A Wife in the Hand Jack H. Crisp.1976

Mies Julie Yaël Farber.2012-12-11 South African born internationally acclaimed director and playwright, Yaël Farber, sets her explosive new adaptation of Strindberg's Miss Julie in the remote, bleak beauty of the Eastern Cape Karoo. Transposed to a post-apartheid kitchen - a single night, both brutal and tender, unfolds between a black farm-labourer, the daughter of his master and the woman who has raised them both. The visceral struggles of contemporary South Africa are laid bare, as John and Mies Julie spiral in a deadly battle over power, sexuality, mothers and memory. Haunting and violent, intimate and epic, the characters struggle to address issues of reprisal and the reality of what can and cannot ever be recovered. Mies Julie is the winner of a number of awards including, the Best Of Edinburgh Fringe Award, an Edinburgh Fringe First Award and an Edinburgh Herald Angel Award. In December 2012, Mies Julie was listed in the Guardian's top ten best theatre picks of 2012 and in the Top Ten Plays of 2012 by the New York Times.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view,

but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Marie Calumet Rodolphe Girard.1976 Marie Calumet is a light hearted, satirical account of rural life in the fictional parish of Saint Ildefonse, Quebec, in 1860. The appearance of Suzon, an alluring adolescent of 17 and cousin to Curé Flavel produces a

scandal. The priest is forced to look reality in the face. The novelty of Suzon's sensual presence is its appearance in a place where it is traditionally forbidden: this is the first instance of a woman becoming a disturbing element in the French-Canadian novel.

Nature Unbound Dan Brockington, Rosaleen Duffy, Jim

Igoe. 2012-07-26 This groundbreaking volume is the first

comprehensive, critical examination of the rise of protected areas and their current social and economic position in our world. It examines the social impacts of protected areas, the conflicts that surround them, the alternatives to them and the conceptual categories they impose. The book explores key debates on devolution, participation and democracy; the role and uniqueness of indigenous peoples and other local communities; institutions and resource management; hegemony, myth and symbolic power in conservation success stories; tourism, poverty and conservation; and the transformation of social and material relations which community conservation entails. For conservation practitioners and protected area professionals not accustomed to criticisms of their work, or students new to this complex field, the book will provide an understanding of the history and current state of affairs in the rise of protected areas. It introduces the concepts, theories and writers on which critiques of conservation have been built, and provides the means by which practitioners can understand problems with which they are wrestling. For advanced researchers the book will present a critique of the current debates on protected areas and provide a host of jumping off points for an array of research avenues

expanding networks of production and consumption have been changing the face of rural economies in significant ways. Millions of rural dwellers have found survival increasingly difficult and have fled to urban centres. Others have remained: some retrenching, struggling to just subsist, others attempting to innovatively redefine their place within 'new' rural economies. Over the past 30 years, rural economies have largely been ignored by policy makers, but recent growing concerns about food security, environmental degradation, climate change, continued rural poverty, and high rates of out-migration have sparked renewed interest in rural regions. Covering a range of geographical and socio-cultural contexts, the case studies in this book draw on actor-oriented in-depth field studies, which provide detailed, locally focused perspectives on the nature of rural livelihoods today. The collection highlights the ways in which rural livelihoods are being redefined, the multiple ways in which rural dwellers draw on distinct social, cultural and environmental resources to formulate their livelihood strategies, and the factors which facilitate or limit their abilities to do so. This volume will be of interest to development practitioners and policy makers, and scholars working in rural development and economic anthropology.

Democratic Eco-Socialism as a Real Utopia Hans A.

Baer.2017-10-01 As global economic and population growth continues to skyrocket, increasingly strained resources have made one thing clear: the desperate need for an alternative to capitalism. In *Democratic Eco-Socialism as a Real Utopia*, Hans Baer outlines the urgent need to reevaluate historical definitions of socialism, commit to social equality and justice, and prioritize environmental sustainability. Democratic eco-socialism, as he terms it, is a system capable of mobilizing people around the world, albeit in different ways, to prevent on-going human socio-economic and environmental degradation, and anthropogenic climate change.
