Capacity Mechanisms in the EU Energy Market Leigh Hancher,Adrien de Hauteclouque,Malgorzata Sadowska.2015-09-24 Ensuring an adequate, long-term energy supply is a paramount concern in Europe. EU member states now intervene by encouraging investment in generation capacity, offering an additional revenue stream for conventional power plants in addition to the existing, heavily subsidised investments in renewable energy sources. These capacity remuneration mechanisms (or simply capacity mechanisms) have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected, so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra-national coordination and no consideration for their cross-border impact, they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in-depth analysis of capacity mechanisms, written by an expert team of policy-makers, economists, and legal professionals. It will be a first point of reference for regulators and policy-makers responsible for designing optimal capacity mechanisms in Europe, and will be an invaluable resource for academics and practitioners in the fields of energy, regulation, and competition.

The European Union's Engagement with Transnational Policy Networks Stephen Kingah,Vivien Ann Schmidt,Wang Yong.2018-02-05 This book is the first of its kind to paint a comprehensive picture of the manner in which the European Union (the EU) interacts with transnational policy networks (TPNs). The TPNs covered are those in a variety of fields including: conflict-prone natural resources, health, energy security, migration, human trafficking, combating of terrorism financing and climate change. The chapters are developed around six main lines of inquiry. The lines of inquiry articulated are: modalities through which the EU influences TPNs around the world, TPNs' influence of policy and decision-making within the EU, conditions under which engagement between the TPNs and the EU may be regarded as successful, the identity and location of the TPNs and finally the added value or futility of a strategy developed in Brussels to weaken or fortify interactions with the networks studied. The importance of TPNs should be approached from the angle of the heightened attention now placed on informal modes of decision making. Increasingly there is a sense that many international decisions are adopted and internalized through networks that can be efficient yet wanting in transparency. The book unveils complex debates on the inter-phase between inter-governmental / supranational entities like the EU, on the one hand, and networks, on the other. The physiognomy of this inter-phase matters not only for the EU but also for other such inter-governmental/ supranational bodies as well as networks. This book was previously published as a special issue of Contemporary Politics.

The Gender Communication Connection Teri Kwal Gamble,Michael W. Gamble.2020-11-09 The third edition of this classic text helps readers consider the myriad ways gendered attitudes and practices influence communication in our personal and professional interactions. Written in an engaging style, with a wide array of exercises designed to challenge and interest readers in applying what they learn, the book integrates research with examples from contemporary life related to gender and culture, race, class, and media. Among new topics covered in this edition are multiple genders, gender activism and the #MeToo movement, and challenges of twenty-first-century masculinities and femininities, including expanded coverage of contemporary male issues. Fresh coverage is also afforded to each communication context, particularly gender at work, the legal and political spheres, global cultures, and the digital world, including social media. The book is ideally suited for undergraduate courses in gender and communication within communication studies, sociology, and business departments. Online resources include lecture slides and an instructor's manual.

The Recovery of Maintenance in the EU and Worldwide Paul Beaumont,Burkhard Hess,Lara Walker,Stefanie Spancken.2014-12-01 This book grew out of a major European Union (EU) funded project on the Hague Maintenance Convention of 2007 and on the EU Maintenance Regulation of 2009. The project involved carrying out analytical research on the implementation into national law of the EU Regulation and empirical research on the first year of its operation in practice. The project also engaged international experts in a major conference on recovery of maintenance in the EU and worldwide in Heidelberg in March 2013. The contributions in this book are the revised, refereed and edited versions of the best papers that were given at the conference. The book is divided into four parts: (i) comparative context (ii) international, looking at national and non-European regional practice and how the Hague Convention could change things; (iii) international and the EU, looking at issues covered by both the Hague Convention and the EU Regulation; and (iv) the EU - looking at the Maintenance Regulation. This is the first study to look carefully at both of the new cross-border maintenance regimes globally and in Europe and to begin the examination of the practical operation of the latter regime. The approval of the Hague Convention by the EU on 9 April 2014 is a major step forward for its practical significance in enabling the recovery of child and spousal support, as from 1 August 2014 all of the 28 EU Member States apart from Denmark will be bound by the Convention.

Tax Incentives for the Creative Industries Sigrid Hemels,Kazuko Goto.2017-01-04 This book combines insights from cultural economics, public finance, and tax law, providing an accessible and comprehensive introduction in the application of tax incentives for the creative industries. It does not have a single-country focus, but instead uses the perspective and examples of various countries around the world. The book starts with a theoretical part, introducing the concepts of creative industries and of tax incentives: how can the creative industries be defined, why do governments support the creative industries and how can tax incentives be applied as policy instrument. In the globalized and digitalized world in which the creative industries operate, restrictions imposed by guidelines on harmful tax competition and state aid and regulations influencing the (im)possibility of applying tax incentives in cross-border situations have a great impact. For that reason these legal concepts are discussed as well in the theoretical part. Globalization also gives rise to questions on the cross border application of tax incentives. The example of cross border giving is discussed in this respect. The theoretical part is followed by a part that focuses on tax incentives for specific sectors of the creative industries: museums and cultural heritage, the audiovisual industries (film, tv and videogames), the art market, copyright and artists. This part uses insightful examples from various countries to illustrate the application of these tax incentives. As the book takes both an academic and a practical approach, it is of relevance to researchers, students, policy makers and readers involved in the creative industry who seek an in-depth and up-to-date overview of this alternative way for governments to support the creative industries.

The British Navy, Economy and Society in the Seven Years War Christian Buchet.2013 'A very important analysis of British naval victualling, with wide implications for economic as well as naval history.' N.A.M. RODGER, All Souls College, Oxford This book, by a leading French maritime historian, discusses how Britain's success in the Seven Years War (1756-63) was made possible by the creation of a superb victualling system for the British navy. It shows how this system had been developed over the preceding centuries, how it balanced carefully the advantages of state control with the flexibility of commercial contracting, and how the system was designed to mesh with and support British strategic ambitions. It provides rich detail on how the system worked, how it was administered, how key products were priced, bought, stored and transported, and how it compared, very favourably, to equivalent systems in France and elsewhere. The book shows how the increasing efficiency of the Victualling Board enabled the navy to take advantage of agricultural, commercial and financial advances in the British economy to supply its front line fighting forces over ever longer distances and ever longer periods. The Victualling Board was one of a number of interfaces between the demands of

the State and the supply facilities of the economy, to their mutual benefit. As a major purchaser through competitive tender, the Board made a positive contribution to the entrepreneurial spirit of British society. The book goes beyond maritime history by discussing how naval supply provided a huge stimulus for British finance, agriculture, trade and manufacturing, and argues that all this together was one of the principal causes of Britain's later Industrial Revolution. CHRISTIAN BUCHET is Professor of Modern History and Director of the Centre d'Etudes de la Mer at the Institut Catholique de Paris. Besides comparative studies of the British and French navies 1688-1783, he has written extensively on maritime environmental issues and is Secretary General of the National Council of the French Archipelago.

Remedies and Procedures before the EU Courts René Barents.2016-03-25 Finding one's way amongst the myriad of provisions that govern the system of remedies and the proceedings before the three constituent courts of the Court of Justice of the European Union (CJEU) presents a major challenge to European practitioners. It is crucial to possess a reliable, thorough guide to the relevant statutory provisions and rules of procedure – such a guide as this book, written by one of Europe's foremost jurists, provides. For every kind of case and any situation likely to arise, it clearly explains which rules apply and how to proceed. It is fully up to date, covering the renewed rules of procedure of the Court of Justice, the General Court, and the Civil Service Tribunal, as well as updated provisions and practice directions. From foundations and principles to specific rules on evidence, damages, failure to act, preliminary rulings, interim measures, and much more, the book covers all essential elements of CJEU procedure, including the following: – division of competences between the Union courts; – admissibility; – rules regarding anonymity; – practice rules for the implementation of rules of procedure; – service of documents; – setting and extension of time limits, hearings, witnesses, and experts; – deposit and recovery of sums; – rules applying to the chamber system; – assignment of cases; – application of competition rules, rules on state aid, and rules on trade protection; – rules in cases concerning intellectual property rights; – rules in actions brought on the basis of an arbitration agreement; – rules governing access to documents; – delimitation of jurisdiction between the CJEU and national courts; – expedited procedures; and – scope of the rules on costs. Each chapter ends with a list of further readings. Any lawyer seeking appropriate remedies in any case before the CJEU will benefit enormously from this book, whether used as a hands-on manual in particular cases or absorbed over time. It is sure to serve as an essential resource for many years to come.

EU Constitutional Law Koen Lenaerts,Piet Van Nuffel.2021-12-17 This title is a comprehensive textbook of EU constitutional law, setting out the structure, values, procedures, and policies of the European Union. It is a first point of reference for issues of EU constitutional law. The book encompasses six major parts. It contains an extensive analysis of the key constitutional principles governing the exercise of competences by the Union and the balance of power between the Union and its Member States, followed by an in-depth analysis of EU citizenship and the four freedoms, followed by an overview of the main internal and external policy domains. The third part addresses the role and workings of the various institutions (European Council, Council, European Parliament, Commission, European Court of Justice, and European Central Bank), the position of the Member States of the Union, and various other institutional matters. Part four explores the various decision-making processes, addressing not only the legislative and executive decision-making, but also the budget, CFSP, and external action. The fifth part looks at the legal instruments and the position of EU law in the EU and national legal orders, with an attention to the key principles of primary and direct effect, and the role of fundamental rights and the Charter of Fundamental Rights. The final part sets out the complete and coherent system of judicial protection in the European Union, offering an overview of the various courses of action before the EU courts and in the national legal orders to enforce EU law or to obtain judicial protection.

Mangrove Ecosystems: A Global Biogeographic Perspective Victor H. Rivera-Monroy,Shing Yip Lee,Erik Kristensen,Robert R. Twilley.2017-11-03 This book presents a comprehensive overview and analysis of mangrove ecological processes, structure, and function at the local, biogeographic, and global scales and how these properties interact to provide key ecosystem services to society. The analysis is based on an international collaborative effort that focuses on regions and countries holding the largest mangrove resources and encompasses the major biogeographic and socio-economic settings of mangrove distribution. Given the economic and ecological importance of mangrove wetlands at the global scale, the chapters aim to integrate ecological and socio-economic perspectives on mangrove function and management using a system-level hierarchical analysis framework. The book explores the nexus between mangrove ecology and the capacity for ecosystem services, with an emphasis on thresholds, multiple stressors, and local conditions that determine this capacity. The interdisciplinary approach and illustrative study cases included in the book will provide valuable resources in data, information, and knowledge about the current status of one of the most productive coastal ecosystems in the world.

Astrophysics and Cosmology Roger Blandford,David Gross,Alexander Sevrin.2016-03-23 Ever since 1911, the Solvay Conferences have shaped modern physics. The format is quite different from other conferences as the emphasis is placed on discussion. The 26th edition held in October 2014 in Brussels and chaired by Roger Blandford continued this tradition and addressed some of the most pressing open questions in the fields of astrophysics and cosmology, gathering many of the leading figures working on a wide variety of profound problems. The proceedings contain the rapporteur talks giving a broad overview with unique insights by distinguished renowned scientists. These lectures cover the five sessions: Neutron Stars, Black Holes, Cosmic Dawn, Dark Matter and Cosmic Microwave Background. In the Solvay tradition, the proceedings also include the prepared comments to the rapporteur talks. The discussions among the participants – expert, yet lively and sometimes contentious – have been edited to retain to retain their flavor and are reproduced in full. The reader is taken on a breathtaking ride through 42 years of extraordinary discovery since astrophysics was last on the Solvay program and 57 years since cosmology was last discussed. Contents:Opening SessionBlack HolesCosmic DawnDark MatterMicrowave BackgroundClosing Session Readership: Students, researchers and academics interested in astrophysics and cosmology. Key Features:Gives a broad overview of the most pressing open problems in several major fields in astrophysics and cosmologyThe rapporteur talks, given by leaders in the field, provide a beautiful review of the state of the art in each of the subfields discussedThe discussions – transcribed in full – provide a unique view on the thoughts of some of the most outstanding physicists active in this field

The Future of Capitalism After the Financial Crisis Richard Westra, Dennis Badeen, Robert Albritton. 2014-12-17 The Future of Capitalism After the Financial Crisis: The Varieties of Capitalism Debate in the Age of Austerity contains thirteen world leading political economists writing from within eight different countries who critically analyze the current crisis tendencies of capitalism both globally and in particular countries. Given the likelihood of an increasingly crisis prone future for capitalism, it is important not only to rethink capitalism in its current manifestations or varieties. It is also important to rethink research methods and conceptual frameworks in preparation for understanding an increasingly rocky future in which capitalism itself could go the way of the many species that in the past were endangered only to become extinct. More and more titles of books and articles are suggesting that capitalism or perhaps civilization itself is endangered if we do not make radical changes in the near future. This book breaks with academic path dependency and attempts to open new vistas of political economy and of multidisciplinary analysis that are crucially important if our thought processes are to be effective in a world in jeopardy. The varieties of capitalism (VoC) debate itself came into being as the Soviet Union unraveled. It drew in scholarship from a cross-section of Marxian and heterodox political economy. The key argument of VoC was that if capitalism was the only global option then those on the Left must get involved in policy discussions on how capitalist economies can be fashioned to become competitive as well as progressive. However, the financial crisis has seen policy across the advanced economies veer toward competitiveness coupled with austerity. The lesson for the Left is that alternatives to capitalism must be sought in the here and now.

Conn's Handbook of Models for Human Aging Jeffrey L. Ram, P. Michael Conn. 2018-04-05 Conn's Handbook of Models for Human Aging, Second Edition, presents key aspects of biology, nutrition, factors affecting lifespan, methods of age determination, use in research and the disadvantages/advantages of use. Using a multidisciplinary approach, this updated edition is designed as the only comprehensive, current work that covers the diversity in aging models. Chapters on comparative models explore age-related diseases, including Alzheimer's, joint disease, cataracts, cancer and obesity. Also included are new tricks and approaches not available in primary publications. This must-have handbook is an indispensable resource for researchers interested in the mechanisms of aging, gerontologists, health professionals, allied health practitioners and students. Combines both the methods of study for human aging and animal models Provides a historical overview and discussion of model availability, key methods and ethical issues Contains over 200 full color illustrations

State Aid Law of the European Union Herwig Hofmann, Claire Micheau, Bucura C. Mihaescu-Evans. 2016 Rules controlling State aid and subsidies on the EU and the WTO level can have a decisive influence on both regulatory and distributive decision-making. This field of law has grown exponentially in importance and complexity over the past decades. Rules on State aid and subsidies control are one of the key instruments to ensure that public spending and regulatory measures do not lead to discriminatory distortions of competition. As a consequence, hardly any part of national law is free from review under criteria of State aid and subsidy regulation. In turn, State aid and subsidies law is linked to economic, constitutional, administrative law of the EU and the Member States as well as to public international law. This book brings together leading experts from academia, the judiciary, civil servants from the European Commission, and practicing lawyers to provide expert opinion and commentary on the diverse dimensions of the complex and vital area of law. Critically analysing and explaining developments and current approaches in State aid law and subsidies, the chapters take into account not only the legal dimensions but also the economic and political implications. They address the EU law applicable to State aid in the aftermath of the recent State Modernization reform, and coverage includes: an in-depth analysis of the notion of State aid as interpreted by the Court's cases-law and the Commission's practice; the rules on compatibility of State aid with the internal market; the rules governing the procedure before the Commission; the litigation before the Court of Justice of the European Union; and analysis of the other trade defense instruments, including WTO subsidy law and EU anti-subsidy law.

Coastal Disaster Surveys and Assessment for Risk Mitigation Tomoya Shibayama, Miguel Esteban. 2022-12-19 This collection covers essential concepts in the management of coastal disasters, outlining several field surveys of such events that have taken place in the 21st century, including the Indian Ocean Tsunami, the Tohoku Earthquake and Tsunami, and the storm surges generated by Hurricane Katrina, Cyclone Nargis, and Typhoon Haiyan. Measurements of flood heights, distributions of structural destruction, and the testimonies of residents are reported, with the results being analysed and compared with past events and numerical simulations to clarify and reconstruct the reality of these disasters. The book covers the state-of-the-art understanding of disaster mechanisms and the most advanced tools for the simulation of future events: • Uniquely explains how to use disaster surveys along with simulations to mitigate risk • Combines pure scientific studies with practical research and proposes procedures for effective coastal disaster mitigation Coastal Disaster Surveys and Assessment for Risk Mitigation is ideal for students in the field of disaster risk management, as well as engineers who deal with issues related to tsunamis, storm surges, high wave attack and coastal erosion.

Analysis and Modelling of Water Supply and Demand Under Climate Change, Land Use Transformation and Socio-Economic Development Katharina Fricke. 2013-12-12 Located in a narrow grassland corridor between the semi-desert and a mountain range in Northwest China, the research area Urumqi Region is despite its semi-arid climate in a relatively favourable hydrological situation. The nearby mountains provide water for settlements and agriculture, making human development possible in the first place. Due to the development of agriculture, population and economy during the last sixty years and the increasing water consumption, a demand- and population-driven water scarcity exists today and is expected to aggravate. At the same time, the effects of climate change and land use transformations on the hydrological system and the water availability are uncertain. This study evaluates the recent and future situation by combining a hydrological water balance model for the simulation of the water supply based on scenarios of climate and land use change with a socio-economic model for projecting the future water demand including predicted growth of population and economy.

European Public Procurement Caranta, Roberto, Sanchez-Graells, Albert. 2021-10-26 This detailed Commentary provides an authoritative interpretation of each provision in the main EU Directive on public procurement - Directive 2014/24/EU, and is rich in its critical analysis of the provisions of the 2014 Directive and the case-law. The Commentary also highlights the application problems and interpretative issues being raised in EU Member States, which in due time will make their way up to the CJEU or even require further legislative interventions.

The Trophic Spectrum Revisited Colin S. Reynolds, Martin T. Dokulil, Judit Padisák. 2013-03-09 These proceedings of a workshop of the International Association for Phytoplankton Taxonomy and Ecology are directed specifically at the relationship between phytoplankton ecology and the trophic status of water bodies. Contributions address the fact that distinctive assemblages of phytoplankton species are closely associated with particular categories of water bodies. Particular attention is paid to how communities are assembled and to the ways in which environmental constraints filter the successful species. Overview articles are included. The book will be a valuable source of information to limnologists, algologists, and the technical staff of all water suppliers.

The Modernisation of State Aid for Economic and Social Development Bruno Nascimbene, Alessia Di Pascale. 2018-11-28 This book analyses the recent modernisation of EU State aid law from various perspectives, and considers both substantive and procedural aspects. It also discusses the reasons for, and the goals and future implications of the modernisation programme, including the evolution of the concept of State aid. The ambitious reform programme was launched in 2012 and has now been almost fully implemented by virtue of the adoption of new rules of procedure in July 2013, and exemption in June 2014. The book highlights the main aspects of this sector reform, which include the Commission's change of attitude towards so-called positive aid, i.e. those able to promote economic growth, and the intention to focus on matters of greater

systematic extent. These objectives also imply a third aspect: increasing the intensity of the control powers conferred on the Commission with regard to that aid that prove to be harmful to competition and the internal market. The book also examines the greater responsibility given to States for self-assessment of their economic policy measures, and explores the resulting impact on, and challenges posed to the administrations of the Member States. The book's second part is devoted to the application State aid rules in the area of services of general economic interest, with a special focus on aid in the field of social health and infrastructure.

European Union Law of State Aid Kelyn Bacon QC.2017-01-19 This book provides a comprehensive practitioner guide to the EU law of State aid, covering all relevant legislation, case law, and the dominant themes shaping EU State aid policy. It discusses the concept of State aid and its development in the European Union, as well as practical aspects such as procedures for notification to the European Commission, and enforcement in the European Court and national courts. It offers extensive coverage of specific sectors, including transport and shipbuilding, media and communications, energy and environmental protection, culture and heritage, and agriculture. The third edition is fully updated to cover the extensive legislative changes in this area, including the new General Block Exemption Regulation and De Minimis Regulation, horizontal aid guidelines, and sectoral guidelines for aviation, cinemas, agriculture, and fisheries; as well as State aid cases in the national courts, particularly the UK, and recent European Court jurisprudence. Accessible to competition lawyers and non-specialists, the book's clarity and concision make it an invaluable reference to this area of law.

BRICS and International Tax Law Peter Antony Wilson.2016-04-24 With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) – and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit out flows – the ve governments, both individually and through cooperative initiatives, have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the out ow of revenue while strongly supporting FDI, both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the rst in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire eld of BRICS international tax law, considering topics such as the following: – information exchange procedures and pitfalls; – response to the OECD's Base Erosion and Pro t-Sharing (BEPS) initiative; – role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; – thin capitalization; – transfer pricing; – controlled foreign corporation rules; – shortcomings related to authorities' limited manpower; – international audit and investigation procedures; – the BRICS approach to residence and mandatory and binding arbitration; and – the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities, as well as with leading BRICS academics and practitioners. Tax cases, together with human rights and investment cases and administrative guidelines in all ve countries are also included in the analysis. The study concludes with recommendations for improving each of the ve countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS' international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance: an approach which facilitates both outbound and inbound FDI, simpli es tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance of cials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.

Parallel Computing: Accelerating Computational Science and Engineering (CSE) M. Bader, A. Bode, H.-J. Bungartz.2014-03-31 Parallel computing has been the enabling technology of high-end machines for many years. Now, it has finally become the ubiquitous key to the efficient use of any kind of multi-processor computer architecture, from smart phones, tablets, embedded systems and cloud computing up to exascale computers.

x000D This book presents the proceedings of ParCo2013 – the latest edition of the biennial International Conference on Parallel Computing – held from 10 to 13 September 2013, in Garching, Germany. The conference focused on several key parallel computing areas. Themes included parallel programming models for multi- and manycore CPUs, GPUs, FPGAs and heterogeneous platforms, the performance engineering processes that must be adapted to efficiently use these new and innovative platforms, novel numerical algorithms and approaches to large-scale simulations of problems in science and engineering. _x000D_ The conference programme also included twelve mini-symposia (including an industry session and a special PhD Symposium), which comprehensively represented and intensified the discussion of current hot topics in high performance and parallel computing. These special sessions covered large-scale supercomputing, novel challenges arising from parallel architectures (multi-/manycore, heterogeneous platforms, FPGAs), multi-level algorithms as well as multi-scale, multi-physics and multi-dimensional problems. _x000D_ It is clear that parallel computing – including the processing of large data sets (“Big Data”) – will remain a persistent driver of research in all fields of innovative computing, which makes this book relevant to all those with an interest in this field.

European Family Law Volume II Jens M. Scherpe.2016-01-29 The Changing Concept of ‘Family’ and Challenges for Domestic Family Law explores the changing concept of ‘family’, with the current social, political, medical and scientific challenges for domestic family law discussed in over 20 European jurisdictions. National reports describe the current law and legal development for ‘horizontal’ (the law of relationships between adults such as marriage, divorce, cohabitation, same-sex relationships), ‘vertical’ (the law governing the relationships between adults and children, such as parentage including artificial reproductive techniques and surrogacy, parental responsibility and adoption) and ‘individual’ (the law of names and recognition of gender identity) family law. They show that, while considerable legal and societal diversity still exists within Europe, family law, in many areas, is developing along similar lines, with a convergence towards a European family law. This book, and the others in the set, will serve as an invaluable resource for anyone interested in family law. It will be of particular use to students and scholars of comparative and international family law, as well as family law practitioners.

Negation in Uralic Languages Matti Miestamo, Anne Tamm, Beáta Wagner-Nagy.2015-06-24 The grammaticalized expression of negation is a linguistic universal. This volume deals with negation in the Uralic language family in a typological perspective. As in no other major language family before, a comprehensive typological questionnaire provides the basis for the chapters documenting negation in 17 languages. Most of them are endangered. The chapters highlight negative auxiliary verbs—the special Uralic feature—and their ways of combining with the rich inventory of other negators in different types of clauses, as well as negative replies, negative indefinites, abessives/caritives/privatives, scope, polarity and emphatic negation. Selected aspects of negation, such as negative indefinites, negation of non-verbal predicates and information structure, are discussed in more detail in five further chapters. The book brings new typologically informed perspectives on negation in the Uralic family, and it provides valuable data and insights for any linguist working on negation.

Downloading L7 Dec 2013 provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading L7 Dec 2013 has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download L7 Dec 2013. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading L7 Dec 2013. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading L7 Dec 2013, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download L7 Dec 2013 has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

However, it uses US copyright law, which isn't universal; some books listed as public domain might still be in copyright in other countries. RightsDirect explains the situation in more detail. Our comprehensive range of products, services, and resources includes books supplied from more than 15,000 U.S., Canadian, and U.K. publishers and more. It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator – a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser. Project Gutenberg (named after the printing press that democratized knowledge) is a huge archive of over 53,000 books in EPUB, Kindle, plain text, and HTML. You can download them directly, or have them sent to your preferred cloud storage service (Dropbox, Google Drive, or Microsoft OneDrive). There are specific categories of books on the website that you can pick from, but only the Free category guarantees that you're looking at free books.
