Minimal Architecture Ilka Ruby, Andreas Ruby, Angeli Sachs, Philip Ursprung. 2003 What is minimalism? Or, more specifically, what isn't? In this fascinating aesthetic voyage, three experts in the field of architecture and art history trace the development of minimalism as a style and offer perspectives on the directions the movement is taking as it morphs towards the future. In double-page spreads filled with color photographs of the most innovative minimalist projects, this book illustrates three principal movements: the traditional, as practiced by Herzog & de Meuron in early works, Adolf Krischanitz and Tadao Ando; the ambiguous, in which architects not commonly associated with minimalism, such as OMA or Zaha Hadid, use it for specific projects; and the subversive, which appropriates minimalist concepts across a variety of new fields as exemplified in the architecture of Shigeru Ban or Lacaton & Vassal.

Images Ilka Ruby, Andreas Ruby, Philip Ursprung. 2004 This title documents the shift from the building as structure to the building as image. This exploration of the use and significance of two-dimensional images in contemporary architecture looks at the works of major designers, including Zaha Hadid, Herzog and de Meuron, Rem Koolhaas, and MVRDV, among others.

Reforming the French Law of Obligations John Cartwright, Stefan Vogenauer, Simon Whittaker.2009-04-17 The 2005 Avant-projet de réforme du droit des obligations et de la prescription, also dubbed the Avant-projet Catala, suggests the most far-reaching reform of the French Civil code since it came into force in 1804. It reviews central aspects of contract law, the law of delict and the law of unjustified enrichment. There is currently a very lively debate in France as to the merits or the demerits of both the particular draft provisions and the general idea of recodification as such. This volume is the first publication to introduce the reform proposals to an English speaking audience. It contains the official English translation of the text, and distinguished private lawyers from both England and France analyse and assess particularly interesting aspects of the substantive draft provisions in a comparative perspective. Topics covered include negotiation and renegotiation of contracts, la cause, the enforcement of contractual obligations, termination of contract and its consequences, the effects of contracts on third parties, the definition of la faute, the quantification of damages, and the law of prescription. The volume also contains an overall assessment of the draft provisions by one of the most senior French judges who chaired the Working Party on the Avant-projet, established by the French Supreme Court, the Cour de cassation. The book is indispensable for comparative private lawyers and lawyers with a particular interest in French law. It is also of use to all private lawyers (both academics and practitioners) looking for information on recent international and European trends in contract and tort.

The Brownian Motion Andreas Löffler,Lutz Kruschwitz.2019-07-03 This open access textbook is the first to provide Business and Economics Ph.D. students with a precise and intuitive introduction to the formal backgrounds of modern financial theory. It explains Brownian motion, random

processes, measures, and Lebesgue integrals intuitively, but without sacrificing the necessary mathematical formalism, making them accessible for readers with little or no previous knowledge of the field. It also includes mathematical definitions and the hidden stories behind the terms discussing why the theories are presented in specific ways.

Economy and Society: Selected Writings Karl Polanyi. 2018-06-29 Few figures are more crucial to understanding the upheavals of our contemporary era than Karl Polanyi. In a world riven by social and economic crises, from rising inequality to the decay of democratic institutions and profound technological disruption, Polanyi's path-breaking account of the dynamics of market capitalism and his defence of society and nature against the dangerous tendencies of the market capitalist system are more relevant than ever. This book brings together Polanyi's most important articles and essays to give a unique selection of his essential shorter writings, mixing classic texts with significant but previously little-known pieces. It highlights the coherence and richness of Polanyi's theoretical and political approach, making it indispensable for understanding his overarching intellectual contribution. The volume includes his interwar writings, which deal with the world economic crisis and the socialist alternative to conservative and fascist developments; his reflection on political theory and the international situation after the war; and his comparative studies of economic institutions. Polanyi's political writings are complemented and supported by the critique of economic determinism and what he termed 'our obsolete market mentality'. This book is an invaluable companion to Polanyi's masterpiece, *The Great Transformation*, and an essential resource for students and scholars of political economy, sociology, history and political philosophy.

Herzog & de Meuron Herzog & de Meuron.2005 More than any of their contemporaries, Swiss architects Jacques Herzog and Pierre de Meuron are challenging the boundaries between architecture and art. *Natural History* explores that challenge, examining how the work of this formidable pair has drawn upon the art of both past and present, and brought architecture into dialogue with the art of our time. Echoing an encyclopedia, this publication reflects the natural history museum structure of the exhibition which it accompanies, organized by the Canadian Centre for Architecture. Models and projects by Herzog & de Meuron, as well as by other artists, are structured around six thematic portfolios that suggest an evolutionary history of the architects' work: Appropriation & Reconstruction, Transformation & Alienation, Stacking & Compression, Imprints & Moulds, Interlocking Spaces, and Beauty & Atmosphere. Each section is introduced with a statement from Herzog, and more than 20 artists, scholars, and architects have contributed essays, including Carrie Asman, Georges Didi-Huberman, Kurt W. Forster, Boris Groys, Ulrike Meyer Stump, Peggy Phelan, Thomas Ruff, Rebecca Schneider, Adolf Max Vogt, and Jeff Wall.

Business Taxation and Financial Decisions Deborah Schanz, Sebastian Schanz. 2010-10-17

Managerial decisions are considerably influenced by taxes: e.g. the choice of location, buying or leasing decisions, or the proper mix of debt and equity in the company's capital structure increasingly demand qualified employees in an economic environment that is becoming more and more complex. Due to the worldwide economic integration and constant changes in tax legislation, companies are faced with new challenges - and the need for information and advice is growing accordingly. This book's goal is to identify and quantify possible tax effects on companies' investment strategies and financing policies. It does not focus on details of tax law, but instead seeks to address students and practitioners focusing on corporate finance, accounting, investment banking and strategy consulting.

Enlargement of the European Union Allan F. Tatham.2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union’s expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the ‘identity’ conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between ‘widening’ and ‘deepening’ and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author’s conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging

Union to continue to 'deliver the goods.' A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote 'an ever closer union of the peoples of Europe,' this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Dual Citizenship and Naturalisation: Global, Comparative and Austrian Perspectives Rainer Bauböck, Max Haller. 2021-05-06 The toleration of dual citizenship has become a global trend as states try to retain ties to their emigrants or to encourage their immigrants to naturalise. This volume examines changes in state attitudes to dual citizenship and their social impact, zooming in from analyses of global dynamics to a series of country case studies that illustrate the variety of reasons and intentions behind dual citizenship reform. Finally, five chapters provide the most thorough analysis of the special Austrian case so far. They show the size of Austria's untapped potential for naturalisation of immigrants, the incoherence of its citizenship policies at home and abroad and the need for a comprehensive reform.

The Common Law of Obligations Andrew Robertson, Michael Tilbury. 2016-01-28 The development of the law of obligations across the common law world has been, and continues to be, a story of unity and divergence. Its common origins continue to exert a powerful stabilising influence, carried forward by a methodology that places heavy weight on the historical foundations of legal principles. Divergence is, however, produced by numerous factors, including national and international human rights instruments, local statutory regimes, civil law influences, regional harmonisation, local circumstances and values and different political and legal cultures. The essays in this collection explore the forces that produce divergence, the countervailing forces that generate cohesion and consistency in the common law of obligations, and the influence that the major common law

jurisdictions continue to exert over one another in this area of law. The chapters in this book were originally presented at the Seventh Biennial Conference on the Law of Obligations held in Hong Kong in July 2014. A second collection, entitled *Divergences in Private Law* (ISBN: 9781782256601), will focus on particular departures from the common law mainstream and the causes and effects of those deviations.

Andrea Fraser Andrea Fraser, Rhea Anastas, Alejandro Cesarco. 2019 This publication is a substantial archive and a singular point of entry into thinking with and understanding Andrea Fraser's work and reception. The interview format provides intimate insight into Fraser's self-positioning as a central aspect of her practice. By presenting the artist's voice as mediated through interlocutors ranging from professional peers to popular media, 'Collected Interviews, 1990-2018' uniquely contextualizes Fraser's practice in the artistic, institutional, and discursive fields in which she intervenes. As Fraser is engaged, challenged, and understood from diverse perspectives, readers learn as much about her artistic commitments from the artist's humor and affect as from her incisive analyses. The collection spans three decades, from the early 1990s to the present, and is organized chronologically with minimal editing. The collection's unmediated format allows Fraser's key ideas and themes to attain deeper resonance through repetitions and subtle differentiations over multiple conversations.

Sustainable Development Policy Michael von Hauff, Claudia Kuhnke. 2017-04-21 Sustainable Development Policy: A European Perspective uses a variety of multidisciplinary perspectives to explore the ways in which sustainable infrastructures can play a more prominent and effective role in international development policy. Building on a solid introduction to sustainability and development policy, this book discusses ways in which viable reform can be promoted through

coherent governing, the design of social security systems, education systems and the possibilities of fair trade as an alternative trading concept . Sustainable Development Policy generates a platform on which to encourage constructive dialogue on issues surrounding sustainability in the wake of the global scarcity of natural and economic resources. This edited collection will be of great interest to all students and lecturers of development studies and development policy, as well as researchers from other disciplines looking for an introduction to sustainable development policy and its practical applications.

Stochastic Discounted Cash Flow Lutz Kruschwitz,Andreas Löffler.2020-02-28 This open access book discusses firm valuation, which is of interest to economists, particularly those working in finance. Firm valuation comes down to the calculation of the discounted cash flow, often only referred to by its abbreviation, DCF. There are, however, different coexistent versions, which seem to compete against each other, such as entity approaches and equity approaches. Acronyms are often used, such as APV (adjusted present value) or WACC (weighted average cost of capital), two concepts classified as entity approaches. This book explains why there are several procedures and whether they lead to the same result. It also examines the economic differences between the methods and indicates the various purposes they serve. Further it describes the limits of the procedures and the situations they are best applied to. The problems this book addresses are relevant to theoreticians and practitioners alike.

Enduring Innocence Keller Easterling.2007-09-28 How outlaw spatial products—resorts, information technology campuses, retail chains, golf courses, and ports—act as cunning pawns in global politics. In Enduring Innocence, Keller Easterling tells the stories of outlaw spatial products—resorts,

information technology campuses, retail chains, golf courses, ports, and other hybrid spaces that exist outside normal constituencies and jurisdictions—in difficult political situations around the world. These spaces—familiar commercial formulas of retail, business, and trade—aspire to be worlds unto themselves, self-reflexive and innocent of politics. But as Easterling shows, in reality these enclaves can become political pawns and objects of contention. Jurisdictionally ambiguous, they are imbued with myths, desires, and symbolic capital. Their hilarious and dangerous masquerades often mix quite easily with the cunning of political platforms. Easterling argues that the study of such real estate cocktails provides vivid evidence of the market's weakness, resilience, or violence. *Enduring Innocence* collects six stories of spatial products and their political predicaments: cruise ship tourism in North Korea; high-tech agricultural formations in Spain (which have reignited labor wars and piracy in the Mediterranean); hyperbolic forms of sovereignty in commercial and spiritual organizations shared by gurus and golf celebrities; automated global ports; microwave urbanism in South Asian IT enclaves; and a global industry of building demolition that suggests urban warfare. These regimes of nonnational sovereignty, writes Easterling, move around the world like weather fronts; she focuses not on their blending—their global connectivity—but on their segregation and the cultural collisions that ensue. *Enduring Innocence* resists the dream of one globally legible world found in many architectural discourses on globalization. Instead, Easterling's consideration of these segregated worlds provides new tools for practitioners sensitive to the political composition of urban landscapes.

A Theory of Intergenerational Justice Joerg Chet Tremmel. 2009-12 This highly accessible book provides an extensive and comprehensive overview of current research and theory about why and how we should protect future generations. It exposes how and why the interests of people today and

those of future generations are often in conflict and what can be done. It rebuts critical concepts such as Parfits' non-identity paradox and Beckerman's denial of any possibility of intergenerational justice. The core of the book is the lucid application of a veil of ignorance to derive principles of intergenerational justice which show that our duties to posterity are stronger than is often supposed. Tremmel's approach demands that each generation both consider and improve the well-being of future generations. To measure the well-being of future generations Tremmel employs the Human Development Index rather than the metrics of utilitarian subjective happiness. The book thus answers in detailed, concrete terms the two most important questions of every theory of intergenerational justice: what to sustain? and how much to sustain?

Sustainable Logistics Wolf-Rüdiger Bretzke, Karim Barkawi. 2012-12-14 Currently the notion of sustainability is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

Markarian.2018-06-13 The concept of fair value marked a major departure from traditional cost

Critics of fair value argue that it is less useful over longer time frames and prone to distortion by market inefficiencies resulting in procyclicality in the financial system by exacerbating market swings. Collecting Experiments Bruno J. Strasser. 2019-06-07 Databases have revolutionized nearly every aspect of our lives. Information of all sorts is being collected on a massive scale, from Google to Facebook and well beyond. But as the amount of information in databases explodes, we are forced to reassess our ideas about what knowledge is, how it is produced, to whom it belongs, and who can be credited for producing it. Every scientist working today draws on databases to produce scientific knowledge. Databases have become more common than microscopes, voltmeters, and test tubes, and the increasing amount of data has led to major changes in research practices and profound reflections on the proper professional roles of data producers, collectors, curators, and analysts.

Collecting Experiments traces the development and use of data collections, especially in the experimental life sciences, from the early twentieth century to the present. It shows that the current revolution is best understood as the coming together of two older ways of knowing—collecting and experimenting, the museum and the laboratory. Ultimately, Bruno J. Strasser argues that by serving as knowledge repositories, as well as indispensable tools for producing new knowledge, these databases function as digital museums for the twenty-first century.

Sheep Machine Vi Khi Nao. 2018 Poetry. Asian & Asian American Studies. Film. SHEEP MACHINE is a textual inscape, a poetically painted nonfictional pasture where mechanical violence and visceral fear coalesce into a kind of science prosody, a post-human panorama whose beauty lies in the ruins of reality it depicts. Influenced by Leslie Thornton's film of sheep feeding in a field as a conveyor belt of cable cars ascend and return from a mountain in the Swiss Alps, Vi Khi Nao takes perception into tumultuous terrains, into a pastoral-celestial void in which temporality is transcended, progress is a bourgeois invention, and god is a liability for our life spent in hunger and grazing. Vi Khi Nao's SHEEP MACHINE is grace said at the ontological last supper.
