disregards attachment needs and feelings. Starting from this consideration, the author describes the stages of human emotional development in a lucid narrative which is both scientifically rigorous and grounded in clinical examples. Mieli critically investigates the origins of a specific weariness towards feelings which is reflected in the history of Western philosophy and science, resulting in a cultural disregard of emotional needs. The book powerfully suggests that if undeterred, this disregard may lead to severe consequences for the future of our society. Research compellingly shows that responding to fundamental emotional needs is a psycho-biological requirement necessary for human wellbeing and survival itself. Mieli contends that its oversight has a counterpart in the dramatic rise of mental distress in contemporary society, as well as in the

difficulties that are increasingly encountered around maternity, fertility, and parenting.

Corpus Jean-Luc Nancy.2009-08-25 How have we thought “the body”? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “mystical body of Christ”—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy’s masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy’s larger project called “The deconstruction of Christianity.”

Sensing the World David Le Breton.2020-05-31 Sensing the World: An Anthropology of the Senses is a highly original and comprehensive overview of the anthropology and sociology of the body and the senses. Discussing each sense in turn - seeing, hearing, touch, smell, and taste - Le Breton has written a truly monumental work, vast in scope and deeply engaging in style. Among other

pioneering moves, he gives equal attention to light and darkness, sound and silence, and his disputation of taste explores aspects of disgust and revulsion. Part phenomenological, part historical, this is above all a cultural account of perception, which returns the body and the senses to the center of social life. Le Breton is the leading authority on the anthropology of the body and the senses in French academia. With a repute comparable to the late Pierre Bourdieu, his 30+ books have been translated into numerous languages. This is the first of his works to be made available in English. This sensuously nuanced translation of *La Saveur du monde* is accompanied by a spicy preface from series editor David Howes, who introduces Le Breton's work to an English-speaking audience and highlights its implications for the disciplines of anthropology, sociology, and the cross-disciplinary field of sensory studies.

Birth and Breastfeeding Michel Odent.2007-02-01 Humanity, argues Michel Odent, stands at a crossroads in the history of childbirth--and the direction we choose to take will have critical consequences. Until recently a woman could not have had a baby without releasing a complex cocktail of love hormones. In many societies today, most women give birth without relying on the release of such a flow of hormones. Some give birth via cesarean section, while others use drugs that not only block the release of these natural substances, but also do not have their beneficial behavioral effects. This unprecedented situation must be considered in terms of civilization, says Odent. It gives us urgent new reasons to rediscover the basic needs of women in labor. At a time

when pleas for the humanization of childbirth are fashionable, the author suggests, rather, that we should first accept our 'mammalian' condition and give priority to the woman's need for privacy and to feel secure. The activity of the intellect, the use of language, and many cultural beliefs and rituals--which are all special to humans--are handicaps in the period surrounding birth. Says Odent: To give birth to her baby, the mother needs privacy. She needs to feel unobserved. The newborn baby needs the skin of the mother, the smell of the mother, her breast. These are all needs that we hold in common with the other mammals, but which humans have learned to neglect, to ignore or even deny. Expectant parents, midwives, childbirth educators, those involved in public health, and all those interested in the future of humanity will find this a provocative and visionary book. Contents: Our Mammalian Roots (and a little girl in North Dakota) At the Dawn of the Post-Electronic Age (side effects of electronic fetal monitoring) The Hospital of the Future (privacy in the birthplace) On Another Planet (the human environment in the birthplace) The Fetus Ejection Reflex (regarding the birth of non-human mammals) Cats (a diversion) The Old and the New (the main chapter) Colostrum and Civilization (the newborn and contact with the mother) From Holland to Malawi (a Dutch midwife and a traditional birth attendant) Photos and Videos (the invasive camera) Freud as a Midwife (low-profile midwives as the experts on psychology) The Hormone of Love (the hormonal basis of love) Breastfeeding and Family Structures (two inseparable topics) Lullaby Time (the specifically human lullaby)

The Behavior of Human Infants Alberto Oliverio, Michele Zappella. 2013-03-09 The present workshop started with various requests on behalf of several participants: some of us suggested the desirability of having only a free discussion, leaving papers aside: others would have preferred to stick to papers, though enlarging the discussion of each of them to more general topics. Further,

intermediate positions were also present. From these different proposals came the hypothesis that a common frame or red line to all of our discussions on behavioural development would be to see what could be done by an interexchange of differing but converging disciplines in favour of children, and in particular of children with psychic handicaps, in terms of prevention and cure. At the end of three days of prolonged meetings, where each paper was given and extensively discussed, one feels that a number of referral points have emerged. On the one side the plasticity of behaviour, on the other is reciprocity (between mother and child, father and child and perhaps we should add between mother and father). The third point, which perhaps has been only partially covered, concerns the relationship between these two variables, i. e. in terms of treatment of a child, the potential plasticity of his behaviour can be used to his great advantage if it is related to the historical common needs of the reciprocal relationship, for example, between the child and his parents.

L'aube des seigneurs Romuald Reber.2017-07-02 Le sujet premier de cette nouvelle traite des mutations possibles de notre système de société, plus précisément du système capitaliste dans lequel nous vivons, face à l'implémentation des intelligences artificielles et de l'avènement des robots humanoïdes. J'ai essayé de dépeindre, dans cette histoire, des visions possibles de ce qui pourrait advenir, en créant des modèles de société contradictoires, voire antagonistes et d'autres hybrides. Dans ce livre, les robots ne rêvent pas, mais sont plutôt des extensions de la conscience ou l'ambition des hommes. On peut parler de science-fiction, bien que l'arrêt sur image soit, je l'avoue, très proche de la réalité et pourrait-être considéré aussi comme une « épopée » contemporaine, voire une fiction. Il y a beaucoup d'humanité dans cette histoire, d'amours, de haines et de voyages. L'histoire se déroule sur plusieurs continents et bien au-delà.

Music and Familiarity Elaine King, Helen M. Prior. 2016-04-29 Familiarity underpins our engagement with music. This book highlights theoretical and empirical considerations about familiarity from three perspectives: listening, musicology and performance. Part I, 'Listening', addresses familiarity as it relates to listeners' behaviour and responses to music, specifically in regulating our choice and exposure to music on a daily basis; how we get to know music through regular listening; how comfortable we feel in a Western concert environment; and music's efficacy as a pain-reliever. Part II, 'Musicology' exposes the notion of familiarity from varied stances, including appreciation of music in our own and other cultures through ethnomusicology; exploration of the perception of sounds via music analysis; philosophical reflection on the efficiency of communication in musicology; evaluation of the impact of researchers' musical experiences on their work; and the influence of familiarity in music education. Part III, 'Performance', focuses on the effects of familiarity in relation to different aspects of Western art and popular performance, including learning and memorizing music; examination of 'groove' in popular performance; exploration of the role of familiarity in shaping socio-emotional behaviour between members of an ensemble; and consideration about the effects of the unique type of familiarity gained by musicians through the act of performance itself.

The New Handbook of Research on Music Teaching and Learning Music Educators National Conference (U.S.). 2002-04-18 Featuring chapters by the world's foremost scholars in music

education and cognition, this handbook is a convenient collection of current research on music teaching and learning. This comprehensive work includes sections on arts advocacy, music and medicine, teacher education, and studio instruction, among other subjects, making it an essential reference for music education programs. The original Handbook of Research on Music Teaching and Learning, published in 1992 with the sponsorship of the Music Educators National Conference (MENC), was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field (Choice). This new companion volume, again with the sponsorship of MENC, explores the significant changes in music and arts education that have taken place in the last decade. Notably, several chapters now incorporate insights from other fields to shed light on multi-cultural music education, gender issues in music education, and non-musical outcomes of music education. Other chapters offer practical information on maintaining musicians' health, training music teachers, and evaluating music education programs. Philosophical issues, such as musical cognition, the philosophy of research theory, curriculum, and educating musically, are also explored in relationship to policy issues. In addition to surveying the literature, each chapter considers the significance of the research and provides suggestions for future study. Covering a broad range of topics and addressing the issues of music education at all age levels, from early childhood to motivation and self-regulation, this handbook is an invaluable resource for music teachers, researchers, and scholars.

The Race for Consciousness John G. Taylor. 2001-08-24 Scientists may be approaching the finish-line in the race to understand consciousness. John Taylor introduces the contending theories, including his own. There is a sense among scientists that the time is finally ripe for the problem of consciousness to be solved once and for all. The development of new experimental and theoretical

tools for probing the brain has produced an atmosphere of unparalleled optimism that the job can now be done properly: The race for consciousness is on! In this book, John Taylor describes the complete scene of entries, riders, gamblers, and racecourses. He presents his own entry into the race, which he has been working on for the past twenty-five years—the relational theory of consciousness, according to which consciousness is created through the relations between brain states, especially those involving memories of personal experiences. Because it is an ongoing and adaptive process, consciousness emerges from past brain activity. It is this highly subtle and delicate process of emergence that leads to the complexity of consciousness. Taylor does not just present another theory of consciousness, but makes comprehensible the nuts-and-bolts methodology behind the myriad attempts to win the race.

Negotiated Breastfeeding Caroline Chautems.2021-10-18 Based on an ethnography of postpartum consultations by independent midwives in Switzerland, this book produces unique insights into home-birth parents' breastfeeding journey from the first hours after birth to weaning. Considered the natural continuity of childbirth without intervention, breastfeeding is a fundamental component of the holistic, continuous and individualised care independent midwives provide as they engage with parents in a shared construction of meaning around breastfeeding. This book offers new perspectives on the conceptualisation of breastfeeding as a shared process. Parents, in collaboration with their midwife and baby, are jointly constructing negotiated breastfeeding. As the child grows and develops, questions arise regarding the management of risks, the construction of the lactating body and the body work required, and the perception of breastfeeding as a means of communication with the child, consistent with a child-centred approach to parenting. Fostering a reflection on the contrasts and similarities between the marginal model of holistic care and the dominant biomedical

model, this book sheds light on issues of a broader scope: the relationship to health risks and health promotion, gender inequalities regarding parental roles and responsibilities, the concept of the child as a project, and the consequential intensification of parenthood. The book also explores transversal themes by outlining how reproduction and parenting are undertaken in Switzerland, framed by the local cultural, political and economic context, including the gender system and resulting power relationships.

New and Selected Poems Yves Bonnefoy. 1995-12-18 Yves Bonnefoy, celebrated translator and critic, is widely considered the most important and influential French poet since World War II. Named to the Collège de France in 1981 to fill the chair left vacant by the death of Roland Barthes, Bonnefoy was the first poet honored in this way since Paul Valéry. Winner of many awards, including the Prix Goncourt in 1987 and the Hudson Review's Bennett Award in 1988, he is the author of six critically acclaimed books of poetry. Spanning four decades and drawing on all of Bonnefoy's major collections, this selection provides a comprehensive overview of and an ideal introduction to his work. The elegant translations, many of them new, are presented in this dual-language edition alongside the original French. Several significant works appear here in English for the first time, among them, in its entirety, Bonnefoy's 1991 book of verse, *The Beginning and the End of the Snow*,

the 1988 prose poem *Where the Arrow Falls*, and an important long poem from 1993, *Wind and Smoke*. Together with poems from such classic volumes as *In the Lure of the Threshold*, these new works shed light on the growth as well as the continuity of Bonnefoy's work. John Naughton's detailed introduction looks at the evolution of Bonnefoy's poetry from the 1953 publication of *On the Motion and Immobility of Douve*, which immediately established his reputation as one of France's leading poets, through the 1993 publication of *The Wandering Life* and its centerpiece *Wind and Smoke*. This is a comprehensive selection that contains examples of work spanning [Bonnefoy's] full career of forty years, from the ground-breaking *Du Mouvement et de l'Immobilité de Douve* through the celebratory *Pierre Ecrite* to the magical winter landscapes of America's East Coast and an unsettling reworking of myth in the recent *La Vie Errante* . . . The translations, which are the work of a variety of hands, including Galway Kinnell, Emily Grosholz and Anthony Rudolf, nevertheless fit well together and all are sensitive to the register and subtleties of both languages, while the introductory essay by John Naughton expertly explains Bonnefoy's importance as a poet and the influences which have shaped him. This is definitely a volume worth having, for layman and French specialist alike.—Hilary Davies, *Times Literary Supplement* Anyone not familiar with Bonnefoy's work will benefit from the background information and explanations given by John Naughton in his excellent introduction The book as a whole provides an excellent introduction to Bonnefoy's poetry and to his concerns of a lifetime.—Don Rodgers, *Poetry Wales*

Analysis, Synthesis, and Perception of Musical Sounds James Beauchamp.2007-08-30 This book contains a complete and accurate mathematical treatment of the sounds of music with an emphasis on musical timbre. The book spans the range from tutorial introduction to advanced research and

application to speculative assessment of its various techniques. All the contributors use a generalized additive sine wave model for describing musical timbre which gives a conceptual unity, but is of sufficient utility to be adapted to many different tasks.
