**Fundamental British Values** Vini Lander.2019-05-17 This book seeks to investigate how the pedagogic space of schools and classrooms has been defined by the UK government's counter-terrorism 'Prevent' strategy, most notably through the requirement on teachers not to undermine 'fundamental British values' as part of the Teachers Professional Standards. The term 'fundamental British values' migrated from Prevent to the statutory framework that regulates teacher professionalism and has effectively securitized education practice. The Prevent strategy was conceived in response to the 7/7 bombings in London by so-called 'home-grown' Muslim terrorists. The need for teachers to promote British values is an attempt to forge a cohesive British identity among young citizens within a multiracial, multicultural and multilingual society. However, as the chapters in this book illustrate, the state project to harness education to engender belonging - or as some would argue, civic nationalism - whilst simultaneously undertaking surveillance of children and young people from the Muslim community for signs of radicalization, has led to the perception of a hierarchy of citizens or, conversely, 'insider-outsider' citizens. The imperative to promote, and not undermine, fundamental British values has, in some instances, transformed the safe space of the classroom where children and young people's right to explore their perceptions of current affairs, citizenship and belonging has been curtailed for fear of surveillance by teachers who may interpret their utterances as either undermining British values or to be signs of radicalization. This book explores these dilemmas for teachers and the implications for their professionalism, and examines

how racist nativism has pervaded society, educational policy and practice through the promotion of a Britishness perceived by many as a raced, classed and exclusionary discourse. This book was originally published as a special issue of the Journal of Education for Teaching.

**Before Writing** Gunther Kress.2005-08-19 Gunther Kress argues for a radical reappraisal of the phenomenon of literacy, and hence for a profound shift in educational practice. Through close attention to the variety of objects which children constantly produce (drawings, cuttings-out, 'writings' and collages), Kress suggests a set of principles which reveal the underlying coherence of children's actions; actions which allow us to connect them with attempts to make meaning before they acquire language and writing. This book provides fundamental challenges to commonly held assumptions about both language and literacy, thought and action. It places these challenges within the context of speculation about the abilities and dispositions essential for children as young adults, and calls for the radical decentring of language in educational theory and practice.

This is the eighth book in the series.

Questioning the unquestionable, this fully updated new edition will make you re-consider everything you thought you knew about teaching and learning, such as: • Are you simply preparing the next generation of unemployed accountants? • What do you do for the 'sweetcorn kids' who come out of the education system in pretty much the same state as when they went in? • What's the real point of school? • Exams - So whose bright idea was that? • Why 'EQ' is fast becoming the new 'IQ'. • What will your school policy be on brain-enhancing technologies? • Which is the odd one out between a hamster and a caravan? With his customary combination of hard-hitting truths, practical classroom ideas and irreverent sense of humour, Ian Gilbert takes the reader on a breathless rollercoaster ride through burning issues of the twenty-first century, considering everything from the threats facing the world and the challenge of the BRIC economies to the link between eugenics and the 11+. **Deir El-Bahari in the Hellenistic and Roman Periods** Adam Łajtar.2006 The temple of Queen Hatshepsut at Deir el-Bahari at Luxor is one of the most fascinating architectural monuments of Ancient Egypt. It has been explored and reconstructed by Polish archaeologists for several decades and the present volume is the most recent result of these activities. The author tracks the history of the sanctuary in the Ptolemaic and Roman periods when it housed a lively cult of two Ancient Egyptian 'saints', the deified sages Amenhotep son of Hapu and Imhotep. The book contains the complete edition of Greek sources connected to this cult, including 320 inscriptions left by pilgrims on the walls of the temple, as well as several ostraca and votive monuments. On the basis of this material, different aspects of the cult are discussed in a synthetic part of the book. These include:

the topography of the cult and its history; gods worshipped in the temple; forms of the cult; the economic side of the cult; the visitors of the temple. The study closes with a chapter devoted to Deir el-Bahari in the Late Antique period when the place was frequented by a pagan corporation of ironworkers from Hermonthis.
