Eichler Paul Adamson,Marty Arbunich.2002-11 Atriums, household conveniences, and sleek styling made Eichler Homes a standard-bearer for bringing the modern home design to middle-class America. Joseph Eichler was a pioneering developer who defied conventional wisdom by hiring progressive architects to design Modernist homes for the growing middle class of the 1950s. He was known for his innovations, including built-ins for streamlined kitchen work, for introducing a multipurpose room adjacent to the kitchen, and for the classic atrium that melded the indoors with the outdoors. For nearly twenty years, Eichler Homes built thousands of dwellings in California, acquiring national and international acclaim. Eichler: Modernism Rebuilds the American Dream examines Eichler's legacy as seen in his original homes and in the revival of the Modernist movement, which continues to grow today. The homes that Eichler built were modern in concept and expression, and yet comfortable for living. Eichler's work left a legacy of design integrity and set standards for housing developers that remain unparalleled in the history of American building. This book captures and illustrates that legacy with impressive detail, engaging history, firsthand recollections about Eichler and his vision, and 250 photographs of Eichler homes in their prime.

Landscape, Nature, and the Body Politic Kenneth Olwig, Kenneth Robert Olwig. 2002-06-14 *Landscape, Nature, and the Body Politic* explores the origins and lasting influences of two contesting but intertwined discourses that persist today when we use the words landscape, country, scenery, nature, national. In the first sense, the land is a physical and bounded body of terrain upon which the nation state is constructed (e.g., the purple mountain majesties above the fruited plain, from sea to shining sea). In the second, the country is constituted through its people and established through time and precedence (e.g., land where our fathers died, land of the Pilgrims' pride). Kenneth Robert Olwig's extended exploration of these discourses is a masterful work of scholarship both broad and deep, which opens up new avenues of thinking in the areas of geography, literature, theater, history, political science, law, and environmental studies. Olwig tracks these ideas through Anglo-American history, starting with seventeenth-century conflicts between the Stuart kings and the English Parliament, and the Stuart dream of uniting Scotland with England and Wales into one nation on the island of Britain. He uses a royal production of a Ben Jonson masque, with stage sets by architect Inigo Jones, as a touchstone for exploring how the notion of landscape expands from artful stage scenery to a geopolitical ideal. Olwig pursues these contested concepts of the body politic from Europe to America and to global politics, illuminating a host of topics, from national parks and environmental planning to theories of polity and virulent nationalistic movements.

The Culture of the High Renaissance Ingrid D. Rowland.2001-01-15 Between 1480 and 1520, a concentration of talented artists, including Melozzo da Forlì, Bramante, Pinturicchio, Raphael, and Michelangelo, arrived in Rome and produced some of the most enduring works of art ever created. This period, now called the High Renaissance, is generally considered to be one of the high points of Western civilisation. How did it come about, and what were the forces that converged to spark such an explosion of creative activity? In this study, Ingrid Rowland examines the culture, society, and intellectual norms that generated the High Renaissance. This interdisciplinary 2001 study assesses the intellectual paradigm shift that occurred at the turn of the fifteenth century. It also finds and explains the connections between ideas, people, and the art works they created by looking at economics, art, contemporary understanding of classical antiquity, and social conventions.

Berlin Mark R. McGee.2002 *Berlin: A Visual and Historical Documentation from 1925 to Present* charts dramatically the changing face of one of the twentieth century's most fascinating cities at three crucial periods of its history.

Landscape and History since 1500 Ian D. Whyte.2004-03-03 *Landscape and History* explores a complex relationship over the past five centuries. The book is international and interdisciplinary in scope, drawing on material from social, economic and cultural history as well as from geography, archaeology, cultural geography, planning and landscape history. In recent years, as the author points out, there has been increasing interest in, and concern for, many aspects of landscape within British, European and wider contexts. This has included the study of the history, development and changes in our perception of landscape, as well as research into the links between past landscapes and political ideologies, economic and social structures, cartography, art and literature. There is also considerable concern at present with the need to evaluate and classify historic landscapes, and to develop policies for their conservation and management in relation to their scenic, heritage and recreational value. This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments, such as national parks and world heritage sites, but in the countryside more generally. Further, Ian D. Whyte argues, changes in European Union policies relating to agriculture, with a greater concern for the protection and sustainable management of rural landscapes, are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe.

The Age of Villages Alfredo Toro Hardy.2002 There are few dates in history that stand out so clearly as a turning point for mankind as September 11, 2001. The terrorist attacks produced an earthshaking impact on world affairs which resulted in a radical disruption of international order. Although deeply significant, September 11 nevertheless represented only one chapter in the story of the great conflict of our time: the confrontation between the global village and the small village, between the forces of uniformity and of diversity, between the homogenizing trends that seek to subdue everything that lies in their path and the currents of thought that value local identities, particularities and traditions. In *The Age of Villages*, Venezuelan scholar and diplomat Alfredo Toro-Hardy sets out to explore the era of globalization, in which we all—for better or for worse—live in. He provides ample evidence of the transfer of national sovereignty upwards to regional or supra-national bodies; of the growth of giant companies whose operations straddle the globe and whose senior management are citizens of the world; of the migrations from state to state and continent to continent that are leading to the globalization of the labor market for skilled workers such as software engineers and the clamor for greater freedom of movement for the less skilled. However, Toro-Hardy recognizes the different reactions to globalization in different parts of the world. He draws our attention to the appeal of right-wing politicians in Europe; to the rise of Islamic fundamentalism; and to the psychological needs of so many for a local identity. Toro-Hardy provides an entirely original, timely, and necessary understanding of the forces that are shaping our world. He offers a global, regional, national, and sub-national analysis of the nature of the great confrontation that grips the world today and its alarming ramifications.
