Religion, Gender and Sexuality in Everyday Life Peter

Nynäs.2016-04-08 Exploring the intersection between religion, gender and sexuality within the context of everyday life, this volume examines contested identities, experiences, bodies and desires on the individual and collective levels. With rich case studies from the UK, USA, Europe, and Asia, Religion, Gender and Sexuality in Everyday Life sheds light on the manner in which individuals appropriate, negotiate, transgress, invert and challenge the norms and models of various religions in relation to gender and sexuality, and vice versa. Drawing on fascinating research from around the world, this book charts central features of the complexities involved in everyday life, examining the messiness, limits, transformations and possibilities that occur when subjectivities, religious and cultural traditions, and politics meet within the local as well as transnational contexts. As such, it will be of interest to scholars of sociology, anthropology, geography and cultural studies examining questions of religion and spirituality, gender and sexuality, and individual and collective identities in contemporary society.

Microhistories of the Holocaust Claire Zalc,Tal

Bruttman.2016-12-01 How does scale affect our understanding of the Holocaust? In the vastness of its implementation and the sheer amount of death and suffering it produced, the genocide of Europe's Jews presents special challenges for historians, who have responded with work ranging in scope from the world-historical to the intimate. In particular, recent scholarship has demonstrated a willingness to study the Holocaust at scales as focused as a single neighborhood, family, or perpetrator. This volume brings together an international cast of scholars to reflect on the ongoing microhistorical turn in Holocaust studies, assessing its historiographical pitfalls as well as the distinctive opportunities it affords researchers.

The Bureaucrat and the Poor Vincent Dubois.2016-03-16 Welfare offices usually attract negative descriptions of bureaucracy with their queues, routines, and impersonal nature. Are they anonymous machines or the locus of neutral service relationships? Showing how people experience state public administration, *The Bureaucrat and the Poor* provides a realistic view of French welfare policies, institutions and reforms and, in doing so, dispels both of these myths. Combining Lipsky's street-level bureaucracy theory with the sociology of Bourdieu and Goffman, this research analyses face-to-face encounters and demonstrates the complex relationship between welfare agents, torn between their institutional role and their personal feelings, and welfare applicants, required to translate their personal experience into bureaucratic categories. Placing these interactions within the broader context of social structures and class, race and gender, the author unveils both the social determinations of these interpersonal relationships and their social functions. Increasing numbers of welfare applicants, coupled with mass unemployment, family transformations and the so-called 'integration problem' of migrants into French society deeply affect these encounters. Staff manage tense situations with no additional resources - some become personally involved, while others stick to their bureaucratic role; most of them alternate between involvement and detachment, assistance and domination. Welfare offices have become a place for 're-socialisation', where people can talk about their personal problems and ask for advice. On the other hand, bureaucratic encounters are increasingly violent, symbolically if not physically.

More than ever, they are now a means of regulating the poor. *Unearthing Policies of Instrumentalization in English Religious Education Using Statement Archaeology* Jonathan Doney.2021-01-01 This book presents the theoretical basis and practical steps involved in using Statement Archaeology, an innovative method that enhances understandings of policy development, exemplifying its use in relation to one curriculum subject, Religious Education. The book is the first of its kind to fully describe the theoretical foundations of Statement Archaeology and the practical steps in its deployment, acting as a methodological handbook that will enable readers to use the method subsequently in their own research. Further, the book offers an unparalleled contribution to the historical account of the development and maintenance of compulsory RE in English state-maintained schools and uses this to engage with key current debates in Religious Education policy. It unearths important insights into how the present is built, informs future policy direction and potential implementation strategies, and helps prevent the repetition of unsuccessful past endeavours. This book will be of great interest for academics, researchers and post-graduate students in the fields of religious education, educational policy and politics, and research methods in education.
