Food Quality, Safety and Technology Giuseppina P. P. Lima,Fabio Vianello.2013-12-11 The present book collects selected contributions from researchers working in the field of food science, and participating at the second spring school for "Food Quality, Safety and Technology," which was held in Botucatu (São Paulo, Brazil), from September 24th to 27th, 2012, at the Botucatu Campus of the Universidade Estadual Paulista "Julio Mesquita Filho" (UNESP). The goal of the conference was to provide a scientific forum covering large areas of agronomy, nutrition, food science and technology, veterinary and other areas related to food technology development. Teachers, professionals, graduate and post-graduate students in Food Science; Food and Agriculture Engineering; Veterinary, Science and Food Technology and related areas were addressed by providing an exchange of knowledge and technologies. The initiative aimed to establish uniform, globally recognized scientific principles on food safety and quality, which could be consistently applied to industry and production sectors and stakeholders, taking into account that effective food control systems are essential to protecting the health and safety of domestic consumers, to guaranteeing the safety and quality of foods entering international trade, and to ensuring that imported foods conform to national requirements.

Biochemistry for Anesthesiologists and Intensivists Fernando Alemanno.2019-10-22 This book discusses and explains the importance of biochemistry knowledge in understanding what happens to patients during anesthesia and/or to those being in intensive care. It covers a wide range of topics, such as Cerebral Edema, Shock, Blood-Brain Barrier, The Pulmonary surfactant, The Acid - Base equilibrium, Local anaesthetics, Perineural adjuvants, Normobaric Oxygen Therapy, Theories of Narcosis. Hyperventilation effects and consequences are also presented. For instance, by hyperventilating a patient with a PaCO₂ significantly below 25 mmHg, we risk blocking pyruvic acid carboxylation and transforming it into oxalacetic acid, which in turn knocks out the Krebs cycle, possibly leading to a complication, i.e. to metabolic acidosis and not to compensation for respiratory alkalosis. It is also worth remembering that vitamins are actually molecules of pretty considerable potency and should not be simply intended as integrators. If we inject a patient under intensive care with vitamin C, this not only plays a capillary-protective role but facilitates the conversion of dopamine to noradrenaline. As far as vitamin B6 goes, not only is it the most natural of antiemetics but the coenzyme responsible for transforming glutamate as one of the most powerful excitatory mediators into GABA, one of the fiercest inhibitors. Anesthesiological and intensive care practice require a detailed biochemistry knowledge to avoid onset of complications and/or to deal with unexpected events promptly and appropriately. The book is intended for anesthesiologists, intensivists, anesthesia teachers, anesthesia trainees and residents.

Plant Physiology Lincoln Taiz,Eduardo Zeiger.2002-01-01 This third edition provides the basics for introductory courses on plant physiology without sacrificing the more challenging material sought by upper division and graduate level students. The text contains many new or revised figures and photographs, all in full colour. A website, referenced throughout the text, includes additional study questions, WebTopics (elaborating on selected topics discussed in the text), WebEssays (discussions of cutting edge research topics, written by those who did the work) and additional suggestions for further reading. Key pedagogical changes to the text result in a shorter book. Advanced material from the second edition has been removed and posted at an affiliated Web site, while many new or revised figures and photographs, study questions and a glossary of key

terms have been added. Despite the streamlining of the text, the third edition incorporates all the important developments in plant physiology, especially in cell, molecular and developmental biology.

Verde brillante Stefano Mancuso,Alessandra Viola.2013-10-23 Le piante sono esseri intelligenti? Partendo da questa semplice domanda Stefano Mancuso e Alessandra Viola conducono il lettore in un inconsueto e affascinante viaggio intorno al mondo vegetale. In generale, le piante potrebbero benissimo vivere senza di noi. Noi invece senza di loro ci estingueremmo in breve tempo. Eppure persino nella nostra lingua, e in quasi tutte le altre, espressioni come vegetare o essere un vegetale sono passate a indicare condizioni di vita ridotte ai minimi termini. Vegetale a chi?... Se le piante potessero parlare, forse sarebbe questa una delle prime domande che ci farebbero.
