Raumanen Marianne Katoppo.2018 *Raumanen*, a prize-winning novel by Marianne Katoppo, tells the story of Monang, a handsome but wayward Batak man, and Raumanen, a young Minahasa woman who, though educated and intelligent, is also a 'soft touch' when it comes to love. As is deftly revealed by the author in this novel, even in modern day Indonesia, matters of religion and ethnicity can greatly affect--for better or worse--the course of a couple's relationship.

Proceedings of the 3rd International Conference on Language, Literature, and Cultural Education (ICON-LLCE 2023) Ari Ambarwati, Layli Hidayah, Frida Siswiyanti, Prayitno Tri Laksono, Helmi Wicaksono. 2023-11-21 This is an open access book. The role of the Indonesian language holds paramount significance, as it serves as an instrumental medium for educating the populace. It retains a steadfast position as a conduit for national communication, a unifying force, and a vital instructional medium for the nation's educational endeavors. In the contemporary epoch of globalization and the advent of Industry 4.0, global communication transcends temporal and spatial boundaries, with language assuming a preeminent role therein. The fortification and consolidation of Indonesian's role in this communicative milieu are imperative. Yet, given the intricate nature of the Indonesian populace, the augmentation and fortification of Indonesian's role necessitates sustained endeavors to ensure the preservation of Indonesian cultural identity within the nation's human resources. Diligent initiatives to fortify Indonesian as the lingua franca of scientific discourse in this era of globalization demand concerted engagement from various stakeholders, including the Indonesian Language and Literature Education Study Program (PBSI) within the Faculty of Teacher Training and Education (FKIP) at the Islamic University of Malang. The forthcoming Third International Conference on Language, Literature, and Cultural Education (ICON-LLCE) will center its focus on augmenting the role of Indonesian language towards the advancement of scientific inquiry and global civilization. The digital transformation, which has pervaded Indonesian society, has been markedly accelerated by the global pandemic that has gripped the world since early 2020. Communities worldwide have transitioned their activities to virtual realms, necessitating adaptability to the digital milieu across diverse sectors encompassing commerce, industry, governance, and education. This transition is marked by an increasing reliance on the digital domain, internet infrastructure, and intelligent computing systems, including artificial intelligence, which Bill Gates heralds as commensurate in impact to the advents of mobile telephony and the internet (The Age of AI has Begun, 2023). The digital transformation denotes a comprehensive process wherein organizations integrate digital technology across all facets of operation, thus altering the manner in which value is delivered to Indonesian-speaking constituencies. In the Indonesian context, this entails the fundamental adoption of innovative digital technologies to effect cultural and operational shifts that harmonize with evolving demands, habits, and exigencies of the Indonesian-speaking populace. Significantly, this encompasses an expansive online Indonesian dictionary, the integration of information technology and the internet in the pedagogical sphere of teaching Indonesian Language and Literature, and the infusion of artificial intelligence into the educational process for Indonesian as a Second Language (BIPA). Additionally, the repository of books and reference materials in Indonesian will be transitioned to a cloud-based mode, facilitating universal accessibility. In summation, the Internet of Things (IoT) precipitates a discernible transformation in the modes of access and utilization of the Indonesian language, particularly within the domain of scientific inquiry. From the foregoing elucidation, it is underscored that Indonesian, as the official language of the Indonesian state, assumes a pivotal and strategic role in fortifying the national identity and safeguarding the enduring vitality of the language itself. In light of this, the Indonesian Language and Literature Education Study Program (PBSI) within the Faculty of Teacher Training and Education (FKIP) at the University of Islam Malang will convene the third iteration of the International Conference on Language, Literature, and Cultural Education (ICON-LLCE) in September 2023, under the overarching theme of Augmenting the Role of Indonesian for the Advancement of Science and Global Civilization. This international conference, which has been ongoing since 2015, succeeds the second edition convened in November 2021. Through this imminent iteration of ICON-LLCE, distinguished scholars and academics representing various global locales will convene to engage in thoughtful deliberations pertaining to initiatives aimed at safeguarding and fortifying the enduring pertinence and robustness of the Indonesian language within the ambit of forthcoming intellectual

pursuits and the broader global cultural discourse.

Mass Communication Theory Denis McQuail.1983 The major textbook in communication theory. Denis McQuail provides a brisk, elegantly organized, and comprehensive overview of the ways in which mass communication has been viewed by social scientists and by practitioners. The wealth of thinking in the field; the enormous range of issues studied and questions raised; the proliferation of schools, approaches and tendencies:

McQuail marshalls this welter of material into a clear, easy to follow textbook for students at all levels of communication studies. He reviews: ways in which the the mass media have been defined theories of their function and purpose views of the organizational structures and processes of mass media content analysis and the other techniques for interpreting the meaning of media content theories of what an audience is and what it does Cultivation theory, traditional sociology, classical marxism, the Frankfurt school, 'hegemony' theory, Soviet media theory, the uses and gratifications approach, development media theory, free press theory, organizational theory -- all these and much more -- are described and placed in their historical and scholarly context. McQuail's extensive references will guide anyone interested in mass communication to the key work in the field. Diagrams, a Media Theory Map, summaries, indexes and other features will further help new students to keep a hold on all the separate strands in the field. About the author: Denis McQuail is currently Professor of Mass Communication, University of Amsterdam, the Netherlands. After graduating from Corpus Christi College, Oxford with a BA in Modern History and a Diploma in Public and Social Administration, he received a PhD in social studies from the University of Leeds. He has since been affiliated to the Television Research Unit, University of Leeds; the University of Southampton; and the Annenberg School of Communication, University of Pennsylvania. His major publications include: Television and the Political Image (with J Trenaman) 1961; Television in Politics: Its Use and Influence (with J G Blumler), 1968; Towards a Sociology of Mass Communications, 1968; Sociology of Mass Communication (editor) 1972; Communication, 1975; Review of Sociological Writing on the Press, 1976; Analysis of Newspaper Content, 1977; Communication Models for the Study of Mass Communication (with Sven Windahl), 1982. Why this textbook? Why choose this textbook for use in your courses over others that are available? McQuail has drawn on his own extensive teaching experience to make sure his book offers the following qualities and features: The frameworks: for ease of organization, McQuail arranges the theories of media effect processes, or mass media and social change in new, clarifying frameworks. He aims to present all the principal theories within a single integrative framework. Its range: McQuail's extraordinary feat of organization encompasses theories from all the principal approaches to communication from all over the world. His book will be useful in a variety of cultural and national settings. Its thoroughness: McQuail provides over 300 references to guide your students to the primary sources. Not only is each theory described, and its sources and histories plotted, but its implications and intellectual context are explored. Consensus theories are given equal weight with themore contentious, critical understandings. Controversy is faced, fairness maintained. Its currency: The most recent research is expressed in the form of theoretical propositions. New approaches are discussed that are not reviewed in other textbooks: a revision of the functional theory, the notion of emerging 'public definitions', and a revision of the 'four theories of the press'. Other unique features: A thorough review of theories of the audience. Questions of media power and normative theories of media are given a central place at various points. Professor Denis McQuail provides a thorough review of the history, structure, and processes of the mass media, and the views taken of them. The first chapter defines the terms and issues of mass media studies. It also traces the development of mass media since the first newspapers in the 17th century. McQuail notes the origins, typical forms, and applications of mass media at different times. He then provides a framework for understanding the different approaches to the study of mass media. Mass society theory, Marxist approaches of different types, message-centred theory, and theory of audience and effect are the perspectives reviewed. Chapter Three explores the ideological, political, and cultural contexts in which the mass media operates, and which define the media's functions. The institutional forms of mass communication are characterized in Chapter Four. In Chapter Five, the meaning of the information provided by the media is analyzed. Different kinds of content, such as news or fiction, are examined from different theoretical perspectives. Chapter Six describes alternative approaches to the study ofthe audience, the different aspects of audiences which they study, and the conclusions they have reached. Chapter Seven focusses on the study of the impact and effect of media. Different scientific approaches to this study are described, and the results of this research given. The final chapter looks at the lessons of

mass communication study for issues of current concern such as international communication and new technological developments.

Media dan Teknologi Pembelajaran Edisi Kedua Prof. Dr. Muhammad Yaumi, M.Hum., M.A..2021-09-01 Lahirnya buku ini didorong oleh begitu langkanya buku rujukan utama atau referensi penting yang berkenaan dengan kajian media dan teknologi pembelajaran. Kebanyakan buku yang beredar merupakan buku terjemahan atau referensi lama yang tidak memperhatikan perkembangan kajian teknologi pembelajaran dari masa ke masa. Padahal, dinamika kemajuan ilmu pengetahuan dan teknologi (saintek) begitu cepat dan arus globalisasi informasi dan komunikasi sangat deras, sehingga mengharuskan untuk memperbarui (merevisi) konten buku rujukan tersebut. Edisi kedua ini menyajikan beberapa penambahan materi yang telah disesuaikan dengan kebutuhan mahasiswa, serta mengikuti perkembangan kajian teknologi pembelajaran terkini. Pada bab tujuh hingga sembilan, disajikan materi terkait belajar melalui media audio dan media video; serta dilanjutkan dengan pembahasan blended learning, yakni pepaduan pembelajaran tatap muka dan pembelajaran daring (online). Materi ini sangat penting untuk dipahami para mahasiswa yang kini dituntut melaksanakan pembelajaran jarak jauh (daring). Karenanya, pembahasan materi pembelajaran jarak jauh berbasis teknologi informasi dan komunikasi (TIK) di bab terakhir saling berkaitan dan menjadi amat relevan dengan tuntutan pembelajaran di masa kini. Buku teks pengantar ini sejatinya merupakan rujukan utama untuk para mahasiswa Fakultas Tarbiyah dan Keguruan di perguruan tinggi agama, dan tentunya juga patut dijadikan rujukan pembelajaran bagi mahasiswa pada perguruan tinggi umum lainnya untuk memperoleh pemahaman komprehensif tentang pengembangan media dan teknologi Buku persembahkan penerbit PrenadaMediaGroup

Four Arguments for the Elimination of Television Jerry Mander.2013-08-13 A total departure from previous writing about television, this book is the first ever to advocate that the medium is not reformable. Its problems are inherent in the technology itself and are so dangerous—to personal health and sanity, to the environment, and to democratic processes—that TV ought to be eliminated forever. Weaving personal experiences through meticulous research, the author ranges widely over aspects of television that have rarely been examined and never before joined together, allowing an entirely new, frightening image to emerge. The idea that all technologies are neutral, benign instruments that can be used well or badly, is thrown open to profound doubt. Speaking of TV reform is, in the words of the author, as absurd as speaking of the reform of a technology such as guns.
