**Registers of Communication** Asif Agha, Frog. 2015-12-03 In any society, communicative activities are organized into models of conduct that differentiate specific social practices from each other and enable people to communicate with each other in ways distinctive to those practices. The articles in this volume investigate a series of locale-specific models of communicative conduct, or registers of communication, through which persons organize their participation in varied social practices, including practices of politics, religion, schooling, migration, trade, media, verbal art, and ceremonial ritual. Drawing on research traditions on both sides of the Atlantic, the authors of these articles bring together insights from a variety of scholarly disciplines, including linguistics, anthropology, folklore, literary studies, and philology. They describe register models associated with a great many forms of interpersonal behavior, and, through their own multi-year and multi-disciplinary collaborative efforts, bring register phenomena into focus as features of social life in the lived experience of people in societies around the world.

Are We Smart Enough to Know How Smart Animals Are? Frans de Waal. 2016-04-25 A New York Times bestseller: A passionate and convincing case for the sophistication of nonhuman minds. —Alison Gopnik, *The Atlantic* Hailed as a classic, *Are We Smart Enough to Know How Smart Animals Are?* explores the oddities and complexities of animal cognition—in crows, dolphins, parrots, sheep, wasps, bats, chimpanzees, and bonobos—to reveal how smart animals really are, and how we've underestimated their abilities for too long. Did you know that octopuses use coconut shells as tools, that elephants classify humans by gender and language, and that there is a young male chimpanzee at Kyoto University whose flash memory puts that of humans to shame? Fascinating, entertaining, and deeply informed, de Waal's landmark work will convince you to rethink everything you thought you knew about animal—and human—intelligence.

*Our Magnificent Bastard Tongue* John McWhorter.2009-10-27 A survey of the quirks and quandaries of the English language, focusing on our strange and wonderful grammar Why do we say “I am reading a catalog” instead of “I read a catalog”? Why do we say “do” at all? Is the way we speak a reflection of our cultural values? Delving into these provocative topics and more, *Our Magnificent Bastard Language* distills hundreds of years of fascinating lore into one lively history. Covering such turning points as the little-known Celtic and Welsh influences on English, the impact of the Viking raids and the Norman Conquest, and the Germanic invasions that started it all during the fifth century ad, John McWhorter narrates this colorful evolution with vigor. Drawing on revolutionary genetic and linguistic research as well as a cache of remarkable trivia about the origins of English words and syntax patterns, *Our Magnificent Bastard Tongue* ultimately demonstrates the arbitrary, maddening nature of English— and its ironic simplicity due to its role as a streamlined lingua franca during the early formation of Britain. This is the book that language aficionados worldwide have been waiting for (and no, it's not a sin to end a sentence with a preposition).

**Where Am I Now?** Mara Wilson.2016-09-13 Thoughtfully traces [Mara Wilson's] journey from child actress to Hollywood dropout...Who is she now? She's a writer. —NPR's Guide To 2016's Great Reads “Growing up, I wanted to be Mara Wilson. *Where Am I Now?* is a delight.” —Ilana Glazer, cocreator and star of *Broad City* Named a best book of the month by GoodReads and Entertainment Weekly A former child actor best known for her starring roles in *Matilda* and *Mrs. Doubtfire*, Mara Wilson has always felt a little young and out of place: as the only kid on a film set full of adults, the first daughter in a house full of boys, a Valley girl in New York and a neurotic in California, and a grown-up the world still remembers as a little girl. Tackling everything from what she learned about sex on the set of *Melrose Place*, to discovering in adolescence that she was no longer “cute” enough for Hollywood, these essays chart her journey from accidental fame to relative (but happy) obscurity. They also illuminate universal struggles, like navigating love and loss, and figuring out who you are and where you belong. Candid, insightful, moving, and hilarious, *Where Am I Now?* introduces Mara Wilson as a brilliant new chronicler of the experience that is growing up female.

*The Rise and Fall of Adam and Eve* Stephen Greenblatt.2017-09-12 “Endlessly illuminating and a sheer pleasure to read.” —Jack Miles, author of

God: A Biography Daring to take the great biblical account of human origins seriously, but without credulity The most influential story in Western cultural history, the biblical account of Adam and Eve is now treated either as the sacred possession of the faithful or as the butt of secular jokes. Here, acclaimed scholar Stephen Greenblatt explores it with profound appreciation for its cultural and psychological power as literature. From the birth of the Hebrew Bible to the awe-inspiring contributions of Augustine, Dürer, and Milton in bringing Adam and Eve to vivid life, Greenblatt unpacks the story's many interpretations and consequences over time. Rich allegory, vicious misogyny, deep moral insight, narrow literalism, and some of the greatest triumphs of art and literature: all can be counted as children of our "first" parents.

No Great Mischief Alistair MacLeod.2012-01-11 Alexander MacDonald guides us through his family's mythic past as he recollects the heroic stories of his people: loggers, miners, drinkers, adventurers; men forever in exile, forever linked to their clan. There is the legendary patriarch who left the Scottish Highlands in 1779 and resettled in "the land of trees," where his descendents became a separate Nova Scotia clan. There is the team of brothers and cousins, expert miners in demand around the world for their dangerous skills. And there is Alexander and his twin sister, who have left Cape Breton and prospered, yet are haunted by the past. Elegiac, hypnotic, by turns joyful and sad, No Great Mischief is a spellbinding story of family, loyalty, exile, and of the blood ties that bind us, generations later, to the land from which our ancestors came.

**Why I Am Not a Muslim** Ibn Warraq.2010-09-30 Those who practice the Muslim faith have resisted examinations of their religion. They are extremely guarded about their religion, and what they consider blasphemous acts by skeptical Muslims and non-Muslims alike has only served to pique the world's curiosity. This critical examination reveals an unflattering picture of the faith and its practitioners. Nevertheless, it is the truth, something that has either been deliberately concealed by modern scholars or buried in obscure journals accessible only to a select few.

**Spaces Speak, Are You Listening?** Barry Blesser,Linda-Ruth Salter.2009-09-18 How we experience space by listening: the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and hear the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In Spaces Speak, Are You Listening?, Barry Blesser and Linda-Ruth Salter examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture.The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to see objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—Spaces

Speak, Are You Listening? establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects.

Unholy Terror John R. Schindler. Al-Qa'ida: in the 80s they were in Afghanistan, supported by America and fighting the Russians. In the new century they have metastasized throughout the world's geopolitical body. Where were they in the 90s? Unholy Terror provides the answer, with all its terrifying implications for our world today. This book provides the missing piece in the puzzle of al-Qa'ida's transformation from an isolated fighting force into a lethal global threat: the Bosnian war of 1992 to 1995. John R. Schindler reveals the unexamined role that radical Islam played in that terrible conflict--and the ill-considered contributions of American policy to al-Qa'ida's growth. His book explores a truth long hidden from view: that, like Afghanistan in the 1980s, Bosnia in the 1990s became a training ground for the mujahidin. Unholy Terror at last exposes the shocking story of how bin Laden successfully exploited the Bosnian conflict for his own ends--and of how the U. S. Government gave substantial support to his unholy warriors, leading to blowback of epic proportions.

Does Education Matter? Alison Wolf.2002-05-30 Education, education, education has become an obsession for politicians and the public alike. It is seen as an economic panacea: an engine for growth and prosperity. But is there a link between increased spending on higher education and economic growth? Professor Alison Wolf takes a critical look at successive governments' education policy and challenges many of the tenets of received wisdom: there are no economic reasons for spending more on higher education in order to stimulate growth. The conclusion of this devastating book is that a large proportion of the billions poured into vocational training and university provision might be better spent on teaching the basics at primary school.

When People Come First João Biehl, Adriana Petryna.2013-07-07 A people-centered approach to global health When People Come First critically assesses the expanding field of global health. It brings together an international and interdisciplinary group of scholars to address the medical, social, political, and economic dimensions of the global health enterprise through vivid case studies and bold conceptual work. The book demonstrates the crucial role of ethnography as an empirical lantern in global health, arguing for a more comprehensive, people-centered approach. Topics include the limits of technological quick fixes in disease control, the moral economy of global health science, the unexpected effects of massive treatment rollouts in resource-poor contexts, and how right-to-health activism coalesces with the increased influence of the pharmaceutical industry on health care. The contributors explore the altered landscapes left behind after programs scale up, break down, or move on. We learn that disease is really never just one thing, technology delivery does not equate with care, and biology and technology interact in ways we cannot always predict. The most effective solutions may well be found in people themselves, who consistently exceed the projections of experts and the medical-scientific, political, and humanitarian frameworks in which they are cast. When People Come First sets a new research agenda in global health and social theory and challenges us to rethink the relationships between care, rights, health, and economic futures.
