The Way Some People Die Ross Macdonald.2010-12-29 In a rundown house in Santa Monica, Mrs. Samuel Lawrence presses fifty crumpled bills into Lew Archer's hand and asks him to find her wandering daughter, Galatea. Described as 'crazy for men' and without discrimination, she was last seen driving off with small-time gangster Joe Tarantine, a hophead hood with a rep for violence. Archer traces the hidden trail from San Francisco slum alleys to the luxury of Palm Springs, traveling through an urban wilderness of drugs and viciousness. As the bodies begin to pile up, he finds that even angel faces can mask the blackest of hearts.Filled with dope, delinquents and murder, this is classic Macdonald and one of his very best in the Lew Archer series.

The Age of Stress Mark Jackson.2016-11-17 We are living in a stressful world, yet despite our familiarity with the notion, stress remains an elusive concept. In *The Age of Stress*, Mark Jackson explores the history of scientific studies of stress in the modern world. In particular, he reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio-political and cultural, as well as biological, factors: stress, he argues, is both a condition and a metaphor. In order to understand the ubiquity and impact of stress in our own times, or to explain how stress has commandeered such a central place in the modern imagination, Jackson suggests that we need

to comprehend not only the evolution of the medical science and technology that has gradually uncovered the biological pathways between stress and disease in recent decades, but also the shifting social, economic, and cultural contexts that have invested that scientific knowledge with meaning and authority. In particular, he argues, we need to acknowledge the manner in which enduring concerns about the effects of stress on mental and physical health are the product of broader historical preoccupations with the preservation of personal and political, as well as physiological, stability.

Milk and Filth Carmen Giménez Smith.2013-10-10 Adding to the Latina tradition, Carmen Giménez Smith, politically aware and feminist-oriented, focuses on general cultural references rather than a sentimental personal narrative. She speaks of sexual politics and family in a fierce, determined tone voracious in its opinions about freedom and responsibility. The author engages in mythology and art history, musically wooing the reader with texture and voice. As she references such disparate cultural figures as filmmaker Lars Von Trier, Annie from the film Annie Get Your Gun, Nabokov's Lolita, Facebook entries and Greek gods, they appear as part of the poet's cultural critique. Phrases such as "the caustic domain of urchins" and "the gelatin shiver of tea's surface" take the poems from lyrical images to comic humor to angry, intense commentary. On writing about "downgrading into human," she says, "Then what? Amorality, osteoporosis and not even a marble estuary for the ages." Giménez Smith's poetic arsenal includes rapier-sharp wordplay mixed with humor, at times self-deprecating, at others an ironic comment on the postmodern world, all interwoven with imaginative language of unexpected force and surreal beauty. Revealing a long view of gender issues and civil rights, the author presents a clever, comic perspective. Her poems take the reader to unusual places as she uses rhythm, images, and emotion to reveal the narrator's

personality. Deftly blending a variety of tones and styles, Giménez Smith's poems offer a daring and evocative look at deep cultural issues.

Historical Painting Techniques, Materials, and Studio Practice

Arie Wallert, Erma Hermens, Marja Peek. 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Twelve Years a Slave Solomon Northup. 2013-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer

the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Divine Machines Justin E. H. Smith. 2011-05 his book provides a comprehensive survey of G. W. Leibniz's deep and complex engagement with the sciences of life, in areas as diverse as medicine, physiology, taxonomy, generation theory, and paleontology. It is shown that these sundry interests were not only relevant to his core philosophical interests, but indeed often provided the insights that in part led to some of his most familiar philosophical doctrines, including the theory of corporeal substance and the theory of organic preformation--

Nature, Human Nature, and Human Difference Justin E. H. Smith. 2017-03-14 People have always been xenophobic, but an explicit philosophical and scientific view of human racial

difference only began to emerge during the modern period. Why and how did this happen? Surveying a range of philosophical and natural-scientific texts, dating from the Spanish Renaissance to the German Enlightenment, *Nature, Human Nature, and Human Difference* charts the evolution of the modern concept of race and shows that natural philosophy, particularly efforts to taxonomize and to order nature, played a crucial role. Smith demonstrates how the denial of moral equality between Europeans and non-Europeans resulted from converging philosophical and scientific developments, including a declining belief in human nature's universality and the rise of biological classification. The racial typing of human beings grew from the need to understand humanity within an all-encompassing system of nature, alongside plants, minerals, primates, and other animals. While racial difference as seen through science did not arise in order to justify the enslavement of people, it became a rationalization and buttress for the practices of trans-Atlantic slavery. From the work of François Bernier to G. W. Leibniz, Immanuel Kant, and others, Smith delves into philosophy's part in the legacy and damages of modern racism. With a broad narrative stretching over two centuries, *Nature, Human Nature, and Human Difference* takes a critical historical look at how the racial categories that we divide ourselves into came into being.

Beginning in the early 1980s, where critical consensus ends, he presents 60 poems, each with an original essay explaining how the poem works, why it matters, and how it speaks to other parts of art and culture.

Divine Names on the Spot II F Porzia,C Bonnet.2023-09-14 English summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to

interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an archipelago, images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the Mapping Ancient Polytheisms project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les recits sont intimement lies et volontiers polysemiques. En tant qu'elements d'information sur les dieux, ils vehiculent des fragments de connaissance et constituent autant de tentatives d'interpretation de la complexite multiforme du monde divin. Dans ce que Robert Parker decrit comme un archipel, les images et les recits sont comme des boussoles qui facilitent la cartographie des dieux. Les differentes contributions rassemblees dans ce volume, traitant des mondes grec et semitique (les deux principaux domaines abordes dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces differentes semantiques, afin de mettre en evidence les specificites et les points communs entre langage onomastique et langage iconographique.

The Sound Pattern of English Noam Chomsky, Morris Halle. 1991 Since this classic work in phonology was published in 1968, there has been no other book that gives as broad a view of the subject, combining generally applicable theoretical contributions with analysis of the details of a single language. The theoretical issues raised in *The Sound Pattern of English* continue to be critical to current phonology, and in many instances the solutions proposed by Chomsky and Halle have yet to be improved upon. Noam Chomsky and Morris Halle are Institute Professors of Linguistics and Philosophy at MIT.

The Philosopher Justin E. H. Smith.2017-10-31 How the role of the philosopher has changed over time and across cultures—and what it reveals about philosophy today What would the global history of philosophy look like if it were told not as a story of ideas but as a series of job descriptions—ones that might have been used to fill the position of philosopher at different times and places over the past 2,500 years? *The Philosopher* does just that, providing a new way of looking at the history of philosophy by bringing to life six kinds of figures who have occupied the role of philosopher in a wide range of societies around the world over the millennia—the Natural Philosopher, the Sage, the Gadfly, the Ascetic, the Mandarin, and the Courtier. The result is at once an unconventional introduction to the global history of philosophy

and an original exploration of what philosophy has been—and perhaps could be again. By uncovering forgotten or neglected philosophical job descriptions, the book reveals that philosophy is a universal activity, much broader—and more gender inclusive—than we normally think today. In doing so, *The Philosopher* challenges us to reconsider our idea of what philosophers can do and what counts as philosophy.

Acts of Care Sara Ritchey.2021-03-15 In *Acts of Care*, Sara Ritchey recovers women's healthcare work by identifying previously overlooked tools of care: healing prayers, birthing indulgences, medical blessings, liturgical images, and penitential practices. Ritchey demonstrates that women in premodern Europe were both deeply engaged with and highly knowledgeable about health, the body, and therapeutic practices, but their critical role in medieval healthcare has been obscured because scholars have erroneously regarded the evidence of their activities as religious rather than medical. The sources for identifying the scope of medieval women's health knowledge and healthcare practice, Ritchey argues, are not found in academic medical treatises. Rather, she follows fragile traces detectable in liturgy, miracles, poetry, hagiographic narratives, meditations, sacred objects, and the daily behaviors that constituted the world, as well as in testaments and land transactions from hospitals and leprosaria established and staffed by beguines and Cistercian nuns. Through its surprising use of alternate sources, *Acts of Care* reconstructs the vital caregiving practices of religious women in the southern Low Countries, reconnecting women's

therapeutic authority into the everyday world of late medieval healthcare. Thanks to generous funding from the University of Tennessee, Knoxville, the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other Open Access repositories.

The Leibniz-Stahl Controversy Gottfried Wilhelm

Leibniz, Gottfried Wilhelm Freiherr von Leibniz, Georg Ernst Stahl. 2016-01-01 The first unabridged English translation of the correspondence between Gottfried Wilhelm Leibniz and Georg Ernst Stahl detailing their opposing philosophies The correspondence between the eighteenth-century mathematician and philosopher G. W. Leibniz and G. E. Stahl, a chemist and physician at the court of King Friedrich Wilhelm I of Prussia, known as the Leibniz-Stahl Controversy, is one of the most important intellectual contributions on theoretical issues concerning pre-biological thinking. Editors François Duchesneau and Justin E. H. Smith offer readers the first fully annotated English translation of this fascinating exchange of philosophical views on divine action, the order of nature, causality and teleology, and the soul-body relationship.

Machines of Nature and Corporeal Substances in Leibniz

Justin E. H. Smith, Ohad Nachtomy. 2011-01-04 In recent decades, there has been much scholarly controversy as to the basic ontological commitments of the philosopher Gottfried Wilhelm Leibniz (1646-1716). The old picture of his thought as strictly idealistic, or committed to the ultimate reduction of bodies to the activity of mind, has come under attack, but Leibniz's precise conceptualization of bodies, and the role they play in his system as a whole, is still the subject of much controversy. One thing that has become clear is that in order to understand the nature of body in Leibniz, and the role body plays in his philosophy, it is crucial to pay attention to the related concepts of organism and of

corporeal substance, the former being Leibniz's account of the structure of living bodies (which turn out, for him, to be the only sort of bodies there are), and the latter being an inheritance from the Aristotelian hylomorphic tradition which Leibniz appropriates for his own ends. This volume brings together papers from many of the leading scholars of Leibniz's thought, all of which deal with the cluster of questions surrounding Leibniz's philosophy of body. *On the True Precepts of the Art of Painting* Giovanni Battista Armenini.1977

The Rationalists: Between Tradition and Innovation Carlos Fraenkel, Dario Perinetti, Justin E. H. Smith. 2010-10-12 This volume draws a balanced picture of the Rationalists by bringing their intellectual contexts, sources and full range of interests into sharper focus, without neglecting their core commitment to the epistemological doctrine that earned them their traditional label. The collection of original essays addresses topics ranging from theodicy and early modern music theory to Spinoza's anti-humanism, often critically revising important aspects of the received picture of the Rationalists. Another important contribution of the volume is that it brings out aspects of Rationalist philosophers and their legacies that are not ordinarily associated with them, such as the project of a Cartesian ethics. Finally, a strong emphasis is placed on the connection of the Rationalists' philosophy to their interests in empirical science, to their engagement in the political life of their era, and to the religious background of many of their philosophical commitments.

The Life Sciences in Early Modern Philosophy Ohad Nachtomy, Justin E. H. Smith. 2014 The present volume advances a recent historiographical turn towards the intersection of early modern philosophy and the life sciences by bringing together many of its leading scholars to present the contributions of important but often neglected figures, such as Ralph Cudworth, Nehemiah Grew, Francis Glisson, Hieronymus Fabricius ab Aquapendente, Georg Ernst Stahl, Juan Gallego de la Serna,

Nicholas Hartsoeker, Henry More, as well as more familiar figures such as Descartes, Spinoza, Leibniz, Malebranche, and Kant. The contributions to this volume are organized in accordance with the particular problems that living beings and living nature posed for early modern philosophy: the problem of life in general, whether it constitutes something ontologically distinct at all, or whether it can ultimately be exhaustively comprehended in the same manner as the rest; the problem of the structure of living beings, by which we understand not just bare anatomy but also physiological processes such as irritability, motion, digestion, and so on; the problem of generation, which might be included alongside digestion and other vital processes, were it not for the fact that it presented such an exceptional riddle to philosophers since antiquity, namely, the riddle of coming-into-being out of -- apparent or real -- non-being; and, finally, the problem of natural order.

Sarcophagi from the Jewish Catacombs of Ancient Rome Adia

Konikoff.1990 This comprehensive inventory of all known sarcophagi from the Jewish catacombs of Rome, is the first specialized treatment of this subject in monograph form. It describes and analyses each sarcophagus and provides full reference material which it critically examines. This work thus fills a lacuna in the literature on this field, which has up to now been confined to the treatment of early Christian and pagan sarcophagi of the period. ♦ We have here a complete overview of the Jewish sarcophagi of ancient Rome, all of them illustrated by

photographs and provided with extensive bibliographies. This work thus fills a lacuna in the literature on this field. ♦ Journal for the Study of Judaism ♦ Until this book, however, no one has attempted to assemble all of the Jewish sarcophagi separately in one place and to provide relevant information in the form of a well-ordered catalogue. For this reason, Konikoff's book provides a welcome resource for anyone interested in the material evidence of ancient Judaism and forms a good beginning for study of the sarcophagi, especially from a bibliographic point of view. ♦ Gnomon .

The Trotula David D. Gilmore. 2001-04-16 The Trotula was the most influential compendium on women's medicine in medieval Europe. Scholarly debate has long focused on the traditional attribution of the work to the mysterious Trotula, said to have been the first female professor of medicine in eleventh- or twelfth-century Salerno, just south of Naples, then the leading center of medical learning in Europe. Yet as Monica H. Green reveals in her introduction to this first edition of the Latin text since the sixteenth century, and the first English translation of the book ever based upon a medieval form of the text, the Trotula is not a single treatise but an ensemble of three independent works, each by a different author. To varying degrees, these three works reflect the synthesis of indigenous practices of southern Italians with the new theories, practices, and medicinal substances coming out of the Arabic world. Arguing that these texts can be understood only within the intellectual and social context that produced them, Green analyzes them against the background of historical gynecological literature as well as current knowledge about women's lives in twelfth-century southern Italy. She examines the history and composition of the three works and introduces the reader to the medical culture of

medieval Salerno from which they emerged. Among her findings is that the second of the three texts, *On the Treatments for Women*, does derive from the work of a Salernitan woman healer named Trota. However, the other two texts—*On the Conditions of Women* and *On Women's Cosmetics*—are probably of male authorship, a fact indicating the complex gender relations surrounding the production and use of knowledge about the female body. Through an exhaustive study of the extant manuscripts of the Trotula, Green presents a critical edition of the so-called standardized Trotula ensemble, a composite form of the texts that was produced in the mid-thirteenth century and circulated widely in learned circles. The facing-page complete English translation makes the work accessible to a broad audience of readers interested in medieval history, women's studies, and premodern systems of medical thought and practice.

The Semantics of Dynamic Space in French Michel

Aurnague, Dejan Stosic. 2019-07-29 Research on the semantics of spatial markers in French is known mainly through Vandeloise's (1986, 1991) work on static prepositions. However, interest in the expression of space in French goes back to the mid-1970s and focused first on verbs denoting changes in space, whose syntactic properties were related to specific semantic distinctions, such as the opposition between "movement" and "displacement". This volume provides an overview of recent studies on the semantics of dynamic space in French and addresses important questions

about motion expression, among which “goal bias” and asymmetry of motion, the status of locative PPs, the expression of manner, fictive or non-actual motion. Descriptive, experimental and formal or computational analyses are presented, providing complementary perspectives on the main issue. The volume is intended for researchers and advanced students wishing to learn about both spatial semantics in French and recent debates on the representation of motion events in language and cognition.

Overcoming School Refusal Joanne Garfi.2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child’s social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

The Complete Poetry of Aimé Césaire Aimé Césaire.2017-10-03 The Complete Poetry of Aimé Césaire gathers all of Césaire’s celebrated verse into one bilingual edition. The French portion is comprised of newly established first editions of Césaire’s poetic œuvre made available in French in 2014 under the title *Poésie, Théâtre, Essais et Discours*, edited by A. J. Arnold and an

international team of specialists. To prepare the English translations, the translators started afresh from this French edition. Included here are translations of first editions of the poet's early work, prior to political interventions in the texts after 1955, revealing a new understanding of Césaire's aesthetic and political trajectory. A truly comprehensive picture of Césaire's poetry and poetics is made possible thanks to a thorough set of notes covering variants, historical and cultural references, and recurring figures and structures, a scholarly introduction and a glossary. This book provides a new cornerstone for readers and scholars in 20th century poetry, African diasporic literature, and postcolonial studies.

Irrationality Justin E. H. Smith. 2020-12-08 What every leader needs to know about dignity and how to create a culture in which everyone thrives. This landmark book from an expert in dignity studies explores the essential but under-recognized role of dignity as part of good leadership. Extending the reach of her award-winning book *Dignity: Its Essential Role in Resolving Conflict*, Donna Hicks now contributes a specific, practical guide to achieving a culture of dignity. Most people know very little about dignity, the author has found, and when leaders fail to respect the dignity of others, conflict and distrust ensue. She highlights three components of leading with dignity: what one must know in order to honor dignity and avoid violating it; what one must do to lead with dignity; and how one can create a culture of dignity in any organization, whether corporate, religious, governmental, healthcare, or beyond. Brimming with key research findings, real-life case studies, and workable recommendations, this book fills an important gap in our understanding of how best to be together in a conflict-ridden world.--
