**Wenn Kinder mit Legasthenie Fremdsprachen lernen** Katrin Sellin.2020-05-11 Nicht alle Kinder lernen Fremdsprachen mit Leichtigkeit -- vor allem dann nicht, wenn die Schüler Lese- und Rechtschreibschwierigkeiten haben. Schüler mit dieser Teilleistungsschwäche schreiben ein Wort möglicherweise auf verschiedene Arten falsch; aus dem englischen please wird dann ein plez oder auch ein pleas. Es kann für sie eine große Anstrengung bedeuten, die richtige grammatische Form oder die richtige Satzstellung zu konstruieren. Lehrer, Therapeuten und auch die Eltern sollten darüber informiert sein, welche Schwierigkeiten sich den Kindern mit Legasthenie beim Erwerb einer Fremdsprache stellen und wie sie sie geschickt fördern können, z. B. beim Aufbau von Sprechfertigkeiten, beim Lesen, bei der Sicherung der Rechtschreibung, beim Vokabellernen, beim Nutzen einer Lernkartei oder einfach beim Spielen. Die vielfältigen Übungen aus dem Englischen sind in dieser Auflage um zahlreiche Anregungen für die Sprachen Französisch und Latein erweitert worden.

**Traditions in German-Speaking Mathematics Education Research** Lisa Hefendehl-Hebeker,Hans Niels Jahnke.2020-10-08 This open access book shares revealing insights into the development of mathematics education research in Germany from 1976 (ICME 3 in Karlsruhe) to 2016 (ICME 13 in Hamburg). How did mathematics education research evolve in the course of these four decades? Which ideas and people were most influential, and how did German research interact with the international community? These questions are answered by scholars from a range of fields and in ten thematic sections: (1) a short survey of the development of educational research on mathematics in German speaking countries (2) subject-matter didactics, (3) design science and design research, (4) modelling, (5) mathematics and Bildung 1810 to 1850, (6) Allgemeinbildung, Mathematical Literacy, and Competence Orientation (7) theory traditions, (8) classroom studies, (9) educational research and (10) large-scale studies. During the time span presented here, profound changes took place in German-speaking mathematics education research. Besides the traditional fields of activity like subject-matter didactics or design science, completely new areas also emerged, which are characterized by various empirical approaches and a closer connection to psychology, sociology, epistemology and general education research. Each chapter presents a respective area of mathematics education in Germany and analyzes its relevance for the development of the research community, not only with regard to research findings and methods but also in terms of interaction with the educational system. One of the central aspects in all chapters concerns the constant efforts to find common ground between mathematics and education. In addition, readers can benefit from this analysis by comparing the development shown here with the mathematical education research situation in their own country. **An Early Self** Susanne Zepp.2014-11-19 What role has Jewish intellectual culture played in the development of modern Romance literature? Susanne Zepp seeks to answer this question through an examination of five influential early modern texts written between 1499 and 1627: Fernando de Rojas's *La Celestina*, Leone Ebreo's *Dialoghi d'amore*, the anonymous tale *Lazarillo de Tormes* (the first picaresque novel), Montaigne's *Essais*, and the poetical renditions of the Bible by João Pinto Delgado. Forced to straddle two cultures and religions, these Iberian conversos (Jews who converted to Catholicism) prefigured the subjectivity which would come to characterize modernity. As New Christians in an intolerant world, these thinkers worked within the tensions of their historical context to question norms and dogmas. In the past, scholars have focused on the Jewish origins of such major figures in literature and philosophy. Through close readings of these texts, Zepp moves the debate away from the narrow question of the authors' origins to focus on the innovative ways these authors subverted and transcended traditional genres. She interprets the changes that took place in various literary genres and works of the period within the broader historical context of the sixteenth and seventeenth centuries, demonstrating the extent to which the development of early modern subjective consciousness and its expression in literary works can be explained in part as a universalization of originally Jewish experiences.

**Theory of Inquiry Learning Arrangements** Johannes Reitingger,Christina Haberfellner,Eric Brewster,Martin Kramer.2016-01-01 Human beings come equipped with a tendency to generally not want to leave thinking to others. With the endeavor to professionally, reflectively, and gracefully support each individual on the basis of this tendency, the paradigm of a curious, self-determined, and inquiring human is developed in this volume, which might point the way towards a promising future. In view of such a perspective, the authors regard the pedagogical construct of self-determined Inquiry Learning as just such a promising concept. The Theory of Inquiry Learning Arrangements (TILA) concretizes this approach according to the principles of critical multiplism. The effectivity of TILA is scrutinized via the personalized concepts AuRELIA (Authentic Reflective Exploratory Learning and Interaction Arrangements) and CrEEd (Criteria-based Explorations in Education). These concepts are presented in detail, empirically investigated, and underpinned with practical examples. In the current edited volume, the concept of self-determined Inquiry Learning is further empirically substantiated and presented to the international community.
