The Balkan Wars Andre Gerolymatos.2008-08-05 When it comes to the Balkans, most people quickly become lost in the quagmire of struggle and intractable hatred that consumes that ancient land today. Many assume that the genesis of the past ten years of atrocity in the region might have had something to do with Tito and his repressive Yugoslav regime, or perhaps with the assassination of Franz Ferdinand in 1914. The seeds were really planted much, much earlier, on a desolate plain in Kosovo in 1389, when the Serbian Prince Lazar and his army clashed with and were defeated by the Ottoman forces of Sultan Murad I. In this riveting new history of the Balkan peoples, André Gerolymatos explores how ancient events engendered cultural myths that evolved over time, gaining psychic strength in the collective consciousnesses of Orthodox Christians and Muslims alike. In colorful detail, we meet the key figures that instigated and perpetuated these myths—including the assassin/hero Milos Obolic and Gavrilo Princip and the warlord Ali Pasha. This lively survey of centuries of strife finally puts the modern conflicts in Bosnia and Kosovo into historical context, and provides a long overdue account of the origins of ethnic hatred and warmongering in this turbulent land.

How Happy to Call Oneself a Turk Gavin D. Brockett.2011-05-01 The modern nation-state of Turkey was established in 1923, but when and how did its citizens begin to identify themselves as Turks? Mustafa Kemal Atatürk, Turkey's founding president, is almost universally credited with creating a Turkish national identity through his revolutionary program to secularize the former heartland of the Ottoman Empire. Yet, despite Turkey's status as the lone secular state in the Muslim Middle East, religion remains a powerful force in Turkish society, and the country today is governed by a democratically elected political party with a distinctly religious (Islamist) orientation. In this history, Gavin D. Brockett takes a fresh look at the formation of Turkish national identity, focusing on the relationship between Islam and nationalism and the process through which a religious national identity emerged. Challenging the orthodoxy that Atatürk and the political elite imposed a sense of national identity from the top down, Brockett examines the social and political debates in provincial newspapers from around the country. He shows that the unprecedented expansion of print media in Turkey between 1945 and 1954, which followed the end of strict, single-party authoritarian government, created a forum in which ordinary people could inject popular religious identities into the new Turkish nationalism. Brockett makes a convincing case that it was this fruitful negotiation between secular nationalism and Islam—rather than the imposition of secularism alone—that created the modern Turkish national identity.

The Culture of Migration in Southern Mexico Jeffrey H. Cohen.2009-06-03 Migration is a way of life for many individuals and even families in the Mexican state of Oaxaca. Some who leave their rural communities go only as far as the state capital, while others migrate to other parts of Mexico and to the United States. Most send money back to their communities, and many return to their homes after a few years. Migration offers Oaxacans economic opportunities that are not always available locally—but it also creates burdens for those who stay behind. This book explores the complex constellation of factors that cause rural Oaxacans to migrate, the historical and contemporary patterns of their migration, the effects of migration on families and communities, and the economic, cultural, and social reasons why many Oaxacans choose not to migrate. Jeffrey Cohen draws on fieldwork and survey data from twelve communities in the central valleys of Oaxaca to give an encompassing view of the factors that drive migration and determine its outcomes. He demonstrates conclusively that, while migration is an effective way to make a living, no single model can explain the patterns of migration in southern Mexico.

The Turkish Language Reform : A Catastrophic Success Geoffrey Lewis.1999-11-18 This is the first full account of the transformation of Ottoman Turkish into modern Turkish. It is based on the author's knowledge, experience and continuing study of the language, history, and people of Turkey. That transformation of the Turkish language is probably the most thorough-going piece of linguistics engineering in history. Its prelude came in 1928, when the Arabo-Persian alphabet was outlawed and replaced by the Latin alphabet. It began in earnest in 1930 when Atatürk declared: Turkish is one of the richest of languages. It needs only to be used with discrimination. The Turkish nation, which is well able to protect its territory and its sublime independence, must also liberate its language from the yoke of foreign languages. A government-sponsored campaign was waged to replace words of Arabic or Persian origin by words collected from popular speech, or resurrected from ancient texts, or coined from native roots and suffixes. The snag - identified by the author as one element in the catastrophic aspect of the reform - was that when these sources failed to provide the needed words, the reformers simply invented them. The reform was central to the young republic's aspiration to be western and secular, but it did not please those who remained wedded to their mother tongue or to the Islamic past. The controversy is by no means over, but Ottoman Turkish is dead. Professor Lewis both acquaints the general reader with the often bizarre, sometimes tragicomic but never dull story of the reform, and provides a lively and incisive account for students of Turkish and the relations between culture, politics and language with some stimulating reading. The author draws on his own wide experience of Turkey and his personal knowledge of many of the leading actors. The general reader will not be at a disadvantage, because no Turkish word or quotation has been left untranslated. This book is important for the light it throws on twentieth-century Turkish politics and society, as much as it is for the study of linguistic change. It is not only scholarly and accessible; it is also an extremely good read.

Conflict, Insecurity and Mobility Ibrahim Sirkeci,Jeffrey H. Cohen,Pinar Yazgan.2016-01-02 Theories and models of contemporary migration often revolves around neofunctional models. They define migrants as rational actors who are focused on improving their well-being which is enabled by access to opportunities that are not available in their origin communities and/or countries. Nevertheless, initiation of migration is largely driven by difficulties, discomfort, disagreements, tensions, and conflicts at the origin, while migration decision and destination choices are moderated by individual characteristics, cultural and social capital as well as by the local, national, and international context. In other words, people do not move when they are satisfied and comfortable with what they have and where they are. The book's scope covers marginalisation and gangs, Kurds in Istanbul, Border perception, Development, security and Frontex, Kurdish Diaspora, Perspectives on conflicts, return of Kurdish villagers, young migrants in Istanbul, communal violence, Military service-migration nexus

Current and Historical Debates in Social Sciences: Field Studies and Analysis Emrah Doğan.2020-10-24 Historical and current debates in social sciences mirror the reality of human existence. However, the reality and facts of human existence are also different from each other. At the same time, these phenomena in social sciences are multidimensional. In this sense, some of the human cases were included in this study. Besides, historical and current analyses in this study have been examined in other social science studies. The multidimensional perspective of the field of social science encourages re-examining the topics covered and revealing different trends. In this context, this study aimed to clarify light on the dark points in the field of social science by reconsidering the discussed or not discussed issues.

Uneven Centuries Şevket Pamuk.2018-11-20 The first comprehensive history of the Turkish economy The population and economy of the area within the present-day borders of Turkey has consistently been among the largest in the developing world, yet there has been no authoritative economic history of Turkey until now. In *Uneven Centuries*, Şevket Pamuk examines the economic growth and human development of Turkey over the past two hundred years. Taking a comparative global perspective, Pamuk investigates Turkey's economic history through four periods: the open economy during the nineteenth-century Ottoman era, the transition from empire to nation-state that spanned the two world wars and the Great Depression, the continued protectionism and import-substituting industrialization after World War II, and the neoliberal policies and the opening of the economy after 1980. Making use of indices of GDP per capita, trade, wages, health, and education, Pamuk argues that Turkey's long-term economic trends cannot be explained only by immediate causes such as economic policies, rates of investment, productivity growth, and structural change. *Uneven Centuries* offers a deeper analysis of the essential forces underlying Turkey's development—its institutions and their evolution—to make better sense of the country's unique history and to provide important insights into the patterns of growth in developing countries during the past two centuries.

Socio-onomastics Terhi Ainiala,Jan-Ola Östman.2017-06-09 The volume seeks to establish socio-onomastics as a field of linguistic inquiry not only within sociolinguistics, but also, and in particular, within pragmatics. The linguistic study of names has a very long history, but also a history sometimes fraught with skepticism, and thus often neglected by linguists in other fields. The volume takes on the challenge of instituting onomastic study into linguistics and pragmatics by focusing on recent trends within socio-onomastics, interactional onomastics, contact onomastics, folk onomastics, and linguistic landscape studies. The volume is an introduction to these fields - with the introductory chapter giving an overview of, and an update on, recent onomastic study - and in addition offers detailed in-depth analyses of place names, person names, street names and commercial names from different perspectives: historically, as well as from the point of view of the impact of globalization and glocalization. All the chapters focus on the use and function of names and naming, on changes in name usage, and on the reasons for, processes in, and results of names in contact.

Cultures of Migration Jeffrey H. Cohen, Ibrahim Sirkeci. 2011-09-01 Around the globe, people leave their homes to better themselves, to satisfy needs, and to care for their families. They also migrate to escape undesirable conditions, ranging from a lack of economic opportunities to violent conflicts at home or in the community. Most studies of migration have analyzed the topic at either the macro level of national and global economic and political forces, or the micro level of the psychology of individual migrants. Few studies have examined the culture of migration—that is, the cultural beliefs and social patterns that influence people to move. *Cultures of Migration* combines anthropological and geographical sensibilities, as well as sociological and economic models, to explore the household-level decision-making process that prompts migration. The authors draw their examples not only from their previous studies of Mexican Oaxacans and Turkish Kurds but also from migrants from Europe, sub-Saharan Africa, the Pacific, and many parts of Asia. They examine social, economic, and political factors that can induce a household to decide to send members abroad, along with the cultural beliefs and traditions that can limit migration. The authors look at both transnational and internal migrations, and at shorter- and longer-term stays in the receiving location. They also consider the effect that migration has on those who remain behind. The authors' culture of migration model adds an important new dimension to our understanding of the cultural beliefs and social patterns associated with migration and will help specialists better respond to increasing human mobility.

Nation-Building in Modern Turkey Alexandros Lamprou. 2015-01-28 From 1924 to 1946 the Republic of Turkey was in effect ruled as an authoritarian single-party regime. During these years the state embarked upon an extensive reform programme of modernisation and nation-building. Alexandros Lamprou here offers an alternative understanding of social change and state-society relations in Turkey, shifting the focus from the state as the prime instigator of change to the population's participation in the process of reform. Through the study of the 'People's Houses', the community centres opened and operated by the Republican People's Party in most cities and towns of Turkey, and using previously unpublished archival material, Lamprou analyses how ordinary people experienced, negotiated and resisted the reforms in the 1930s and 1940s and how this process contributed to the shaping of social identities. This book will be essential reading for students and scholars of nation-building, socio-cultural change and state-society relations in modern Turkey.

Islam, Secularism and Nationalism in Modern Turkey Soner Cagaptay. 2006-05-02 It is commonly believed that during the interwar period, Kemalist secularism successfully eliminated religion from the public sphere in Turkey, leaving Turkish national identity devoid of religious content. However, through its examination of the impact of the Ottoman millet system on Turkish and Balkan nationalisms, this book presents a different view point. Cagaptay demonstrates that the legacy of the Ottoman millet system which divided the Ottoman population into religious compartments called millets, shaped Turkey's understanding of nationalism in the interwar period. Providing a compelling examination of why and how religion shapes national identity in Turkey and the Balkans the book covers topics including: * Turkish nationalism * the Ottoman legacy * Kemalist citizenship policies and immigration * Kurds, Muslims and Jews and the ethno-religious limits of Turkishness. Incorporating documents from untapped Turkish archives, this book is essential reading for scholars and students with research interests in Turkey, Turkish nationalism and Middle East history.

Becoming Turkish Hale Yılmaz. 2013-07-30 Becoming Turkish deepens our understanding of the modernist nation-building processes in post-Ottoman Turkey through a rare perspective that stresses social and cultural dimensions and everyday negotiations of the Kemalist reforms. Yılmaz asks how the reforms were mediated on the ground and how ordinary citizens received, reacted to, and experienced them. She traces the experiences of the subaltern as well as the experiences of the elites and the mediators in the overall narrative—highlighting the relevance of class, gender, location, and urban and rural differences while also revealing the importance of nonideological, social, and psychological factors such as childhood and generations.

Racism on the Internet Yaman Akdeniz, Council of Europe. 2009-01-01 Racism was a pressing social problem long before the emergence of the digital age. The advancement of digital communication technologies such as the Internet has, however, added a new dimension to this problem by providing individuals and organisations with modern and powerful means to propagate racism and xenophobia. The use of the Internet as an instrument for the widespread dissemination of racist content is assessed in detail by the author. The problem of racist content on the Internet has naturally prompted vigorous responses from a variety of agents, including governments, supranational and international organisations and from the private sector. This book also provides a detailed critical overview of these regulatory and non-regulatory initiatives.
