Les sciences humaines dans le centre de l'art CORDONNIER Sarah.2012-09-24 Cet ouvrage propose de décrypter le rôle des sciences humaines dans l'art contemporain au fil de son développement et de son institutionnalisation en France. Cette approche communicationnelle s'intéresse aussi bien aux pratiques qu'aux discours, aux dispositifs (comme l'exposition) qu'aux représentations (en particulier des sciences). Comment observer les sciences humaines dans le champ artistique, alors que leur réception, leurs réappropriations, ne sont pas visibles de manière immédiate ? Comment rendre compte d'un usage collectif de ces savoirs et, donc, les situer dans des règles et normes partagées par les acteurs de l'art contemporain ? Comment repérer et analyser les manières différenciées d'y recourir dans ce cadre commun ? Par l'observation et l'examen détaillé des centres d'art et des expositions d'art contemporain, Les sciences humaines dans le centre d'art vise à éclairer la circulation sociale des savoirs et les manières de l'étudier.

Lexique transversal et formules discursives des sciences humaines Marie-Paule Jacques, Agnès Tutin.2018-10-01 *Lexique transversal et formules discursives des sciences humaines* propose une synthèse de travaux menés autour du lexique scientifique transdisciplinaire (LST) en français, c'est-à-dire le lexique employé par les auteurs scientifiques pour décrire et conceptualiser les résultats de leurs recherches. Propre au genre, par-delà les disciplines, ce LST est indispensable à la recherche et à l'écriture scientifique, essentiellement dans les disciplines des sciences humaines. Cet ouvrage présente une description des caractéristiques lexicales et discursives des écrits de recherche en

sciences humaines. Sont abordées les propriétés sémantiques, syntaxiques et discursives du lexique et de la phraséologie de ce genre. Figurent en annexes un inventaire des unités lexicales transdisciplinaires, ainsi que des classes sémantiques organisant cet inventaire. L'ouvrage sera donc particulièrement utile aux enseignants et aux étudiants soucieux de comprendre les rouages de l'écriture de recherche dans des disciplines variées.

Natural Resources, Socio-Ecological Sensitivity and Climate Change in the Volta-Oti Basin, West Africa Jürgen Runge, Assogba Guézéré, Laldja Kankpéndja.2020-09-10 This book presents the outcome of an interdisciplinary and international workshop supported by the Volkswagen Stiftung (funding line 'Knowledge for Tomorrow') on the topic of 'Natural Resources, Socio-Ecological Sensitivity and Climate Change in the Volta-Oti Basin, West Africa'. The conference was jointly organised by Goethe-University Frankfurt (Germany) and the University of Kara (Togo) held from

March 6 to 8, 2019 in northern Togo. It aimed to strengthen capacities of junior scientists from the sub-region, exchange and mobilise theoretical and methodological background from various scientific fields (Botany, Construction, Geology, Geography, Infrastructure, Politics, Remote Sensing, Sociology and Urban Planning). One goal was to deliver reliable elements for ongoing and profound environmental analyses that lie outside the common questions of the academic and civil society stakeholders. Ecosystem fragmentation and deforestation in West Africa are mainly triggered by humans such as agriculture and small-scale forest disturbances for charcoal and firewood production. Increasing population pressure, declining of carrying capacity and demand for agricultural land caused the reduction of land conservation capacities, even in protected areas. The complexity of interactions between environmental and socio-ecological systems and subsequent effects (sensitivity) has raised ongoing international awareness in light of ongoing climate change. By the example of natural resources, land use and stakeholders' perceptions within the Volta-Oti Basin the book's proceedings present, discuss and distribute new findings that will sustainably stimulate the international debate. The workshop also intended to overcome national borders and language barriers between the Anglophone (Ghana) and the Francophone (Benin, Burkina Faso, Ivory Coast, Togo) research communities, and supported better West African cooperation and networking. The young as well as the established partners formed new collaborations, and the event at the University of Kara (Togo) was a truly unique opportunity for all involved, not only to discuss science, but also to assess applied and best future management practices for the Oti-Volta Basin in West Africa.

Mergers & Acquisitions Mohammed Ibrahim. 2018-07-27 This book deals with corporate mergers and acquisitions by analyzing the financial and strategic aspects. It starts with a chronological

justification of the evolution of external growth operations and ends with case studies in order to put into practice the theoretical contribution of the previous titles. Through this book, we wish to detail the types of mergers and acquisitions, their modes, their motivations, their consequences and their performances. First of all, we propose a panoply of scientific research, methodological explanations and logical structuring to expose a subject of experience considered for a long time as a phenomenon in finance. Then, through a sample of 90 mergers or acquisitions, we analyze the effects of these transactions on French companies.

Lexique des sciences sociales Madeleine Grawitz.1999 Couvrir dans un lexique toutes les sciences sociales représente une entreprise présomptueuse. La difficulté majeure d'un ouvrage si peu spécialisé, c'est d'abord le choix des mots. Comment sélectionner en écartant les termes techniques propres à des sciences comme l'économie ou la linguistique et retenir ce qui, dans l'une ou l'autre, relève des sciences sociales ? Mes critères, je l'avoue, ont été plus pédagogiques que scientifiques. En fonction de mon expérience, j'ai cherché avant tout à être utile. Ce lexique s'adresse à un public très large de lecteurs, susceptibles de rencontrer des termes de sciences sociales sans avoir étudié celles-ci, mais également aux spécialistes d'un seul domaine. Un étudiant en démographie ne se contentera pas de la définition du taux de reproduction, plus développée dans un dictionnaire de démographie, mais découvrira ce qu'est le systémisme ; un économiste jugera courte la définition de l'inflation, un sociologue celle de l'anomie, mais l'un et l'autre apprendront ce

qu'est la patrilinéarité. Enfin, combien parmi tous ces lecteurs connaissent Lilith et ce que signifie procrastination ? En montrant aussi quels problèmes posent souvent les définitions vocabulaire courant : rêve, loisirs, jeunesse, vieillesse... Ce lexique lutte utilement contre les trompeuses et fausses évidences.

Redefining Culture John R. Baldwin, Sandra L. Faulkner, Michael L. Hecht, Sheryl L.

Lindsley.2006-08-15 Argues that culture is perhaps the most important thing to know about people if one wants to make predictions about their behavior. The goal of this volume is to present a theoretically exhaustive integration of multidisciplinary approaches.

Lexique des sciences sociales Gilles Ferréol.2000 Les sciences sociales se sont dotées d'un vocabulaire spécifique, chaque discipline apportant sa pierre à l'édifice. Une soixantaine de termes ont été ici retenus : • certains évoquent la pensée ou l'œuvre d'un père fondateur ; • d'autres se réfèrent à des préoccupations d'ordre méthodologique ou mettent en exergue des cadres d'analyse et des grilles de lecture ; • les principaux domaines d'investigation font également l'objet d'une présentation synthétique, la prise en compte de problématiques plus transversales se révélant très fructueuse ; • en fonction des thèmes abordés, l'accent est mis sur l'étymologie, l'évolution sémantique, les études de cas ou la confrontation de perspectives théoriques.

Intercultural Approaches to Education Abdeljalil Akkari, Myriam Radhouane.2022-02-28 This open access book provides an analysis of contemporary societies and schools shaped by cultural diversity, globalization and migration. This diversity is necessarily reflected in education systems and requires the promotion of intercultural approaches able to improve learning processes and the quality of

education. From an international and comparative perspective, this book first presents theoretical and conceptual foundations for seriously considering cultural diversity. The book also compares intercultural approaches and debates generated in countries as diverse as the United States, Canada, Brazil, Switzerland and France. For each national context, the book addresses both the historical roots of intercultural approaches and the concrete initiatives driven by educational policies for their implementation in schools and classrooms. Finally, the book presents discussions surrounding the treatment of linguistic or religious diversity in schools, the emergence of global citizenship education and the key role of teachers in intercultural approaches. This is an open access book.

Lexique d'économie et de sciences sociales Henri Bourachot. 2014 L'une des difficultés majeures dans l'approche de l'économie et des sciences sociales est sans doute le vocabulaire utilisé. Avec un jargon professionnel fait de termes techniques, d'acronymes, de mots anglo-saxons, l'apprentissage de cette spécialité n'est pas aisé. Avec plus de 1500 définitions traitant des concepts fondamentaux comme de l'actualité du monde économique, ce lexique a pour vocation d'être un outil simple d'utilisation pour décrypter les notions les plus importantes de ce secteur. Beyond Descriptive Translation Studies Anthony Pym, Miriam Shlesinger, Daniel Simeoni. 2008-03-13 To go "beyond" the work of a leading intellectual is rarely an unambiguous tribute. However, when Gideon Toury founded Descriptive Translation Studies as a research-based discipline, he laid down precisely that intellectual challenge: not just to describe translation, but to explain it through reference to wider relations. That call offers at once a common base, an open and multidirectional ambition, and many good reasons for unambiguous tribute. The authors brought together in this volume include key players in Translation Studies who have responded to Toury's

challenge in one way or another. Their diverse contributions address issues such as the sociology of translators, contemporary changes in intercultural relations, the fundamental problem of defining translations, the nature of explanation, and case studies including pseudotranslation in Renaissance Italy, Sherlock Holmes in Turkey, and the coffee-and-sugar economy in Brazil. All acknowledge Translation Studies as a research-based space for conceptual coherence and creativity; all seek to explain as well as describe. In this sense, we believe that Toury's call has been answered beyond expectations.

Social Stakes of Privatizations in Cameroon Hermann-Habib Kibangou. 2018-10-26 The devaluation of the CFA franc and the early 90s mark the second wave of privatizations recommended by international financial institutions. The transition from a system of "social goals" to that of private capital becomes more and more evident. From the peoples' point of view, the ongoing reforms imposed from outside often do not take into account the specific situation of each country. Therefore, the question posed by privatization is: how can a government conciliate the need to privatize a public company with that of the consideration of the claims of the people? This is the fundamental question behind this thinking. We chose as example the case of the Cameroon Development Corporation (Cdc). This is justified by the fact that, as announced more than ten years earlier, privatization drags on, though it (Cdc) appears third on the list of fifteen public companies

and parastatals to be privatized. After choosing to sell its four branches separately (banana, tea, rubber, palm oil), the Cameroonian government succeeded in October 2002 to sell the tea industry to the South African group Brobon Finex, which created the Cameroon Tea Estates (Cte). This is, to date, the only branch privatized. With its 13,000 employees, the first agro-industrial company in Cameroon, also first employer after the State, is a major stake. Also, the planned dismantling raises much concern. Our intention is to see how far and to what extent African states in general, and the Cameroonian State in particular, may accept the collaboration with representatives of the civil society in the game and the stakes of privatization policies, in the search for a social compromise.

Lexique de sociologie Yves Alpe,Alain Beitone,Christine Dollo,Jean-Renaud Lambert,Sandrine Parayre.2013 La 4e de couverture indique : Plus de 1 400 entrées concises et explicites qui couvrent tous les domaines de la sociologie (sociologie générale, économique, politique, méthodologie sociologique, etc.). Plus de 110 définitions encadrées mettant en avant les notions incontournables de la discipline. Tous les courants théoriques de la sociologie explicités : sociologie critique, individualisme méthodologique, fonctionnalisme, ethnométhodologie, interactionnisme... Une attention particulière a été apportée aux développements théoriques récents : sociologie de l'expérience, de l'individu, des réseaux sociaux, etc. Plus de 400 auteurs cités. 60 notices biographiques des principaux sociologues, facilement repérables en fin d'ouvrage. Un système très complet de corrélats qui permet de circuler facilement entre les notions. Enseignée dans de

nombreux cursus de formation (universités, IEP, classes préparatoires, écoles de commerce...), la sociologie occupe une place de plus en plus importante dans le débat public. Des problèmes sociaux fréquemment évoqués dans les médias (délinquance, crise urbaine, transformations de la famille...) aux analyses sociologiques parfois mobilisées dans le débat public, le vocabulaire sociologique est devenu courant tout en restant assez mal connu et souvent mal maîtrisé. Cette nouvelle édition du *Lexique de sociologie* offre une vision complète, claire et actuelle de cette branche méconnue des sciences sociales pourtant indispensable pour comprendre le monde.

Financial Risk Management and Modeling Constantin Zopounidis, Ramzi Benkraiem, Iordanis Kalaitzoglou. 2021-09-13 Risk is the main source of uncertainty for investors, debtholders, corporate managers and other stakeholders. For all these actors, it is vital to focus on identifying and managing risk before making decisions. The success of their businesses depends on the relevance of their decisions and consequently, on their ability to manage and deal with the different types of risk. Accordingly, the main objective of this book is to promote scientific research in the different areas of risk management, aiming at being transversal and dealing with different aspects of risk management related to corporate finance as well as market finance. Thus, this book should provide useful insights

for academics as well as professionals to better understand and assess the different types of risk. **Eastern Man, Western Man (Essay on the modelling of thought and action)** Bijan Ghalamkaripour.2014-08-13 There are a number of interpretations of reality comparable to that of the population on Earth, for which, anyone can put his life or that of others in danger. But, one must keep in mind that the source of these interpretations is very limited. Such as international music which is composed of seven main notes or that all living beings live based on the four nucleotides forming deoxyribonucleic acid (DNA), all human thought is equally based on only eight zones that inevitably guide our behaviour.
