Regional Integration and Future Cooperation Initiatives in the Eurasian Economic Union Lagutina, Maria.2019-12-27 The integration of the Eurasian Economic Union has been under constant development as officials try to successfully implement new economic policies within its various regions. Introducing a new policy such as this creates the formation of new markets, the improvement of cooperation initiatives, as well as a new legislative base and supplementations. These continual alterations require updated analysis and research for political leaders to follow regarding provincial incorporation methods. Regional Integration and Future Cooperation Initiatives in the Eurasian Economic Union is an essential reference source that discusses the conceptual and empirical frameworks of the current phase of Eurasian integration as well as its economic impact. Featuring research on topics such as multilateral cooperation, free trade, and international views, this book is ideally designed for politicians, economists, strategists, public relations specialists, research scholars, policymakers, students, and academicians seeking coverage on regional integration issues in modern Eurasia.

Strange Beasts of China Yan Ge.2021-07-13 A New York Times Editors' Choice and Notable Book of 2021 Best Science Fiction, Fantasy and Horror of 2021—The Washington Post From one of the most exciting voices in contemporary Chinese literature, an uncanny and playful novel that blurs the line between human and beast... In the fictional Chinese city of Yong'an, an amateur cryptozoologist is commissioned to uncover the stories of its fabled beasts. These creatures live alongside humans in near-inconspicuousness—save their greenish skin, serrated earlobes, and strange birthmarks. Aided by her elusive former professor and his enigmatic assistant, our narrator sets off to document each beast, and is slowly drawn deeper into a mystery that threatens her very sense of self. Part detective story, part metaphysical enquiry, *Strange Beasts of China* engages existential questions of identity, humanity, love and morality with whimsy and stylistic verve.

Iranian and Diasporic Literature in the 21st Century Daniel Grassian.2013-02-18 The most populous Islamic country in the Middle East, Iran is rife with contradictions, in many ways caught between the culture and governments of the Western—more dominant and arguably imperialist—world and the ideology of conservative fundamentalist Islam. This book explores the present-day writings of authors who explore these oppositional forces, often finding a middle course between the often brutal and demonizing rhetoric from both sides. To combat how the West has falsely generalized and stereotyped Iran, and how Iran has falsely generalized and stereotyped the West, Iranian and diasporic writers deconstruct Western caricatures of Iran and Iranian caricatures of the West. In so doing, they provide especially valuable insights into life in Iran today and into life in the West for diasporic Iranians.

Advances in Economic Measurement Duangkamon Chotikapanich,Alicia N. Rambaldi,Nicholas Rohde.2022-10-03 The purpose of this book is to honour D.S. Prasada Rao and his many outstanding contributions to economic measurement, including index number methods for international comparisons of prices, real incomes, output, and productivity; stochastic approaches to index numbers; purchasing power parities for the measurement of regional and global inequality and poverty; and measurement of income and economic insecurity. This book brings together contributions by well-known and influential researchers in the field of economic measurement with special focus on topics in productivity measurement (Part I); income and health inequality, inequality of opportunity, and measurement of insecurity (Part II); index number theory and applications to consumer price index numbers, international comparisons of prices and real expenditures, and housing price index numbers (Part III). The chapters are authored by eminent researchers including Conchita D'Ambrosio, Bert Balk, Erwin Diewert, Robert Hill, Robert Inklaar, Knox Lovell, Robin Sickles, Jacques Silber and Marcel Timmer. The contributed papers offer in-depth reviews of the state of the art in these areas with a focus on the existing methods and applications, making the volume an invaluable source for both experienced researchers and new researchers, including PhD and other postgraduate students.

Advanced Organic Chemistry Francis A. Carey, Richard J. Sundberg. 2007-06-27 The two-part, fifth edition of *Advanced Organic Chemistry* has been substantially revised and reorganized for greater clarity. The material has been updated to reflect advances in the field since the previous edition, especially in computational chemistry. Part A covers fundamental structural topics and basic mechanistic types. It can stand-alone; together, with Part B: *Reaction and Synthesis*, the two volumes provide a comprehensive foundation for the study in organic chemistry. Companion websites provide digital models for study of structure, reaction and selectivity for students and exercise solutions for instructors.

The Alawis of Syria Michael Kerr, Craig Larkin. 2015-01-12 Throughout the turbulent history of the Levant the 'Alawis - a secretive, resilient and ancient Muslim sect - have aroused suspicion and animosity, including accusations of religious heresy. More recently they have been tarred with the brush of political separatism and complicity in the excesses of the Assad regime, claims that have gained greater traction since the onset of the Syrian uprising and subsequent devastating civil war. The contributors to this book provide a complex and nuanced reading of Syria's 'Alawi communities - from loyalist gangs (Shabiha) to outspoken critics of the regime. Drawing upon wide-ranging research that examines the historic, political and social dynamics of the 'Alawi and the Syrian state, the current tensions are scrutinised and fresh insights offered. Among the themes addressed are religious practice, social identities, and relations to the Ba'ath party, the Syrian state and the military apparatus. The analysis also extends to Lebanon with a focus on the embattled 'Alawi community of Jabal Mohsen in Tripoli and state relations with Hizballah amid the current crisis.

Transnational Law and State Transformation Jennifer Lander. 2019-11-07 This book contributes new theoretical insight and in-depth empirical analysis about the relationship between transnational legality, state change and the globalisation of markets. The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism: the power to institute new rules and limits for national states. This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives. While leading scholars in the field have emphasised the much-needed value of case studies, there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution. This monograph addresses this empirical gap, whilst expanding the theoretical scope of the field. Mongolia's recent transformation as a mineral-exporting country provides a rare opportunity to witness economic and legal globalisation in process. Based on careful empirical analysis of national law and policy-making, the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector, specifically by redistributing state power in relation to the market, sub-national administrations and civil society. The book investigates the role of international financial institutions, multinational corporations and non-governmental organisations in normative transmission, as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy

environment. As the book demonstrates, however, the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation, institutionally and ideologically. The book will be of interest to scholars of international law, global governance and the political economy of development.

The Overland Campaign, 4 May - 15 June 1864 David W. Hogan.2014 In the spring of 1864, the Civil War's two legendary military leaders, Ulysses S. Grant and Robert E. Lee, confronted each other on the battlefield for the first time. Part of the U.S. Army's commemorative series of the Civil War, *The Overland Campaign, 4 May - 15 June 1864*, by David W. Hogan, Jr. tells the story of the clash of these two titans through the burning scrub brush of the Wilderness, the bitter struggle for the Bloody Angle at Spotsylvania Court House, the cavalry encounter at Yellow Tavern, the maneuvering along the North Anna River, and the tragedy of Cold Harbor. It also provides analysis in light of the latest scholarship. This brochure includes eight maps and twenty-two illustrations. High school students and teachers that are learning and preparing research papers about the American Civil War may be interested in this illustrated resource. Additionally, military personnel, especially military historians, military science students, and American citizens may be interested in this book.

Global Intelligence Oversight Zachary K. Goldman, Samuel J. Rascoff.2016-04-26 In a world that is increasingly unstable, intelligence services like the American CIA and the United Kingdom's MI6 exist to deliver security. Whether the challenge involves terrorism, cyber-security, or the renewed specter of great power conflict, intelligence agencies mitigate threats and provide decisional advantage to national leaders. But empowered intelligence services require adequate supervision and oversight, which must be about more than the narrow (if still precarious) task of ensuring the legality of covert operations and surveillance activities. *Global Intelligence Oversight* is a comparative investigation of how democratic countries can govern their intelligence services so that they are effective, but operate within frameworks that are acceptable to their people in an interconnected world. The book demonstrates how the institutions that oversee intelligence agencies participate in the protection of national security while safeguarding civil liberties, balancing among competing national interests, and building public trust in inherently secret activities. It does so by analyzing the role of courts and independent oversight bodies as they operate in countries with robust constitutional frameworks and powerful intelligence services. The book also illuminates a new transnational oversight dynamic that is shaping and constraining security services in new ways. It describes how global technology companies and litigation in transnational forums constitute a new form of oversight whose contours are still undefined. As rapid changes in technology bring the world closer together, these forces will complement their more traditional counterparts in ensuring that intelligence activities remain effective, legitimate, and sustainable.

China in the Era of Xi Jinping Robert S. Ross, Jo Inge Bekkevold.2016-05-12 Since becoming president of China and general secretary of the Chinese Communist Party, Xi Jinping has emerged as China's most powerful and popular leader since Deng Xiaoping. The breathtaking economic expansion and military modernization that Xi inherited has convinced him that China can transform into a twenty-first-century superpower. In this collection, leading scholars from the United States, Asia, and Europe examine both the prospects for China's continuing rise and the emergent and unintended consequences posed by China's internal instability and international assertiveness. Contributors examine domestic challenges surrounding slowed economic growth, Xi's anti-corruption campaign, and government efforts to maintain social stability. Essays on foreign policy range from the impact of nationalist pressures on international relations to China's heavy-handed actions in the South China Sea that challenge regional stability and US-China cooperation. The result is a comprehensive analysis of current policy trends in Xi's China and the implications of these developments for his nation, the United States, and Asia-Pacific.

The Globalization of Chinese Propaganda K. Edney.2014-05-20 This book investigates the relationship between the Chinese Communist Party's crucial goal of using the propaganda system to consolidate its power within the domestic political environment and its prominent recent attempts to use propaganda overseas to increase China's international power.

Big Data Hassan A. Karimi.2014-02-18 Big data has always been a major challenge in geoinformatics as geospatial data come in various types and formats, new geospatial data are acquired very fast, and geospatial databases are inherently very large. And while there have been advances in hardware and software for handling big data, they often fall short of handling geospatial big data efficiently and effectively. *Big Data: Techniques and Technologies in Geoinformatics* tackles these challenges head on, integrating coverage of techniques and technologies for storing, managing, and computing geospatial big data. Providing a perspective based on analysis of time, applications, and resources, this book familiarizes readers with geospatial applications that fall under the category of big data. It explores new trends in geospatial data collection, such as geo-crowdsourcing and advanced data collection technologies such as LiDAR point clouds. The book features a range of topics on big data techniques and technologies in geoinformatics including distributed computing, geospatial data analytics, social media, and volunteered geographic information. With chapters contributed by experts in geoinformatics and in domains such as computing and engineering, the book provides an understanding of the challenges and issues of big data in geoinformatics applications. The book is a single collection of current and emerging techniques, technologies, and tools that are needed to collect, analyze, manage, process, and visualize geospatial big data.
