On their long drives to crags an idea blossomed: write a nutrition book for mountain sports. Peak Nutrition details 100 simple and tasty recipes within the context of outdoor goals and body science: motivation, recovery, hydration; how our digestive system works; how food provides energy; effects of weather and altitude; the relationship between food, muscle, and cramping; how nutrition relates to mental and physical stress; and much more. The authors also explore shifting eating habits and ways to develop a healthier approach, whether bouldering, climbing, backcountry skiing, mountain biking, trekking, or trail running. **The Rock Warrior's Way** Arno Ilgner.2006 Mental training is scarcely covered in the climbing literature, yet it is as important to performance as strength, flexibility, and technique. In his unique approach to mental training, Arno Ilgner draws essential elements from the rich warrior literature, as well as from sports psychology, and combines these with his extensive climbing experience to create The Rock Warrior's Way. Here is a comprehensive program for learning how to focus your mental resources during a challenging climb. It includes step-by-step guidance on motivation analysis, information gathering, risk assessment, mental focus, and deliberate transition into action. Poor use of attention creates fear, which can manifest itself as anything from performance anxiety to sheer terror. By using attention more purposefully we can understand how fear is created, deal with it effectively, and free ourselves to get back in touch with a far more powerful motivating force: our love of climbing. We can then create the kind of unbending intention that leads to outstanding performance. The Rock Warrior's Way is a revolutionary program for climbers who want to improve both their performance and their enjoyment of climbing.

**The Impossible Climb** Mark Synnott.2020-03-10 INSTANT NATIONAL BESTSELLER NEW YORK TIMES MONTHLY BESTSELLER One of the 10 Best Books of March, Paste Magazine A deeply reported insider perspective of Alex Honnold's historic achievement and the culture and history of climbing. "One of the most compelling accounts of a climb and the climbing ethos that I've ever read."—Sebastian Junger In Mark Synnott's unique window on the ethos of climbing, his friend Alex Honnold's astonishing free solo ascent of El Capitan's 3,000 feet of sheer granite is the central act. When Honnold topped out at 9:28 A.M. on June 3, 2017, having spent fewer than four hours on his historic ascent, the world gave a collective gasp. The New York Times described it as "one of the great athletic feats of any kind, ever." Synnott's personal history of his own obsession with climbing since he was a teenager—through professional climbing triumphs and defeats, and the dilemmas they render—makes this a deeply reported, enchanting revelation about living life to the fullest. What are we doing if not an impossible climb? Synnott delves into a raggedy culture that emerged decades earlier during Yosemite's Golden Age, when pioneering climbers like Royal Robbins and Warren Harding invented the sport that Honnold would turn on its ear. Painting an authentic, wry portrait of climbing history and profiling Yosemite heroes and the harlequin tribes of climbers known as the Stonemasters and the Stone Monkeys, Synnott weaves in his own experiences with poignant insight and wit: tensions burst on the mile-high northwest face of Pakistan's Great Trango Tower; fellow climber Jimmy Chin miraculously persuades an official in the Borneo jungle to allow Honnold's first foreign expedition, led by Synnott, to continue; armed bandits accost the same trio at the foot of a tower in the Chad desert . . . The Impossible Climb is an emotional drama driven by people exploring the limits of human potential and seeking a perfect, choreographed dance with nature. Honnold dared far beyond the ordinary, beyond any climber in history. But this story of sublime heights is really about all of us. Who doesn't need to face down fear and make the most of the time we have?

**Injuries, Injury Prevention and Training in Climbing** Gudmund Grønhaug,Atle Hole Saeterbakken,Volker Rainer Schöffl,Andreas Schweizer.2024-04-19 Climbing as an activity has a long and proud history of ascending mountains and steep walls. Still, as a newly acknowledged Olympic sport, climbing has a short history of systematic training and injury prevention. Sport climbing is divided in three disciplines (bouldering, lead climbing, speed climbing) that requires different physiological and psychological abilities witch again lead to different mechanical loading and thereby possible injuries. Furthermore, climbing is practiced by a diversified population from the recreational climber to the professional athlete. One of the things that separates climbing from most other Olympic sports is that a vast majority of the athletes operates outside the federations. Even internationally high performing climbers are not organized or part of a team with trainers and health personnel.

**Kilimanjaro Millennial Style** Rodney Parks.2022-01-28 'As someone with no interest in adventure travel, I was surprised to find that I couldn't put this book down. The narrative is absorbing and engaging; the story is told with such authenticity that it captured my imagination the way a good novel would, leaving me eager to follow the students' journey and find out what would happen next. Despite being written by a variety of authors, the voice seemed very consistent and the book transitioned smoothly from one chapter to the next. I was completely caught up in the students' thoughts and emotions; I felt as though I was walking alongside them as they faced each challenge, getting to know them, and cheering them on to achieve their goal. I felt fortunate to benefit from the lessons they learned without having to leave the comfort of my warm, safe home. I enthusiastically recommend this book to anyone who might be contemplating a similar trip (or whose child has proposed such a trip) and also to anyone who loves to get lost in a fascinating, compelling, and well-told

story.' Dr. Diane Miller, Director of Student Academic Services at the University of Georgia Students in Elon University's first adventure-based learning course to Tanzania hiked to the top of Mt. Kilimanjaro - millennial style. Then they wrote a book about it. The 22 upper-level students in the Core Capstone course authored this book in order to share what they learned from their adventure, and provide helpful information for those who follow in their footsteps. Most travel adventure books about Kilimanjaro are written by older adults, and tend to focus on the individual's "peak experience. Those reading Kilimanjaro, Millennial Style will quickly grasp the different ways young adults perceive their world, how their relationships are deepened, where they find adventure, and what it means to have an authentic experience together. As one of the authors wrote, I would never want to hike to the top of Kilimanjaro again. Not because it wasn't the most amazing experience I have ever had, but because it wouldn't be with the people that made my experience so extraordinary.

**The Push** Tommy Caldwell.2017-05-16 A New York Times Bestseller A dramatic, inspiring memoir by legendary rock climber Tommy Caldwell, the first person to free climb the Dawn Wall of Yosemite's El Capitan "The rarest of adventure reads: it thrills with colorful details of courage and perseverance but it enriches readers with an absolutely captivating glimpse into how a simple yet unwavering resolve can turn adversity into reward." —The Denver Post A finalist for the Boardman Tasker Award for Mountain Literature On January 14, 2015, Tommy Caldwell, along with his partner, Kevin Jorgeson, summited what is widely regarded as the hardest climb in history—Yosemite's nearly vertical 3,000-foot Dawn Wall, after nineteen days on the route. Caldwell's odds-defying feat—the subject of the documentary film *The Dawn Wall* to be released nationwide in September—was the culmination of an entire lifetime of pushing himself to his limits as an athlete. This engrossing memoir chronicles the journey of a boy with a fanatical mountain-guide father who was determined to instill toughness in his son to a teen whose obsessive nature drove him to the top of the sport-climbing circuit. Caldwell's affinity for adventure then led him to the vertigo-inducing and little understood world of big wall free climbing. But his evolution as a climber was not without challenges; in his early twenties, he was held hostage by militants in a harrowing ordeal in the mountains of Kyrgyzstan. Soon after, he lost his left index finger in an accident. Later his wife, and main climbing partner, left him. Caldwell emerged from these hardships with a renewed sense of purpose and determination. He set his sights on free climbing El Capitan's biggest, steepest, blankest face—the Dawn Wall. This epic assault took more than seven years, during which time Caldwell redefined the sport, found love again, and became a father. *The Push* is an arresting story of focus, drive, motivation, endurance, and transformation, a book that will appeal to anyone seeking to overcome fear and doubt, cultivate perseverance, turn failure into growth, and find connection with family and with the natural world.

**Towards an Islamic Lunisolar Calendar** Hisham Abad.2021-04-10 The Calendar was invented in ancient times to allow nations to pace their economic and social activities with climatic seasons. Throughout the history of civilizations, much depended on organizing and administering an accurate calendar. Hunter-gatherers needed the calendar to predict the migrations of herds of wild animals. As humanity advanced, farming communities required calendars to predict the coming of rain or the time of the flooding of rivers. Traders and seafaring communities needed to map the best time of the year to tackle the dangers of seas when sailing

far from home. In contemporary times of globalization, calendars have become even more critical in optimizing the complex supply chains of local and global production cycles. Oral traditions ascertain that the Arabs of the Arabian Peninsula used a rudimentary lunisolar calendar, called in the literature the "Arabian Calendar." Like with all nations, the lunisolar Arabian Calendar helped the Arabs organize their meager resources in the best ways possible. For example, research showed that the Hajj season and its pan-Arabian markets were scheduled to coincide with the date harvesting season peaking from July to September. The abundance of the date harvest available in this period, along with assigning the concept of inviolability to the Arabian months spanning this season, allowed them to travel across Arabia to Mecca to trade in the pan-Arabian markets and to participate in the religious rituals of their pilgrimage (the Hajj). It is asserted in this book that Prophet Muḥammad followed the lunisolar Arabian Calendar all his life. At the end of the tenth year after he migrated from Mecca to Medīna, and during his Farewell Pilgrimage, the Qurʾān sternly abolished the process of intercalation, i.e., the Nasīʾ, the very process which allowed the Arabs to organize their various economic and religious activities. When Caliph ʿUmar ibn al-Khaṭṭāb initiated the Hijri Calendar seven years after Prophet Muḥammad death, i.e., in 17 AH, he founded it as "purely lunar," which meant its months were allowed to float within the solar year. Caliph ʿUmar is famous for his zeal in protecting the fundamental Islamic principle of monotheism. This, I show, was the reason for introducing the Hijri Calendar as purely lunar, because "Nasīʾ," i.e., Quraysh's method of intercalation was hopelessly entangled with the polytheistic religion of Quraysh, the Prophet's tribe, and the guardian of the holy places in Mecca and its environs. The harmful effects of following the purely lunar Hijri Calendar were realized from early on. But the prohibition of Nasīʾ inhibited the early Islamic caliphs from reforming the Hijri Calendar. This book explores the history of the Arabian Calendar and its intimate connection with the Hijri Calendar. The main findings of this book are as follows: 1- The main Hajj shrines in Macca are aligned in the direction of sunrises and sunsets of the Summer Solstice day. 2- Quraysh intercalated its Arabian Calendar by forcing the Summer Solstice (SS) Day to occur within the 11th month of the Arabian Calendar, Shawwāl. The Nasīʾ month was added when the onset of the SS was about to transfer to into the 11th month Dhūʾl Qaʿda. 3- The onset of the SS day was determined through the sunset alignment along the line joining the posts of "al-Woṣṭā and al-ʿAqaba Jamarāt, and also by observing the sun rising from behind the peak of mount Thabīr from the location of the sacrificial altar of pre-Islamic Mina. 4- The Prophet arrived in his migration from Mecca to Medīna on the Days of ʿĀshūrāʾ which corresponded to the dates of 8th of Rabīʾ-I, the 10th of the Hebrew month Tishri, and to the 23rd of September 632. 5- The epoch of the Hijri Calendar must be adjusted back by two days from the epoch used so far. 6- The Farewell Pilgrimage occurred in autumn on September 4, 632 CE, not in spring on March 11, 632 CE.
