With unmatched suspense and her signature cinematic storytelling, #1 New York Times–bestselling author Marie Lu plunges readers back into the unforgettable world of Legend for a truly grand finale. Eden Wing has been living in his brother’s shadow for years. Even though he’s a top student at his academy in Ross City, Antarctica, and a brilliant inventor, most people know him only as Daniel Wing’s little brother. A decade ago, Daniel was known as Day, the boy from the streets who led a revolution that saved the Republic of America. But Day is no longer the same young man who was once a national hero. These days he’d rather hide out from the world and leave his past behind. All that matters to him now is keeping Eden safe—even if that also means giving up June, the great love of Daniel’s life. As the two brothers struggle to accept who they’ve each become since their time in the Republic, a new danger creeps into the distance that’s grown between them. Eden soon finds himself drawn so far into Ross City’s dark side, even his legendary brother can’t save him. At least not on his own . . .

For over a decade the approach known as 'mission command' has been taught at the leading HULT Ashridge International Business School and has been applied in transforming businesses as diverse as pharmaceuticals and F1 racing. What do you want me to do? This question is the enduring management issue, a perennial problem that Stephen Bungay shows has an old solution that is counter-intuitive and yet highly practical. The Art of Action is a thought-provoking and fresh look at how managers can turn planning into execution, and execution into results. Drawing on his experience as a consultant, senior manager and a highly respected military historian, Stephen Bungay takes a close look at the army which built its agility on the initiative of its highly empowered junior officers, to show business leaders how they can build more effective, productive organizations.

Psychology of Shopping IntroBooks Team. After the outburst of the industrial revolution, consumerism has been rising immensely. This consumerism has given the buyers the power to rule the markets as opposed to the power held by sellers before. The sellers now have to heed to the demands of the buyers in all the ways possible in order to create a market for themselves. This kind of change in the marketplace has emerged a new field of study, which is the psychology of shopping. Researchers are trying to understand the behavioral patterns behind the purchases made by consumers. Such understanding has proved beneficial for the brands as they could not target the correct customer for their particular products with the help of new tools and techniques.

Mother Nature's Pedagogy Peter Gray.2020-09 Children come into the world biologically designed to educate themselves. Their natural curiosity, playfulness, sociability, willfulness, adventurousness, tendency to look ahead, and desire to do well in the world were all shaped, by natural selection, to serve the function of education. In this collection of essays, developmental psychologist Peter Gray describes, with research evidence, how these natural tendencies play themselves out in children who are not schooled but, instead, are allowed ample time and opportunity to exercise their natural educative drives. He explains, especially, how children learn from one another when allowed to play freely in settings where they are not segregated by age. In addition, he presents evidence that children come into the world with prosocial drives-to help, share, and comfort-that grow ever stronger when adults allow them to grow. He also discusses ADHD as a natural and valuable personality variation, not a disorder, which causes problems in the typical school environment but does not interfere with Self-Directed Education.

TAMBA, Child Soldier Marion Achard.2019-10-15 My name is Tamba Cisso. When I was eight years old, I lived in the village with my father, my mother and my sister. I went to school and had learned to read. I knew there was war in my country, but I didn't know that children could wage it. Providing a testimonial to one of the most heart-wrenching and chilling developments in modern warfare, this graphic novel chronicles the realities of hundreds of thousands across the world, kidnapped and forced to commit atrocities.

By the People Susan J. Ellis.1990 Most history books paint our past with portraits of presidents, generals, and captains of industry. *By the People* introduces the multitude of citizens who stood on the front lines when history was being made--the volunteers and associates that shaped us as a people, from the Social Compact of 1620 to the Underground Railroad before the Civil War and the women's suffrage movement.

I Wish I Were a . . . Werner Holzwarth.2013-09-01 The ever perceptive meerkat examines his surroundings at the zoo. To the left of him, he finds the burliest bear of them all. To the right of him, the meerkat observes a hilarious monkey gracefully swinging from rope to rope; and straight ahead is by far the most powerful lion of all the land! If only this meerkat could be just like them! But when a sudden dark shadow creepily emerges over the zoo, the meerkat is the first to alert his fellow companions of the impending danger. Almost immediately after, the animals look up to him for his special skill. From afar, the bear admires his speed. The monkey aspires to have his vigilant eye. And as for the lion, he only wishes he could have the meerkat's swift decision-making skills. Stefanie Jeschke's quirky illustrations compliment Werner Holzwarth's important theme of recognizing one's individual talents. Parents and children of all ages will certainly be entertained by this humorous tale and silly meerkat!

A Connected Curriculum for Higher Education Dilly Fung.2017-06-07 Is it possible to bring university research and student education into a more connected, more symbiotic relationship? If so, can we develop programmes of study that enable faculty, students and 'real world' communities to connect in new ways? In this accessible book, Dilly Fung argues that it is not only possible but also potentially transformational to develop new forms of research-based education. Presenting the Connected Curriculum framework already adopted by UCL, she opens windows onto new initiatives related to, for example, research-based education, internationalisation, the global classroom, interdisciplinarity and public engagement. A Connected Curriculum for Higher Education is, however, not just about developing engaging programmes of study. Drawing on the field of philosophical hermeneutics, Fung argues how the Connected Curriculum framework can help to create spaces for critical dialogue about educational values, both within and across existing research groups, teaching departments and learning communities. Drawing on vignettes of practice from around the world, she argues that developing the synergies between research and education can empower faculty members and students from all backgrounds to contribute to the global common good.

The Palgrave International Handbook of Alternative Education Helen E. Lees,Nel Noddings.2016-08-31 This state-of-the-art, comprehensive Handbook fully explores the field of alternative education on an international scale. Alternatives to mainstream schooling and education are becoming increasingly recognised as pertinent and urgent for better understanding what really works in successfully educating children and adults today, especially in light of the increased performance driven and managerially organised economic modelling of education that dominates. For too long we have wondered what "exactly" education done otherwise might look like and here we meet individual examples as well as seeing what alternative education is when a collection becomes greater than the sum of parts. The Handbook profiles numerous empirical examples from around the world of education being done in innovative and excitingly democratic and autonomous ways from Forest Schools and Home Education through to new technologies, neuroscience and the importance of solitude. The book also sets out important theoretical perspectives to inform us why seeing education through an alternative lens is useful as well as urgently needed. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of Education, Education Policy, Sociology and Philosophy as well as educational practitioners.

The Four Scott Galloway.2017-10-03 NEW YORK TIMES BESTSELLER USA TODAY BESTSELLER Amazon, Apple, Facebook, and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about everyone is wrong. For all that's been written about the Four over the last two decades, no one has captured their power and staggering success as insightfully as Scott Galloway. Instead of buying the myths these companies broadcast, Galloway asks fundamental questions. How did the Four infiltrate our lives so completely that they're almost impossible to avoid (or boycott)? Why does the stock market forgive them for sins that would destroy other firms? And as they race to become the world's first trillion-dollar company, can anyone challenge them? In the same irreverent style that has made him one of the world's most celebrated business professors, Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers. He shows how they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves, at a speed and scope others can't match. And he reveals how you can apply the lessons of their ascent to your own business or career. Whether you want to compete with them, do business with them, or simply live in the world they dominate, you need to understand the Four.

The last thing either Jana (13) or Louise (17) is looking for on this hot and boring summer is a friend of totally the wrong age. But then one day, they abandon their responsibilities and irritating families, and head off in a 'borrowed' car for a day by the lake. Their adventure is simple -- beer, ice-cream, swimming, singing -- but the friendship it forges between them turns out to be profound. When Jana experiences loss, it is only Louise's tender and funny postcards that can haul her out of depression -- right out of her bedroom window and off on another adventure.

Cryptocurrencies Simply Explained - By Tenx Co-Founder Dr. Julian Hosp Julian Hosp.2017-12-21 The easiest way into the world of blockchain, cryptocurrency, decentralization, bitcoin, icos, and co: Have you ever asked yourself what a cryptocurrency, a blockchain, or Bitcoin is? How about the word decentralization? You might have heard that these things are coming and will take over the world. No matter if you have or haven't, they are right-these things are coming. And these things will play just as important a role as the internet has for the past 20 years. You know who won with the internet? The people who started preparing for it at the beginning, using it personally or for their business before others did. With this new technology called blockchain, a similar window of opportunity has started to open. If you have no clue what a blockchain, a cryptocurrency, or Bitcoin is, don't worry-most of the population doesn't. One of the main challenges for anyone trying to get familiar with these topics is the question of Where should I start? This is exactly what prompted me to write this book. In the simplest way possible, I will explain all the aforementioned points so even a 10-year-old could understand them. At the same time, I will reference the details on a technical level to give you both the large scale and the detailed picture. Explaining something to a 10-year-old is in no way a commentary on anyone's intelligence. I'm just following Albert Einstein's advice: If you can't explain it simply, you don't understand it well enough. My ultimate goal is to make people all around the world #CRYPTOFIT. I.E fit for this new wave of decentralization and blockchain. 10 things you will learn in this book that will blow your mind: What does backed by gold actually mean? Will cryptocurrencies replace fiat currencies? Can an internet outage destroy cryptocurrencies? Does mining really create cryptocurrencies? (Hint: It doesn't) Is a maximum amount of Bitcoin really good for a currency? How do I get a cryptocurrency account if no one is in charge? Are cryptocurrencies better than fiat currencies? Is blockchain the only solution for decentralization? Which technology will win? (Hint: Not the best one!) Can you lose a coin? (Hint: You can NOT) Enjoy the read - Yours, Dr. Julian Hosp An overview of the areas covered in the book: FROM GOLD TO CRYPTO BLOCKCHAIN AND CRYPTOCURRENCY BASICS PRIVATE KEYS AND PUBLIC ADDRESSES MINING HOW ARE CRYPTOCURRENCIES CREATED? WALLETS BLOCKCHAIN FORKS AND ATTACKS DESTROYING A CRYPTOCURRENCY? PRIVACY, ANONYMITY, AND TRANSPARENCY ALTCOINS AND BITCOIN CRYPTO-INVESTING THE FUTURE OF CRYPTOCURRENCIES BONUS CHAPTER: INITIAL COIN OFFERINGS (ICOs)
