Competitive Authoritarianism Steven Levitsky, Lucan A. Way. 2010-08-16 Based on a detailed study of 35 cases in Africa, Asia, Latin America, and post-communist Eurasia, this book explores the fate of competitive authoritarian regimes between 1990 and 2008. It finds that where social, economic, and technocratic ties to the West were extensive, as in Eastern Europe and the Americas, the external cost of abuse led incumbents to cede power rather than crack down, which led to democratization. Where ties to the West were limited, external democratizing pressure was weaker and countries rarely democratized. In these cases, regime outcomes hinged on the character of state and ruling party organizations. Where incumbents possessed developed and cohesive coercive party structures, they could thwart opposition challenges, and competitive authoritarian regimes survived; where incumbents lacked such organizational tools, regimes were unstable but rarely democratized.

Resilience of an African Giant Johannes Herderschee, Kai-Alexander Kaiser, Daniel Mukoko Samba. 2011-10-05 The development of an effective state, a reliable infrastructure, and a dynamic private sector has long been hampered by political economy obstacles in the Democratic Republic of Congo. Resilience of an African Giant identifies these obstacles, which prevent the country from realizing its economic potential as the second-largest country in Sub-Saharan Africa, and outlines how they can be overcome. Four instruments that have been used to boost economic development in the past and that can contribute to more development in the future are explored in the book: coordination among those who control or influence policy, application of new technologies, leveraging of external anchors, and development of social accountability networks. This book pulls together an impressive body of research on the exemplary transition of a country from a state of conflict to a post-conflict situation, and from there toward becoming a country with legitimate institutions created by free, democratic, and transparent elections. I therefore wholeheartedly recommend it to all who are interested in development, particularly to policy makers in my country, as well as its partners.

La consolidation de l'Etat de droit au Gabon Dominique Etoughe. 2018-09-26 Il est fait grief à la Cour constitutionnelle du Gabon de faire de la politique au lieu de se limiter à dire le droit. L'auteur s'appuie sur l'article 91 de la loi fondamentale gabonaise du 26 mars 1991, pour démontrer que la Cour constitutionnelle du Gabon dispose aussi d'une compétence politique strictement limitée et encadrée. Celle-ci est liée à l'objectif constitutionnel de la consolidation de l'État de droit gabonais qui incombe à cette cour.

The Third Wave Samuel P. Huntington. 2012-09-06 Between 1974 and 1990 more than thirty countries in southern Europe, Latin America, East Asia, and Eastern Europe shifted from authoritarian to democratic systems of government. This global democratic revolution is probably the most important political trend in the late twentieth century. In *The Third Wave*, Samuel P. Huntington analyzes the causes and nature of these democratic transitions, evaluates the prospects for stability of the new democracies, and explores the possibility of more countries becoming democratic. The recent transitions, he argues, are the third major wave of democratization in the modern world. Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government. Using concrete examples, empirical evidence, and insightful analysis, Huntington provides neither a theory nor a history of the third wave, but an explanation of why and how it occurred. Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes; economic and social development; the changed role of the Catholic Church; the impact of the United States, the European Community, and the Soviet Union; and the snowballing phenomenon: change in one country stimulating change in others. Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred. Compromise was key to all democratizations, and elections and nonviolent tactics also were central. New democracies must deal with the torturer problem and the praetorian problem and attempt to develop democratic values and processes. Disillusionment with democracy, Huntington argues, is necessary to consolidating democracy. He concludes the book with an analysis of the political, economic, and cultural factors that will decide whether or not the third wave continues. Several Guidelines for Democratizers offer specific, practical suggestions for initiating and carrying out reform. Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process. At this volatile time in history, Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world.

The Crime of Aggression Claus Kreß, Stefan Barriga. 2016-10-27 The 2010 Kampala Amendments to the Rome Statute empowered the International Criminal Court to prosecute the 'supreme crime' under international law: the crime of aggression. This landmark commentary provides the first analysis of the history, theory, legal interpretation and future of the crime of aggression. As well as explaining the positions of the main actors in the negotiations, the authoritative team of leading scholars and practitioners set out exactly how countries have themselves criminalized illegal war-making in domestic law and practice. In light of the anticipated activation of the Court's jurisdiction over this crime in 2017, this work offers, over two volumes, a comprehensive legal analysis of how to understand the material and mental elements of the crime of aggression as defined at Kampala. Alongside *The Travaux Préparatoires of the Crime of Aggression* (Cambridge, 2011), this commentary provides the definitive resource for anyone concerned with the illegal use of force.

What Is a Nation? and Other Political Writings Ernest Renan. 2018-08-28 Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the

political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. *What Is a Nation? and Other Political Writings* is the first English-language anthology of Renan's political thought. Offering a broad selection of Renan's writings from several periods of his public life, most previously untranslated, it restores Renan to his place as one of France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

Refonder l'Etat au Gabon Dominique Etoughe.2003 En mars 1990, la Conférence nationale a sonné le glas du parti unique au Gabon. Le pays avait reconquis en l'occasion la démocratie et le multipartisme : dès lors, tous les espoirs étaient permis. Une décennie plus tard, la refondation de cet Etat hante à nouveau l'actualité politique du Gabon. Les auteurs de cet ouvrage s'interrogent sur les enjeux d'une telle entreprise et se posent cette question: Refonder? Oui! Mais quelle refondation? Comment refonder? Et en vue de quoi?

Democracy and the Market Adam Przeworski.1991-07-26 The quest for freedom from hunger and repression has triggered in recent years a dramatic, worldwide reform of political and economic systems. Never have so many people enjoyed, or at least experimented with democratic institutions. However, many strategies for economic development in Eastern Europe and Latin America have failed with the result that entire economic systems on both continents are being transformed. This major book analyzes recent transitions to democracy and market-oriented economic reforms in Eastern Europe and Latin America. Drawing in a quite distinctive way on models derived from political philosophy, economics, and game theory, Professor Przeworski also considers specific data on individual countries. Among the questions raised by the book are: What should we expect from these experiments in democracy and market economy? What new economic systems will emerge? Will these transitions result in new democracies or old dictatorships?

What is a Fair International Society? Emmanuelle Tourme Jouannet.2014-07-18 Today's world is post-colonial and post-Cold War. These twin characteristics explain why international society is also riddled with the two major forms of injustice which Nancy Fraser identified as afflicting national societies. First, the economic and social disparities between states caused outcry in the 1950s when the first steps were taken towards decolonisation. These inequalities, to which a number of emerging states now contribute, are still glaring and still pose the problem of the gap between formal equality and true equality. Second, international society is increasingly confronted with culture- and identity-related claims, stretching the dividing line between equality and difference. The less-favoured states, those that feel stigmatised, but also native peoples, ethnic groups, minorities and women now aspire to both legal recognition of their equal dignity and the protection of their identities and cultures. Some even seek reparation for injustices arising from the past violation of their identities and the confiscation of their property or land. In answer to these two forms of claim, the subjects of international society have come up with two types of remedy encapsulated in legal rules: the law of development and the law of recognition. These two sets of rights are neither wholly autonomous and individualised branches of law nor formalised sets of rules. They are imperfect and have their dark side. Yet they can be seen as the first milestones towards what might become a fairer international society; one that is both equitable (as an answer to socio-economic injustice) and decent (as an answer to cultural injustice). This book explores this evolution in international society, setting it in historical perspective and examining its presuppositions and implications.

Democratization in Africa: Challenges and Prospects Gordon Crawford, Gabrielle Lynch.2013-09-13 It is two decades since the 'third wave' of democratization began to roll across sub-Saharan Africa in the early 1990s. This book provides a very timely investigation into the progress and setbacks over that period, the challenges that remain and the prospects for future democratization in Africa. It commences with an overall assessment of the (lack of) progress made from 1990 to 2010, exploring positive developments with reasons for caution. Based on original research, subsequent contributions examine various themes through country case-studies, inclusive of: the routinisation of elections, accompanied by democratic rollback and the rise of hybrid regimes; the tenacity of presidential powers; the dilemmas of power-sharing; ethnic voting and rise of a violent politics of belonging; the role of 'donors' and the ambiguities of 'democracy promotion'. Overall, the book concludes that steps forward remain greater than reversals and that typically, though not universally, sub-Saharan African countries are more democratic today than in the late 1980s. Nonetheless, the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights, but also socio-economic rights and the physical security of African citizens. This book was originally published as a special issue of Democratization

Self-determination in International Law Robert McCorquodale.2000 The right of self-determination affects many areas of international law, from sovereignty over territory and human rights to decisions on the recognition of new States and the succession of States to treaties. It also has an impact on many approaches to understanding the nature of international law and international society. This volume sets out some of the methods by which authors have dealt with the right of self-determination and provides illustrations of the applications of the right to a variety of situations.

Britain, France and the Decolonization of Africa Andrew W.M. Smith, Chris Jeppesen. 2017-03-01 Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power. Praise for *Britain, France and the Decolonization of Africa* '...this ambitious volume represents a significant step forward for the field. As is often the case with rich and stimulating work, the volume gestures towards more themes than I have space to properly address in this review. These include shifting terrains of temporality, spatial Scales, and state sovereignty, which together raise important questions about the relationship between decolonization and globalization. By bringing all of these crucial issues into the same frame, *Britain, France and the Decolonization of Africa* is sure to inspire new thought-provoking research.' - *H-France* vol. 17, issue 205
