Human Error in Aviation R.Key Dismukes.2017-07-05 Most aviation accidents are attributed to human error, pilot error especially. Human error also greatly effects productivity and profitability. In his overview of this collection of papers, the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents. Human factors research reveals a more accurate and useful perspective: The errors made by skilled human operators - such as pilots, controllers, and mechanics - are not root causes but symptoms of the way industry operates. The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient.

QF32 Richard de Crespigny.2012-08-01 QF32 is the award winning bestseller from Richard de Crespigny, author of the forthcoming Fly!: Life Lessons from the Cockpit of QF32 On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the

riveting, blow-by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013

Dragged Off David Anh Dao.2021-03-16 A Vietnamese Refugee, a Viral Video, and the United Airlines Scandal That Started It All "His refusal to give up his seat on a United Airlines flight, and the ensuing assault he suffered, is emblematic of how far we, the people, still have to travel to create a world with liberty and justice for all." —Marlena Fiol, PhD, globally recognized scholar and speaker and author of Nothing Bad Between Us Dr. David Dao was dragged off United Express Flight 3411 on April 9, 2017 after refusing to give up his seat. In the tradition of contemporary immigrant stories comes a personal narrative of the many small but significant acts of racial

discrimination faced on the way to the American Dream. The unseen effects of discrimination. The United Airlines scandal of 2017 garnered over a million views on YouTube. A result of an overbooking overlook, security officials forcibly removed Dr. Dao after refusing to give up his seat. He awoke in the hospital to a concussion, a broken nose, several broken teeth, and worldwide attention. Things aren't always fair for an immigrant, but according to Dr. Dao, you can prevail if you firmly advocate for yourself. A response to a lifetime of oppressive acts. Why was Dr. Dao so adamant on his right to a seat? His entire life had led to that moment. A Vietnamese refugee, he fled his home country during the fall of Saigon. He was stranded in the Indian Ocean, immigrated to the United States, enrolled in medical school for a second time, built a practice, and started a family-all the while battling the effects of discrimination and what he had to embrace as a result. This is his story. If you are moved by immigrant stories, or books like *America for Americans*, *Minor Feelings*, *How to Be an Antiracist*, or *The Making of Asian America*, then you'll want to read Dr. David Dao's story, *Dragged Off*.

AIR CRASH INVESTIGATIONS, FLYING COFFIN? The Near Crash of Olympic Airlines Flight OA202 Pete Collins, editor.2012-07-01 The Lockheed 1011 registered A6-BSM, operated by Star Jet and chartered by Olympic Airlines, arrived on 4 July 2005 at Terminal 1 at Paris Charles de Gaulle airport. Departure was delayed because the forward hold door could not be closed. A mechanic tried to close the door manually with a hammer and a chuck. Some passengers, worried about the apparent state of the cabin and the noise, asked to disembark, and this led to a mass movement. The airplane took finally off at 16h17. Shortly after departure the crew noticed problems with engine number 3. The captain requested the SEVERE DAMAGE procedure and returned to the airport. The French Bureau d'Enqu tes et d'Analyses pour la s curit de l'aviation civile (BEA) investigated the

incident. BEA found out that the aircraft suffered from many problems, such as leaking fuel, malfunctioning safety features and lacking maintenance. The flight crew was not properly licensed, the captain was too old to fly in Europe. The Lockheed Tristar was a flying coffin.

Legal Priorities in Air Transport Ruwantissa Abeyratne.2019-05-27 Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance, both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO, and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO, such as: the need to teach air law to a new generation of aviation professionals; combating cyber-crime and cyber-terrorism; the regulation of artificial intelligence; traveller identification; interference with air navigation; human trafficking; unruly passengers; climate change; air carrier liability for passenger death or injury; Remotely Piloted Aircraft Systems (drones); and the cabin crew and their legal implications.

Ethical Issues in Aviation Elizabeth Hoppe. 2016-05-13 Applied ethics has been gaining wide attention in a variety of curriculums, and there is growing awareness of the need for ethical training in general. Well-publicized ethical problems such as the Challenger disaster, the Ford Pinto case and the collapse of corporations such as Enron have highlighted the need to rethink the role of ethics in the workplace. The concept of applied ethics originated in medicine with a groundbreaking book published in 1979. Business ethics books began to appear in the 1980s, with engineering ethics following in the 1990s. This volume now opens up a new area of applied ethics, comprehensively addressing the ethical issues confronting the civil aviation industry. Aviation is unique in two major ways: firstly it has a long history of government regulations, and secondly its primary focus is the safety of its passengers and crew. For decades commercial aviation was viewed in the same manner as public utilities, and thus it was highly regulated by the government. Since the Deregulation Act of 1978, aviation has been viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems, especially since many airlines were unprepared for the change. Ethical Issues in Aviation focuses on current concerns and trends, to reflect the changes that have occurred in this deregulated era. The book provides the reader with an overview of the major themes in civil aviation ethics. It begins with theoretical frameworks, followed by sections on the business side of aviation, employee responsibility, diversity in aviation, ground issues regarding airports, air traffic control and security, as well as health and the environment. The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace.
