User Modeling and Adaptation for Daily Routines Estefanía Martín,Pablo A. Haya,Rosa M. Carro.2013-02-15 User Modeling and Adaptation for Daily Routines is motivated by the need to bring attention to how people with special needs can benefit from adaptive methods and techniques in their everyday lives. Assistive technologies, adaptive systems and context-aware applications are three well-established research fields. There is, in fact, a vast amount of literature that covers HCI-related issues in each area separately. However, the contributions in the intersection of these areas have been less visible, despite the fact that such synergies may have a great impact on improving daily living. Presenting a comprehensive review of state-of-the-art practices on user modeling and adaptation for people with special needs, as well as some reflections on the challenges that need to be addressed in this direction, topics covered within this volume include the analysis, design, implementation and evaluation of adaptive systems to assist users with special needs to take decisions and fulfil daily routine activities. Particular emphasis is paid to major trends in user modeling, ubiquitous adaptive support, diagnostic and accessibility, recommender systems, social interaction, designing and building adaptive assistants for daily routines, field studies and automated evaluation. Nine leading contributors write on key current research in the domain of adaptive applications for people with special needs, integrating and summarizing findings from the best known international research groups in these areas. Rock & Pop on British TV Jeff Evans.2017-02-16 When rock 'n' roll arrived, all Britain had were two black and white TV channels, the BBC and the slightly racier ITV. In just over a decade after the first dedicated music programme, Cool For Cats,

aired in 1956, cheap black and white studio-bound miming would give way to epic prog-rock live performances as programme controllers' were forced to accept the rise of the counter culture. Eventually, mammoth rock festivals would be enjoyed on multi-channel high-definition TV, delivering more coverage than any one person attending the actual event could ever experience. In *Rock & Pop on British TV*, Jeff Evans tells the whole story of how this entertainment medium morphed and grew as technology advanced and cultures changed. In a world where music is available on demand, 24/7, the story of *Rock & Pop On British TV* takes you back to your youth - whenever that was - and the days when pop on TV was an eagerly anticipated, greedily consumed and thrilling part of growing up in Britain. This Omnibus Enhanced digital edition includes a Digital Timeline of the notable programmes discussed within the book and the #1 hits of the day, illustrated with videos and images.

Dramatizing Writing Virginia Skinner-Linnenberg.2020-07-24

Although speech departments have owned delivery for the last 100 years, those who teach writing, especially English departments, can gain a great deal by reinstating delivery into their conceptions of and theories about writing. Thus, in the author's vision of dramatizing writing in the composition classroom, delivery can have an impact on all the composing

steps, from invention to final draft. The goals of this text are to redefine delivery for writing, to reunite it with other parts of the classical rhetorical canon, and to practically apply it in contemporary writing instruction. This text is divided into three main sections. The first provides a survey of the history of delivery in rhetorical theory. A continuum is set up from a totally physical conception of delivery to a noetic one which incorporates more intellectual processes. The argument is that the tension heightened by discord over its definition eventually led to the splitting of delivery from the rhetorical canon. A separate discussion of the women's challenge to delivery is also included. The next section contains a survey of facets of delivery that exist in current theory combined with the author's own theory of delivery. It provides insight into the state of delivery in contemporary writing instruction. The author argues that since the split of delivery from the rhetorical canon has caused a modern bias against delivery in writing theory, many strategies that could aid in the teaching of writing have either been overlooked or undertheorized. Therefore, she borrows from current theoretical areas within and outside of writing in order to construct her own theory of delivery. The last section provides practical applications of delivery in writing instruction. Again borrowing from many sources inside and outside of composition, she describes the techniques teachers may use to incorporate delivery in a writing classroom. Through the use of delivery, more strategies may be developed to aid in the teaching of writing. Special features include: * the incorporation of some practices that had been in use in the composition classroom for many years but did not have any consciously theoretical grounding; * the discussion of women rhetoricians' theories on delivery; * the combination of many contemporary theoretical areas including theatrical, feminist, rhetorical, and pedagogical to form the author's redefined theory of delivery; and * the presentation of practical applications of this new theory of delivery for teachers

to utilize in their own classrooms.

Pugh.2017-02-01 Of all the topics ever studied, surely one of the most compelling is human learning itself. What is the nature of the human mind? How do we understand and process new information? Where do new ideas come from? How is our very intelligence a product of society and culture? *Computers, Cockroaches, and Ecosystems: Understanding Learning through Metaphor* brings to light the great discoveries about human learning by illuminating key metaphors underlying the major learning perspectives. Such metaphors include, among others, the mind as computer, the mind as ecosystem, and the mind as cultural tools. These metaphors reveal the essence of different learning perspectives in a way that is accessible and engaging for teachers and students. Each metaphor is brought to life through stories ranging from the humorous to the profound. The book conveys scholarly ideas in a personal manner and will be a delight for teachers, university students, parents, business or military trainers, or anyone with an interest in learning.

Writing Down Rome John Henderson.1998-12-17 In a series of controversial essays, this book examines the Roman penchant for denigration, and in particular self-denigration, at the expense of Roman culture. Comedy in Republican Rome radically transformed both itself and the culture from which it sprang: in *Poenulus*, Plautus laughed at Roman depreciation of Carthage; in *Adelphoe*, Terence turned on his audience in provocation. The comic Roman poets played with self-mockery: in *Eclogue III*, Virgil tests his audience's security in judging peasant unpleasantness; in *Odes III.22*, Horace sends up his own pious

rusticity down on the farm. In the second half of the book, Roman verse satire is the subject: the genre of male bragging mocks its own masculine aggression. The great Latin satirists make fun of making fun: Horace, *Satires* I.9, shows up the politics of humour, unmanned by his own good manners; Persius nails his own weaknesses in fortifying himself against the world; Juvenal, *Satire* 1, loathes the literary scene he bids to dominate. The book shows a vital ingredient of Roman poetry to be an energetic surge of urbane banter directed towards Roman culture.

Deburau Edward Nye.2022-07-01 This volume analyses the nature of the mime art of Deburau and of the pantomime performances of the Théâtre des Funambules in Paris in the context of Romantic art, literature and socio-political thought. Deburau and the Théâtre des Funambules are characteristic of Romantic art in that they are closely associated with certain aspirations for social reform, even revolution. Deburau was an iconic figure for intellectuals such as George Sand who effectively considered him to be part of the 'poète-maçon' movement. Edward Nye examines this fascination as well as the myth which developed from it. With its unique framing in art, literature and politics, this book is a must read for undergraduates and postgraduates in theatre, literary studies and the Romantic period.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. Newcomers need to draw on all their resources—intellectual, linguistic, cultural—as they make sense of new content and a new language. In this much-needed book, the authors marshal research and several decades of their own experience to provide instructional practices and activities that will help teachers develop newcomers as readers and writers of English and engage them in content learning across the curriculum. Equally important, they show how teachers can advocate for these vulnerable students, many of whom have experienced multiple challenges in their home countries or in the United States, including poverty, violence, and political persecution. With chapters on assessment and second-language acquisition as well as reading, writing, speaking, and content learning, their book is a timely and comprehensive guide for any K-8 educator whose classroom or school includes newcomer students.
