Communication Yearbook 11 James A. Anderson.2012-05-23 In Communication Yearbook 11 major contributions from leading scholars in a variety of communication fields are presented and then critiqued by other authorities (often representing complementary or competing schools of thought). Topics addressed and commented on include the mass media audience, the theory of mediation, effective policy for health care communication and feminist criticism of television.

The Psychology of Reading Insup Taylor,M. Martin Taylor.2013-09-17 The Psychology of Reading provides a fair and coherent overall picture of how reading is done and how it is best taught. It aims to relate reading to writing systems, analyze the process of reading from several viewpoints using research from diverse disciplines, and develop a model of reading to explain reading processes all the way from letter recognition to reading whole texts. The book describes how children learn to read in different scripts, by different methods, and at different ages. It discusses different components of reading—eye movements, letter and word recognition, sentence and prose reading, and so on, in beginning readers, in skilled or unskilled readers, as well as dyslexic readers. Brain-damaged patients with selective impairment of different components provide a natural laboratory to compare reading processes within one script as well as across different scripts. The more types of readers, scripts, and components examined, the better the picture of reading processes drawn. This book is a text for college students as well as a reference book for professionals in psychology, education, linguistics, and other related fields.

Universal Access in Human-Computer Interaction: Universal Access to Information and Knowledge Constantine Stephanidis,Margherita Antona.2014-05-15 The four-volume set LNCS 8513-8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 65 papers included in this volume are organized in the following topical sections: access to mobile interaction; access to text, documents and media; access to education and learning; access to games and ludic engagement and access to culture.

Television and Behavior: Technical reviews .1982 Abstract: A comprehensive report summarizes the past 10 years of research activities and findings concerning the effects of television viewing on child behavior and development. Approximately 90% of all research publications on this topic appeared during this period, representing over 2500 titles. The report is presented in 2 volumes, a summary report and technical reviews. The technical reviews comprise overall, comprehensive, and critical syntheses of the scientific literature on specific topic areas, developed by 24 researchers in this area. The topic areas address such issues as cognitive and emotional aspects of television viewing; television's influences on physical and mental health; television as it relates to socialization and viewer's conceptions of social reality; and television as an American institution. The overall orientation of the report is toward research and public health issues.

Inferences during Reading Edward J. O'Brien,Anne E. Cook,Robert F. Lorch, Jr.2015-04-16 Inferencing is defined as 'the act of deriving logical conclusions from premises known or assumed to be true', and it is one of the most important processes necessary for successful comprehension during reading. This volume features contributions by distinguished researchers in cognitive psychology, educational psychology, and neuroscience on topics central to our understanding of the inferential process during reading. The chapters cover aspects of inferencing that range from the fundamental bottom-up processes that form the basis for an inference to occur, to the more strategic processes that transpire when a reader is engaged in literary understanding of a text. Basic activation mechanisms, word-level inferencing, methodological considerations, inference validation, causal inferencing, emotion, development of inferences processes as a skill, embodiment, contributions from neuroscience, and applications to naturalistic text are all covered as well as expository text, online learning materials, and literary immersion.

Methods and Materials for Teaching the Gifted Frances A. Karnes,Suzanne M. Bean.2021-09-23 The newly revised and updated fourth edition of Methods and Materials for Teaching the Gifted is an excellent introduction to gifted education and real-world learning. The chapters of this comprehensive textbook are written by respected leaders in the field of gifted education. The authors review the unique needs of gifted learners and give current information on instructional planning and evaluation, strategies for best practices, and ongoing enhancement and support of gifted programs. Chapters include topics such as differentiated curricular design, extending learning through research, writing challenging instructional units, and developing leadership skills and innovative thinkers. Instructional practices such as problem-based learning, technology literacy, independent study, simulation and gaming, and more are addressed. A special focus is given to using the Gifted Education Programming Standards and Common Core State Standards. The fourth edition provides updated information on funding sources and public relations strategies for gifted education programs. It also includes updated lists of books, teaching materials, websites, and other resources for teachers of the gifted.

Understanding and Teaching Reading Comprehension Jane Oakhill,Kate Cain,Carsten Elbro.2014-08-21 The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no

previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter

Leveled Texts for Social Studies: Symbols, Monuments, and Documents Debra J. Housel.2012-10-01 Designed to fully engage and motivate students in grades 1-8, this resource is perfect for differentiating social studies instruction. Leveled Texts for Social Studies: Symbols, Monuments, and Documents includes 15 different topics, each featuring high-interest text written at four different reading levels with matching pictures. Learning and Instruction Richard E. Mayer.2003 How do people learn? How can instruction promote learning? This new book by a noted scholar thoroughly and succinctly answers these two fundamental educational psychology questions. The author focuses on the big ideas, preferring that readers understand a few exemplary ideas deeply, rather than numerous ideas superficially. The book uses clear definitions, concrete examples, and a conversational writing style that easily engages readers by addressing them directly. Coverage is organized around two sides of the educational coin: learning in subject areas and instructional methods that foster meaningful learning; and explaining what research says about the learning/teaching process. For professionals in the field of Education Psychology.

Language Learning Disabilities in School-age Children Geraldine P. Wallach,Katharine G. Butler.1984

The Explicit and the Implicit in Language and Speech Liudmila Liashchova.2018-10-16 Our ability to acquire a language - one of the most complex semiotic systems - is stunning. However, to describe and explain even a small fraction of this system and of this ability is a great challenge. This book brings together modified papers of seventeen university scholars from Belarus, Germany, Russia and Lithuania originally presented at an international conference held in Minsk, Belarus, in 2017, on different hidden and implicit aspects of language and the ways of disclosing and explicating them. Language is understood by them differently as a cognitive ability, a specific semiotic structure interwoven with culture, and a discourse. This book will be of great interest to a wide range of linguist-theoreticians, specialists in applied linguistics, and the general reader with an interest in understanding what exactly language is.

Memory Development in Children (PLE: Memory) Peter A. Ornstein.2014-05-09 Originally published in 1978, the contributors to this volume offer here chapters and position papers concerned with children's memory. The chapters represent in-depth reports on children's sensory memory, rehearsal processes, and organizational processes, as well as treatments of constructive aspects of children's memory, the representational-

development hypothesis, and memory in pre-schoolers. The position papers address critical issues confronting researchers in memory development, including the developmental implications of multistore and levels-of-processing models of memory, as well as distinctions between semantic and episodic memory, recall and recognition, and deliberate and nondeliberate aspects of children's memory. An historical overview provides an introduction to the volume, leading the reader to the very latest in new directions of research in this area at the time. This volume will be of interest to all concerned with the development of memory in children.

Historical Foundations of Educational Psychology John A. Glover, Royce R. Ronning. 2013-11-11 This volume represents a beginning effort to compile a history of educational psychology. The project began, innocuously enough, several years ago when we decided to add material about the history of educational psychology to the undergraduate course we were teaching. What seemed like a simple task became very complex as we searched in vain for a volume dealing with the topic. We ended up drawing on various histories of psychology that devoted anywhere from a few paragraphs to several pages to the topic and on a very few articles addressing the issue. We were startled, frankly, by the apparent lack of interest in the history of our field and decided to attempt to compile a history ourselves. As is the case with any edited volume, the contributing authors deserve credit for its positive features. They uniformly made every effort asked of them and taught us much about educational psychology. Any errors or omissions are our responsibility alone.

Levels of Processing in Human Memory (PLE: Memory) Laird S. Cermak, Fergus I.M. Craik. 2014-05-09 As a conceptual framework for the investigation of human memory, the levels-of-processing paradigm had enjoyed immense popularity since its introduction in the early 1970s. It was the impetus behind literally hundreds of experiments and was used as an explanation for a wide range of retention phenomena. Consequently, a wealth of data and theory had emerged, and this title assimilates and evaluates this information. Originally published in 1979, the distinguished contributors to the volume - both proponents and opponents of the levels-of-processing framework - present here their latest data and ideas on a viewpoint that has been a tremendous influence in memory research and related areas.

Deaf Cognition Kringelbach. 2008-06-30 'Deaf Cognition' examines the cognitive underpinnings of deaf individuals' learning. It contributes to the science of learning by describing and testing theories that might either over- or underestimate the role that audition or vision plays in learning and memory, and by shedding light on multiple pathways for learning.

Handbook of Implicit Social Cognition Bertram Gawronski, B. Keith Payne. 2011-07-06 Virtually every question in social psychology is currently being shaped by the concepts and methods of implicit social cognition. This tightly edited volume provides the first comprehensive overview of the field. Foremost authorities synthesize the latest findings on how automatic, implicit, and unconscious cognitive processes influence social judgments and behavior. Cutting-edge theories and data are presented in such crucial areas as attitudes, prejudice and stereotyping, self-esteem, self-concepts, close relationships, and morality. Describing state-of-the-art measurement procedures and research designs, the book discusses promising applications in clinical, forensic, and other real-world contexts. Each chapter both sums up what is known and identifies key directions for future research.

Social Cognition and Social Development E. Tory Higgins, Diane N. Ruble, William W. Hartup. 1985-07-26 In psychology there has been an explosion of interest in what has come to be called social cognition. How do people categorise and conceptualise social situations, obligations and relationships? And what are the implications of their categorisations and conceptualisations for behaviour? Developmental and social psychologists are currently converging on the developmental roots of social cognitive abilities. This timely 1983 book offers a useful overview of research and theory concerning social cognition and social behaviour in children at the time of this book's publication. A full range of theoretical approaches is represented, key problems are systematically reviewed, and research programmes and perspectives of leading psychologists in the field are summarised.

Cognitive Strategy Research M. Pressley, J. R. Levin. 2012-12-06 For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the advances type, carrying the subtitle Progress in Cognitive Development Research. Each volume in the Progress sequence is strongly thematic, in that it is limited to some well-defined domain of cognitive developmental research (e.g., logical and mathematical development, development of learning). All Progress volumes will be edited collections. Editors of such collections, upon consultation with the Series Editor, may elect to have their books published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors are being published as separate volumes within the series.
