An Introduction to the Study of Education David Matheson.2014-09-15 This fully updated, fourth edition of An Introduction to the Study of Education provides a comprehensive and reflective introduction to the study of education, inviting students to question what education is, who it is for and what purpose it serves. Taking the reader from the early years through to lifelong learning, it examines all forms of education and learning. This new edition includes ten completely new chapters and a step-by-step guide to essay writing. There is also a companion website to accompany the book, featuring additional chapters which can be visited at www.routledge.com/cw/matheson. This fully updated, fourth edition provides: a full exploration of the historical, sociological, philosophical and psychological roots of education; a clear focus on the individual levels of education - preschool, compulsory, post-compulsory and lifelong learning; the latest debates within special educational needs; an in-depth examination of learning styles; insights into the historical development of education and the role of, and background to, research in education; a focus on current educational practice and diversity across the United Kingdom and Ireland. Written in a clear and accessible style, this is the essential core text for all beginning students on undergraduate and postgraduate courses in Education Studies and all those interested in education today, where it came from and where it is going.

Contemporary Debates in Education Ron Brooks.2014-09-25 Did the Thatcher years and their aftermath constitute a revolution or a restoration in education. Do they represent a departure from, or a reinforcement of tradition? Contemporary Debates in Education is a thought-provoking volume which reviews the reforms of the eighties and early nineties, then follow this with an examination of the long-standing issues in education over the last century in order to relate current reforms and changes to their broader historical background, so that those with a general or professional interest in education can better understand the process in which they are involved.

A Taxonomy for Learning, Teaching, and Assessing Lorin W. Anderson,David R. Krathwohl.2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Seven Myths About Education Daisy Christodoulou.2014-03-14 In this controversial new book, Daisy Christodoulou offers a thought-provoking critique of educational orthodoxy. Drawing on her recent experience of teaching in challenging schools, she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles. She examines seven widely-held beliefs which are holding back pupils and teachers: Facts prevent understanding Teacher-led instruction is passive The 21st century fundamentally changes everything You can always just look it up We should teach transferable skills Projects and activities are the best way to learn Teaching knowledge is indoctrination In each accessible and engaging chapter, Christodoulou sets out the theory of each myth, considers its practical implications and shows the worrying prevalence of such practice. Then, she explains exactly why it is a myth, with reference to the principles of modern cognitive science. She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence-less theory and bad practice. This blisteringly incisive and urgent text is essential reading for all teachers, teacher training students, policy makers, head teachers, researchers and academics around the world.

Darkhenge Catherine Fisher.2012-01-31 It's been three months since Rob's younger sister, Chloe, fell into a coma after a riding accident, and his life is in disarray. Rob's parents spend most of their time at his sister's bedside, and his best friend is afraid to talk to Rob about Chloe. To distract himself, Rob takes a job working at a secret archaeological site, where workers have uncovered a mystical ring of black timbers. At its center an ancient tree is buried upside down in the earth—a tree with the power to transport Rob to the Unworld, where Chloe lives in a forest of enchanting dreams, trapped between life and death. Catherine Fisher has combined a fascinating exploration of myth with a modern quest for understanding. Where is the land of the imagination? And if we found our way there, would we ever want to come back?

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee.2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

Achtung-Panzer! Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Big Society in a Small Country Dan Boucher.2013-06-24 This book argues that the 'Big Society' concept is, in a real sense, more Welsh than English. It contends that Wales can add value to the development of big society ideas in practice and at the same time renew its own economic life, identity and traditions.

Drawing is Thinking Milton Glaser.2008-11-26 For more than fifty years, Milton Glaser has designed much of the world we live and experience every day. His posters, books, albums, restaurants, advertisements, and so much more have identified him as the preeminent force in design in America. Now, in *Drawing is Thinking*, Glaser draws upon an amazing vocabulary of images and techniques to create his most personal book to date. In a way, he has not only been drawing all his life, he has been thinking about art and design on that journey. Based on his view that all art has its origin in the impulse to create, he has designed a book that powerfully delineates this position. In *Drawing is Thinking*, the drawings depicted are meant to be experienced sequentially, so that the viewer not only follows Glaser through these pages, but comes to inhabit his mind. The drawings represent a sweeping range of subject matter taken from the full range of a reflective master's career. The pages suggest that drawing is not simply a way to represent reality, but, as the title implies, a better way to perceive the world. The maker and the viewer become more attentive, one by creating the work, the other by experiencing it. Glaser's two signature books, *Graphic Design* and *Art is Work*, are each in print decades after their first appearances. In different ways, each is a display of his work with extended descriptions of how the work came about, and how design problems were visually resolved. But in *Drawing is Thinking* the author is less interested in display. Glaser this time is concerned with how the mind works in its attempt to create reality.--BOOK JACKET.
