**Traite de Charpente En Bois** Oslet-G.2013-04-28

**Traite de charpente en bois** Gustave Oslet.1926

*Cours élémentaire théorique et pratique de construction* Jean-Paul Douliot.1866

Cours élémentaire théorique et pratique de construction Jean-Paul Douliot.1828

*Mise en oeuvre des charpentes en bois* Ursula

Bouteveille.2014-11-26 Richement illustré par de nombreux plans et schémas, ce guide pratique fournit les prescriptions techniques relatives à la conception et la construction des charpentes en bois traditionnelles et industrielles. Il décrit les différents types de charpentes et leur mise en œuvre dans le respect des normes et des DTU. Il explique de façon didactique le choix des bois, le fonctionnement et le comportement des assemblages. Il détaille également les ancrages dans le gros œuvre et le contreventement. Des exemples de mise en œuvre fournissent des détails de réalisation des points singuliers, des supports de couverture et des assemblages de panneaux de toiture monoblocs. Ils permettent d'appréhender un projet de construction, mais également d'établir le diagnostic d'une charpente existante. Les modifications de charpente liées à l'augmentation du volume, l'éclairage naturel, l'isolation et l'aménagement des combles sont traités en détail. Un chapitre dédié à l'organisation du chantier apporte les solutions pour le stockage, le transport et le levage des charpentes, et précise les règles concernant les garde-corps et la protection des chutes de hauteur. La structure de l'ouvrage, sous forme de fiches illustrées, favorise à la fois une compréhension immédiate des savoir-faire et règles de l'art nécessaires à la construction d'une charpente, et une maîtrise des principes de conception et des

notions utiles pour élaborer et réaliser un projet pas à pas.

**La charpente** Yves Benoit.2018-07-12 Ayant exposé les procédés de construction de la maison à ossature bois dans deux grands manuels de référence, Yves Benoit a entrepris de détailler une à une les principales étapes de la réalisation. Amorcée avec la dalle bois, cette nouvelle série nous conduira jusqu'à la terrasse en passant par les murs et les planchers et, ici, par la charpente. Les nombreuses techniques de structures bois appliquées à toutes sortes de matériaux permettent d'obtenir une grande variété de charpentes qui, toutes, sont bien adaptées aux maisons à ossature bois. La plus classique est la charpente traditionnelle.

Généralement réalisée en bois massif, elle exige toutefois l'aménagement de renforts dans les murs. D'autres matériaux peuvent être employés comme le bois massif reconstitué, le bois lamellé-collé et les poutres en I. Faite de bois massif, la charpente industrielle est l'autre type souvent choisi pour des raisons économiques, surtout lorsque les combles ne sont pas aménagés. Cette structure est simple à mettre en oeuvre ; les chevrons arbalétriers donnent de grands volumes dont le rampant (dessous de la charpente), visible, ajoute un cachet à l'ensemble. Les toitures terrasses - caractéristiques de l'architecture contemporaine - apportent notamment, lorsqu'elles sont accessibles, une appréciable zone de vie supplémentaire. Moins courantes mais particulièrement adaptées aux formes complexes et courbes, les structures en bois lamellé-collé offrent des possibilités architecturales infinies. En procurant à ses utilisateurs une connaissance approfondie des matériaux, des organes d'assemblages et des tables de pré-dimensionnement, ce manuel leur permettra de mettre en oeuvre toutes ces structures dans les meilleures conditions.
