Break the Cycle Dr. Mariel Buqué.2024-01-02 ***The Instant National Bestseller*** A Next Big Idea Club must-read title for January 2024 The definitive, paradigm-shifting guide to healing intergenerational trauma—weaving together scientific research with practical exercises and stories from the therapy room—from Dr. Mariel Buqué, PhD, a Columbia University-trained trauma-informed psychologist and practitioner of holistic healing From Dr. Mariel Buqué, a leading trauma psychologist, comes this groundbreaking guide to transforming intergenerational pain into intergenerational abundance. With *Break the Cycle*, she delivers the definitive guide to healing inherited trauma. Weaving together scientific research with practical exercises and stories from the therapy room, Dr. Buqué teaches readers how trauma is transmitted from one generation to the next and how they can break the cycle through tangible therapeutic practices, learning to pass down strength instead of pain to future generations. When a physical wound is left unhealed, it continues to cause pain and can infect the whole body. When emotions are left unhealed, they similarly cause harm that spreads to other parts of our lives, hurting our family, friends, community members, and others. Eventually, this hurt can injure an entire lineage, metastasizing across years and generations. This is intergenerational trauma. This trauma is why some of us become estranged from our families, why some of us are people pleasers, why some of us find

ourselves in codependent relationships. This trauma can be rooted in the experiences of ancestors, who may have suffered due to unhealthy family dynamics, and it can be collective, the result of a shared experience like systemic oppression, or harmful ingrained behaviors in a culture like the acceptance of physical discipline of children, or even a natural disaster like a pandemic. These wounds are complex, impacting our minds, bodies, and spirits. Healing requires a holistic approach that has so far been absent from the field of psychology. Until now.

Journey Through Trauma Gretchen L. Schmelzer, PhD.2018-02-06

For survivors of PTSD and repeated, relational trauma -- and the people who love them. Gretchen Schmelzer watched too many people quit during treatment for trauma recovery. They found it too difficult or too frightening or just decided that for them it was too late. But as a therapist and trauma survivor herself, Dr. Schmelzer wants us to know that it is never too late to heal from trauma, whether it is the suffering caused within an abusive relationship or PTSD resulting from combat. Sometimes what feels like a big setback is actually an unexpected difficult step forward. So she wrote Journey Through Trauma specifically for survivors--to help them understand the terrain of the healing process and stay on the path. There are three basic principles that every trauma survivor should know: Healing is possible. It requires courage. And it cannot be done alone. Traumas that happen more than once--child abuse, sexual abuse, domestic violence, gang violence, even war--are all relational traumas. They happened inside a relationship and therefore must be healed inside a relationship, whether that relationship is with a therapist or within a group. Journey Through Trauma gives us a map to help guide us through that healing process, see where the hard

parts show up, and persevere in the process of getting well. We learn the five phases that every survivor must negotiate along the way and come to understand that since the cycle of healing is not linear, circling back around to a previous stage does not mean defeat - it actually means progress as well as facing new challenges. Authoritative and accessible, *Journey Through Trauma* provides support for survivors and their loved ones through one of the most challenging but necessary processes of healing that anyone can face.

Reducing Environmental Cancer Risk Suzanne H.

Reuben.2010-10 Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008&2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military activities, modern lifestyles, and natural sources. This report presents the Panel's recommend. to mitigate or eliminate these barriers. Illus.

Practical Guide to Simulation in Delivery Room Emergencies

Gilda Cinnella, Renata Beck, Antonio Malvasi. 2023-07-15 In this

book the use of hybrid simulation in delivery room emergencies is described and shown. The use of a patient actor combined with a task trainer within the same session substantially improve the training for practical management of intrapartum emergencies in real life, reducing the risk of failure of operative vaginal delivery and of related adverse events, including perinatal or maternal complications. Furthermore, simulation with high reality computerized mannequin and scenography of emergency situation can improve technical and manual skills of the participants. For this book and the related videos, a new generation of mannequins suitable for both clinical manoeuvres and ultrasound examination is used to simulate all clinical scenarios of emergency that can happen in the delivery room for both the mother and the child. This unique book is a useful tool for medical students, residents, practicing pediatricians, anesthetists, obstetricians and all health care professionals working in the delivery room in their ability to deal with critical and emergency situations with safety and good medical practice.

Kerr.2016-07-05 Relative to the extensive neuroscientific work on seated meditation practices, far less studies have investigated the neural mechanisms underlying movement-based contemplative practices such as yoga or tai chi. Movement-based practices have, however, been found to be effective for relieving the symptoms of several clinical conditions, and to elicit measurable changes in physiological, neural, and behavioral parameters in healthy individuals. An important challenge for neuroscience is therefore to advance our understanding of the neurophysiological and neurocognitive mechanisms underlying these observed effects, and this Research Topic aims to make a contribution in this regard. It showcases the current state of the art of investigations on movement-based practices including yoga, tai chi, the Feldenkrais Method, as well as dance. Featured contributions include empirical research, proposals of theoretical frameworks, as well as novel perspectives on a variety of issues relevant to the field. This Research Topic is the first of its kind to specifically attempt a neurophysiological and neurocognitive characterization that spans multiple mindful movement approaches, and we trust it will be of interest to basic scientists, clinical researchers, and contemplative practitioners alike.

The Tao of Trauma Alaine D. Duncan, Kathy L. Kain. 2019-01-08 Explains trauma using a combination of the Five Elements (from Traditional Chinese Medicine) and a touch perspective; for practitioners of a variety of modalities, including acupuncturists, somatic therapists, massage therapists, and mental health providers. Combining Eastern and Western trauma physiology, clinician-educators Alaine Duncan and Kathy Kain introduce a new map for acupuncturists, medical practitioners, mental health providers, and body-oriented clinicians to help restore balance in their patients. Using concepts from Acupuncture and Asian Medicine (AAM), alongside descriptions of the threat response from Western bio-behavioral science, they describe common physical symptoms, emotional presentations, and paths for healing for five survivor types detailed by the authors and correlated to the Five Elements of AAM. This ancient/modern integrative lens illuminates the diverse manifestations of traumatic stress in its survivors--chronic pain, autoimmune illness, insomnia, metabolic problems, and mental health disorders--and brings new hope to survivors of trauma and those who treat them.

Therapy with Displaced and Highly Mobile Individuals

Anastasia Piatakhina Giré.2023-12-11 This book provides therapists with an understanding of displacement-related issues to help them better serve potential clients such as emigrants, expats, migrants, digital nomads - all those who have left their original home country behind and moved to a different culture and place. With the spread of communication technologies, psychotherapists are expanding their practice to the online setting and into the unfamiliar waters of transcultural counselling with highly mobile and displaced individuals. Building on her research, the author brings up new concepts in therapy practice with emigrants, calling for a displacement-focused, transcultural approach for a modern psychotherapy practice, blended or online, in a world shaped by ubiquitous displacement. Giré's own experience of relocations and multicultural families have helped her develop a personal approach to universal topics of the therapeutic endeavour, such as displacement, multilingualism, and shame. Meeting displaced individuals' mental health needs is a priority for the mental health community. Therapy with Displaced and Highly Mobile Individuals will be of interest to all therapists working online with this client group, and for all those interested in psychotherapy (therapists or not), who want to learn about the psychological issues created by displacement.

The Wireless Internet of Things Daniel Chew.2018-11-13 Provides a detailed analysis of the standards and technologies enabling applications for the wireless Internet of Things The

Wireless Internet of Things: A Guide to the Lower Layers presents a practitioner's perspective toward the Internet of Things (IoT) focusing on over-the-air interfaces used by applications such as home automation, sensor networks, smart grid, and healthcare. The author—a noted expert in the field—examines IoT as a protocol-stack detailing the physical layer of the wireless links, as both a radio and a modem, and the media access control (MAC) that enables communication in congested bands. The text deconstructs these standards and provides background including relevant communication theory, modulation schemes, and access methods. The author includes a discussion on Wi-Fi and gateways, and explores their role in IoT. He introduces radio topologies used in software-defined radio implementations for the WPANs. The book also discusses channel modelling and link budget analysis for WPANs in IoT. This important text: Introduces IEEE 802.15.4, ITU-T G.9959, and Bluetooth LE as physical layer technology standards enabling wireless IoT Takes a layered approach in order to cultivate an appreciation for the various standards that enable interoperability Provides clarity on wireless standards with particular focus on actual implementation Written for IoT application and platform developers as well as digital signal processing, network, and wireless communication engineers; The Wireless Internet of Things: A Guide to the Lower Layers offers an inclusive overview of the complex field of wireless IoT, exploring its beneficial applications that are proliferating in a variety of industries.

Healing the Shame that Binds You John Bradshaw.2005-10-15 This classic book, written 17 years ago but still selling more than 13,000 copies every year, has been completely updated and expanded by the author. I used to drink, writes John Bradshaw, to solve the problems caused by drinking. The more I drank to relieve my shame-based loneliness and hurt, the more I felt

ashamed. Shame is the motivator behind our toxic behaviors: the compulsion, co-dependency, addiction and drive to superachieve that breaks down the family and destroys personal lives.
