The Satires of Juvenal Paraphrastically Imitated, and Adapted to the Times. With a Preface. [By Edward Burnaby Greene.] Decimus Junius JUVENALIS, Edward Burnaby GREENE. 1763

European Values Pierre Bréchon, Frédéric Gonthier. 2017-04-18 Written by the team carrying out the EVS surveys in France, this book contrasts with the popular belief that values are converging. It demonstrates that increasingly individualized value systems do not necessarily mirror a more individualistic society.

Current Topics in Flavours and Fragrances K.A. Swift. 2012-12-06 This book is designed to give the reader up to date information on some of the more exciting developments that have taken place at the leading edge of fragrance and flavour research. Chapter one gives the reader a rapid excursion through the chronological landmarks of fragrance and flavour materials and sets the scene for the remaining nine chapters which cover topics that are at the forefront of modern research. Chapter two looks at the total synthesis of synthetically interesting perfumery natural materials. This chapter aims to highlight the creative and elegant chemistry that has been performed by some of the world's greatest chemists in their quest to synthesise one of the five natural products reviewed in the chapter. The chapter fits in with the forward looking theme of the book as it will hopefully inspire other chemists that are interested in synthesising natural products to produce elegant new, or industrially applicable routes to these and other perfumery materials. Chapter three looks at the growing area of interest in asymmetric fragrance materials. The chapter focuses on the use of the metal-BINAP catalytic system for the preparation of fragrance and flavour ingredients. Environmental considerations are now an integral and vital part of planning any new industrial chemical process. Chapter four aims to give the reader an insight into the wide-ranging and often readily applicable chemistry that is currently available for the installation of environmentally friendly chemical processes.

Margaret of York, Simon Marmion, and The Visions of Tondal Thomas Kren. 1992-07-16 Presented at a symposium held in 1990 to celebrate the Getty Museum's acquisition of the only known illuminated copy of *The Visions of Tondal*, twenty essays address the celebrated bibliophilic activity of Margaret of York; the career of Simon Marmion, a favorite artist of the Burgundian court; and *The Visions of Tondal* in relation to illustrated visions of the Middle Ages. Contributors include Maryan Ainsworth, Wim Blockmans, Walter Cahn, Albert Derolez, Peter Dinzelbacher, Rainald Grosshans, Sandra Hindman, Martin Lowry, Nigel Morgan, and Nigel Palmer.

Religion and Power Nicole Maria Brisch. 2008 This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar *Religion and Power: Divine Kingship in the Ancient World and Beyond*, held at the Oriental Institute, February 23-24, 2007. The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods. The study of kingship goes back to the roots of fields such as anthropology and religious studies, as well as Assyriology and Near Eastern archaeology. More recently, several conferences have been held on kingship, drawing on cross-cultural comparisons. Yet the question of the divinity of the king as god has never before been examined within the framework of a cross-cultural and multi-disciplinary conference. Some of the recent

anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings. Several contributors to this volume have pointed out the Western, Judeo-Christian background of our categories of the human and the divine. However, rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it.

Tourism and Regional Development Maria Giaoutzi.2017-05-15 Tourist visits used to be a less common activity in the past. However, more people than ever now make leisure trips, making this an era of mass tourism. This drastic change in spatial behaviour is not only caused by economic prosperity, but the scale of this phenomenon means that it is able to generate economic growth, making tourism a key factor in regional development policy. One of the main challenges of current regional policy is to market the attractiveness of an area, thereby increasing tourist visits and subsequent revenue. In particular, regions are attempting this through the use of Information and Communication Technologies (ICT), which offer information on interesting places, and efficient methods for organizing and booking trips. This book examines the interconnections between tourism, ICT and regional development. Bringing together a range of European case studies illustrating various ICT and policy innovations, it not only critiques current activity by regions in terms of tourism development, but also considers how this sector is likely to continue to grow.

Magnesium: Current Status and New Developments Theophile Theophanides,Jane Anastassopoulou.1997-09-30 This volume contains the Proceedings of the 8th International Symposium on Magnesium. It presents research and applications in order to interface between medical doctors, clinicians and scientists responsible for magnesium involvement in the pathogenesis of diseases, its biological significance, metabolism and many other utilizations which are associated with membranes and cells. The topics which are discussed concern mechanisms of the mode of action of free magnesium cations, hydrated cations and magnesium-linked cations.

Not of Woman Born Renate Blumenfeld-Kosinski.2019-03-15 Not of woman born, the Fortunate, the Unborn—the terms designating those born by Caesarean section in medieval and Renaissance Europe were mysterious and ambiguous. Examining representations of Caesarean birth in legend and art and tracing its history in medical writing, Renate Blumenfeld-Kosinski addresses the web of religious, ethical, and cultural questions concerning abdominal delivery in the Middle Ages and the Renaissance. Not of Woman Born increases our understanding of the history of the medical profession, of medical iconography, and of ideas surrounding unnatural childbirth. Blumenfeld-Kosinski compares texts and visual images in order to trace the evolution of Caesarean birth as it was perceived by the main actors involved—pregnant women, medical practitioners, and artistic or literary interpreters. Bringing together medical treatises and texts as well as hitherto unexplored primary sources such as manuscript illuminations, she provides a fresh perspective on attitudes toward pregnancy and birth in the Middle Ages and the Renaissance; the meaning and consequences of medieval medicine for women as both patients and practitioners, and the professionalization of medicine. She discusses writings on Caesarean birth from the twelfth and thirteenth centuries, when Church Councils ordered midwives to perform the operation if a mother died during childbirth in order that the child might be baptized; to the fourteenth century, when the first medical text, Bernard of Gordon's *Lilium medicinae*, mentioned the operation; up to the gradual replacement of midwives by male surgeons in the fifteenth and sixteenth centuries. Not of Woman Born offers the first close analysis of Franois Rousset's 1581 treatise on the operation as an example of sixteenth-century medical discourse. It also considers the ambiguous nature of Caesarean birth, drawing on accounts of such miraculous examples as the birth of the Antichrist. An appendix reviews the complex etymological history of the term Caesarean section. Richly interdisciplinary, Not of Woman Born will enliven discussions of the controversial issues surrounding Caesarean delivery today. Medical, social, and cultural historians interested in the Middle Ages and the

Renaissance, historians, literary scholars, midwives, obstetricians, nurses, and others concerned with women's history will want to read it.

Global Neoliberalism and Education and its Consequences Dave Hill,Ravi Kumar.2012-04-06 In this groundbreaking critique of neoliberalism in schooling and education, an international cast of education policy analysts, educational activists and scholars deftly analyze the ideologies underlying the global, national and local neoliberalisation of schooling and education. The thrilling scholarship that makes up *Global Neoliberalism and Education and its Consequences* exposes the machinations, agenda and impacts of the privatising and 'merchandisation' of education by the World Bank, the General Agreement on Trade in Services (GATS), biased think tanks, global and national corporations and capital, and the full political spectrum of Neoliberal governments. Including such topics as the increasing polarization of racialized and gendered social classes as a consequence of neoliberal policies, the role and shape of markets and education in the era of globalised Capitalism, the effects of the profit motive in higher education, the impact of the Heritage Foundation in the USA, and even a critical evaluation of education in Cuba--readers are sure to find startling insight and provocative arguments throughout *Global Neoliberalism and Education and its Consequences*.

Imperial Migrations E. Morier-Genoud,M. Cahen.2012-12-15 This volume investigates what role colonial communities and diaspora have had in shaping the Portuguese empire and its heritage, exploring topics such as Portuguese migration to Africa, the Ismaili and the Swiss presence in Mozambique, the Goanese in East Africa, the Chinese in Brazil, and the history of the African presence in Portugal.

Phylogeography of Southern European Refugia Steven Weiss,Nuno Ferrand.2007-06-04 This book provides the first synthesis of the remarkable diversity, evolutionary complexity, and conservation importance of the flora and fauna in the Mediterranean region, with emphasis on the three major peninsular refugia. The book highlights biodiversity importance in Southern Europe for European biota conservation, and includes chapters from authorities in phylogeography: John Avise, Remy Petit, Ettore Randi.

Mystifying the Monarch Jeroen Deploige,Gita Deneckere.2006 The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

The Republican Alternative André Holenstein,Thomas Maissen,Maarten Roy Prak.2008 *The Republican Alternative* seeks to move beyond the mere notion of scholarly inquiry into the republic—the subject of recent rediscovery by political historians interested in Europe's intellectual heritage—by investigating the practical similarities and differences between two early modern republics, as well as their self-images and interactions during the turbulent seventeenth and eighteenth centuries. Among the world's most economically successful societies, Switzerland and the Netherlands laid much of the foundation for their prosperity during the early modern period discussed here. This volume attempts to clarify the special character of these two countries as they developed, including issues of religious plurality, the republican form of government, and an increasingly commercially-driven agrarian society.

A nomenclator of extant and fossil taxa of the Valvatidae (Gastropoda, Ectobranchia) Gerhard Haszprunar.2014-02-05 The present catalog provides a compilation of all supra- and (infra-) specific taxa of extant and fossil Valvatidae (Ectobranchia), a group of freshwater operculate snails (Gastropoda, Heterobranchia). Taxa initially described in this family and subsequently classified in other families (in particular Hydrobiidae and

Planorbidae, but among others also larval shells of trichopteran insects) as well as names due to errors or misspellings are likewise included. For each taxon the full original reference and the type locality (and type horizon in fossils) is provided. Remarks on nomenclatorial problems and possible solutions are added if necessary. As a novelty the extensive reference list is as far as possible directly linked to the internet source (digital view or pdf-download) of the respective papers to facilitate future taxonomic research.

Technology and Innovation in Learning, Teaching and Education Meni Tsitouridou, Josâe A. Diniz, Tassos A. Mikropoulos. 2019 This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Technology and Innovation in Learning, Teaching and Education, TECH-EDU 2018, held in Thessaloniki, Greece, on June 20-22, 2018. The 30 revised full papers along with 18 short papers presented were carefully reviewed and selected from 80 submissions. The papers are organized in topical sections on new technologies and teaching approaches to promote the strategies of self and co-regulation learning (new-TECH to SCRL); eLearning 2.0: trends, challenges and innovative perspectives; building critical thinking in higher education: meeting the challenge; digital tools in S and T learning; exploratory potentialities of emerging technologies in education; learning technologies; digital technologies and instructional design; big data in education and learning analytics.

Toxines et cancer GOUDEY-PERRIÈRE Françoise, BENOIT Évelyne, GOYFFON Max, MARCHOT Pascale. 2006-11-26 De tout temps, l'homme a eu conscience de l'intérêt thérapeutique des toxines. Certaines toxines végétales depuis longtemps utilisées figurent encore dans la pharmacopée actuelle. Viennent s'y ajouter depuis peu des toxines microbiennes. Cependant le maniement des toxines natives ou à peine modifiées reste délicat tant est faible la marge entre les effets toxiques et l'efficacité thérapeutique. Comment, dans une perspective médicale, canaliser la puissance d'action et l'efficacité d'une toxine ? Connaître sa structure, comprendre son mécanisme d'action n'est pas suffisant : il faut aussi identifier sa cible privilégiée, autrement dit un récepteur cellulaire, faute de quoi l'entreprise apparemment chimérique d'un détournement de sa puissance et de sa spécificité reste aveugle. Ce cap est franchi, depuis un certain nombre d'années, et le développement des recherches sur les toxines axées sur la thérapeutique est devenu foisonnant. Voyez telle ou telle toxine protéique ternaire, avec ses trois domaines, de fixation sur un récepteur membranaire, de translocation qui lui permet de franchir la membrane cellulaire, et d'activité enzymatique qui va alors pouvoir s'exercer dans la cellule. Qu'on parvienne à dissocier chacun de ces trois domaines en leur conservant leurs propriétés, et des possibilités nouvelles d'utilisation thérapeutique vont s'ouvrir, presque à l'infini semble-t-il. Car chacun d'entre eux pourra être couplé à une molécule active bien ciblée, et leur efficacité sera même améliorée pour peu qu'on parvienne à conjuguer leur action. Qu'un récepteur, qu'une molécule, propres au métabolisme ou à la physiologie d'une cellule cancéreuse soient identifiés, et des toxines conjuguées à un ligand de ce récepteur, de cette molécule (ce peut être un anticorps) bloqueront les canaux ioniques ou exerceront leur effet cytolytique sur cette seule cellule, sans nuire aux cellules saines. Nous voilà

dégagés de l'utopie, le contenu de cet ouvrage le prouve abondamment. Et même si la concrétisation des promesses reste délicate, le champ d'action est si vaste initialement qu'il ne saurait rester improductif : il ne l'est d'ailleurs déjà plus.

The Cerrados of Brazil Paulo S..2013-02-05 The massive grasslands of Brazil -- known as the cerrados -- which cover roughly a quarter of its land surface and are among the most threatened regions in South America, have received little media attention. This book brings together leading researchers on the area to produce the first detailed account in English of the natural history and ecology of the cerrado/savanna ecosystem. Given their extent and threatened status, the richness of their flora and fauna, and the lack of familiarity with their unique ecology at the international level, the cerrados are badly in need of this important and timely work.

Sacred Landscapes in Antiquity Ralph Haussler,Gian Franco Chiai.2020-07-31 From generation to generation, people experience their landscapes differently. Humans depend on their natural environment: it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities (such as droughts, famines, floods and landslides) need to be appeased. We presume that, in many societies, lakes, rivers, rocks, mountains, caves and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end as different societies had very different understandings, beliefs and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were 'rewritten', adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized - especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative humanmade, seemingly 'non-natural' landscape, with perfectly astronomically aligned buildings that define a cosmological order? Sacred Landscapes therefore aims to analyze the complex links between landscape, 'religiosity' and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

Archaeology at the Millennium Gary M. Feinman,T. Douglas Price.2007-10-17 In this book an internationally distinguished roster of contributors considers the state of the art of the discipline of archaeology at the turn of the 21st century and charts an ambitious agenda for the future. The chapters address a wide range of topics including, paradigms, practice, and relevance of the discipline; paleoanthropology; fully modern humans; holocene hunter-gatherers; the transition to food and craft production; social inequality; warfare; state and empire formation; and the uneasy relationship between classical and anthropological archaeology.

Drug Discovery Robert A. Maxwell,Shohreh B. Eckhardt.2012-12-06 This treatise had its origins in the authors' strong opinion that the discovery of new drugs, especially of innovative therapeutic agents, really does not happen as a spontaneous sequel to investigative research, no matter how penetrating such research may be. Rather, it seemed to us that the discovery of innovative therapeutic agents was a very active process, existing in and of itself, and demanding full attention-it was not simply a passive, dependent by-product of investigative research. And yet, many researchers some close confreres of the authors, others more distant-believed otherwise. We felt that their view reflected unrealistic thinking and that reality probably lay closer to what Beyer maintained: We are taught to believe that if we can understand a disease it should be easy enough to figure out,

say, the molecular configuration of a definitive receptor mechanism somewhere along the line and to design a specific drug And so we start out to understand the disease but never get around to doing much about therapy. The authors very soon realized that there was essentially no quantitative information available on just where and how innovative therapeutic agents were discovered. There were only anecdotal accounts, and these were able to be selected and presented in ways that could be used to defend any point of view.

Nutritional and Toxicological Consequences of Food Processing Mendel Friedman.2013-11-21 A variety of processing methods are used to make foods edible; to permit storage; to alter texture and flavor; to sterilize and pasteurize food; and to destroy microorganisms and other toxins. These methods include baking, broiling, cooking, freezing, frying, and roasting. Many such efforts have both beneficial and harmful effects. It is a paradox of nature that the processing of foods can improve nutrition, quality, safety, and taste, and yet occasionally lead to the formation of anti-nutritional and toxic compounds. These multifaceted consequences of food processing arise from molecular interactions among nutrients with each other and with other food ingredients. Since beneficial and adverse effects of food processing are of increasing importance to food science, nutrition, and human health, and since many of the compounds formed have been shown to be potent carcinogens and growth inhibitors in animals, I organized a symposium broadly concerned with the nutritional and toxicological consequences of food processing. The symposium was sponsored by the American Institute of Nutrition (AIN) -Federation of American Societies for Experimental Biology (FASEB) for its annual meeting in Washington, D.C., April 1-5, 1990. Invited speakers were asked to develop at least one of the following topics: 1. Nutrient-nutrient interactions between amino acids, proteins, carbohydrates, lipids, minerals, vitamins, tannins, fiber, natural toxicants, etc. 2. Effects of radiation. 3. Thermally induced formation of dietary mutagens, antimutagens, carcinogens, anticarcinogens, antioxidants, and growth inhibitors. 4. Effects of pH on nutritional value and safety.

Task Design In Mathematics Education Anne Watson, Minoru Ohtani.2015-10-26 *THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK* This open access book is the product of ICMI Study 22 Task Design in Mathematics Education. The study offers a state-of-the-art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design. The authors represent a wide range of countries and cultures and are leading researchers, teachers and designers. In particular, the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching, researching and designing roles - recognising that these might be undertaken by the same person or by completely separate teams. Tasks generate the activity through which learners meet mathematical concepts, ideas, strategies and learn to use and develop mathematical thinking and modes of enquiry. Teaching includes the selection, modification, design, sequencing, installation, observation and evaluation of tasks. The book illustrates how task design is core to effective teaching, whether the task is a complex, extended, investigation or a small part of a lesson; whether it is part of a curriculum system, such as a textbook, or promotes free standing activity; whether the task comes from published source or is devised by the teacher or the student.

Metroethnicity, Naming and Mocknolect John C. Maher.2021-05-15 Language is a social space, an aesthetic, a form of play and communication, a geographical reference, a jouissance, a producer of numerous social and personal identities. This book takes up salient issues of sociolinguistics with a specific focus on Japan: language and gender (the married name controversy), language and the 'portable' identities being fashioned around traditional, essentialist notions of ethnicity (metroethnicity) endangerment, slang, taboo and discriminatory language in Japanese especially regarding minorities, place-names from indigenous languages, the fellowship and parody of children's songs, and the diversity of nicknames among children and young people. This book gives radical and new perspectives on the sociolinguistics of Japanese.

The Object of the Atlantic Rachel Price.2014-11-30 The Object of the Atlantic is a wide-ranging study of the transition from a concern with

sovereignty to a concern with things in Iberian Atlantic literature and art produced between 1868 and 1968. Rachel Price uncovers the surprising ways that concrete aesthetics from Cuba, Brazil, and Spain drew not only on global forms of constructivism but also on a history of empire, slavery, and media technologies from the Atlantic world. Analyzing Jose Marti's notebooks, Joaquim de Sousandrade's poetry, Ramiro de Maeztu's essays on things and on slavery, 1920s Cuban literature on economic restructuring, Ferreira Gullar's theory of the "non-object," and neoconcrete art, Price shows that the turn to objects—and from these to new media networks—was rooted in the very philosophies of history that helped form the Atlantic world itself.

The Architecture of the City Aldo Rossi.1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement *La Tendenza* and one of the most influential theorists of the twentieth century. *The Architecture of the City* is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

The Transformation of the Armed Forces Michele Nones,Alessandro Marrone.2012 Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transormation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called Forza NEC. Opportunities and challenges of Forza NEC have been considered according to the Italian armed force's requirements, developed during two decades of experience in international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different Forza NEC activities, as it represents one of the pillars of the procurement program.

The Evolution of Plant Architecture Marie Helena Kurmann,Alan R. Hemsley,Royal Botanic Gardens, Kew.1999 Plant architecture is the morphological manifestation of the genetic make-up of a plant at any one stage during its development. Application of accurate architectural models provides a wealth of information about living and extinct plants, especially in regard to growth pattern and development. The Evolution ofPlant

Architecture brings together contributions from specialists in many different fields, including ecology, palaeobotany, systematics and evolution.

De Sphaera of Johannes de Sacrobosco in the Early Modern Period Matteo Valleriani.2020-01-01 This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

Management and Ecology of Freshwater Plants Joseph Caffrey, Philip R.F. Barrett, Kevin J. Murphy, Philip Max Wade.2012-12-06 There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical, physical, biological and biomanipulation. This series of papers from over 20 different countries was generated from the highly successful European Weed Research Society symposia on aquatic plant management, this being the ninth. The contributions provide a valuable insight into the complexities involved in managing aquatic systems, discuss state-of-the-art control techniques such as biomanipulation using fish and waterfowl and the use of straw, and deal with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants, including growth responses under different trophic conditions, the impact of pollution, and aspects of photosynthesis. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.

Conversation Analysis Gene H. Lerner.2004-08-31 This collection assembles early, yet previously unpublished research into the practices that organize conversational interaction by many of the central figures in the development and advancement of Conversation Analysis as a discipline. Using the methods of sequential analysis as first developed by Harvey Sacks, the authors produce detailed empirical accounts of talk in interaction that make fundamental contributions to our understanding of turntaking, action formation and sequence organization. One distinguishing feature of this collection is that each of the contributors worked directly with Sacks as a collaborator or was trained by him at the University of California or both. Taken together this collection gives readers a taste of CA inquiry in its early years, while nevertheless presenting research of contemporary significance by internationally known conversation analysts.

Lagoa Santa Karst: Brazil's Iconic Karst Region Augusto S. Auler, Paulo Pessoa.2020-01-22 This book discusses the Lagoa Santa Karst, which has been internationally known since the pioneering studies of the Danish naturalist Peter Lund in the early 1800s. It covers the speleogenesis, geology, vegetation, fauna, hydrogeology, geomorphology, and anthropogenic use of the Lagoa Santa Karst and is the first English-language book on this major karst area. The area, which has been at the heart of the debate on the origin and age of human colonization in the Americas, is characterized by a classical and scenic karst landscape with limestone cliffs, karst lakes and karst plains, in addition to numerous solution dolines. More than 1,000

caves have been documented in the area, many with significant archeological and paleontological value. Despite its great importance, the Lagoa Santa Karst faces severe environmental threats due to limestone mining and the expansion of the metropolis of Belo Horizonte and its surrounding towns. The growing recognition of the area's remarkable significance has led to increasing concern, and a number of protected areas have now been established, improving the conservation status of this landmark karst area.

It's easier than you think to get free Kindle books; you just need to know where to look. The websites below are great places to visit for free books, and each one walks you through the process of finding and downloading the free Kindle book that you want to start reading. Ebooks on Google Play Books are only available as EPUB or PDF files, so if you own a Kindle you'll need to convert them to MOBI format before you can start reading. Now that you have a bunch of ebooks waiting to be read, you'll want to build your own ebook library in the cloud. Or if you're ready to purchase a dedicated ebook reader, check out our comparison of Nook versus Kindle before you decide. Just like with library books,

when you check out an eBook from OverDrive it'll only be loaned to you for a few weeks before being automatically taken off your Kindle. You can also borrow books through their mobile app called Libby. The split between "free public domain ebooks" and "free original ebooks" is surprisingly even. A big chunk of the public domain titles are short stories and a lot of the original titles are fanfiction. Still, if you do a bit of digging around, you'll find some interesting stories. Established in 1978, O'Reilly Media is a world renowned platform to download books, magazines and tutorials for free. Even though they started with print publications, they are now famous for digital books. The website features a massive collection of eBooks in categories like, IT industry, computers, technology, etc. You can download the books in PDF format, however, to get an access to the free downloads you need to sign up with your name and email address. Monthly "all you can eat" subscription services are now mainstream for music, movies, and TV. Will they be as popular for e-books as well? If you keep a track of books by new authors and love to read them, Free eBooks is the perfect platform for you. From self-help or business growth to fiction the site offers a wide range of eBooks from independent writers. You have a long list of category to choose from that includes health, humor, fiction, drama, romance, business and many more. You can also choose from the featured eBooks, check the Top10 list, latest arrivals or latest audio books. You simply need to register and activate your free account, browse through the categories or search for eBooks in the search bar, select the TXT or PDF as preferred format and enjoy your free read. Don't forget about Amazon Prime! It now comes with a feature called Prime Reading, which grants access to thousands of free ebooks in addition to all the other amazing benefits of Amazon Prime. And if you don't want to bother with that, why not try some free audiobooks that don't require downloading?
