Preimplantation Diagnosis of Genetic Disease Yury Verlinsky, Anver Kuliev. 1993 *Preimplantation Diagnosis of Genetic Diseases A New Technique in Assisted Reproduction* Editors: Yury Verlinsky and Anver M. Kuliev For individuals with hereditary genetic disorders such as cystic fibrosis, muscular dystrophy, or hemophilia, the decision to reproduce can be a profoundly difficult and emotional problem. For specialists in reproductive medicine, this situation can raise a myriad of complex—often conflicting—ethical questions. Recently, a revolutionary approach to screening for genetic disorders has emerged, offering unique possibilities for resolving this dilemma. *Preimplantation Diagnosis of Genetic Diseases: A New Technique in Assisted Reproduction* details the latest procedures for detecting congenital disease in gametes prior to fertilization or in embryos fertilized in vitro prior to uterine implantation. This book covers current methods used in oocyte and preembryo sampling as well as the latest techniques in DNA and cytogenetic analysis in preimplantation development. This text presents detailed, practical information on such crucial topics as: blastomere and blastocyst biopsy for preimplantation genetic analysis oocyte retrieval and embryo transfer for in vitro fertilization preparation of necessary media and micromanipulation tools polymerase chain reaction techniques for DNA analysis of polar bodies and preembryos preimplantation cytogenetic and enzymatic analyses ethical issues involved in preimplantation

genetic screening. Language MOOCs Elena Martín-Monje, Elena Bárcena. 2015-08-17 Language MOOCs (or LMOOCs) are dedicated Web-based online courses for second languages with unrestricted access and potentially unlimited participation. They are generating interest and expectation in the contexts of university education, lifelong learning and online training in general. This pioneering book presents an initial analysis of the theoretical and methodological issues underlying LMOOCs and presents empirical evidence of their potential for the development of language communicative competences, based upon previously unpublished research. It provides a mosaic-like view of LMOOC research, not only with respect to the geographical and institutional origin of its authors, but also to the heterogeneous nature of their respective academic backgrounds, and suggests directions for future development. As in other types of online language courses, the integration of the results of multidisciplinary research projects and teaching experiences related to LMOOCs is fundamental to make the field advance steadily and respond to some of the real challenges and problems faced by individuals working and living in competitive plurilingual societies today.

The New Peasantries Jan Douwe van der Ploeg. 2018-06-13 When first published in 2008, *The New Peasantries* revolutionized our ways of thinking of what constitutes the peasantry and repeasantization. It showed how a new era of empire and globalization was creating new forms of

peasantry. This new edition is thoroughly revised, with a reorganization of chapters and several new chapters added. It includes a new chapter on China, based on the author's extensive fieldwork there, and much more information on Brazil. It integrates and critically reviews the many publications on peasants, peasantries and peasant modes of agricultural production published in recent years. The theoretical discussion is enriched with more attention to the seminal work of Chayanov. Greater attention is also paid to the construction of new markets - a theme that will remain a major issue in the coming decade. It combines and integrates different bodies of literature: the rich traditions of peasant studies, development and rural sociology, neo-institutional economics and debates on empire and globalization. The original book has been used in several international postgraduate courses. The experience and feedback thus obtained has been used to simplify the structure of the book and make it more accessible as a textbook for students.

Jan Brueghel the Elder Arianne Faber Kolb.2005 Kolb has produced a thoroughly researched essay on this painting, which is in the Getty Museum. The study focuses on Brueghel's depiction of nature, especially his exacting representation of identifiable species of animals and birds, the names of which are listed. Brueghel's collaboration with other painters, his and other painters' re-use of the same theme and composition, and the history and practice of natural history collection and representation are central themes. The volume, which is printed in a horizontal format (it's 11x8) and heavily illustrated, is written for a general audience, though art historians will also find much of interest.

Fashioning the Bourgeoisie Philippe Perrot.1994 By the middle of the century, men were prompted to disdain the decadent and gaudy colors of the pre-Revolutionary period and wear unrelievedly black frock coats suitable to the manly and serious world of commerce. Their wives and daughters, on the other hand, adorned themselves in bright colors and often uncomfortable and impractical laces and petticoats, to signal the status of their family.

Sects & Social Disorder Abdul Raufu Mustapha.2014 Analyses Muslim-Muslim divisions within northern Nigeria, which are as important for understanding the violence in the region as those between Muslim and Christian (for which, see the companion volume, Creed and Grievance), with consequences for long-term peacemaking

The Path to Genocide in Rwanda Omar Shahabudin McDoom.2021-03-11 The shocking characteristics of Rwanda's genocide in 1994 have etched themselves indelibly on the global conscience. The Path to Genocide in Rwanda combines extensive, original field data with some of the best existing evidence to evaluate the myriad theories behind the genocide and to offer a rigorous and comprehensive explanation of how and why it occurred, and why so many Rwandans participated in it. Drawing on interviews with over three hundred Rwandans, Omar Shahabudin McDoom systematically compares those who participated in the violence against those who did not. He contrasts communities that experienced violence early with communities where violence began late, as well as communities where violence was limited with communities where it was massive. His findings offer new perspectives on some of the most troubling questions concerning the genocide, while also providing a broader engagement with key theoretical debates in the study of genocides and ethnic conflict.

Set Linear Algebra and Set Fuzzy Linear Algebra W. B. Vasantha Kandasamy, Florentin Smarandache, K. Ilanthenral. 2008 Set linear algebras, introduced by the authors in this book, are the most generalized form of linear algebras. These structures make use of very few algebraic operations and are easily accessible to non-mathematicians as well. The dominance of computers in everyday life calls for a paradigm shift in the concepts of linear algebra. The authors believe that set linear algebra will cater to that need.

A Secret History of Clay Edmund De Waal. 2004 The qualities that have caused clay to be overlooked as a medium by those writing the history of modern art are precisely those that make it attractive to artists. It is easy to work, fragile, inexpensive, unpredictable and physical, and therefore inherently

subversive. A Secret History of Clay reveals the previously undisclosed love affair between artists and this most humble of materials and in doing so re-writes modern art history. Works by some of the greatest artists of the twentieth century, many never reproduced before, will be fully illustrated in colour, tracing the transition of ceramics from a craft pursuit to something altogether more radical. Simon Groom, curator of the exhibition, argues the case for a re-examination of the use of clay in modern art. The distinguished ceramicist and writer Edmund de Waal explores its history, examining little-known works by groups such as the Fauves, Russian Suprematists, German Expressionists, Italian Futurists, and CoBrA, as well as by artists including Duchamp, Miro, Picasso and Noguchi. The book will also feature extracts from the manifestos and writings of both artists and critics on the use of clay. Starting with Gauguin,

The Reality of Symbols Jan Baptist Bedaux.1990 Bedaux brings the discussion of meaning in northern painting back to the basics: the description of real objects, the evocation of everyday associations, the employment of standard visual metaphors, symbols and allegories. With the first publication of an eighteenth-century iconographical program drawn up by the Hague painter Mattheus Verheyden, he demonstrates the continued importance of allegory, that stepchild of iconography. -- Cover page 4.

Preimplantation Genetics A. Kuliev, Yury Verlinsky.2012-03-02 Yury Verlinsky and Anver Kuliev Reproductive Genetics Institute, Illinois Masonic Medical Center, 836 W. Wellington Chicago, IL 60657 Although introduction of a first trimester prenatal diagnosis by chorionic villus sampling (CVS) has considerably improved the possibility for prevention of genetic diseases, it requires a

selective abortion in case of an affected fetus. Following the direction of an earlier prenatal diagnosis and to avoid the need for abortion, preimplantation genetic diagnosis has been initiated based on polar body removal and pre-embryo biopsy. The First International symposium on Preimplantation Genetics, Chicago, September 17-19, 1990, was organized to explore these important developments, to review the state of knowledge in the field, and to address existing problems to be solved for developing and improving current approaches for preimplantation diagnosis of genetic disorders. A growing interest in the subject was obvious from the wide attendance of the meeting: over 250 scientists from 19 countries participated. This was the first attempt to put together the advances in different areas of basic and applied research relevant to Preimplantation Genetic Diagnosis, with the multidisciplinary scientific program including the sessions on embryology, micromanipulation and biopsy, genetic analysis of gametes and pre-embryos, IVF, gene expression and gene therapy, and ethical and legal issues. The deliberations of the Symposium presented in the above mentioned sessions, which comprise the contents of corresponding sections of the Proceedings, open a new area in medical research based on the interaction of IVF and New Genetics.

The New Peasantries Jan Douwe van der Ploeg.2012-05-23 This book explores the position, role and significance of the peasantry in an era of globalization, particularly of the agrarian markets and food industries. It argues that the peasant condition is characterized by a struggle for autonomy that finds expression in the creation and development of a self-governed resource base and associated forms of sustainable development. In this respect the peasant mode of farming fundamentally differs from entrepreneurial and corporate ways of farming. The author demonstrates that the peasantries are far from waning. Instead, both industrialized and developing countries are witnessing complex

and richly chequered processes of 're-peasantization', with peasants now numbering over a billion worldwide. The author's arguments are based on three longitudinal studies (in Peru, Italy and The Netherlands) that span 30 years and provide original and thought-provoking insights into rural and agrarian development processes. The book combines and integrates different bodies of literature: the rich traditions of peasant studies, development sociology, rural sociology, neo-institutional economics and the recently emerging debates on Empire.

Childhood Pleasures Donna R. Barnes, Peter G. Rose. 2012-11-05 Seventeenth-century Netherlands is a time and place that inspires our imagination. This maritime country conjures up images of windmills and dikes, picturesque farms, bustling cities, and harbors filled with ships returning home from far-away lands, their holds packed with spices. The small country enjoyed vibrant economic growth and a remarkably tolerant society that welcomed people of all religious backgrounds. The enormous legacy of this period of the Dutch republic, which artists, writers, and poets celebrated as its Golden Age, has enriched all our lives. As historians search for a fuller understanding of its unique character, they continually return to the central role of the family. Children are an essential part of the story, because how they were raised and taught, how they played, and what they ate and drank offer fundamental insights into Dutch lives. The images in the book are organized around eight themes: Infancy; St. Nicholas: Bringer of Sweets and Toys; Celebrations and Music; Toys and Games; Animals as Pets and Companions; Inventing Fun, Games, and Mischief; Shopping for Food Treats; and Winter Activities: Outdoors. A recipe chapter provides inspiration for cooking projects, allowing children to prepare tastes of the past. Through words and images, we learn that while some pleasures enjoyed by Dutch youngsters 400 years ago have changed, some have remained the same and are sources of fun and excitement for children today.

Intent to Deceive Linda Melvern. 2020-02-25 A shocking exposé of genocide denial It is twenty-five years since the 1994 genocide of the Tutsi of Rwanda when in the course of three terrible months more than 1 million people were murdered. In the intervening years a pernicious campaign has been

waged by the perpetrators to deny this crime, with attempts to falsify history and blame the victims for their fate. Facts are reversed, fake news promulgated, and phoney science given credence. *Intent to Deceive* tells the story of this campaign of genocide denial from its origins with those who planned the massacres. With unprecedented access to government archives including in Rwanda Linda Melvern explains how, from the moment the killers seized the power of the state, they determined to distort reality of events. Disinformation was an integral part of their genocidal conspiracy. The génocidaires and their supporters continue to peddle falsehoods. These masters of deceit have found new and receptive audiences, have fooled gullible journalists and unwary academics. With their seemingly sound research methods, the Rwandan génocidaires continue to pose a threat, especially to those who might not be aware of the true nature of their crime. The book is a testament to the survivors who still live the horrors of the past. Denial causes them the gravest offence and ensures that the crime continues. This is a call for justice that remains perpetually delayed.

Literacy, Technology, and Diversity Jim Cummins, Kristin Brown, Dennis Sayers. 2007 An invaluable resource for both practicing and pre-service teachers, this long-awaited book offers a fresh and much-needed point of view of how to rethink literacy and technology in today's diverse classrooms. Authored by some of the most respected researchers in the field today, *Literacy, Technology, and Diversity* reflects on the idea that great expectations are achievable through educational projects that foster academic growth, with classroom diversity and technology as catalysts for deeper learning, and that a narrow focus on grade expectations yields superficial results. Arguing today's learning principles need to incorporate the core values of community learning, critical pedagogy, multilingualism, anti-racist education, high academic standards, and technological fluency, Cummins, Sayers and Brown provide a thought-provoking introduction into these learning principles

that will inspire the life-long learning of students. Take a peek inside... Provides examples of projects, backed by research-based theories for their effective adaptation to help both pre-service and practicing teachers become more independent and creative in the ways they use technology. Gives useful suggestions on how to effectively integrate literacy and technology into the classroom. Presents Portraits (Case studies) of collaborative projects promoting literacy learning and often involving technology on such topics as: Cognition, Assessment, Community of Learning, and Tools and Resources in Section II (Chapters 5-9). Contains an appendix of short vignettes of exemplary projects that promote learning of standards-based expectations for academic achievement. Includes a complimentary CD-ROM of additional resources for teachers as well as updated portraits on exemplary projects.
