Britannia's Auxiliaries Stephen Conway.2017-10-13 Britannia's Auxiliaries provides the first wide-ranging attempt to consider the continental European contribution to the eighteenth-century British Empire. The British benefited from many European inputs - financial, material, and, perhaps most importantly, human. Continental Europeans appeared in different British imperial sites as soldiers, settlers, scientists, sailors, clergymen, merchants, and technical experts. They also sustained the empire from outside - through their financial investments, their consumption of British imperial goods, their supply of European products, and by aiding British imperial communication. Continental Europeans even provided Britons with social support from their own imperial bases. The book explores the means by which continental Europeans came to play a part in British imperial activity at a time when, at least in theory, overseas empires were meant to be exclusionary structures, intended to serve national purposes. It looks at the ambitions of the continental Europeans themselves, and at the encouragement given to their participation by both private interests in the British Empire and by the British state. Despite the extensive involvement of continental Europeans, the empire remained essentially British. Indeed, the empire seems to have changed the Europeans who entered it more than they changed the empire. Many of them became at least partly Anglicized by the experience, and even those who retained their national character usually came under British direction and control. This study, then, qualifies recent scholarly emphasis on the transnational forces that undermined the efforts of imperial authorities to maintain exclusionary empires. In the British case, at least, the state seems, for the most part, to have managed the process of continental involvement in ways that furthered British interests. In this sense, those foreign Europeans who involved themselves in or with the British Empire, whatever their own perspective, acted as Britannia's auxiliaries.

Maritime Women: Global Leadership Momoko Kitada,Erin Williams,Lisa Loloma Froholdt.2015-02-05 This exciting new WMU book series' volume features the first attempt to include detailed experiences of women in the maritime sector at a global level. It highlights the achievement of women in the maritime sector, in particular, women's leadership and service to the sustainable development of the maritime industry. The volume contains contemporary studies on maritime women and follows an inter-disciplinary approach. It offers an overview of women's integration into the maritime sector since the late 1980s as well as benchmarking its impact on various levels, such as policy, employment, education, leadership and sustainability. Even 20 years after the Beijing Declaration, gender-related challenges at work still remain in the maritime sector, for example, lack of gender policy, difficulty in work-life balance, access to education, and leadership opportunities. The book addresses a series of recommendations that may further help the integration of women into the maritime sector.

Shipwrecks and the Bounty of the Sea David Cressy,David (George III Professor of British

History and Humanities Distinguished Professor Emeritus Cressy, George III Professor of British History and Humanities Distinguished Professor Emeritus Ohio State University).2022-09-08

Shipwrecks and the Bounty of the Sea is a work of social history examining community relationships, law, and seafaring over the long early modern period. It explores the politics of the coastline, the economy of scavenging, and the law of 'wreck of the sea' from the beginning of the reign of Elizabeth I to the end of the reign of George II. England's coastlines were heavily trafficked by naval and commercial shipping, but an unfortunate percentage was cast away or lost. Shipwrecks were disasters for merchants and mariners, but opportunities for shore dwellers. As the proverb said, it was an ill wind that blew nobody any good. Lords of manors, local officials, officers of the Admiralty, and coastal commoners competed for maritime cargoes and the windfall of wreckage, which they regarded as providential godsend or entitlements by right. A varied haul of commodities, wines, furnishings, and bullion came ashore, much of it claimed by the crown. The people engaged in salvaging these wrecks came to be called 'wreckers', and gained a reputation as violent and barbarous plunderers. Close attention to statements of witnesses and reports of survivors shows this image to be largely undeserved. Dramatic evidence from previously unexplored manuscript sources reveals coastal communities in action, collaborating as well as competing, as they harvested the bounty of the sea.

Maritime Technology and Engineering III Carlos Guedes Soares,T.A. Santos.2016-12-01

Maritime Technology and Engineering 3 is a collection of papers presented at the 3rd International Conference on Maritime Technology and Engineering (MARTECH 2016, Lisbon, Portugal, 4-6 July 2016). The MARTECH Conferences series evolved from biannual national conferences in Portugal, thus reflecting the internationalization of the maritime sector. The keynote lectures and the papers, making up nearly 150 contributions, came from an international group of authors focused on different subjects in a variety of fields: Maritime Transportation, Energy Efficiency, Ships in Ports, Ship Hydrodynamics, Ship Structures, Ship Design, Ship Machinery, Shipyard Technology, Safety & Reliability, Fisheries, Oil & Gas, Marine Environment, Renewable Energy and Coastal Structures. This book will appeal to academics, engineers and professionals interested or involved in these fields.

Advanced Maritime Technologies and Applications Azman Ismail,Wardiah Mohd Dahalan,Andreas Öchsner.2022-01-10 This book presents the outcomes from the 2nd International Conference on Marine and Advanced Technologies 2021 (Icmat2021) which was organized by the Research and Innovation section, University Kuala Lumpur - Malaysian Institute of Marine Engineering Technology. The theme "Propelling to the Innovative Idea" highlights prominence of recent developments in marine and advanced technologies in the field of marine application, maritime operation, energy and reliability, advanced materials and applied science. This online conference provided a platform for presentations and discussions at the local and international level between educationists, researchers, students, and industrialists. Furthermore, it created opportunities to establish networks and meet experts in addition to exchange of up-to-date knowledge in the field. This book is the up-to-date reference, especially to those who want to learn and explore more about the latest developments and technologies of maritime industries.

A Question of Manhood, Volume 1 Darlene Clark Hine,Earnestine Jenkins.1999-10-22 Each of these essays illuminates an important dimension of the complex array of Black male experiences as workers, artists, warriors, and leaders. The essays describe the expectations and demands to struggle, to resist, and facilitate the survival of African American culture and community. Black manhood was shaped not only in relation to Black womanhood, but was variously nurtured and challenged, honed and transformed against a backdrop of white male power and domination, and the relentless expectations and demands on them to struggle, resist, and to facilitate the survival of African-American culture and community.

Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers Iliana Christodoulou-Varotsi, Dmitry A. Pentsov. 2007-10-31 The importance of international maritime labour law - both as a component of international maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the International Labour Organization, the International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on *Maritime Work Law Fundamentals: Responsible Shipowners Reliable Seafarers*. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.

Maritime History as Global History Maria Fusaro, Amélia Polónia. 2017-10-18 This study aims to provide new insights into the connections between maritime history and global history. It demonstrates the significance of maritime activity as a conduit of global exchange by examining local, national, and international interdependencies and trade networks, and a broad range of time periods, geographical areas, and various sub-divisions of maritime historical research. It is composed of ten essays, with an introductory chapter and concluding chapter. The first five essays discuss the effects of globalisation on shipping in the early modern period; the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day; the next discusses the impact of global entrepreneurialism on maritime history; the penultimate discusses the connections and variables between maritime and global history; and the concluding chapter examines the theoretical assumptions surrounding the two disciplines, using the globalisation of Early Modern Spain as a case study to do so. The study demonstrates that the core strength of maritime history is its essential place in global history, and that the process of globalisation began at sea.

Handbook of Research on the Future of the Maritime Industry Senbursa, Nihan. 2022-03-25 During the COVID-19 pandemic, employees of maritime and logistics sectors have continued their activities both on shore and on board to complete operations and supply continuity of logistics management in hard times. While organizations worked to provide the best services to customers, the shipping industry suffered by the work-life changes brought by the pandemic. Changes have been felt in talent management in new shipping, changing maritime ethics and affecting the maritime industry psychology, employee motivation, importance of seafarers, and employee rights and responsibilities. The *Handbook of Research on the Future of the Maritime Industry* presents leaders and managers from maritime and logistics industries, sharing their experiences, new paradigms, practices, and strategies. This book provides practical ideas and strategies to cope with the consequences of the "new normal" in the wake of the global pandemic crisis. Covering topics such as employee rights, occupational safety, and psychological effects, this book is an essential resource for senior executives, leaders and managers, HR professionals, lecturers, business clusters, entrepreneurs, researchers, scholars, academicians, and faculty of higher education.

The Seafarer Ida L. Gordon. 1979

The Mysterious Case of the Nefarious Seafarers CJ Lutton.2010-12-27 To those so inclined, my long association with the great Sherlock Holmes, may appear at first blush, an incredible journey through life. Valiant knights on a quest to rid the world of evil doers, with the occasional, slaying of a dragon along the way. Truly, a romantic's ideal. After all, what child hasn't dreamt of curing the world's ills and ridding the populace of its criminal element? True, rooming with one of the most remarkable minds of our time, afforded me the privilege of chronicling many of our exciting adventures, but as many of my readers are well aware, Holmes was often churlish and disagreeable when there were no cases to challenge his keen mind. As Holmes would self-pityingly put it, it was during a particularly, cruel and spiteful lull in London's crime rate that I reluctantly, found myself returning to the flat at Baker Street, after completing my consultation at Royal Bethlam Hospital on St. George's Road. As a doctor of medicine, it is normally not my wont or habit to administer to the health and welfare of lunatics, but a colleague was in a quandary, regarding a particular patient and he sought my opinion as to the poor soul's physical, well being. With much trepidation, I allowed myself to be cajoled into paying a visit to Bedlam. So it was that I, upon returning to Baker Street in an already sour mood; caused no doubt, by the deplorable conditions of Bethlam Hospital, that I had little patience with Holmes's, petulant and mean spirited, disposition. Entering the flat, I had no other desire than to scrub the foul stench and oppressive mood off me, and I hung my coat on the back of the door. Holmes lay sprawled on the sofa, browsing the papers, and from the mess of discarded pages scattered about the room, it was obvious that he did not find anything to his liking. Turning his head in my direction, his angry expression, confirmed my fears. Ah Watson, he remarked sarcastically, swinging upright and tossing the remaining papers in the air. I trust you had an enjoyable outing? Not now, Holmes! I'm in no mood to... Ignoring my words entirely, Holmes continued to rant on. Has the Queen offered a proclamation, placing all of London's criminals on holiday? There's not one hint of scandal or conspiracy brewing in any of these rags! In a fit of tantrum, he punted the newspapers in the air, scattering the fluttering, sheets about the room. My God Holmes, must you? Again, ignoring my pleadings, he went on...

Corporate Social Responsibility in the Maritime Industry Lisa Loloma Froholdt.2018-03-16 This book addresses the environmental, legal, social, and economic aspects of corporate social responsibility in the maritime industry. It discusses the voluntary aspects of the CSR concept and how the lines between informal and formal rules are merging and becoming fuzzy. Further, it shows how regulation is enhancing responsibility and sustainability in the maritime industry. The book gathers the experiences of the WMU, IMO, UN and public and private actors in developing and developed countries in the maritime industry.

Women Seafarers International Labour Office, Seafarers International Research Centre.2003 This book focuses on contemporary women seafarers at a global level. It looks at issues surrounding the working conditions and welfare of women, from both developed and developing countries, employed aboard the world's merchant and passenger ships. Using research commissioned by the ILO, the book considers women's participation levels in the industry, and examines policies concerning their recruitment, training, maternity

and employment rights, and other aspects of work and life at sea. It also gives first-hand accounts from women seafarers describing how they have dealt with discrimination, sexual harassment, parental disapproval and an array of other difficulties. The study examines the practices and policies of national and international regulatory agencies, employers, trade unions, and maritime education institutions. A series of recommendations that may further help the integration of women into shipboard communities is included.

Sailors and Traders Alastair Couper. 2008-12-09 Written by a senior scholar and master mariner, *Sailors and Traders* is the first comprehensive account of the maritime peoples of the Pacific. It focuses on the sailors who led the exploration and settlement of the islands and New Zealand and their seagoing descendants, providing along the way new material and unique observations on traditional and commercial seagoing against the background of major periods in Pacific history. The book begins by detailing the traditions of sailors, a group whose way of life sets them apart. Like all others who live and work at sea, Pacific mariners face the challenges of an often harsh environment, endure separation from their families for months at a time, revere their vessels, and share a singular attitude to risk and death. The period of prehistoric seafaring is discussed using archaeological data, interpretations from interisland exchanges, experimental voyaging, and recent DNA analysis. Sections on the arrival of foreign exploring ships centuries later concentrate on relations between visiting sailors and maritime communities. The more intrusive influx of commercial trading and whaling ships brought new technology, weapons, and differences in the ethics of trade. The successes and failures of Polynesian chiefs who entered trading with European-type ships are recounted as neglected aspects of Pacific history. As foreign-owned commercial ships expanded in the region so did colonialism, which was accompanied by an increase in the number of sailors from metropolitan countries and a decrease in the employment of Pacific islanders on foreign ships. Eventually small-scale island entrepreneurs expanded interisland shipping, and in 1978 the regional Pacific Forum Line was created by newly independent states. This was welcomed as a symbolic return to indigenous Pacific ocean linkages. The book's final sections detail the life of the modern Pacific seafarer. Most Pacific sailors in the global maritime labor market return home after many months at sea, bringing money, goods, a wider perspective of the world, and sometimes new diseases. Each of these impacts is analyzed, particularly in the case of Kiribati, a major supplier of labor to foreign ships.

The Market for Seamen in the Age of Sail Lewis R. Fischer. 2017-10-18 This volume collects eight essays that all attempt to answer two key concerns: did markets for seafarers exist in the age of sail; and, if so, were these markets efficient? The question was initially approached by Charles Kindleberger, who claims a market is efficient if it permits free access for employer and employee, if supply and demand match balance so that wages increase, and that labour must command the same price across the market. The first four focus on the broadly defined early-modern period, and all agree on the existence of the markets but are divided over whether or not they are efficient. The second section asks the same questions

of the nineteenth century, and receives similar answers. All of the essays take issue with the definition and application of the term 'efficiency' when approaching their conclusions. Each author is considered an expert within their field, and all base their research on the North Atlantic. Section 1: These essays focus on the early-modern period of maritime history. Carla Rahn Phillips considers the market for maritime labour in early-modern Spain, finding that despite the necessity of sailors and existence of the market, wages remained low and skilled maritime labourers did not have bargaining power, rendering the system inefficient. Vince Walsh examines Salem, Massachusetts, and finds that the market within Salem was efficient yet would only recruit within Salem and suffered as a result. Paul van Royen focusses on seventeenth and eighteenth century Netherlands, and finds the organisations functioned well but enable huge discrepancies in wages. David Starkey chose eighteenth century England, noting a fluctuation between efficiency and inefficiency across markets. All authors find their work linked by the prevalence of these markets and their own difficulties in determining 'efficiency' within these economies. Section 2: These essays focus on the maritime history of the nineteenth century. David Williams discusses the emergence on the advance note and the tremendous influence it had on market behaviour, indicating inefficient markets. Yrjo Kaukiainen considers Finland's history of interconnected local maritime labour markets, but also struggles to quantify their 'efficiency' after also taking issue with the ambiguous phrase. Lewis R. Fischer addresses the imbalance of wages in Norwegian maritime markets and finds that despite the integration from local to regional markets, the system remained inefficient. Finally, Morten Hahn-Pedersen and Poul Holm consider the fishing and shipping markets in Denmark and believe the wage inconsistencies reflect an inefficient system.

Maritime Psychology Malcolm MacLachlan.2017-01-21 This first-of-its-kind volume assembles current research on psychosocial issues and behavioral and safety concerns inherent in life and careers at sea. Focusing mainly on the commercial maritime transport sector, it sets out the basic concepts of maritime psychology in the contexts of health and occupational psychology and illustrates more expansive applications across nautical domains. A systems perspective and detailed case studies spotlight unique challenges to mariners' work performance, personal and environmental health and safety; it also provides support for psychometric assessment of seafarers, and describes emerging uses

for the healing properties of the sea and sailing. The book is a springboard for continued research and practice development, further interaction between psychology and the maritime world, and the continued broadening and deepening of the field. Among the topics covered: · Positive psychology and wellbeing at sea. · Transferring learning across safety critical industries. · Occupational stress in seafarers. · The psychology of ship architecture and design. · Motion sickness susceptibility and management at sea. · Risk communication during a maritime disaster. Written with clarity and nuance reflecting the vastness of marine experience, *Maritime Psychology* will be of interest to lecturers, researchers, and students of occupational and health psychology and maritime science, and to social and health scientists and practitioners in these and related fields.

These range from the challenges faced by MET institutions worldwide in incorporating the new topic of maritime security into their syllabi, to the economic costs of the new maritime security regime to the shipping industry and to ports. Other topics are also covered, including the technical means of monitoring the movements of ships, and the social implications for seafarers on board ships.Section 3 includes papers on a variety of current MET issues, such as bridge resource management, quality management in MET, careers at sea, and ship handling and marine engineering simulators.

Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations Dr. (Capt.) Vivek Jain.2023-07-11 This Book is of the seafarers, by the seafarers, for the seafarers Seafarers are the core of all maritime trade and their expectations/perspectives alone should be at the centre of all solutions for maritime skills. Taking this standpoint, the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology. The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in - the ecosystem, status & relationship with stakeholders, technology, focus on renewable energy, anxiety levels and so forth. Furthermore, stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years. Therefore, the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry. This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention. The editor thereafter divided the researched critical gaps in maritime skills into four groups (Jain's Model for Maritime Skills) - Panoptic, Social Intelligence, Upskilling & Reskilling for onboard vessels skills, and Portable Skills for future shore jobs. Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs. Thereafter, the editor embarked on a voyage to discover, persuade, collaborate with a number of exceptionally experienced subject-matter experts over many months to collaboratively pursue many mini-research projects across all selected maritime skills,

adopting specific methodology to plug these critical gaps. These experts were drawn - (1) from countries such as India, the Philippines, Romania, South Korea, Malaysia, UAE, the UK and Singapore, (2) from both genders, (3) from deck, engine & professionals settled ashore, (4) with current experience in the industry and/or at sea at a fundamental level, and (5) from seafaring-supplying nations, recognising/experiencing the relevant socio-economic circumstances of seafarers. From this book, seafarers will not only find ideas on how to plug gaps in their maritime skills, but also how they can transition with their existing skills to other maritime jobs, such as marine superintendents, marine managers, designated persons ashore, managers supervising new build/second-hand vessels, IT managers in the maritime domain, marine surveyors, marine experts/investigators, marine pilots in ports, maritime arbitrators, managers in shipyards and so forth. The solutions in this book will also resolve the issue of the shortage and retention of seafarers.

Seafarer & Community Peter H. Fricke.2023-10-27 *Seafarer & Community* (1973) examines life on shipboard and how the communities which rely on the sea for their livelihood exist. The main theme running through the chapters in this book is the observation of seafaring as an occupational community, as observed by anthropologists, economists, geographers, psychologists, seafarers and sociologists. The book explores the nature of seafaring communities, and asks whether they exist as communities in their own right or if they are occupational subgroups within a larger community. It also examines the psychological impact on seafarers of working within the closed communities of ships, and analyses the problems of training and recruitment.

Maritime Professions .2023-03-13 On a global scale, more than 40 million people make their living working directly at sea as fishers, seafarers, in aquaculture or seabed-mining, or related occupations such as dockworkers, shipbuilding, logistics, maritime administration, secondary branches of shipping, marine tourism and other maritime professions. The study of maritime labour and occupations is still under-represented in the social sciences and humanities. With the present volume, we attempt to fill this gap by representing recent research on maritime professions from a sociological perspective drawing on a wide variety of disciplinary approaches and subject matters.
