The Practice of Patient Education Barbara Klug Redman. 2006-06-30 With patients leaving the hospital sicker and more care being done in outpatient settings or at home, patients need to become active, informed participants on their health care team. This one-of-a-kind text provides unique advice to help nurses apply their knowledge and skills to teaching patients in the clinical setting with specific diseases, including special populations. The book is organized into two basic sections - the first describes the theories and process of learning and teaching, and the second focuses on the major fields of patient education practice in place today. The new case study approach also makes it easy for students to understand how to apply teaching strategies to specific patient types resulting in better informed patients and a more positive teaching/learning experience. Covers a variety of learning theories and concepts, as well as strategies for applying them in patient teaching. Uses evidence-based patient education practice, with extensive citations to the research base. Presents key issues in patient education such as literacy, use of patient decision aids, and multiple patient conditions for which organized patient education should be developed. Includes study questions with suggested answers. Teaching basics streamlined for use as the main text for a course or as a supplement to any clinically oriented course. Includes multiple case examples, at every stage of the teaching process, which students can use as models to guide their own practice. New case study approach provides multiple case examples enabling readers to understand how to apply teaching strategies to specific patient types and settings. Now includes significant content in patient self-management of chronic conditions, the largest growing area of patient education.

The New American Workplace James O'Toole, Edward E. Lawler. 2015-05-12 Thirty years ago, the bestselling letter to the government *Work in America* published to national acclaim, including front-page coverage in *The New York Times*, *Wall Street Journal*, and *Washington Post*. It sounded an alarm about worker dissatisfaction and the effects on the nation as a whole. Now, based on thirty years of research, this new book sheds light on what has changed - and what hasn't. This groundbreaking work will illuminate the new critical issues - from worker demands to the new

ethical rules to the revolution in culture at work.

Women's Health Needs In Patient Education Barbara K. Redman, PhD, RN, FAAN.2004-01-01

The goal of this book is to fill the many gaps that health care providers face when helping women learn self care and prevention skills. Special attention is paid to minority status, low literacy, and elderly women who may have fewer opportunities to find health information independently. While this is ample information on reproductive health available, women experience a lack of timely information on nonreproductive health issues, such major killers as lung cancer and cardiovascular disease; adequate information for family caregivers, who are mostly women; and other disorders, ranging from AIDS to osteoporosis and urinary incontinence. Nurses, health educators, physicians, and those interested in women's health will find this an eye-opening and important resource.

Daily Poison Johann G. Zaller.2020-10-28 This book is a sound science report about the consequences of pesticides to nature, health and environment. The book shares essential insights into the use of pesticides in agriculture, discusses the politics, rhetoric and profits involved, addresses the potential health and ecological risks of pesticides in our daily lives, and debates possible solutions. Does sustainable agriculture exist, and is agriculture without pesticides possible at all? Moreover, the author gives insight into his scientific work, the set-up of the experiments, and also writes about his very own experiences with the media and press after publication of his studies. For many years, Johann G. Zaller, an ecologist at the University of Natural Resources and Life Sciences in Vienna, and his team, have been researching applied chemicals and their effects on the environment. Their findings, together with relevant literature and media reports, are presented in this book, which offers a unique resource for anyone who wants to know the nature and background of pesticides and how we come into contact with them in our daily lives. Heart Johannes Hinrich von Borstel.2017-06-03 "Describes the physiology behind the normal function of the heart with gusto and humor . . . well informed and accessible . . . a necessary book." —Readings In this lively and informative exploration of all aspects of the heart, Johannes Hinrich von Borstel offers a perfect mix of medical fact and amusing anecdote. A doctor, prospective cardiologist, and former paramedic—as well as a successful science-slammer—von Borstel relates his own experiences to provide a personal insight into the human side of heart medicine, while clearly explaining the science behind cardiac disease and healthcare for the heart. His many tips on how to give your ticker the best chance of enduring for as long as possible include one that will certainly be close to many people's hearts: have more sex! Oh, and eat more vegetables. "Whether your heart is healthy or not, everyone should read this book, because the author has truly put his heart and soul into it." —Shelf Life "While von Borstel cautions against these excesses, his youthful enthusiasm and gusto for his subject makes for a lively read." —The Sydney Morning Herald "An eminently readable book which strikes a very good balance between information and anecdote . . . should be of interest to anyone who wants to know what goes on 'under the hood' as it were, regardless of your level of anatomical understanding . . . this is a marvelous book." —Yinspire

Everest - the First Ascent Harriet Tuckey.2014-04-10 WINNER OF THE OUTSTANDING GENERAL SPORTS WRITING AWARD, BRITISH SPORTS BOOK AWARDS WINNER OF THE BOARDMAN TASKER PRIZE WINNER OF THE MOUNTAIN & WILDERNESS PRIZE, BANFF FESTIVAL WINNER OF THE TONY LOTHIAN AWARD, BIOGRAPHERSâ€(TM) CLUB For the first time, drawing upon previously unseen diaries and letters, rare archive material and interviews, Everest â€ The First Ascent tells the remarkable story of Griffith Pugh, the forgotten team member whose scientific breakthroughs ensured the worldâ€(TM)s highest mountain could be climbed. A doctor and physiologist, Griffith Pugh revolutionised almost every aspect of British high-altitude mountaineering, transforming the climbersâ€(TM) attitude to oxygen, the clothes they wore, their equipment, fluid intake and acclimatisation. Yet, far from receiving the acclaim he was due, he was met with suspicion and ridicule. His scientific contributions were, quite simply, at odds with old-fashioned notions of derring-do and the gentlemanly amateurism that dogged the sport. Later in his career, his impact in helping athletes enhance their performance lasts to this day in the fields of

cycling, swimming and running. This insightful biography shows Pugh to be troubled, abrasive, yet brilliant. Eight years in the writing, closely researched, and told with unflinching honesty by Pugh's daughter, Harriet Tuckey, Everest's *The First Ascent* is the compelling portrait of an unlikely hero.

Challenging and Emerging Conditions in Emergency Medicine Arvind Venkat.2011-05-03 With growing numbers of chronically ill patients surviving longer and receiving novel medical and surgical treatments, emergency departments are increasingly the venue for associated acute presentations. How can emergency physicians respond to these challenging and emerging conditions? This book focuses on the unusual and complex disease presentations not covered in detail in the standard textbooks, helping you manage patients with conditions such as congenital heart disease, cystic fibrosis, morbid obesity, intellectual disability and intestinal failure. Not only does this book provide guidance on evaluation and diagnosis, but it also addresses the practical issues of acute management and continuing referral. The individual chapters are written by high profile emergency physicians, in conjunction with appropriate specialists, and include authoritative evidence to back up the clinical information.

Alcohol and Tobacco Otto-Michael Lesch, Henriette Walter, Christian Wetschka, Michie Hesselbrock, Victor Hesselbrock.2011-01-15 Alcohol and nicotine addiction mostly occur together. Over the last ten years therapeutic aspects and motivational strategies have been considerably improved. Hence, groups and subgroups have been defined and can be treated with specific medication and tailor-made psychotherapies, leading in the long term to considerably better and more effective results than the once broadly applied, rigorous abstinence-based therapies. However, alcohol and nicotine addiction still represent major medical and social problems. In this book, new therapeutic approaches are comprehensively described, outlining the different interactions between personality, environment and the effects of the substance. In addition to prevention-based therapies and diagnosis, essential psychological and sociological strategies, as well as medication-based therapies, are also presented in detail. All of these therapies have realistic aims and are of global validity. In addition, the book provides a broad overview of the American and European epidemiology of alcohol and nicotine addictions. The book is written for all those who care for and offer professional therapy for alcohol and nicotine-addicted patients.

Healthy Medicine Robert J. Testing Treatments Imogen Evans, Hazel Thornton, Iain Chalmers, Paul Glasziou.2011 This work provides a thought-provoking account of how medical treatments can be tested with unbiased or 'fair' trials and explains how patients can work with doctors to achieve this vital goal. It spans the gamut of therapy from mastectomy to thalidomide and explores a vast range of case studies.

Personality and Disease Howard S. Friedman.1990-08 The original and creative analyses presented in this work represent a new understanding of the exciting field of personality and disease. Contributors offer current research findings and their experienced opinions on the relationship that exists between personality and disease in a clear, comprehensive fashion. Among the topics covered are models of linkages between personality and disease, stress and illness, individual differences and health--gender, coping and stress. Personality and social factors or and how they affect the outcome of cancer, are also discussed. The exploration and examination of the issues presented here are extremely valuable and will have a major impact on future research and practice.

Coping with Bipolar Disorder Steven Jones, Peter Haywood, Dominic Lam.2009-05-01 A guide to coping with bipolar disorder which offers information on all the key areas, including medication, dealing with stress, and using psychological techniques to cope with manic depression. Coping with Bipolar Disorder is designed specifically for sufferers of bipolar disorder, their carers, friends and

families. It combines definitive coverage of the condition and information about treatment with an approach which encourages patients to manage their own psychological health using cognitive behaviour therapy, as well as the more traditional medication regimes. The result is a straightforward book that should empower sufferers, in addition to giving them necessary advice on such key areas as sleeping habits, coping with stress and anger, and relating to family and friends.

Clinical Research in Complementary Therapies E-Book George Thomas Lewith, Wayne B. Jonas, Harald Walach.2010-11-23 The use of complementary therapies is exploding, increasing the pressure to establish a rigorous science to support its practice. *Clinical Research in Complementary Therapies: Principles, Problems and Solutions* provides students with the tools they need to research complementary and integrative medicine (CIM) and so fill this gap. Essential for both undergraduate and postgraduate students, this second edition is significantly updated and enhanced. Part 1 deals with research strategies and methods, explaining the major types of clinical research in CIM and how these inter-relate. New chapters are included on whole systems research, qualitative research and questionnaire development. Not all therapies can be treated the same way nor channeled through the signal process of randomized controlled trials. Therefore, detailed description of mixed methods approaches including observational, qualitative, cost-benefit and comparative effectiveness research are described. Part 2 deals with specific complementary therapies and how they are investigated by experts in each field. The book analyses the key questions asked and the controversies debated in complementary medicine research and offers clear and innovative guidance for answering these questions. FEATURES • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of research which are different in orthodox research and complementary therapy research • Reviews the types of research carried out in specific complementary therapies and analyses issues which arise • Includes information on measuring the economic cost and benefits of complementary medicine, clinical audit and the role of placebos use • Builds upon recent research results, looks at the lessons these provide for all complementary therapies and suggests key issues to address in future research. • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of research which are different in orthodox research and complementary therapy research • Reviews the types of research carried out in specific complementary therapies and analyses issues which arise • Includes information on measuring the economic cost and benefits of complementary medicine, clinical audit and the role of placebos use • Builds upon recent research results, looks at the lessons these provide for all complementary therapies and suggests key issues to address in future research.

The Living Brain William Grey Walter.1963 Dr. Walter begins with a history of the evolution of the brain, and describes to us something of the meaning of that enchanted loom where millions of flashing shuttles weave a dissolving pattern. He then tells the story of the invention and perfection of the EEG machine and its clinical use for the diagnosis of brain afflictions. He analyzes, with vivid examples, the rhythmic patterns of personality revealed in different brain prints, and discusses what light these new electronic processes can throw on memory, vision, fatigue, sleep, hypnotism, genius, lunacy, sex disturbances, crime, and other problems of everyday interest. He includes descriptions, with wiring diagrams, of the various electrical toys (including the speculatrix or mechanical turtle) which he has himself invented to demonstrate his theories. With an extraordinary gift for language, a minimum of speculation and a maximum of demonstrated fact, Dr. Walter has written a truly exciting book, a landmark in the advance of human knowledge.

A Darker Domain Val McDermid.2009-10-06 A New York Times Notable Crime Book of the Year • A Finalist for the Los Angeles Book Prize “A thrilling story with heartbreaking questions of social justice and history.” —Seattle Times The New York Times calls Val McDermid, “As smooth a practitioner of crime fiction as anyone out there...the best we’ve got.” Time spent with her extraordinary thriller, *A Darker Domain*, will prove that it’s true. Set in Scotland, the milieu of Ian Rankin’s *John Rebus*, McDermid’s brilliant exploration of loyalty and greed intertwines the past and present. Fife, Scotland, 1984. Mick Prentice abandons his family at the height of a politically charged national miners' strike to join the strikebreakers down south. Despised and disowned by friends and relatives, he is not reported missing until twenty-three years later. Fife, Scotland, 1985. Kidnapped heiress Catriona MacLennan Grant is killed and her baby son vanishes when the ransom payoff goes horribly wrong. In 2008, a tourist in Tuscany stumbles upon dramatic new evidence that reopens the investigation. Already immersed in the Prentice affair, Detective Karen Pirie, newly appointed head of the Cold Case Review Team, wants to make her mark with this second unsolved 1980s mystery. But two decades' worth of secrets are leading Pirie into a dark domain of violence and betrayal—a place darker than any she has previously entered.

Mountain Emergency Medicine Hermann Brugger,Ken Zafren,Luigi Festi,Peter Paal,Giacomo Strapazzon.2021-03-15T00:00:00+01:00 Mountain emergency medicine has seen exponential development due to the ever increasing number of people who hike or trek as well as practice extreme sports. Emergency physicians and nurses need to be equipped with the necessary training to be able to manage “on the field” accidents and sicknesses as well as their own physical security. Theoretical knowledge is generally of high level but practical expertise is dangerously lacking in many operators. Furthermore, treatment modalities on the field have not been completely codified and are not supported by internationally-accepted guidelines. This book is the first to offer a complete and thorough approach to this field of Emergency Medicine based on the latest research findings.
