History and Development of Steam Locomotion on Common Roads Fletcher William.2019
Locomotion Philip John Greer Ransom.2001 This anthology celebrates 200 years of railway history and railway writing. The author has made a fascinating, wide-ranging selection from factual and fictional accounts to illustrate the attractions of train travel and the human side of running a railway. He includes memorable extracts describing rail travel in Britain, continental Europe, Canada, the USA and India which give a vivid impression of the development and diversity of railways since the pioneering days of the early 1800s. The quotations have been chosen for their inherent historical interest and insight, the quality of the writing and for the extraordinary events they record. His collection will be fascinating reading for railway enthusiasts and for everyone who knows the charm of travelling by train. Famous authors feature in the collection - Charles Dickens, John Masters, L.T.C. Rolt - but there are many evocative, well-written accounts from less-well-known rail travellers. Also featured are tales of innovative engineering, wartime railways, narrow-gauge railways, railway disasters and heroism, speed records, diesel development and the determination of the railway preservation movement.

'A Faster Means of Locomotion' Todd DeFeo.2020-08-01 Clarksville, Tennessee, has a fascinating railroad history. The push for a railroad in the community dates to the 1830s, but it wasn't until 1852 that the state of Tennessee chartered the Memphis, Clarksville & Louisville Railroad. A street railroad, in one form or another, operated in Clarksville from 1885 until 1928. Mules powered the first cars, and the line later electrified. What is perhaps most interesting about streetcars in the city is the sheer number of companies organized to operate. Considering the history of the city's street railway system stretches less than a half-century, its history is dizzying.

Locomotives and Locomotive Building Rogers Locomotive and Machine Works.1886 This catalog, from one of the premier builders of American locomotives, is an outstanding example of the use of photography in 19th century advertising. Along with the Baldwin locomotive catalog of 1871/2, and the Grant catalog of the same period this is one of the earliest. The 22 collotypes from photographs are uncredited which is unusual for this early date in the US. As early collotypes they are extremely well done and show the work of master craftsmen. They are printed on light uncoated paper which is also somewhat unusual for the period.--Clark file 2012

Locomotive Brian Floca.2013-09-03 The Caldecott Medal Winner, Sibert Honor Book, and New York Times bestseller *Locomotive* is a rich and detailed sensory exploration of America's early railroads, from the creator of the "stunning" (Booklist) *Moonshot*. It is the summer of 1869, and trains, crews, and family are traveling together, riding America's brand-new transcontinental railroad. These pages come alive with descriptive details of the journey: the sounds, speed, and strength of the mighty locomotives; the work that keeps them moving; and the thrill of travel from plains to mountain to ocean. Come sit inside the caboose, feel the heat of the engine, watch the landscape race by. Come ride the rails, come cross the young country!

Loco Motion Michael R. Bailey.2014 The steam locomotive is a machine that has inspired imagination, innovation and invention from the time of its origination and continues to evoke passion in enthusiasts today.Here Michael R. Bailey, expertly and in fascinating detail, describes the development of the steam locomotive during its pioneering first half-century until 1850 by exploring the surviving locomotives that may be seen in Britain, Europe, and North and South America. In addition to surviving relics, he also takes a look at operable replicas, which fill many gaps in international collections, to provide continuity in this evolutionary story.Exploring in depth each example's operational and preservation history, along with design characteristics, component materials and modifications made, no detail is left unmentioned. With unparalleled detail, incredibly stunning images and a list of museums housing all of the world's oldest locomotives, this truly is a volume that no student of railway history should be without.

The Locomotive Pioneers Anthony Burton.2017-11-30 This fascinating book explores the development of locomotives over the course of fifty years. From Richard Trevithick's first experimental road engine of 1801 up to the Great Exhibition some fifty years later, locomotives have come far in reimagining and reinventing themselves to serve the people and British industry. The early years showed slow development amongst locomotives: Trevithick's first railway locomotives failed significantly as the engine broke the brittle cast-iron rails. The story is continued through the years when locomotives were developed to serve collieries, a period that lasted for a quarter of a century, and saw many different engineers trying out their ideas; from the rack and pinion railway developed by Blenkinsop and Murray, to George Stephenson's engines for the Stockton & Darlington Railway. The most significant change came with Robert Stephenson's innovative Rocket, the locomotive that set the formula for future developments. British engineers dominated the early years, although in France Marc Seguin developed a multi-tubular boiler at the same time as Stephenson. The next period was marked by the steady spread of railways in Europe and across the Atlantic. Timothy Hackworth of the Stockton & Darlington railway supplied locomotives to Russia, and his men had an exciting ride to deliver parts by sleigh across the snowy steppes, pursued by wolves. In America, the first locomotives were delivered from England, but the Americans soon developed their own methods and styles, culminating in the Baldwin engines, a type that has become familiar to us from hundreds of Western films. This is more than just a book about the development of a vital technology, it is also the story of the men who made it possible, from the steadily reliable team of William Buddicom and Alexander Allan, who developed their locomotives at Crewe, to the flamboyant Isambard Kingdom Brunel, whose broad gauge was served by the magnificent engines of Daniel Gooch.
