Viral Loads Lenore Manderson, Nancy J. Burke, Ayo Wahlberg.2021-09-20 Drawing upon the empirical scholarship and research expertise of contributors from all settled continents and from diverse life settings and economies, Viral Loads illustrates how the COVID-19 pandemic, and responses to it, lay bare and load onto people's lived realities in countries around the world. A crosscutting theme pertains to how social unevenness and gross economic disparities are shaping global and local responses to the pandemic, and illustrate the effects of both the virus and efforts to contain it in ways that amplify these inequalities. At the same time, the contributions highlight the nature of contemporary social life, including virtual communication, the nature of communities, neoliberalism and contemporary political economies, and the shifting nature of nation states and the role of government. Over half of the world's population has been affected by restrictions of movement, with physical distancing requirements and self-isolation recommendations impacting profoundly on everyday life but also on the economy, resulting also, in turn, with dramatic shifts in the economy and in mass unemployment. By reflecting on how the pandemic has interrupted daily lives, state infrastructures and healthcare systems, the contributing authors in this volume mobilise anthropological theories and concepts to locate the pandemic in a highly connected and exceedingly unequal world. The book is ambitious in its scope - spanning the entire globe - and daring in its

insistence that medical anthropology must be a part of the growing calls to build a new world.

Growing Up in a Culture of Respect Inge Bolin.2010-01-01 Far from the mainstream of society, the pastoral community of Chillihuani in the high Peruvian Andes rears children who are well-adjusted, creative, and curious. They exhibit superior social and cognitive skills and maintain an attitude of respect for all life as they progress smoothly from childhood to adulthood without a troubled adolescence. What makes such child-rearing success even more remarkable is that childhood is not recognized as a distinct phase of life. Instead, children assume adult rights and responsibilities at an early age in order to help the community survive in a rugged natural environment and utter material poverty. This beautifully written ethnography provides the first full account of child-rearing practices in the high Peruvian Andes. Inge Bolin traces children's lives from birth to adulthood and finds truly amazing strategies of child rearing, as well as impressive ways of living that allow teenagers to enjoy the adolescent stage of their lives while contributing significantly to the welfare of their families and the community. Throughout her discussion, Bolin demonstrates that traditional practices of respect, whose roots reach back to pre-Columbian times, are what enable the children of the high Andes to mature into dignified, resilient, and caring adults.

Reform, Inclusion and Teacher Education Christine Forlin, Ming-Gon John Lian.2008-06-05 This ground-breaking book considers current perspectives on special education reform in the Asia-Pacific region. It has a major focus on a new era of special education, and how this relates to education

reform towards inclusive education. With major changes being proposed under current educational reform and confusion as to how to instigate these measures, this book provides ways to better prepare teachers. It is helpfully divided into three different sections of education reform: Education Reform in the Asia-Pacific region reviews broad trends and issues in special education across the region, including Taiwan, Korea, Australia, India, China and Hong Kong. Preparing Teachers to work in Inclusive Classrooms focuses on curricula and pedagogical practices for teacher education. This section considers different approaches to preparing teachers such as cross-categorical, collaborative, innovations, and the impact of teachers' attitudes, perceptions and concerns on inclusion. Effective Special & Inclusive Practices draws upon evidence-based research to provide best practice models to assist in developing inclusive school communities. Each section addresses a list of objectives and questions; suggests best practice pedagogy; and concludes with a support section with useful websites and suggested professional development activities. This book will interest teachers, teacher educators, university lecturers in education and post graduate students.

The Integrated Reporting Movement Robert G. Eccles, Michael P. Krzus. 2014-10-20 An in-depth, enlightening look at the integrated reporting movement The Integrated Reporting Movement explores the meaning of the concept, explains the forces that provide momentum to the associated movement, and examines the motives of the actors involved. The book posits integrated reporting as a key mechanism by which companies can ensure their own long-term sustainability by contributing to a sustainable society. Although integrated reporting has seen substantial development due to the support of companies, investors, and the initiatives of a number of NGOs, widespread regulatory intervention has yet to materialize. Outside of South Africa, adoption remains voluntary, accomplished via social movement abetted, to varying degrees, by market forces. In considering integrated reporting's current state of play, the authors provide guidance to ensure wider adoption of the practice and success of the movement, starting with how companies can improve their own reporting processes. But the support of investors, regulators, and NGOs is also important. All will benefit, as will society as a whole. Readers will learn how integrated reporting has evolved over the years, where frameworks and standards are today, and the practices that help ensure effective implementation—including, but not limited to an extensive discussion of information technology's role in reporting and the importance of corporate reporting websites. The authors introduce the concepts of an annual board of directors' "Statement of Significant Audiences and Materiality" and a "Sustainable Value Matrix" tool that translates the statement into management decisions. The book argues that the appropriate combination of market and regulatory forces to speed adoption will vary by country, concluding with four specific recommendations about what must be done to accelerate high quality adoption of integrated reporting around the world.

A China Não Existe Daniel Marques.2012-11-17 Enquanto o mundo continua a evoluir em direções imprevisíveis, mas a economia Portuguesa mantém-se previsivelmente em declínio permanente, como aliás tem sido há séculos desde a sua queda do primeiro lugar mundial, exista uma busca por explicações, soluções e respostas que se mostram aparentemente inexistentes. Uma análise ao passado revelaria inúmeras causas para a queda duma nação, mas tal estudo mostra-se tão ou mais relevante quanto a observação de novas nações emergentes. Perante este cenário, a China apresenta-se agora como um exemplo de boa economia e sociedade para os Portugueses, embora até mesmo nesta atitude se encontrem atrás de muitos outros, os quais já ultrapassaram esta fase e começam a olhar para uma nova possibilidade num futuro pós-China. Os investimentos Portugueses a oriente têm vindo a aumentar, da mesma forma que antes as trocas comerciais se estabeleceram em Países da Lusofonia, como o Brasil, Angola e Moçambique. Mas, será mesmo que a realidade Chinesa é assim tão promissora? Muitos estudos realizados na China têm esquecido detalhes extremamente importantes e que ditam o cenário real deste país. É com base nesta verdade oculta que este livro pretende retratar o que realmente se está a passar neste novo número um mundial. Embora comparando duas realidades distintas, de dois países também eles de dimensões muito diferentes, existe aqui um estudo mais profundo, como é o caso que dois grandes impérios podem permitir compreender. Da queda do mais longo império mundial, como é o caso de Portugal, à emergência dum novo império ressurgido das cinzas e da pobreza, tal a situação da China, muito há para comparar a fim de se conseguir melhores previsões sobre mercados e economias no plano mundial. Assim sendo, este livro mostra-se muitíssimo relevante e necessário para empresários e políticos de qualquer país, em busca de estabelecer trocas comerciais e investimentos com a China, mas também para quem queira viver e trabalhar neste país. Esta obra não esconde muitas das mais perversas situações desta moderna nação e o modo de pensamento Chinês face ao ocidente, para evidenciar o que os Chineses realmente planeiam para o planeta inteiro. É uma oportunidade para conhecer este país profundamente e o que ele representa para o futuro da humanidade. Esta obra tem por base um estudo com mais de 6 anos, realizado em várias cidades de norte a sul, e composto

por entrevistas com inúmeros cidadãos de ambos os países. Mas, apresenta ainda comparações relativamente a outros países Europeus e Asiáticos, principalmente, na área dos negócios. Esta obra revela a verdade escondida pelos media e filmes fantasiosos sobre o oriente, muito além das lendas, filosofias e histórias Chinesas, as quais representam um imagem falsa da China, a qual hoje existe escondida por detrás da sombra do passado.

Mirrors - Manual on combating antigypsyism through human rights education

Collectif.2015-06-01 Everyday in Europe, people associated with Roma or Traveller communities are exposed to acts of discrimination and exclusion on a scale that has stopped shocking people and institutions. Too often, it is only when lives are claimed that we wake up to the persistence of realities that have no place in any democratic society. Antigypsyism is a term used to refer to the multiple forms of biases, prejudice and stereotype that motivate the everyday discriminatory behaviour of institutions and many individuals towards Roma. Antigypsyism is a form of racial discrimination. Most antigypsyism acts are illegal and contrary to human rights, even when they are not prosecuted, and even if they are widespread and often ignored or tolerated. Antigypsyism undermines the moral fabric of societies. Democracy and human rights cannot take root where discrimination is institutionalised, tolerated or conveniently ignored. Education plays a central role in combating and overcoming antigypsyism because the result of centuries of prejudice cannot be fought by laws and courts alone. Human rights education - learning for, through and about human rights - provides an ideal approach to raising awareness about antigypsyism and promoting a culture of universal human rights. This manual was produced within the Roma Youth Action Plan of the Council of Europe to provide teachers, trainers and facilitators of non-formal education processes with essential information and methodological tools to address antigypsyism with young people of all ages and in any social-cultural setting. It is equally suitable for work with groups of non-Roma, Roma only, or mixed groups. Combating antigypsyism is a task for all of us; learning about it is a necessary starting point. As human beings we have the capability to discriminate and impose prejudice upon others. Fortunately, we are also capable to learn and change. *Mirrors* is a great help to help us notice this, correct distorted views and to recognise ourselves in the eyes of others.
