Internet Histories Niels Brügger, Gerard Goggin, Ian Milligan, Valérie Schafer. 2018-12-07 In 2017, the new journal Internet Histories was founded. As part of the process of defining a new field, the journal editors approached leading scholars in this dynamic, interdisciplinary area. This book is thus a collection of eighteen short thought-provoking pieces, inviting discussion about Internet histories. They raise and suggest current and future issues in the scholarship, as well as exploring the challenges, opportunities, and tensions that underpin the research terrain. The book explores cultural, political, social, economic, and industrial dynamics, all part of a distinctive historiographical and theoretical approach which underpins this emerging field. The international specialists reflect upon the scholarly scene, laying out the field's research successes to date, as well as suggest the future possibilities that lie ahead in the field of Internet histories. While the emphasis is on researcher perspectives, interviews with leading luminaries of the Internet's development are also provided. As histories of the Internet become increasingly important, Internet Histories is a useful roadmap for those contemplating how we can write such works. One cannot write many histories of the 1990s or later without thinking of digital media - and we hope that Internet Histories will be an invaluable resource for such studies. This book was originally published as the first issue of the Internet Histories journal.

Introducing Malaguzzi Sandra Smidt. 2013 Loris Malaguzzi (1920 - 1994) was the pioneer of the Reggio Emilia approach to teaching young children. An ever-increasing number of teachers and educationalists from all over the world now come to study the Reggio pre-school's unique methods, and this is largely due to Malaguzzi's devotion, work and commitment over 45 years, and the small group of teachers and educators he trained and with whom he developed his methods. The principles that underpin the Reggio Emilia approach are fundamental to the way in which Early Childhood Education is being shaped around the world today. The work of Loris Malaguzzi was rooted in a strong sociocultural framework, meaning it was a considered response to what was needed for particular communities and their needs. Sandra Smidt here considers the life of this remarkable man, and through a pedagogical perspective explores his approach on topics including: - Relationships; - Observation; - Creativity; - Questioning; - Justice; - Equality; - Politics. Accessible and informative, this introductory yet in-depth look at Malaguzzi's life and work will be of huge benefit to anyone working with young children in an educational capacity, including parents, and will be essential reading for students on early childhood education

Violence Against Women and Ethnicity Ravi K. Thiara, Stéphanie Condon, Monika Schröttle. 2020-10-09 This book draws together both: theory and practice on minority/migrant women and gendered violence. The interplay of gender, ethnicity, religion, class, generation and sexuality in shaping the lives, experiences and choices of minority/migrant women affected by violence has not always been adequately theorised within much of the existing writing on violence against women. Feminist theory, especially the insights provided by the concept of intersectionality, are central to the editors' conceptual frameworks. Positive Discipline Jane Nelsen. 1996 THE KEY TO DISCIPLINE IS NOT PUNISHMENT, BUT MUTUAL RESPECT All parents try to do their best--but the best of intentions don't always produce the best results. Dr. Jane Nelsen, an experienced psychologist, educator, and mother, believes that children misbehave when they feel thwarted in their need to belong and in their need for love and attention. An authoritative approach, using phrases like Because I said so! , will only lead to rebellious behavior. Instead, parents need basic principles that bring them and their children closer. They need Positive Discipline. Dr. Nelsen explains that parents who use kindness and firmness to teach life skills will encourage self-respect, self-discipline, cooperation, good behavior, and problem-solving skills in their children. In Positive Discipline, revised and updated for the '90s, she shows all of us, parents and teachers alike, exactly how her practical program works--answering, step-by-step, such important questions as: *What works better than punishment to teach children positive, good behavior? *What mistakes do most parents make in the name of love ? *How can parents turn their mistakes into assets? *How can praise be dangerous? *What are the dangers of trying to be Super Mom ? *How can teachers avoid discipline problems in the classroom? It is positive! It works! It saves your sanity! And it is easy to share with others. --Julie Pope, Parent Sacramento, CA As a parent and psychotherapist, I have found enormous value and practical wisdom in Positive Discipline. It conveys a win/win atmosphere for parents

and children. The techniques are so easy to learn and fun to use...Anyone following these concepts will see almost instant results and big smiles on the faces of their children. --Katherine Dusay, Psychotherapist San Francisco, CA

Ethics by Committee Noortje Jacobs.2022-08-26 Ethics boards have become obligatory passage points in today's medical science, and we forget how novel they really are. The use of humans in experiments is an age-old practice that records show goes back to at least the third century BC and, since the early modern period, as a practice it has become increasingly popular. Yet, in most countries around the world, hardly any formal checks and balances existed to govern the communal oversight of experiments involving human subjects until at least the 1960s. *Ethics by Committee* traces the rise of ethics boards for human experimentation in the second half of the twentieth century. Using the Netherlands as a case-study, Noortje Jacobs shows how the authority of physicians to make decisions about clinical research gave way in most developed nations to formal mechanisms of communal decision-making that served to regiment the behavior of individual researchers. This historically unprecedented change in scientific governance came out of a growing international wariness of medical research in the decades after World War II. Research ethics committees were originally intended not only to make human experimentation more ethical but also to raise its epistemic quality. By examining complex negotiations over the appropriate governance of human subjects research, *Ethics by Committee* advances our understanding not only of the history of research ethics and the randomized controlled trial but also, more broadly, of how liberal democracies in the late twentieth century have sought to resolve public concerns over charged issues in medicine and science--

The Birds of Ancient Egypt Patrick F. Houlihan.2023-09-30 Hailed as a sumptuously produced and finely illustrated outstanding contribution to ancient Egyptian studies, this facsimile reprint of Patrick Houlihan's 1986 comprehensive study makes a welcome return in the Oxbow Classics in Egyptology series. Animals of all kinds are amply illustrated in Egyptian art, none more so than birds, in both secular and religious contexts and in hieroglyphic scripts. A great variety of bird species has for millennia made twice yearly migrations passing over Egypt, which is also an important overwintering area for many. These migrant birds, together with indigenous species were an abundant and easily exploited source of food for ancient Egyptians, for domestication and status display. Tomb scenes displaying birds provided as food for the deceased are abundant, as are procession scenes of offering with bearers bringing gifts of fowl. Many birds also had religious associations. Houlihan provides a systematic and unparalleled survey of all the bird life depicted by the ancient Egyptians in art and hieroglyphic writing, some 72 species (plus bats), with a list of known mummified species, and discussions on their religious and secular associations and many illustrations. Their present-day distributions are compared with that known from the time of the Pharaohs. A checklist of the birds of modern Egypt is provided by Steven Goodman.

Mathematical Problem Solving ALAN H. SCHOENFELD.2014-06-28 This book is addressed to people with research interests in the nature of

mathematical thinking at any level, to people with an interest in higher-order thinking skills in any domain, and to all mathematics teachers. The focal point of the book is a framework for the analysis of complex problem-solving behavior. That framework is presented in Part One, which consists of Chapters 1 through 5. It describes four qualitatively different aspects of complex intellectual activity: cognitive resources, the body of facts and procedures at one's disposal; heuristics, rules of thumb for making progress in difficult situations; control, having to do with the efficiency with which individuals utilize the knowledge at their disposal; and belief systems, one's perspectives regarding the nature of a discipline and how one goes about working in it. Part Two of the book, consisting of Chapters 6 through 10, presents a series of empirical studies that flesh out the analytical framework. These studies document the ways that competent problem solvers make the most of the knowledge at their disposal. They include observations of students, indicating some typical roadblocks to success. Data taken from students before and after a series of intensive problem-solving courses document the kinds of learning that can result from carefully designed instruction. Finally, observations made in typical high school classrooms serve to indicate some of the sources of students' (often counterproductive) mathematical behavior.

Religion, Reason and Nature in Early Modern Europe R. Crocker. 2001-10-31 From a variety of perspectives, the essays presented here explore the profound interdependence of natural philosophy and rational religion in the 'long seventeenth century' that begins with the burning of Bruno in 1600 and ends with the Enlightenment in the early Eighteenth century. From the writings of Grotius on natural law and natural religion, and the speculative, libertine novels of Cyrano de Bergerac, to the better-known works of Descartes, Malebranche, Cudworth, Leibniz, Boyle, Spinoza, Newton, and Locke, an increasing emphasis was placed on the rational relationship between religious doctrine, natural law, and a personal divine providence. While evidence for this intrinsic relationship was to be located in different places - in the ideas already present in the mind, in the observations and experiments of the natural philosophers, and even in the history, present experience, and prophesied future of mankind - the result enabled and shaped the broader intellectual and scientific discourses of the Enlightenment.

Perceptions of Byzantium and Its Neighbors Olenka Z. Pevny. 2000 The thirteen papers in this volume were delivered at the international symposium

held at The Metropolitan Museum of Art May 23-25, 1997, in the context of The Glory of Byzantium exhibition, which was on view from March 11 through July 6, 1997. One of the main purposes of this exhibition was to explore the Byzantine Empire's complex and varied relationship with its neighbors, recognizing the multi-national, multi-ethnic, and multi-cultural character of its artistic traditions. Whereas the symposium was conceived in close conjunction with the exhibition, its intent was somewhat different. It strove to acknowledge the international character and diversity of current scholarship on Byzantine art, and to present not only new material but also the variety of objectives, approaches, and methodologies that shape modern perceptions of the subject. Thus, the symposium was not restricted to a specific theme; instead, the participants were asked to address a broad range of aspects of the Glory of Byzantium exhibition. The contributors to this volume, all of whom are scholars of Byzantine art and culture, hail from ten different countries, including Austria, Bulgaria, Georgia, Greece, Hungary, Italy, Poland, the Russian Federation, Ukraine, and the United States of America. They all hold prominent positions in the leading scholarly or cultural institutions of their respective countries, and are distinguished experts in their fields of specialization, with established international reputations. Immediately apparent is that many of the authors are from Eastern Europe, and reside in lands that once were under the ecclesiastical and cultural sway of Byzantium. Yet, their perceptions of the Byzantine artistic legacy, which contributed to the cultural identity of their homelands, rarely are included in such English-language symposia and publications.
